The Church of Our Lady of Rosary - Navelim Goa

The Church of Our Lady of Rosary is located at Navelim in Salcete taluka of South Goa District. Navelim is a Census Town and constituent unit of Margao Urban Agglomeration. This town is situated 2 K.m. away at south of Margao on the National Route Highway NH-17. It is 1.5 Km from Margao Konkan Railway Station. The Church of Our lady of Rosary is an imposing red laterite whitewashed edifice, a tribute erected by its numerous devotees down the centuries to its patrons, the Blessed Virgin Mother of the Rosary viz. The Church known as Igreja de Nossa Senhora do Rosario. The imposing Navelim Church was founded by the Jesuits Fr. Joao de Sena S.J. towards the end of the 16th century. The Church has altogether six Altars. Besides the main altar dedicated to our Lady of Rosary, the side Altars are dedicated to Our Lady of Good Delivery, Saint Anna, Sacred heart of Jesus and Our Lady of piety. The main Altar is richly decorated with carved wooden trelliswork painted in gold. It is believed that Good Mother has blessed thousands of devotees throughout the centuries who have excelled in the past all over the world in various fields of life.

Annexure-IV : Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census	274
Annexure-V : Brief account of main religions in the District as per 1991 Census	278
Annexure-VI : Marital status of population as per 1991 Census	280
Annexure-VII : Age, Sex and Educational level in the district, 1991 Census	286
Annexure-VIII : Distribution of different Mother tongues returned in 1991 Census	298

Foreword

The District Census handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centers, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterates at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarges in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religious, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digit permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sameer Kumar Biswas, IAS, Director of Census Operations, Goa. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research officer of Social Studies Division, Dr.R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorate have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

Preface

The Registrar General and Census Commissioner, India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Hand book (DCHB) but has also explained the scope and coverage for this important publication. Though the DCHB was first introduced at the 1951 Census, in India, for Goa the first DCHB was brought out in 1971 Census – that being the first Census organised and conducted in Goa on the All India pattern after its liberation from the erstwhile Portuguese rule. Considering the small size of the districts of Goa, Daman & Diu in the erstwhile Union Territory of Goa, Daman & Diu, a combined volume for all the three districts was brought out both in 1971 and 1981 Censuses. Consequent to the formation of the new State of Goa and the districts of North Goa and South Goa in 1987, separate DCHBs have been brought out for the district of North Goa and South Goa in the 1991 Census. Thus this volume of 2001 is the second in the series for the South Goa District.

This volume contains the salient results based on the data collected at the Census of India, 2001 and in addition contains other non-census information in respect of villages and towns of the district. It is a grass root level statistical data on demographic characteristics and other amenities in the villages and towns, which is an essential aid for district level planning and administration. Among the series of Census publications, District Census Handbook is the only source, which provides these basic data for each village and ward within a town. And as such, it has come to be recognized as the most demanded and widely used publication.

In this publication, C.D. Block is the main unit of presentation for Village Directory rather than the traditional taluka. However, since in North Goa District, the C.D. Block and taluka boundaries are co-terminus excluding statutory towns, there is no major difference in their presentation. The DCHB of 2001 Census, alike, 1991 Census, has two parts A and B. While Part A contains the Village and Town Directory, Part B confines itself to the Primary Census Abstract. As in the earlier Censuses, both Part A and B are combined in this volume since, the data presented therein are closely inter-related.

Since, the district of North Goa and South Goa formed in August, 1987, district level data in respect of some sector were not available. Further, Goa being a small and compact State, bifurcated into two districts for administrative purpose, the write up/analysis for certain items like history, physical feature has been generally confined to the State level with an emphasis to the district wherever possible.

The relevant non-census data for the Village and Town Directory was primarily collected through the Mamlatdars/Municipalities and Panchayats. Much of the data so supplied have been cross checked with the data obtained from Department of Education, Health, Land Survey, Electricity, Planning, Statistics & Evaluation, Post and Telegraph etc. I take this opportunity to offer my grateful thanks to all these departments and the concerned officials for all their cooperation in furnishing the data.

This Handbook is the result of the hard work and labour of several persons in my office. In particular, I wish to place my grateful appreciation of the contribution of Shri V. Venkateswaran, Dy. Director and Smt. Mala Dilip Kamat, Asstt. Director of Census Operations, Goa. I wish to place on record the services rendered by Smt. Mala Kamat, Asstt. Director in preparing the Analytical Note and Analysis of Data in respect of Village/Town Directory and the Primary Census Abstract. The collection, compilation and scrutiny of data and preparation of related statements and tables have been undertaken by Shri Posko R. Gaonkar, Statistical Investigator Grade II and Smt. Chandralekha S. Naik, Statistical Investigator Grade III. The maps presented in the volume are prepared by Shri Victor Pereira, Sr. Draughtsman. The computer typing of the manuscript and the tables have been done by Shri Satish C. Bondade, Jr. Stenographer. I express my deep sense of gratitude to all of them. The officers/officials who have contributed in bringing out this volume are acknowledged separately.

I would like to place on record my sincere gratitude to Shri J. K. Banthia, IAS, Registrar General & Census

Commissioner, India for the benefit I have derived by way of guidance and advice. Shri R. G. Mitra, Dy. Registrar General (C&T) and Dr. I. C. Agrawal, Senior Research Officer (Social Studies) and Dr. R. P. Singh, Dy. Registrar General (Map) provided the technical guidance in this work which is gratefully acknowledged.

District Highlights - 2001 Census

1. South Goa is the 1st small district in terms of size and 2nd larger in population in the State.
2. South Goa is the most urbanized district in the State having about 53 per cent of its population in urban areas whereas about 50 per cent of State's population lives in urban area.
3. In terms of population per sq. km. South Goa is the 2nd densely populated district in the State.
4. South Goa has 1st rank in terms of sex ratio in the State.
5. There are only 8 uninhabited villages in the district whereas one village is having a population of more than 10,000.
6. Curtorim (Salcete Taluka) is the most populated village (11,187) and Antorim (Sanguem Taluka) is the least populated village (17) in the district.
7. The economy of the district is mainly depend on tertiary sector. Out of 100 workers in the district 73 are engaged in tertiary sector.
8. Sanguem Taluka is having the highest number of villages 51 in the district and Canacona Taluka is having the lowest number of villages 8 in the district.
9. Cotigao village (Canacona Taluka) has the largest area (11,171 hectares) and Sao Jacinto Island village (Mormugao Taluka) has the smallest area (15 hectares) among the villages in the district.
10. Power supply facility is much impressive, it is available for 99.27 per cent of the villages.
11. South Goa has attained fame of historical temples, churches, forts and world famous beaches

Definition of Census Town :

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

- i) A minimum population of 5,000;
- ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and
- iii) A density of population of at least 400 per square kilometer (1,000 per square mile).

Summary Statements

The summary statements 1 to 9 are presented as follows :

- Statement 1 : Name of the headquarters of District/Tahsil, their rural-urban status and distance from District headquarters, 2001.
- Statement 2 : Name of the headquarters of District/C D block, their rural-urban status and distance from District headquarters, 2001.
- Statement 3 : Population of the District at each census from 1901 to 2001.
- Statement 4 : Area, number of villages/towns and population in District and Tahsil, 2001.
- Statement 5 : C D block wise number of villages and rural population, 2001.
- Statement 6 : Population of urban agglomerations (including constituent units/towns), 2001.
- Statement 7 : Villages with population of 5,000 and above at C D block level as per 2001 census and amenities available.
- Statement 8 : This statement relates to Statutory Towns with population less than 5,000 as per 2001 Census and amenities available. Since there is no such Statutory Town in Goa hence this statement is Nil.
- Statement 9 : Houseless and institutional population of Tahsils, rural and urban, 2001.

STATEMENT- 1**NAME OF THE HEADQUARTERS OF DISTRICT / TAHSIL, THEIR RURAL-URBAN STATUS AND DISTANCE FROM DISTRICT HEADQUARTERS, 2001****District : South Goa****Headquarter : Margao**

Serial number	Name of District / Tahsil	Name of District / Tahsil headquarters	Whether Urban / Rural	Distance from tahsil headquarters to district headquarters by road (in km.)
1	2	3	4	5
1	Mormugao*	Mormugao	Urban*	27
2	Salcete*	Margao	Urban*	0
3	Quepem	Quepem	Urban*	15
4	Sanguem	Sanguem	Urban*	29
5	Cancona	Cancona	Urban*	37

Note: 1. Asterik in column 2 denotes that the district / tahsil headquarters is a railroad.

2. Asterik in column 4 denotes that the district /tahsil headquarters is a statutory town

STATEMENT-2**NAME OF THE HEADQUARTERS OF DISTRICT/C.D. BLOCK, THEIR RURAL-URBAN STATUS AND DISTANCE FROM DISTRICT HEADQUARTERS, 2001****District : South Goa****Headquarter : Margao**

Serial Number	Name of District/C.D. Block	Name of District/ Tahsil headquarters	Whether Urban/Rural	Distance from tahsil headquarters to district headquarters by road (in kms.)
1	2	3	4	5
1	Mormugao*	Mormugao	Urban*	27

Section - II Town Directory

Note explaining the abbreviations used in the Town Directory :

Town Directory statements (I to VII)

Statement I : Status and Growth History :

Column (2) : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i) Municipal Corporation	M. Corp.
(ii) Municipal Committee	MC
(iii) Municipal Council	M Cl
(iv) City Municipal Council	CMC
(v) Town Municipal Council	TMC
(vi) Municipal Board	MB
(vii) Municipality	M
(viii) Cantonment Board/Cantonment	CB
(ix) Notified Area	NA
(x) Notified Town	NT
(xi) Notified Area Committee/ Notified Area Council	NAC
(xii) Notified Town Area	NTA

(xiii) Industrial Notified Area	INA
(xiv) Industrial Township	ITS
(xv) Township	TS
(xvi) Town Panchayat	TP
(xvii) Nagar Panchayat	NP
(xviii) Town Committee/Town Area Committee	TC
(xix) Small Town Committee	ST
(xx) Estate office	EO
(xxi) Gram Panchayat	GP
(xxii) Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999 :

Column 3 to 5 : Physical Aspects :

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.) :

Information about kutch/pucca road is to be recorded separately for the roads within the limits of the referent town.

- | | |
|-----------------|----|
| (i) Pucca Road | PR |
| (ii) Kutch Road | KR |

Column (7) : System of Sewerage :

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

- | | |
|--------------------------|-----|
| (i) Sewer | S |
| (ii) Open Surface Drains | OSD |
| (iii) Box Surface Drains | BSD |
| (iv) Syk Drains | SD |
| (v) Cesspool method | CP |
| (vi) Pit System | Pt |
| (vii) Others | O |

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent method of disposal of night soil are given below with codes :

- | | |
|---------------|----|
| Head Loads | HL |
| Basket | B |
| Wheel Barrows | WB |
| Septic Tank | ST |
| Pit System | Pt |
| Sewerage | S |
| Others | O |

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

- | | |
|----------------------|----|
| (i) Tap water | T |
| (ii) Tube-well water | TW |
| (iii) Tank Water | TK |
| (iv) Well water | W |

Column 14 :

- | | |
|----------------------------------|-----|
| (v) Over Head Tank | OHT |
| (vi) Service Reservoir | SR |
| (vii) River Infiltration Gallery | RIG |
| (viii) Bore Well Pumping System | BWP |
| (ix) Pressure Tank | PT |

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i) Hospital	H
(ii) Dispensary	D
(iii) Health Centre	HC
(iv) Family Welfare Centre	FWC
(v) T.B. Clinic	TB
(vi) Nursing Home	NH
(vii) Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i) Arts only	A
(ii) Science only	S
(iii) Commerce only	C
(iv) Arts & Science only	AS
(v) Arts & Commerce only	AC
(vi) Combined for all categories - Arts, Science and Commerce	ASC
(vii) Law	L
(viii) University	U
(ix) Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

“Recognised” should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i) Vocational Training Institute	VT
(ii) Shorthand	SH
(iii) Typewriting	Type
(iv) Shorthand & Typewriting	SH Type
(v) Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher’s Training Institute, Music/Dance School, Nursing School etc. are covered under ‘Others’.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

- | | |
|--------------------|----|
| (i) Public Library | PL |
| (ii) Reading room | RR |

Statement VI : Trade, Commerce, Industry and Banking, 1999**Column 3 to 8 :**

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999 :

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5470 sub-districts, 5161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation (Annexure-II). The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing :

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Schedules for both the phases were scanned through high speed scanners in fifteen data centres across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for

the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance :

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers

were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes population were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was

operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract is the basic table compiled on full count basis from the information collected in the Household Schedule. It is adjunct of the A-Series census tables which gives basic demographic information on area of the unit, number of households, total population, population of age group 0-6, population of Scheduled Castes and Scheduled Tribes, literates, main and marginal workers classified into four industrial categories and non-workers. The publication contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main

workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis of literacy data.

The data in the Primary Census Abstracts are presented at different levels, The District Primary Census Abstract is presented at District/ C D block/ UA/City/Town, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented at District/C D block/ Town, Village Primary Census Abstract is presented villagewise for each C D block and Urban Primary Census Abstract at Town/Ward* level. The Primary Census Abstract data for each of these characteristics is presented by sex and rural-urban residence.

The District Primary Census Abstract has been presented in 59 columns, Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes has been presented in 52 columns, Village Primary Census Abstract and Urban Primary Census Abstract has been presented in 58 columns. The information on each village under a C D block are presented in the Village Primary Census Abstract and each of the wards under a town has been provided in the Urban Primary Census Abstract exist in the district. The Data was presented for villages C D block-wise for the first time in 1991 Census. This practice is continued in 2001 Census also.

The concepts and definitions used in the column heading are already explained under the sub heading

‘Census concepts’ in the Analytical note. The Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts is as follows:

Area Figures :

The area figures supplied by local revenue authorities of the district in respect of tahasils, P.Ss and by the local bodies in respect of towns are given in sq.kms. The area figures of the villages supplied by the Tahasildars in acres have been converted and shown in hectares. The area figures of the C D block is the total of the village areas coming under each C D block. The area figures for the district supplied by the Surveyor General of India have been adopted to maintain uniformity at the national level. The total area figures of all the Tahsils/C D blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of P.S./Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on total population, Scheduled Castes population and Scheduled Tribes population for each town.

Annexure II: Note on fertility, mortality and migration, 1991.

Fertility Levels:

Fertility is a major component of population growth. It is, therefore, obvious that if fertility is higher, increase in population will be higher. Therefore, knowledge of fertility levels and trends is very much essential.

Fertility is the term used in demography to indicate the actual number of children born alive. While the term fertility refers to actual reproductive performance the term fecundity is used to indicate the physiological ability to bear children. Thus, fertility is the measures of the reproductive performance of women as obtained from statistics of the number of live births.

Information relating to fertility aspects was collected for the first time in 1971 Census when the following two questions were canvassed for every currently married women; (i) age at marriage, and (ii) any child born in the last one year. During 1981 Census

two specific questions relating to fertility were asked. The first question covered all 'ever married women' in the households and elicited data on (a) age at marriage, (b) number of children surviving at present (by sex). and (c) number of children even born (by sex). The second question viz. 'any children born alive during last one year' covered 'currently married women only'. All these questions without any addition or deletion were canvassed at the 1991 Census also. The term 'ever married' would include all women who may be currently married, the widowed, the separated and the divorced. The term 'currently married would include all these women whose marriage is subsisting at the time of enumeration with the spouse living.

The fertility indicators on which information is presented are Age Specific Fertility Rate (ASFR), Age Specific Marital Fertility Rate (ASMFR), General Fertility Rate (GFR), General Marital Fertility Rate (GMFR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR) and are based on the question on "birth during last year".

ANNEXURE III
VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

State/District	GFR	GMFS	TFR	TMFR	CBR	No. of children ever born per woman in age-group 45-49	Child-women Ratio	Mean Age at Marriage
1	2	3	4	5	6	7	8	9
Goa	54	91	1.80	3.30	24.90	3.83	295	20.42
North Goa	51	89	1.70	3.20	23.12	3.79	287	20.40
South Goa	57	94	1.80	3.40	26.73	3.89	306	20.44

Based on 1991 Census data

Source: Part IV C-Series and Part-VI F-Series Tables.

ANNEXURE - III A
Age Specific Marital Fertility Levels, 1991

Age-Group	South Goa District			Goa State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.144	0.149	0.141	0.128	0.120	0.136
20-24	0.202	0.213	0.192	0.193	0.190	0.196
25-29	0.174	0.190	0.160	0.169	0.174	0.163
30-34	0.093	0.098	0.087	0.094	0.097	0.090
35-39	0.039	0.044	0.035	0.045	0.046	0.043
40-44	0.014	0.016	0.011	0.019	0.021	0.016
45-49	0.009	0.008	0.010	0.013	0.014	0.011

It is noticed that fertility is relatively low in the age-group 15-19 in the state as well as in the districts, but rises in the age group 20-24 and 25-29 and comes down thereafter with the increase in age. The fertility in rural areas is slightly lower in the age-groups 15-19 and 20-24 than the urban area of the state. Levels

of fertility in South Goa district are comparatively higher in age-groups 15-19, 20-24 and 25-29 than the Goa State. In other age-groups differential in fertility levels between the district and the state are not much significant. Other fertility measures for South Goa district and Goa state are given in the following table.

ANNEXURE - III B
Various Measures of Fertility and mean age at marriage, 1991

Fertility measures	South Goa District			Goa State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7

GMFR	94	100	87	91	92	90
TFR	1.8	1.9	1.7	1.8	1.8	1.7
TMFR	3.4	3.6	3.2	3.3	3.3	3.3
Crude Birth Rate	26.73	N.A	N.A	24.90	N.A	N.A
No. of children ever born per woman in age- group 45-49	3.89	4.04	3.75	3.83	3.92	3.68
Mean age at marriage	20.44	20.36	20.51	20.42	20.25	20.66
Child woman Ratio	306	314	299	295	296	294

Mortality Levels:

Information on the question on children ever born and children surviving canvassed for all ever married women has been tabulated by age of the mother. From this estimates, child mortality have been worked out by using the brass technique.

ANNEXURE - III (C)
Estimation of child mortality, 1991

Source: District Profile 1999 Goa State

Migration:

In the Census, migrants are classified on the basis of place of birth or place of last residence. Hence, migration streams can therefore, be studied on the basis of place of birth or place of last residence. A persons is considered as migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly, a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence. Here we will first see migration by place of birth.

	1.08	1.26	0.92	0	0	0	100	100	100

In the 1991 Census there were 520251 migrants by place of birth in our State consisting of 214038 males and 306213 females. These migrants constitute 44.47 percent of the total population of Goa. Male migrants constitute 35.99 percent of the male population while female migrants constitute 53.25 percent of the female population. It is quite obvious from the Census data that a majority of the State's population are living in the same village/town where they are born. This ratio was 53.47 percent in 1981 and has increased marginally to 55.53 percent in 1991. The total migrants on the basis of place of birth would include migrants within the State and also outside the State/country.

We may see from Table that those who migrated to places within the same district where they were born constitute 53.86 percent and those who have migrated to other district of Goa other than the ones where they were born constitute 11.65 percent of the total migrants by place of birth in 1991. These both together constitute 65.51 percent of the total migrants whose places of birth were within the State of enumeration i.e. Goa. This ratio in 1981 was slightly lower being 65.11 percent. There are 1,69,789 migrants who were born outside the State (i.e. born in other States and Union Territories beyond the State of enumeration) and found residing in Goa. They form 32.64 percent of the total migrants. A majority of them were from the neighbouring States of Karnataka (18.74 percent) and Maharashtra (10.61 percent). The ratio of such migrants in 1981 was slightly higher being 32.74 percent. Birth-place migrants from the countries beyond India form just 1.77 percent in 1981.

Among the male and female migrants by place of birth, we may see that the proportion of the female migrants born within the State of enumeration is quite high being 71.46 percent as compared to their counterpart which is 56.99 percent in 1991. The similar trend can be seen in 1981 also. This is generally attributed to the prevailing custom of the girls moving away on marriage from the normal residence. But, the ratio of female migrants born in other States and Union Territories of India residing in Goa is quite low being 26.99 percent than among the male migrants which is 40.71 percent. This is indicative of male

dominated migration from other parts of the country to Goa mainly in search of employment.

Internal migrants by place of birth :

The migration stream consists of three elements namely migration within the State of enumeration itself, migration from other States/Union Territories of India to the State of enumeration and migration from other countries to the State. The first two streams constitute the internal migrants. The Annexure -IV-A shows the distribution of internal migrants by place of birth.

ANNEXURE - IV-A

DISTRIBUTION OF INTERNAL MIGRANTS BY PLACE OF BIRTH (PROPORTION IN PERCENT)

Migration by place of birth	Persons	Males	Females
1	2	3	4
A. Migrants within the State of enumeration (i.e. inter-state migrants) to total internal migrants.	66.75	58.32	72.58
B. Migrants from other States in India (i.e. Inter-state migrants) to total internal migrants	33.25	41.67	27.42
C. Internal migrants to total migrants.	98.14	97.70	98.45

Source: Part V-D series, Migration Table, Goa, 1991 Census.

The total migrants by place of birth in the State are 520251 consisting of 214038 males and 306213 females. Of these 510585 (209110 males and 301475 females) or 98.14 percent represents internal migrants. The proportion among males and females are 97.70 and 98.45 percents respectively. It is also evident that two thirds of the total internal migrants are the migrants within the State itself, both intra-district, and inter-district while one third represents migrants born outside the State. The proportion of male inter-state migrants to total male internal-migrants of 41.67 percent is quite high as compared to the corresponding

proportion of 27.42 percent in the case of females. As against this, the proportion of female migrants within the state itself to total internal migrants is 72.58 percent which is higher than the corresponding proportion of 58.32 percent among males.

During the 2001 Census there were 7,73,930 migrants by place of birth in the State contributing of 347111 males and 426819 females. Constituting the 57.43 percent of the population of Goa. Male migrants constitute 50.51 percent of the males population while female migrants constitute 64.63 percent of the female population, showing a gradual increase in the migrants population during the decades by 2,53,679 (12.96) percent, males with 1,33,073 (14.52) and females with 1,20,606 (11.38) percent. The ratio was 55.53 in 1991 and has increased to 42.57 percent in 2001.

ANNEXURE - IV A

DISTRIBUTION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 (Proportions in percent)

Migration by place of birth	Persons	Males	Females
1	2	3	4
A.Migrants within the State of enumeration (i.e. inter-state migrants) to total internal migrants	5,01,199 65.52	2,00,922 58.72	3,00,277 71.04
B.Migrants from other state in India (i.e. inter-state migrants) to total internal migrants	2,63,653 34.47	1,41,250 41.28	1,22,403 28.96
C.Internal migrants to total migrants	7,64,852 98.83	3,42,172 98.58	4,22,680 99.03

Source: D1 Population classified by place of birth and sex.

During 2001 Census the total migrants by place of birth in the State are 98.83 percent, represents internal migrants. The proportion among males and females are 98.58 and 99.03 percent respectively like 1991 census two third of the total internal migrants are the migrants within the state itself i.e. 65.52 percent while one third represents migrants born outside the state i.e. 34.47 percent. The proportion of male inter-state migrants to total male internal migrants 41.28 percent is quite high when compared to the corresponding proportion of 28.96 percent in the case of females is almost similar to 1991 again a similarity is noticed in the female migrants within the state itself to total internal migrants is 71.04 percent which is higher than the corresponding proportion of 58.72 percent among males.

Migrants by place of last residence :

On the basis of information gathered on migrants by place of last residence, there are 531602 migrants in Goa in 1991 Census consisting of 221281 males and 310321 females. These migrants constitute 45.44 percent of the State's population. Male migrants constitute 37.20 percent of the total male population and the female migrants constitute 53.97 percent of the total female population. As compared to earlier Census, it is seen that the ratio of the migrants in the State's population is declined from 47.46 percent in 1981 to 45.44 percent in 1991. This proportion among the male population is decreased from 40.01 percent to 37.20 percent and among the female population it is reduced from 55.09 percent to 53.97 percent between the same period. The total migrants would include those who have moved from their place of last residence to the place of enumeration within the district itself and between the districts of the State and also would include those who have moved from the place of last residence outside the State/country.

Percentage Distribution of Migrants by place of last residence in 1991 Census :

It is seen from the Table that in Census, of the total migrants 67.99 percent were migrants by place of last residence within the State of enumeration itself, 29.27 percent were migrants who had their last residence in other States/Union Territories of India 2.67 percent were migrants who had their place of last residence in other countries. The ratio of migrants within the State is higher among females (73.57 percent) than among males (60.17 percent). The ratio among the males is observed to be more than those among females in respect of migrants with last residence in other State/U.Ts and in other countries as well. The position in 1981 was more or less the same with slight variations here and there at percentage points.

We see that migrants within the same district of enumeration form the major proportion of the total State's migrants i.e. 56.23 percent. Migrants who have moved from other district of the State constitute 11.76 percent. These both together constitute 67.99 percent of the total migrants of the State in 1991, as against 67.41 percent observed in 1981. Among the males and females, the movement of females within the State is higher mainly because of the prevailing custom of movement of females soon after marriage to their husband's house.

There were 155576 persons in the State who had the place of last residence in other States/Union Territories of India constituting 13.30 percent of the total population of the State in 1991 Census. In 1981, the number of such persons were 144636 constituting 14.35 percent of the total population of the State. Of these migrants who had residence in other State/Union Territories of India, the migrants who had last residence in Karnataka and Maharashtra constitute 81.62 and 81.87 percents in 1981 and 1991 respectively. It is because, that these two States have a close cultural and social link with the people of Goa.

Internal migrants by place of last residence :

Table shows the distribution of internal migrants by place of last residence.

ANNEXURE - IV B DISTRIBUTION OF INTERNAL MIGRANTS BY PLACE OF LAST OF RESIDENCE, 1991 (Proportions in percent)

Migration by place of last residence				
residence	Persons	Males	Females	
1	2	3	4	
A.Migrants within the State of enumeration (i.e. inter-state migrants) to total internal migrants	69.91	62.01	75.01	
B. Migrants from other state in India (i.e. inter-state migrants) to total internal migrants	30.09	37.39	24.99	
C. Internal migrants to total migrants	97.26	96.10	98.08	

It is evident from the Table that of the total migrants by place of last residence, 97.26 percent are internal migrants and the proportions among males and females are 96.10 and 98.08 percents respectively. It is also clear that two-thirds of the total internal migrants are the migrants within the state itself and one-third represents migrants from other States/Union Territories of India. While these proportions among males are 62.01 and 37.39 percents, the proportions among females are 75.01 and 24.99 percents respectively.

The information on migrants by place of last residence gathered during the 2001 Census. There are 13,31,412 migrants in Goa consisting of 5,77,967 males and 7,53,445 females. The migrants constitute 98.79 percent of the State's population. As compared to 1991 census it is seen that the ratio of the migrants in the State population has shown high increase from 45.44 percent to 98.79 percent.

ANNEXURE - IV B DISTRIBUTION OF INTERNAL MIGRANTS BY PLACE OF LAST OF RESIDENCE, 2001 (Proportions in percent)

Migration by place of last residence				
residence	Persons	Males	Females	
1	2	3	4	
A.Migrants within the State of enumeration (i.e. inter-state migrants) to total internal migrants	5,46,392 41.34	2,25,020 39.31	3,21,372 42.89	
B. Migrants from other states in India (i.e. inter-state migrants) to total internal migrants	7,75,261 58.66	3,47,385 60.69	4,27,876 57.11	
C. Internal migrants to total migrants	13,21,653 99.27	5,72,405 99.04	7,49,248 99.44	

Source : D2 - migrants classified by place of last residence, sex and duration of residence in place of enumeration.

It is evident from the table that of the total migrants by place of last residence 99.27 percent are internal migrants and the proportions among males and females are 99.04 and 99.44 percent respectively. Only 41.34 percent are the internal migration within the state itself and 58.66 percent represents migrants from other states/union territories of India while these proportions among males are 39.31 percent and 60.69 percent and the proportion among females are 42.89 and 57.11 percent respectively.

Rural-urban components of migration:

The migratory movement has a direction with various socio-economic factors as an impetus, and is dictated by the "push" and "pull" factors that are exercised between the regions which receive and exclude the population. Owing to the classification as rural and urban, any area has to fall in either of these two sectors. The process of urbanization has been regarded as a step towards economic progress. Thus the study of the movement of people between these two sectors is of high importance for determining the general economic situation of an area, and further to evaluate the influence of such movement and causes thereof. Hence, migration is measured in four possible ways:- rural to rural, rural to urban, urban to rural and urban to urban. Tables shows data on the basis of these various streams in case of migrants by birth place and migrants by place of last residence. These tables present the data only in respect of internal migrants and exclude those who have migrated into the State from abroad.

ANNEXURE IV (C)
RURAL URBAN COMPOSITION OF INTERNAL
MIGRANTS BY PLACE OF BIRTH, 1991
(PROPORTIONS IN PERCENT)

Place of Birth		Place of enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total internal migrants				
1. Within the State of enumeration	Total	100.00	63.56	36.44
	Rural	52.39	34.40	17.99
	Urban	47.42	29.08	18.34
2. In other States /Union Territories of India	Total	100.00	41.38	58.62
	Rural	47.64	22.81	24.83
	Urban	51.47	18.27	33.20

Source:- Part V-D series. Migration Tables, Goa. 1991 Census.

From the figures presented in Table, we may see that of the movement of migrants within Goa, 52.39 percent have moved out from rural areas and 47.42 percent have shifted from urban areas. Further, the movement of the migrants also reveals that the proportion of rural to rural migrants (34.40 percent) as also urban to rural migrants (29.08 percent) is higher as compared to the proportion of rural to urban migrants (17.99 percent) and urban migrants (18.34 percent).

Among the migrants those who have come to Goa from other states and U.Ts of India, majority of them (52 percent) have come from urban areas and the remaining 48 percent from rural areas. Further, the extent of migrants from rural to urban (24.83 percent) is marginally higher than rural to rural (22.81 percent). However, the proportion of urban to urban migrants is considerably higher (33.20 percent) as compared to urban to rural migrants which is just 18 percent. Thus, a majority of the migrants those who have come to Goa from other States and U.Ts of India are residing in the urban areas of our State.

ANNEXURE IV (D)
RURAL URBAN COMPOSITION OF INTERNAL
MIGRANTS BY PLACE OF LAST RESIDENCE
(PROPORTIONS IN PERCENT)

Place of last residence		Place of enumeration		
		Total	Rural	Urban
1	2	3	4	5
Total internal migrants				
1. Within the State of enumeration	Total	100.00	62.81	37.19
	Rural	52.13	32.42	17.71
	Urban	47.60	28.28	19.32
2. In other States /Union Territories of India	Total	100.00	40.89	59.11
	Rural	44.25	21.05	23.20
	Urban	54.80	19.52	35.28

Source: Part V-D Series, Migration Tables, Goa, 1991 Census.

The ratio of migrants from rural to urban and vice versa in the case of migrants based on place of last residence data, presented in Table also reveals more or less the same trend as discussed in the previous paras for migrants based on place of birth. The data on migrants within the State of Goa based on place of birth/place of last residence, clearly indicates that a majority of them have shifted to rural areas. But, in the case of migrants from other States and U.Ts of India, a majority of them have shifted to the urban areas of our State.

Annexure V :

Brief Account of Main Religion in the District/ C.D. or Tahsil as per 1991 Census :

Religion is an important and one of the basic cultural characteristic of the population. In a Secular State like India, several religions have thrived and every decennial Census has attempted to provide an interesting picture of the religious persuasions of the people of the country. In India every citizen is granted a freedom to profess his religion of faith by the constitution. The data on religion yielded by the census are of great interest to the anthropologist, sociologist demographers, administrators, planners, scholars and also laymen.

Importance is attached to religion in census because many facts of life of persons are influenced by his religious persuasions. The religious composition of a population of interest to the demographer because it is related to important aspects of demography like marital status, occupation and migration apart its influence on birth and death rate. The data on religion may be of special interest for sociologist who may be keen on analyzing the influence of religion on other social characteristics such as literacy, migration, marriage, economic conditions etc. this is why the question on religion has prominently featured throughout as part of the Census questionnaire.

Information on religion in respect of each individual was collected in 1991 census also. A Census Enumerator has instructions to faithfully record the religion as actually returned by a respondent against question 8 of the Individual Slip. The Enumerator was instructed to use abbreviations for recording the main religion Viz. 'H' for Hindus, 'M' for Muslims, 'C' for Christians., 'S' for Sikhs, 'B' for Buddhists and 'J' for Jains. For others he was instructed to record the actual religion as returned fully. If the person reported that

he has no religion the answer was recorded accordingly. The Enumerator was also instructed to copy the returns regarding religion of an individual from question 8 of Individual Slip to Column 9 of Household Schedule. The religion-wise data of 1991 Census was compiled from Household schedules.

In India there are many religion and faiths. However, there are six numerically important religious communities viz. Hindus, Muslims, Christians, Sikhs, Buddhists, and Jains. Every individual knows the religion he professes and has clear idea as to which of the six major religions he belongs. The return on religion has therefore provided a true and correct picture of the principle religions professed by the people of the

country. Like earlier Censuses the 1991 census also presents statistical data in respect of six main religions as mentioned above. In addition two other broad grouping of persons viz. 'Other religions and persuasions and 'religion not stated' are also used for presentation of data.

Population by religion in the District/C.D. Tahsil.

As seen earlier, Hindus, Christians and Muslims constitutes the entire population of Goa. It will be interesting to study the religious composition of population in the district of Goa as brought out by the 1991 Census data. Table below presents the religion-wise distribution of population in the districts and talukas of Goa as per 1991 Census.

ANNEXURE – V A

BRIEF ACCOUNT OF MAIN RELIGION IN THE DISTRICT AND C.D. OR TAHSIL AS PER 1991 CENSUS

State/ District	Total population	Hindu Per- cent	Christian Per- cent	Muslim Per- cent	Sikh Per- cent	Jain Per- cent	Buddhist Per- cent	Other Religion Per- cent	Religion not stated Per- cent

Source : C.1, Population by religious community.

It can be seen from the above tables that the districts major population 256306 (50.8) percent and 309703 (52.6) percent during 1991 Census and 2001 Census respectively is covered under Hindu religion followed by Christian 214724 (42.50) percent and 223178 (37.9) percent showing a decline of 4.6 percent during the decade, Muslims 32582 (6.5) percent and 48827 (8.3) percent with an increase of 1.8 percent.

Taluka-wise Sanguem, Canacona, Quepem and Mormugao Taluka shows the highest percentage population of Hindu with 79.5 percent, 78.6 percent, 62.4 percent and 61.5 percent respectively and the

least in salcete Taluka with 28.5 percent during 1991 Census. The Christian population recorded highest percentage in Salcete Taluka with 65.1 percent during 1991 Census and 57.4 percent during 2001 Census showing decline of 7.7 percent during decade followed by Quepem talukas with 33.3 percent during 1991 and 30.8 percent during 2001 census with a decline in population by 2.5 percent during the decade. The lowest Christian population is recorded in Sanguem 13.4 percent and Canacona 18.2 percent. The Mormugao Taluka reported 23.0 percent Christian population during 2001 Census. The highest percentage Muslim

population is reported in Mormugao 11.6 percent followed by Salcete 9.2 percent, Sanguem and Quepem Taluka reported 5.4 percent and 5.3 percent respectively and the lowest percentage Muslim population was reported in Canacona Taluka 1.6 percent during the 2001 Census.

Annexure VI

Marital Status of population as per 1991 Census.

The question on marital status is the most important sources of demographic data collected in the Census. In fact classification of population by marital status has been followed at all the censuses held so far. Since, it provided valuable information on the impact of social movement. Correct data on marital status are also of great demographic importance as it has profound effect on the birth rate of population. Each married women is a potential mother for quite a long span of time and thereby likely to contribute to the growth of population, the number of children born being dependent on the number of married females in the reproductive age span.

The marital status of population is examined with reference to four phases of human life viz. 1. Never married, 2. Currently married 3. Widowed and 4. Divorced or separated. A currently married person is one whose marriage, whether for the first time or any other time, subsist at the time of Census enumeration with the Spouse living. Persons who are recognized by customs or society as married and persons who are living in stable de facto union are also classified as currently married. A widowed person is one whose husband or wife is dead. A persons who has been separated from ones wife or husband and is living apart with apparent intention of living together again or who has been divorced either by decree of a law court or by an accepted social and religious custom but has not remarried is classified as separated or divorced.

Distribution of population by marital status.

Annexure VI presents percentage distribution of population by marital status in 1991 Census.

ANNEXURE VI

PERCENTAGE DISTRIBUTION OF POPULATION BY MARITAL STATUS IN 1991 CENSUS

State/ District	Persons/				
	Males/ Females	Never Married	Married	Widowed	Divorced Separated
1	2	3	4	5	6
Goa	Persons	55.48	38.93	5.46	0.12
	Males	60.72	37.84	1.31	0.10
	Females	50.06	40.04	9.75	0.14

State/ District	Persons/				
	Males/ Females	Never Married	Married	Widowed	Divorced Separated
1	2	3	4	5	6
South Goa	Persons	54.85	39.86	5.16	0.11
	Males	59.98	38.70	1.21	0.10
	Females	49.58	41.05	9.23	0.13

In the total population of 1169793 in 1991 Census, 55.48 percent were never married, 38.93 percent were married, 5.46 percent were widowed and 0.12 percent divorced or separated. The corresponding population in South Goa District were more or less the same. Gender-wise, the proportion of never married males was higher in the State being 60.72 percent and for females it was 50.06 percent. It was little bit lower in South Goa than the State average, which was 59.98 and 49.58 percent for males and females respectively. However, among married category, the population is obvious higher among females 40.04 percent than married males 37.84 percent. It is slightly higher in South Goa District than State average being 41.05 and 38.70 percent for females and males respectively.

The percentage of widows is very high than the widower both in the State and in the district of South Goa. In the State while only 1.31 percent are widowers, the widows accounting to 9.75 percent. The corresponding proportion in South Goa district was 1.21 and 9.23 percent, which is found lower than the State average.

ANNEXURE VI

PERCENTAGE DISTRIBUTION OF POPULATION BY MARITAL STATUS IN 2001 CENSUS

State/ District	Persons/				
	Males/ Females	Never Married	Married	Widowed	Divorced Separated
1	2	3	4	5	6
Goa	Persons	50.09	43.95	5.76	0.20
	Males	55.62	43.00	1.26	0.12
	Females	44.34	44.93	10.45	0.28
South Goa	Persons	50.18	43.99	5.62	0.21
	Males	55.74	42.94	1.19	0.14
	Females	44.46	45.88	10.17	0.29

In the total population of 1347668, in 2001 Census, 50.09 percent were never married, 43.95 percent were married, 5.76 percent were widowed and 0.20 percent were divorced or separated. The corresponding proportion in South Goa District was more or less the same. Gender-wise, the proportion of never married males was higher in the State being 55.62 percent and for females it was 44.34 percent, it was little bit higher in South Goa than the State average, which is 55.74 percent for males and for females 44.46 percent.

However, among married category, the proportion is obvious higher among females 44.93 percent than married males 43.00 percent. It is more or less same in South Goa District being 45.08 percent and 42.94 percent for females and males respectively.

The percentage of widows is very high than the widower in the State and in the district of South Goa. In the state which only 1.26 percent are widowers, the widow accounting to 10.45 percent. The corresponding proportion in South Goa district was 1.19 and 10.17 percent, which is found lower than the state average.

DISTRIBUTION OF 1000 PERSONS OF EACH SEX IN THE TOTAL RURAL AND URBAN AREA OF GOA 1991 CENSUS

Marital Status	Male			Female		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Never Married	607	613	598	501	502	498
Married	378	370	390	400	390	415
Widowed	13	15	10	97	106	85
Divorced or Separated	1	1	1	1	1	1

In every 1000 males there are 607 never married, 378 married, 13 widowed and 1 divorced or separated. The corresponding proportion for females are 501 never married among males than among females. Among the married the disparity is slightly reduced as their being 400 females married as against 378 married males. The proportion is being obviously higher among the females than the males.

But among the widowed the inequality is striking. The proportion is being much higher among females than the males. The proportion among divorced or separated males and females is very small, indicating that by that the problem of divorced or separated is not of every great numerical importance in this State till this decade.

The comparison between the rural and urban areas of the Statement shown slight variations. The urban proportion of the never married in respect of both males and females is lower than that of the rural males and females. While the percentage of married males and females is higher in the urban areas than in the rural areas. In case of widowed the proportion is observed to be higher in the rural areas than in the urban areas both for males and females.

DISTRIBUTION OF 1000 PERSONS OF EACH SEX IN THE TOTAL RURAL AND URBAN AREA OF GOA 2001 CENSUS

Marital Status	Male			Female		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Never Married	556	567	546	443	447	440
Married	430	417	443	449	434	465
Widowed	13	15	10	105	117	92
Divorced or Separated	1	1	1	3	2	3

In every 1000 males there are 556 never married which is lower than 607 in 1991, 430 married which is comparatively higher than 1991 being 378 and 13 widowed and 1 divorced or separated which is equal during the decades. The corresponding proportion for females are 443 never married which is lower than 501 for 1991 among the married the disparity is slightly reduced as their being 449 females married as against 430 males which is 400 females married as against 378 married males respectively in 1991. The proportion is being higher among the females than the males. But among the widowed the inequality in striking during both the census. The proportion among the females is very higher than males. The proportion among divorced or separated males and females is very small but is found higher among females.

The comparison between the rural and urban area of the statement shows slight variations. The urban proportion of the never married in respect of both males and females is lower than that of the rural males and females like in 1991 census while the percentage of married males and females is higher in urban areas than in rural areas as in 1991. In case widowed the proportion is observed to be higher in the rural areas than the urban areas both for males and females during both the censuses.

Marital status by age and sex :

Table below gives the percentage distribution of males and females in Goa by four marital status categories for different age groups and also for rural and urban areas.

During 2001 Census a comparative study of the ratio of never married, married and widowed in the various age-groups reveals that the ratio of married among females is highest at 35.09 percent in 20-24 ages (as against 10.59 percent among males and it sharply increases to 72.05 percent in 25-29 ages and than 87.97 percent in 30-34 age group. Among males however, married people constitute only 34.97 percent in 25-29 age group and 69.58 percent in 30-34 age group. The maximum ratio of married among females is 90.22 percent in age group 35-39 while for males the highest ratio is 94.60 in the age group 45-49.

Proportion of married females 1991 :

It will be interesting to compare the proportion of married females in certain age groups in Goa State with that of all India averages.

**PERCENTAGE OF MARRIED FEMALES IN SELECTED
AGE GROUPS 1991**

Age group	Percent married females to total	
	India	Goa
1	2	3
10-14	4.5	0.8
15-19	35.3	4.6
20-24	81.8	33.8
25-44	79.5	57.1
45-69	52.5	35.8
70-79	32.7	20.9
80+	23.4	12.7

*Exclude Jammu & Kashmir.

It may be noticed that only 4.6 percent of the total females in younger age group 15-19 are returned as married as against 35.3 percent in the country as a whole. The variation in the proportion married females in age group 20-24 is much wider being 33.8 percent in Goa as against 81.8 percent in the country. In Goa, it is observed that a very few marriages take place of girl below the age of 20 among the Hindus and below the age of 22 among the Christians, the two largest religious communities of Goa.

**PERCENTAGE OF MARRIED FEMALES IN SELECTED
AGE GROUPS 2001**

Age group	Percent married females to total females in	
	India	Goa
1	2	3
10-19	4.50	0.78
20-29	54.03	10.93
30-39	10.21	14.50
40-49	2.66	9.65
50-59	1.12	5.68
60-69	0.55	2.39
70-79	0.23	0.61
80+	0.09	0.14

It may be noticed that only 0.78 percent of the total females in younger age group 10-19 are returned as married as against 4.50 in the country as a whole. The variation in the proportion of married females in age group 20-29 is much wider being 10.93 percent in Goa as against 54.03 percent in the country.

In the age group 30-39 the proportion is quite obvious with 14.50 percent in Goa and 10.21 percent in the country it is observed from the above table that very few marriages take place of females below the age of 20 and the highest percentage is found in the age group 30-39 in Goa where as the highest proportion percentage is notice in the age group 20-29 in the country.

Mother tongue is the language spoken in childhood by the persons mother to the person. In case of infants and deaf mutes the language usually spoken by the mother should be recorded as the mother tongue of a person. The definition of the Mother Tongue is the same as in 1991 Census.

As many as 46 languages have been reported by the people of South Goa District during the 1991 Census while main 27 languages are shown in the above statements and languages with speakers less than hundred are clubbed in other languages recorded during the 2001 Census. The three main mother tongues spoken by the people in the district are Konkani, Marathi and Kannada. During 1991 Census Konkani language was reported by 328711 (65.09) percent and during 2001 Census it is reported by 383457 (65.09) percent as Mother tongue showing increase of 54746 persons but percentage wise it is equal without showing any change during the decade. Marathi language which was reported by 82491 (16.33) percent during 1991 as mother tongue has shown the decrease during the decade recording 61906 (10.51) percent with a decrease of 20585 persons i.e. decrease of (3.49) per cent maintaining its 2nd position in the district. The Kannada language is in the third place with 30166 (5.97) during 1991 has shown a gradual increase during the decade by recording 41429 (7.03) percent during 2001 census with a increase of 11263 persons i.e. (1.91) percent. It was followed by Hindi with 22601 (4.48) per cent during 1991 has shown an increase during 2001 Census with 35537 (6.03) percent, Urdu with 19970 (3.95) percent has shown an increase during the decade by recording 28100 (4.77) percent. Malayalam with 6422 (1.27) per cent during 1991 has shown a slight increase during 2001 with 7490 (1.27) per cent showing increase of 1068 but having a constant percentage of 1.27 during the decade. The other languages having the good number of speakers are Telugu, Tamil, Gujrati and English.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

In the history of Indian Census the District Census Handbook was first introduced at the 1951 Census to meet the ever increasing demand for micro-level data by administrators, planners, demographers and other census data users. This publication containing grass root level statistical data on demographic characteristics, civic and other amenities in villages and towns is an essential aid for district level planning and administration. Among the series of census publications, the District Census Handbook is the only source, which provides these basic data for each village and ward within a town. It has come to be recognised as the most important and widely used publication. It has become a tradition to bring out this publication at the earliest after the census count. In fact, the District Census Handbook was brought out by the Census Department on behalf of the State Government till 1991 Census. The cost of this publication was also borne by the State Government. However, during 2001 Census, the printing of the DCHB has been done centrally under the arrangement of the Registrar General, India, New Delhi. This has been done in consultation with State Government, in order to avoid delay in bringing out the publication. Further it was decided to print only 10 copies of DCHB of each district by in-house printing in the Directorate.

The scope of the District Census Handbook since 1951 has greatly enlarged. At every succeeding census there has been an endeavour to enhance the utility of this publication with the main objective of presenting a comprehensive and intelligible portrait of the district. The District Census Handbook of 2001 Census has two parts as usual viz. Part A – Village and Town Directory and Part B – Primary Census Abstract. Part A – Village and Town Directory has two Sections viz. Section I – Village Directory and Section II – Town Directory.

Under Section I - Village Directory presents for

each village particular about area, total population, number of households, amenities available such as educational, medical, drinking water facilities, post, telegraph and telephone facilities, communication facilities, number of banks and credit societies, number of recreational and cultural facilities, approach to village, nearest town and its distance from the village, power supply, receipt of newspapers/magazine, income and expenditure of the village, name of the most important commodities, imported manufactured, exported and land use pattern.

Under Section II - Town Directory presents for each town the status and growth history of population; physical aspects and location; municipal finance; civic and other amenities; medical, educational, recreational and cultural facilities; trade, commerce, industry and banking, civic and other amenities in slums.

Part B of District Census Handbook presents Primary Census Abstract for general population. It contains data for each village and ward level data for each town such as area, number of occupied residential houses, number of households, total population, Scheduled Castes, Scheduled Tribes population, literate, main workers, marginal workers and non-workers etc. Similar information is also provided in the Primary Census Abstract for Scheduled Castes and Scheduled Tribes at Taluka (UA)/Town level.

The 1971 Census being the first Census organized and conducted in Goa on the All-India pattern after its liberation from the erstwhile Portuguese rule, the first District Census Handbook for Goa was published only in 1971. Considering the small size of the districts of Goa, Daman and Diu in the erstwhile Union Territory of Goa, Daman & Diu, a combined volume for all the three districts was brought out both in 1971 and 1981 Censuses. These volumes also contained both Parts A and B of the DCHB of all the three districts.

Consequent to the formation of the new State of Goa and the districts of North Goa and South Goa in

successful in establishing their rule in four Concelhos (talukas) which are known as “Velhas Conquistas” (old conquistas) which comprised the island of Goa, (Tiswadi) and the talukas of Salcete (inclusive Mormugao) and Bardez.

The Marathas under Shivaji built up a strong fleet and harassed the Portuguese on the seas during the 17th Century. While his army overran Bardez, Sambhaji, his son threatened at the very gates of the city of Old Goa but had to give up the siege to meet the Mughals. After the decline of Maratha power, by the end of the 18th Century the talukas of Pernem, Bicholim and Satari situated to the North, which were ruled by the Marathas, vassals of the Sawantwadi were occupied by the Portuguese in 1788. Similarly talukas of Ponda, Sanguem, Canacona and Quepem forming part of the territory of Maratha vassals Chief of Sounda were occupied by the Portuguese by the end of the 18th Century. These annexations were called “Novas Conquistas” (New Conquests).

The 19th Century was noted for bloodshed and political uprising in Goa. The liberation of Dadra & Nagar Haveli in 1954 gave a further fill up to Goan freedom movement. The Government of India tried again and again to persuade the Portuguese Government to withdraw peacefully, but the latter did not respond favorably. This adamant attitude of the Portuguese ultimately, forced the Government of India to send an army to liberate Goa. This historic event which marked the end of about 450 years of Portuguese rule took place on December 19th, 1961 and Goa became free and a part and parcel of India on that day. Goa was a district of the then Union Territory of Goa, Daman and Diu until May 30th, 1987 when Goa attained Statehood. For detailed history of Goa, the Gazetteer of the Union Territory of Goa, Daman & Diu District Gazetteer Part 1-Goa, Gazetteer Department, Government of Goa, 1979 may be referred to.

Consequent upon the formation of new State of Goa, it was divided into two districts viz. North Goa and South Goa under Government Notification No. 16/15/87-RD dated August 3rd, 1987 with their headquarter as Panaji and Margao respectively. The Southern part of Goa has been named as South Goa District. South Goa District comprising five talukas under three sub –divisions as under:

Name of Sub-divisions	Name of talukas included
Margao	Salcete
Mormugao	Mormugao
Quepem	Quepem
	Sanguem
	Canacona

The Northern part of Goa has been named as North Goa District which comprises the remaining six talukas of Goa State.

Brief History of Census in Goa :

The year 1872 marked the beginning of Census taking in India when the results of the censuses around that time in different parts of the country conducted non-synchronously were aggregated. From 1881 onwards, however, a complete and synchronous Census has been held once in ten years. The 2001 Census represented the fourteenth Census of India as reckoned from 1872 and the sixth after Independence.

Like the Indian Census, there was a long tradition of Census taking in Goa too even though it was under the Portuguese rule. The first available report containing the details of population Census relates to the Census of 1881. According to this report, at least three attempts prior to 1881 were made to hold censuses of population in this State. The first official attempt to hold the Census was made in 1850, but no report thereon is available. However, table No. 142 in the Census Volume of 1881 gives the population of Goa, Daman & Diu as 406,563 in 1850. A second attempt to hold Census appears to have been made in 1878. In this case also no data are available except for table 141 appearing in the Census Volume of 1881, which indicates that population of Goa was 390,130 in 1878. The third attempt of population Census was made in 1880 but that seems to have been left incomplete. Then a fresh Census was ordered and was held on 17th February 1881 (the date on which the population Census took place in the former British India). From then onwards, regular Censuses have been held in this territory almost after every 10 years. Thus, the Census of 1881 was followed by the Censuses held in 1887, 1900, 1921, 1931, 1940, 1950 and 1960. The 1960 Census was the last Census conducted by the erstwhile Portuguese regime in this

Number of Villages and Towns in Goa :

As per the Notification No. RD/LND/213/69-71/II dated 15.02.1971 of the then Government of Goa, Daman & Diu, there are in all 429 Revenue Villages in Goa. There are 14 Municipal Towns and 30 Census Towns in Goa in the 2001 Census. In all, 34 Revenue Villages have been included in 14 Municipal Towns excluding part of some villages, which have also been included in some of the Municipal Towns. Thus, 70 Revenue Villages including Census Towns form part of the urban areas in the State as a whole. The following Statement shows the number of villages and towns by districts and talukas.

NUMBER OF VILLAGES AND TOWNS BY DISTRICTS AND TALUKAS

State/District /Taluka	No. of Villages as per the Govt. Notification	No. of Villages / Towns as per the 2001 Census. Statutory		No. of Villages wholly included in the Towns
		Villages	Towns	
1	2	3	4	5
Goa	429	359	44	70
North Goa	257	213	27	44
Tiswadi	39	26	5	13
Bardez	46	33	11	13
Pernem	27	26	2	1
Bicholim	31	22	4	9
Satari	82	78	1	4
Ponda	32	28	4	4
South Goa	172	146	17	26
Salcete	50	39	9	11
Mormugao	17	12	3	5
Sanguem	53	51	2	2
Quepem	42	36	2	6
Canacona	10	8	1	2

The above Statement shows as to how the 70 Revenue Villages forming part of 44 Towns are distributed by Talukas. It may also be mentioned that some of the Municipal Towns include more than one Revenue Village. In case of Pernem, only a part of the Pernem Revenue Village has been notified as Pernem Town. The remaining part has been treated as Pernem village. Wherever a part of a Revenue Village has been included in the Municipal Town, the remaining part has been retained as the Revenue Village. The following list shows the Revenue Villages either wholly or partly included in the Municipal Councils/Census Towns.

LIST OF REVENUE VILLAGES WHOLLY OR PARTLY INCLUDED IN MUNICIPAL COUNCILS/CENSUS TOWNS, 2001

Name of Town	Revenue Villages included in the Town
South Goa District	
1. Mormugao (M.Cl)	1. Mormugao (part) 2. Vasco-da-gama 3. Vadem
2. Chicalim (CT)	4. Chicalim
3. Sancoale (CT)	5. Sancoale

11. Chinchinim (CT)	15. Chinchinim
12. Sao Jose De Areal (CT)	16. Sao Jose De Areal
13. Sanguem (M Cl)	17. Sanguem Cotarli (part)
14. Sanvordem (CT)	18. Sanvordem
15. Quepem (M Cl)	19. Quepem 20. Cusmane 21. Deao 22. Amona Sirvai (part)
16. Curchorem Cacao (M Cl)	23. Curchorem 24. Cacora
17. Canacona (M Cl)	25. Canacona 26. Nagarcem-Palolem

M Cl : Municipal Council.

CT : Census Town.

In all two villages in South Goa have been submerged due to construction of dams. They are as follows:

1. Curdi (Sanguem)
2. Salauli "

(iv) Physical Features

South Goa District as the name suggests covers the entire southern part of Goa State and is bounded by the Arabian Sea on its West North Goa District in the North and by the District of Uttar Kannada of Karnataka in East and South. The District of South Goa is situated between the latitudinal parallels of 15° 29' 32" N and 14° 53' 57" N and the longitudinal parallel of 73° 46' 21" E and 74° 20' 11" E. From North to South and from East to West the district spans a distance of 68 kms and 40 kms respectively.

Drainage :

Rivers, rivulets and brooks bathe the Goan soil before discharging into the sea. The important rivers are Mandovi, Zuari, Tiracol, Chapora (Colvale), Sal, Talpona, Galgibag and their tributaries like Kushavati, Nanorem, Nanus, Valvonta, Mapusa etc. However, of the many rivers and streams that drain the land of the State and its two districts, the Tiracol, Mandovi, (North Goa) and Sal, Talpona and Galgibag (South Goa) are the most important because of the extent of their drainage area and the human attractions they held.

The river Tiracol flows to the North of Pernem Taluka, whereas Chapora (Colvale) river bathes the southern part of Pernem and Northern part of Bardez and Bicholim talukas of North Goa District. Both these rivers which run almost parallel way have their sources at Banda and Maneri towns respectively of Sawantwadi taluka of Sindhudurg District of Maharashtra. The river Sal has its source at Vernem in Salcete taluka and meets the Arabian Sea at Betul after passing through Salcete and Quepem talukas of South Goa District. These three rivers have lengths of approximately 20 km each. But the two most important rivers, which have largely influenced the economic growth of Goa, are Mandovi also known as Gomati and Zuari also known as Aaghanashani.

The river Mandovi, which has its rise at Bhimgad in the main Sahyadri range of Karnataka State flows through Satari taluka (North Goa) and reaches Gangem as Mahadei River. At this point the water becomes saltish. A few small tributaries of Mahadei river confluence at Narvem in Bicholim taluka (North Goa District) which is popularly considered to be holy place where Hindu devotees flock on Janmashtami day for holy Dip. This river during its course passes through Cumbharjua, Jua, Divar, Choraó etc. all in North Goa District before it meets, the Arabian Sea at Cabo-Aguada. Old Goa, the ancient capital of Goa, and Panaji the present capital of Goa State are located on the left bank of the river Mandovi. With rivers Rogaro and Kushavati as the main left bank tributaries and the Nanorem, Nanus, Valvonta and Mapusa as the main right bank tributaries, the river Mandovi has the largest drainage basin in Goa. In Goa, the river has a length of about 77 km and a wide meandering course through the irregular and increasingly plateau like forms. The river course is dotted with islands in the stream e.g. Divar and Choraó (North Goa District).

River Zuari is the southern counterpart of Mandovi. It rises at Hemad-barshem and runs through Sanguem, Quepem, Salcete, Mormugao (South Goa District), Ponda and Tiswadi talukas of (North Goa District). The longer stream draining the hilly area of southwest Sanguem must be considered as the main stream. The river has a length of 34 km. Kushavati is the main tributary of river Zuari.

The Cumberjua canal which joins the river Mandovi and Zuari has helped Goa to maintain its iron ore export operations during the monsoon when the Aguada bar is not navigable. Both these major rivers have influenced the competitive characteristics of Goa's ore by reducing to a sizable extent the distance between mining pitheads and Mormugao harbor. Goa's river network has an estimated total extension of 250 kms. and presently 141 barges with a total capacity of 167,000 tons make use of these waterways to carry ore from the different loading points to Mormugao harbor.

Lakes and Canals :

Lakes constitute a scenic feature in Goa, though most of them have a limited and local use for irrigation. Most of them owe their origin to bunds across stream valleys, large and small and along plateau margins and in alluvial flats. The lakes that are to be found immediately behind the coast are mainly due to the diversion of the estuarine streams by sand bar and filled in alluvium on the flats behind the sand bars. Here the lakes appear as detached remnant of marsh and flats; such are the several lakes of the river Sal basin; south of Margao (South Goa). Similar shallow stretches occur in the alluvial flat of the Tiswadi (North Goa), so indeterminate is the expanse of fresh water in such lakes that the transition to rice lands and salt flats is hardly noticeable. The lakes of the interior are mostly impounded creation in the small streams and serve as a valuable irrigation course to rice lands and betel nut gardens. The more important of the lakes of Goa are Maem, Chimbél, Karamali, Calapor (North Goa District), Benaulim, Cacora and Kudtari (South Goa District).

Goa has presently three canals viz: Tivim (North Goa), Paroda and Salaulim canals (South Goa). However, they are not navigable. The first two are essentially used for irrigation purposes, whereas the third is a part of a composite project giving water for irrigation as well as potable purposes.

State Income :

In the context of the planned development of the economy of a State, the estimates of State Domestic Product (SDP) play a vital role in formulating the policies of the Government. This estimate serves as indicators of economic development and level of income of the State and also brings out the contribution of the various sectors of the economy. Goa is considered as one of the richest States in the country on account of its high per capita income. The real growth in the economy is measured on the growth in the State Domestic Product at constant prices.

As per the available statistics, the Net State Domestic Product (NSDP) at current prices has increased from Rs. 27 crores in 1960 to Rs. 315 crores in 1980-81 and from 851 crores in 1989-90 to Rs. 4202 crores in 1999-2000 (Quick estimates). The per capita income at current prices has increased from Rs. 6939 in 1989-90 to Rs. 26,681 in 1999-2000, a broad sector-wise study revealed changing economic pictures in the State. In 1999-2000 at current prices Tertiary Sector contributed 61 per cent as compared to 49 per cent in 1989-90. The contribution from the Primary Sector, however, decreased from 21 per cent in 1989-90 to 15 per cent in 1999-2000. The contribution from Secondary Sector also registered a fall from 30 per cent in 1989-90 to 24 per cent in 1999-2000.

Forestry :

The State of Goa has an area of 1,424 Sq. Kms. under forest cover which forms 38 per cent of the total geographical area of 3,702 Sq. Kms. Of these 1,224 Sq. Kms. is government forest and 200 Sq. Kms. is private forest. Forests in Goa are largely confined to the Western Ghat hill slopes. Almost 85 per cent of the government forest area is covered in the talukas of Sanguem, Canacona of South Goa District and Satari taluka of North Goa District. Of the total forest area only about 28 per cent is in North Goa District and the remaining 72 per cent is in South Goa District. In North Goa District about 20 per cent of the total geographical area is covered under forest. The major forest areas of this district lie in the taluka of Satari (82 per cent), Ponda (9 per cent), Pernem (5 per cent) and Bicholim (3 per cent). The coastal talukas of Tiswadi and Bardez have negligible area covered under forest.

The State Forest Department, Government of Goa takes every steps for protecting and preserving the existing forest and bringing the cultivable waste land and degraded area under forest cover. The legislations like Indian Forest Act, 1972, Forest Conservation Act, 1980, which facilitate protection of forests are effectively enforced in the State. The felling of trees from private areas is being strictly regulated under provisions of Preservation of Trees Act, which was introduced in 1984. Due to concerted efforts made in bringing degraded forests under a forestation scheme the forest cover has increased from 15 per cent in 1989-1990 to 20 per cent as on 1999-2000.

The forests in Goa are rich in flora and fauna. Wild life management, which is an important component, is being taken care of by scientific management of four sanctuaries, which cover about 25 per cent of the Government forest area of the State. Wild Life Preservation Act, 1972, is vigorously implemented in the State for conservation of natural living resources. There are four Wild Life Sanctuaries namely Mollem National Park and Bhagwan Mahavir Wild Life Sanctuary in Sanguem Taluka, Cotigao Wild Life Sanctuary in Canacona Taluka of South Goa and Bondla Wild Life Sanctuary in Ponda Taluka of North Goa District. Besides there is a bird sanctuary named after Dr. Salim Ali in Tiswadi Taluka of North Goa. Varieties of local as well as migratory birds frequently visit Dr. Salim Ali Bird Sanctuary located at Chorao in Tiswadi Taluka of North Goa District.

Minerals and Mining :

The State of Goa is richly endowed with the industrial minerals like Iron Ore, Manganese Ore, Bauxite, Limestone, Ferro-Manganese etc. However, the chief minerals explored in the State are Iron Ore, Manganese Ore and Bauxite. Mining was the backbone of Goa economy. Prior to liberation mining constituted a major activity contributing 17.9 per cent of the Net State Domestic Product (NSDP) in 1960. Though after liberation mineral products has almost remained steady, the contribution of mining to NSDP has decreased from 17.9 per cent in 1960 to 4.1 per cent in 1999-2000 at constant prices (quick estimates), which shows that Goa's economy is no more dependent on mining for its principal income.

The rest of the paddy land is termed as Morod. These are the plots situated on the high lands with very good soils. However, these areas are rain fed only the Kharip crop is cultivated.

Cropping Pattern :

The chief food crops in the district are paddy and other cereals, millets and pulses, sugarcane and vegetables along with horticultural crops such as cashewnuts, coconut, arecanut, and other fruits like mango, pineapple, papaya, jackfruit, bananas etc.

Paddy is the predominant crop and accounts for 32 per cent of the area under food crops including that under horticultural crops and 69 per cent of the area under the food crops excluding that under horticultural crops. The rest of the area sown is under cereals and pulses, sugarcane, vegetables etc. Other cereals, millets and pulses accounts for 19 per cent of the area sown. They are, followed by vegetables and sugarcane.

The district is an important producer of commercial crops such as cashew nuts, coconut, areca nut, pineapples, mango etc. The district has an area of 56770 hectares under horticultural crops. The pride of place in respect of horticultural crops is occupied by cashew nut plantation, which accounts for 38926 hectares i.e. 69 per cent of the area under horticultural crops. It is followed by coconut with 11000 hectares i.e. 19 per cent of the area under horticultural crops. The fruits such as Mango, pineapple, banana, papaya, jackfruits etc. accounts for 5482 hectares which is 10 per cent of the area under horticultural crops. Amongst, horticultural crops areca nuts comes last with an area of 1362 hectares representing 2.4 per cent of the total area under horticultural crops. The following table presents cropping pattern in the district in 1999-2000.

CROPPING PATTERN, 1999-2000

Crop 1	Taluka/District					
	Mormugao 2	Salcete 3	Quepem 4	Sanguem 5	Canacona 6	South Goa 7
1. Paddy	863	9,182	5,524	4,126	3,249	22,944
2. Other Cereals/Pulses	167	1,081	335	653	1,200	3,436
3. Sugarcane	-	5	198	865	35	1,103
4. Coconut	1,218	6,041	2,099	2,956	1,661	13,975
5. Arecanut	3	-	42	100	43	188
6. Cashewnut	337	1,832	2,341	6,745	3,111	14,366
7. Vegetables	48	1,374	80	68	380	1,950
8. Garden crops	183	2,059	1,216	1,605	1,755	6,818
9. Gross cropped area	2,821	21,586	11,988	17,462	11,446	65,303
10. Area sown more than once.	303	2,879	1,421	2,385	742	7,730
11. Net cropped area	2,518	18,707	10,567	15,077	10,704	57,573

Land and Land Use Pattern:

Until the end of the last century the erstwhile Portuguese Government did not have a full-fledged agency to carry out a detailed holding-wise survey. It was only in the year 1898 that a Survey Department was first established to survey the lands of Comunidades in selected talukas. In 1904, this Department embarked upon a measurement survey of all lands and completed the same in the talukas of Tiswadi, Ponda and Bicholim. Thereafter, between 1911 and 1940 it intermittently continued the survey of parts of the Bardez, Pernem and Satari talukas. After the liberation these data along with the data of photographic survey carried out in 1960 in respect of unsurveyed area were reclassified in accordance with

the land use classification followed in the rest of the country. This reclassified data was then taken as portraying the position prevailing just before liberation i.e. in 1960. A complete cadastral survey was taken up in 1965 and completed in 1977.

The total geographical area of Goa State as per the Surveyor General, India is 3702 Sq. Kms. Out of which North Goa constitutes 1736 Sq. Kms. or 47 per cent of the total geographical area of the State.

The area figures presented in the Statement indicating land use pattern have been derived from the figures supplied by the Directorate of settlement and land reforms Government of Goa and published by the Department of Planning, Statistics &

development of agricultural economy. A second committee to examine the problems in broader perspective was constituted in 1966 under the chairmanship of Shri P. B. Venkata Subramanian, which was later reconstituted in 1969 under the chairmanship of Shri Antony D'souza. Based on the recommendation of the above committee several important legislative and executive measures were taken by the Government. These are briefly dealt below:

Agricultural Tenancy Act :

The Goa, Daman & Diu Agricultural Tenancy Act of 1964 was the major step taken by the Government towards protecting the tenants in Goa. Under the act, all tenants of paddy were declared protected tenants. Earlier, the lease of paddy fields used to be for a period of six years only. The Act conferred heritable permanent tenancy right on the tenants. The Agricultural Tenancy Rules framed under this Act, came into force from March 11th, 1965.

Under the Fifth Amendment to the Agricultural Tenancy Act, passed by the Goa Legislature in October 1976, the Government has sought to make some important amendments. The amendments also provided that on the tillers day every tenant would be deemed to have purchased from his land lord the land held by him as a tenant and such land would vest in him free from all encumbrances subsisting on the said day. But the said Act was challenged in the then Judicial Commissioner's Court and subsequently in the Supreme Court of India. However, in July 1991 the Supreme Court of India has disposed off the case in favour of the tenants.

Goa, Daman & Diu Land Revenue Code, 1968:

In order to bring the Land Revenue Administration in this State on par with that prevailing in other States, the Goa Legislative Assembly passed the Land Revenue Code Bill in 1968. The code attempts to regularize the relationship between the State and landlords without disturbing the ownership rights. This has been brought into effect from March 1st, 1971.

Mamlatdar's Court Act, 1966 :

This act has been enforced in Goa from April 6, 1966. Under this Act, speedy remedy is available to agriculturists or 'Mundkars' in disputes relating to agricultural lands, easement, etc.

Agriculture :

Agriculture was one of the important economic activities of the people of Goa. At the time of liberation about 60 per cent of the work force was engaged in agriculture contributing only 16.5 per cent to the income of the territory. But, due to rapid industrialization and urbanization there has been significant reduction of area under cultivation. The proportion of agricultural workers has now decreased to 19 per cent. In spite of this, the agricultural production has increased manifold and the contribution of this Sector to the Net State Domestic Product (NSDP) of the State during 1999-2000 is 15 per cent to be exact 14.8 per cent.

Prior to liberation agriculture was almost neglected and no planned/ systematic efforts were made by the erstwhile Portuguese Regime towards the development of agriculture in the State. It was only after liberation that remarkable achievements have been made through various measures like use of high yielding varieties of seeds, intensive use of fertilizers, plant protection, improved agricultural practices, execution of major and minor irrigation and drainage work, credit and marketing facilities etc. so as to boost agricultural production and to make agricultural activity a remunerative proposition.

Production of food grains has increased from 0.50 lakh tonnes in 1960-61 to around 1.64 lakh tonnes in 1999-2000. Cashewnut and Coconut are the important cash crops of Goa. The production of cashew nut and coconut has also increased from 3,500 tonnes and 70 million nuts in 1961 to 17,274 tonnes and 122 million nuts in 1999-2000. Mango production, which was 3,500 tonnes in 1990-1991, has increased to 10,000 tonnes in 1999-2000. Sugarcane production, which was negligible in 1961, has increased to 68,440 tonnes in 1999-2000. Yield per hectare of rice, which was 1,200 kg. in 1961 is estimated to increase to 2,526 kg. per hectare and 2,877 kg. per hectare during Kharif and Rabi seasons respectively in 1998-99. Due to improvement in irrigation facilities and extensive efforts the area under vegetable cultivation has increased from 7,300 hectares in 1990-91 to about 7,500 hectares in 1999-2000, accounting for about 4.4 per cent of the gross cropped area.

In the district of South Goa, the soils and climatic conditions are favorable for the growth of wide variety of tropical crops. The agricultural crops that are currently grown includes paddy, ragi, pacol, udid, tur etc. Coconut and Cashewnut are important

varieties are; mancurade, mussarade, fernandis, xavier, afonso, colaco etc. The other common fruits are pineapple, banana, jackfruit etc. There are two varieties of jackfruits grown in the district namely Kapo (hard) and Rasal (soft).

The kind of vegetable grown in the district, are brinjals, lady's fingers, radish, cucumbers, pumpkins, drumsticks, breadfruit and different varieties of gourds, sweet potatoes, chilies, onions etc. The area covered under vegetable is 1950 hectares spread over Salcete, Canacona, Quepem, and Sanguem.

Paddy, Cashewnut, Coconut and Other Cereals and Pulses are the four most important crops in South Goa which together accounts for almost 83 per cent of the cropped area. Groundnut, the only oilseed crop cultivated in Goa is a late introduction in the State and is grown mainly in Rabi season.

Irrigation:

The State of Goa is endowed with a good annual average rainfall of over 3000 mm and rolling topography which provide excellent scope for storage dams for water supply of irrigation, drinking and industrial purposes and also for tourism industry.

The water resources of the State have been assessed at 8570 million cubic meters (mm^3). However, due to topographical, geological and other constraints, the level of utilization of resources of irrigation is expected to be 1465 (Mm^3) (1125 Mm^3 surface + 340 Mm^3 ground water) bringing 89660 hectares of agricultural area under irrigation. (82260 hectares by surface water and 7400 hectares by ground water). Another 300 Mm^3 of water storage & utilization is expected for domestic, industrial and tourism purpose (surface water 200 Mm^3 and ground water 100 Mm^3). The storage and water distribution for irrigation in respect of the aforesaid 1465 Mm^3 of water has to be made through various major, medium and minor irrigation projects.

As per the State Irrigation Department estimates the potential of different types of irrigation schemes area-wise is as follows:

A.	Surface Water	82,260 hectares
1.	Minor Irrigation	25,500 hectares
2.	Medium Irrigation	25,260 hectares
3.	Major Irrigation	31,500 hectares
B.	Ground Water	7,400 hectares
	Total	89,660 hectares.

Source: Draft Ninth Five-Year Plan.

Like agriculture, irrigation was also a neglected sector in the erstwhile regime. According to the available statistics, the area irrigated on the eve of liberation was only 7,860 hectares which accounted for only 5.8 per cent of the net area sown. There were, no major or medium irrigation project in Goa then. There were only two minor irrigation schemes viz. Khandepar (North Goa) and Paroda (South Goa) canals consisting of pickup weirs across the river Khandepar and Kushavati respectively and minor canal systems having a command area of about 600 hectares for both together. There were in addition small tanks scattered all over Goa irrigating small patches of land. Although, the State was endowed with adequate water resources, their utilization was far below the desired level. Irrigation being a prime input, for agriculture, the Government of Goa, since liberation has taken up a number of measures for harnessing/exploiting of the available water resources for providing irrigation facilities.

Major and Medium Irrigation Projects:

The major part of irrigation potential is expected to be created by major and medium irrigation which works out to 56,760 hectares (CCA) (88,020 hectares ultimate) out of the total expected 82, 260 hectares (CCA) (1,23,390 hectares ultimate) under surface water irrigation potential. At the end of March 2000, an irrigation potential of 6714 hectares (CCA) (11,49 hectares ultimate) was created under major and medium irrigation projects. The details of the schemes and major and medium irrigation sector are as follows:-

The Salaulim Irrigation Project a major irrigation project is located near Salaulim Village in Sanguem taluka of South Goa District on river Salaulim a tributary of river Zuari. It was approved in 1971 to provide irrigation facilities to 14,360 hectares in Sanguem, Quepem and Salcete taluka of South Goa district. Water supply component of 160 MLD has already been created and being utilized. The execution of the Salauli Irrigation Project is very much in advance stage and expected to be completed by March 2003. The water spread and command area of this project lies entirely in Goa State.

The Tilar Major Irrigation Project is a joint venture of the Government of Goa and the Government of Maharashtra across the river Tilar Wadi, in Sawantwadi taluka of Sindhudurg District in the State of Maharashtra. The project will irrigate after its completion, an area of 16,978 hectares (CCA) in Bicholim (5536 hectares), Bardez (6435 hectares) and

Fisheries :

With a coastline extending over 100 kms and inland waterway over 250 kms. Goa is endowed with rich marine and inland fishing potentials. Fish is the staple food for the people of Goa. Apart from being an esteemed item of daily diet of about 95 per cent of the Goan population, it is the major source of protein for the people. Fishing like agriculture is one of the oldest occupations of the Goans and an important means of livelihood particularly of those living in the coastal areas.

Prior to Goa's liberation, except for a couple of trawlers acquired by the Portuguese Government almost on the eve of liberation, fishing operations were restricted to non-mechanized vessels. Lack of regular fisheries development program by the erstwhile Government as well as lack of required financial support by solitary back-functioning in the State, private enterprises were precluded from venturing into mechanized fishing. Since liberation, development of fisheries has taken place at a rapid rate and as a consequence of various measures and schemes initiated by the Government, the State has at present a fishing fleet of 1110 mechanized boats, 946 motorized boats, 1392 traditional crafts and 7077 fishing gears exploiting the rich demersal and pelagic resources of the in shore areas and off shore waters along the Goan sea coast. The total fish catch in the State increased from 17,000 tones in 1960 to around 65,000 tones in 1999-2000. Almost 75 per cent of the total catch comprises pelagic resources like mackerels, sardines etc. and remaining 25 per cent from inland and demersal resources in sea.

Necessary fisheries infrastructure such as construction of jetties, ramps, approach roads, cold storage complexes, ice factories, fish drying platform etc. for the fullest exploitation of fisheries resources and improvement of lot of fishermen have been undertaken over the decades in the State. Cold storage complexes have been set up in Panaji (Tiswadi), Chapora (Bardez) in North Goa District and Canacona in South Goa District. Fishing jetties have been provided at Malim (Bardez) in North Goa District and Cortalim (Salcete), Talpona (Canacona) and Curtorim (Salcete) in South Goa. Fish landing ramps have been provided at Marvel, Caranzalem and Odxel in Tiswadi Taluka, Orda and Sinqerim at Candolim (Bardez) and Querim at Pernem in North Goa District.

In South Goa District, out of five talukas, there are three fishing talukas viz. Mormugao, Salcete and Canacona. As per the livestock and Farm Equipment Census of 1997, South Goa with 934 fishing crafts accounted for more than three-fourth of the fishing crafts in Goa. Of these 619 or 37% are mechanized. Among, the talukas of North Goa, the highest number of fishing crafts was in Bardez Taluka (695 or 41%) followed by Tiswadi (691 or 41%). These two coastal talukas together accounted for 82% of the fishing craft in North Goa.

Industry :

The industrial situation was totally different in Goa at the time of liberation. Except mining, which could not be strictly classified as industry, there were hardly 50 small-scale units in the territory. Industries worth the name consisted of few cashew processing units couple of fruit canning units, a carbon dioxide plant, a manglore tiles factory, a match factory, a tyre re-trading unit and a few laundry soap making units. Investments in these units, as well as their employment generating capacity were extremely limited. Goa's pre-liberation economy was basically an import oriented trading economy. Most of the consumer needs of the local population around 6 lakh were met by imports rather than local production. Lack of adequate infrastructural facilities such as electric power, potable water, transport and communication network etc. were instrumental for a low profile of industrial development during the erstwhile regime. In 1960, the contribution of the manufacturing sector to the State Domestic Product (SDP) was only to 1.99 crores accounting for 7.3 per cent of the SDP.

The era of planned industrial development was ushered in Goa only after liberation. The important and most different task of rehabilitating and activating the pre-liberation stagnant economy of Goa was initially assigned to a Planning Board appointed immediately after liberation and thus the concept of planned development was for the first time introduced in Goa. The Government of Goa realizing well in time, that the industrial sector was the weakest link of the economy took the wise step of establishing development agencies and assigning to them the role of promoting industrial development in the territory. Side by side, the local Directorate of industry was activated.

Goa, with the exclusion of municipal limits of the Capital Town of Panaji was declared as an industrially backward area and consequently industries set up in

Transport and Communications:

Transport sector plays a vital role in the economy of Goa directly influencing mining, industry, construction, trade and commerce, tourism and other services. Transport and Communication contributed almost 6.9 per cent of the Net State Domestic Product (NSDP) at constant (1993-94) prices in 1999-2000 (quick estimates) as compared to 17.5 per cent in 1989-90 while railways and communications accounted for 1.15 and 1.02 per cent respectively of the NSDP in 1999-2000, transport by other means accounted for 4.75 per cent.

The State of Goa has a fairly well developed network of transport and communication system. It is served by railway, roadways, inland waterways and airways as well as by post and telegraph service, telephone, telex, exchanges etc. It has a very good natural harbor at Mormugao in South Goa. Mandovi, Zuari, Sal, Chapora and Talpona rivers provides inland waterways and are extensively used particularly to transport minerals to the port.

Even before liberation Goa was well endowed with road facilities. However, the roads were generally narrow and not asphalted. In 1961, the total length of roads including rural roads was only 2735 km., most of which were not asphalted. The phenomenal rise of vehicular traffic from 8531 in 1961 to 3,29,943 in 2001 as now the demand of the growing population and the development activities had necessitated better network of roads and bridges. There are more than 50 big and small bridges in Goa of which 46 were constructed after liberation. Another five bridges are under construction. The total length of roads inclusive of rural roads has increased from 7242 km. in 1991 to 9240 kms as on 31st March 2000. Thus Goa has 2496 kms of roads per every 1000 sq. kms of area. All weather roads in the State have connected all the villages.

With the objective of providing safe, regular, reliable and comfortable road transport to the traveling public and to connect interior remote areas with the urban centers, Kadamba Transport Corporation (KTC), a wholly owned company of the Government of Goa was established in October 1980 with an initial strength of 10 buses. Today, the State owned KTC has a fleet of 384 buses serving the entire State, mainly the remote areas, of which 79 are mini buses. The mini buses are operating non-stop shuttle service connecting major towns of Panaji, Ponda and Mapusa in North Goa and Margao and Mourmugao in South

Goa. The KTC buses cater to about 74000 passengers covering about 65597 kms per day. Apart from KTC buses, 2593 buses and mini buses run by Private Operators are engaged in passenger transport service. Beside these buses there are 6302 taxis, 4779 motorcycle on hire and 2974 auto rickshaws in Goa as on 31.03.2000.

As regards railway transport, there is a broad gauge line in South Goa extending from Mormugao Harbor to castlerock in Karnataka State. The existing meter gauge line has been converted into broad gauge during the decade 1991-2000 from Mormugao to Miraj.

The Konkan Railway Corporation Ltd. has been set up as a public sector company under the Ministry of Railway for constructing a new railway line from Roha to Manglore. It was completed and commissioned in the mid nineties. The line passes through Goa for the length of 129 kms. The line passes through the taluka of Pernem, Bardez, Tiswadi and Bicholim (North Goa), Salcete, Quepem, Mormugao and Canacona (South Goa). Introduction of Konkan Railway in the mid nineties has brought down the pressure on road transport. The passenger and goods traffic on inter and intra State has been diverted through Konkan Railway. Thus the commissioning of the Konkan Railway has given a big boost to rail traffic, both passenger and freight in Goa during the decade 1991-2001.

Goa has about 555 kms of inland waterways of 256 kms are navigable through the river Mandovi, Zuari, Chapora, Tiracol and Sal. There are 23 routes (including on interstate route) on which regular ferry services ply apart from two launch services in Goa. There are 50 vessels comprising of 48 ferryboats and two motor launches in operation in 1999-2000, which ferried more than 692 lakhs passengers. Beside, 133 barge with an average freight carrying capacity of 807 tones are used for carrying ore by rivers to port. The entire movement of iron ore in Goa is on waterways.

Goa has an International Airport at Dabolim in South Goa. The distance from Panaji to Dabolim Airport is 27 kms. The CHOGM meeting held in Goa in 1983 led to the up gradation of the Dabolim Airport to an International Airport.

There is one Head Post Office each in Panaji (North Goa) and Margao (South Goa). There are 258 Post Offices (80 in South Goa). Of the 258

The State of Goa consists of two districts viz. North Goa and South Goa districts with eleven Community Development Blocks and two Zilla Panchayats. South Goa district has five C.D. Blocks and one Zilla Panchayat viz. South Goa Zilla Panchayat. There are 69 Village Panchayats in the State under the control of the Directorate of Panchayats. Of the 189 Village Panchayats, 69 are covered in South Goa.

Composition :

As per the provisions of the Act, the Panchayats have been classified in four categories viz. A, B, C & D depending upon the population. A minimum population in order to constitute a Panchayat is 1500. The number of members in each Panchayat is determined in accordance with its population as follows:

Sl. No.	Population	Number of Members	Classification
1	2	3	4
1	1500 or more but not more than 2000.	5	D
2	More than 2000 but not more than 5000	7	C
3	More than 5000 but not more than 8000	9	B
4	More than 8000.	11	A

There are 69 Village Panchayats in South Goa district. Their block distribution is as under:-

Name of C.D. Blocks	Total Number of Village Panchayats				
	A	B	C	D	Total
1	2	3	4	5	6
South Goa	5	21	37	6	69
Mormugao	3	3	2	1	9
Salcete	2	9	15	4	30
Quepem	-	2	8	1	11
Sanguem	-	4	8	-	12
Canacona	-	3	4	-	7

As could be seen from above information, the maximum number of members for a Panchayat is 11 and the minimum is 5 members based on its population. Two seats have been reserved for women in every Village Panchayat. Seats are also reserved for other Backward Classes as provided in the constitution of India. However, no reservation is made to the Scheduled Castes as their population is hardly 2 per cent in the State, which is scattered all over the State. The reservation of seats for women and other backward classes is done by rotation. One third of the offices of Sarpanchas and Dy. Sarpanchas have been reserved for women by rotation. The term of office of the

Village Panchayat is for a period of 5 years, which can be extended for a period not extending one year by the Government. General Elections have been held to all the Village Panchayats in the year 1997.

Jurisdiction :

A Village Panchayat, constitute a single village or a group of villages in the State. The area of jurisdiction of each Panchayat extends to village or villages falling under a particular Village Panchayat.

Role of Village Panchayat in development of village and its economy :

Schedule I to the Panchayat Raj Act gives the list of functions and responsibilities of the Village Panchayats. The Act also gives wide powers to the Village Panchayats. The Panchayats have to regulate the construction of buildings, factories, workshops and other business activities in its area of jurisdiction. It is the Licensing Authority for construction of buildings in the village. It is empowered to demolish or remove any unauthorized construction or building or structure, which is erected without its written permission. Every Panchayat is authorized to levy taxes on buildings, entertainment, advertisement and hoardings, lighting, drainages etc. and fees like market fee, registration of cattle's, grazing cattle's, sale of goods, extraction of sand and laterite stone, issue of various certificates etc.

However, most of the Village Panchayats in the State have to depend upon the financial assistance from the Government, as they are not financially sound. The Government releases the grants in various forms for undertaking development activities for the villages and its economy. The Panchayats have to look after construction of new roads, maintenance, repairs and widening of the existing road, construction of retaining walls, asphaltting of roads, construction of foot bridges so as to facilitate the rural population easy approach to the cities and for all round development of the village on account of the roads.

The Village Panchayats have to maintain public health and sanitation, social-welfare, cleanliness, supply of water for domestic use etc. regulation of burial grounds, construction and maintenance of public latrines, lighting, villages establishment and maintenance of markets, slaughter houses and other works of public utility, establishment, maintenance and regulation of fairs, cattle pounds, extension of village sites, regulation of buildings and housing schemes in accordance with such principles as are prescribed.

sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other are made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, storeroom, passageway and verandah, which are not normally usable for living, are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building

used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons, then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If a single household occupies all these five rooms it was not realistic to

a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and /or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab State Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent

Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Goa are given below :

Scheduled Castes:

1. Bhangi (Hadi)
2. Chambhar
3. Mahar
4. Mahyavanshi (Vankar)
5. Mang

Scheduled Tribes:

1. Dhodia
2. Dubla (Halpati)
3. Naikda (Talavia)
4. Siddi (Nayaka)
5. Varli

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind

Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population.

Population Density :

Population density is the number of persons inhabited per square kilometer of the area.

Age :

Age is measured in terms of the completed number of years.

Sex - Ratio:

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved Drinking Water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sykh pattern drain, etc., in these towns.

Type of Latrine and Method of disposal of Night Soil :

There are three prevalent systems of disposal of

human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faeces matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of childbearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude Birth Rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal Mortality Rate (ENMR) :

$$\text{ENMR} = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal Mortality Rate (LNMR) :

$$\text{LNMR} = \frac{\text{Number of infant deaths of 7 days to less Than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Neo-natal Mortality Rate (PNMR) :

$$\text{PNMR} = \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Pre-natal Mortality Rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of Less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still Birth Rate (SBR) :

$$\text{SBR} = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal Mortality Rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49.}}{\text{Number of live birth.}} \times 100,000$$

Eligible Couple (Couples per 1000 population):

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child Woman Ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child Woman Ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration:-

- i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.
- ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.
- iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

the district viz. Mormugao, Salcete, Quepem, Sanguem and Canacona. Like-wise there are five C.D. Blocks by the same names as against four C.D. Blocks during 1991 Census. The rural part of the Talukas and C.D. Blocks are coterminous except C.D. Block Mormugao and Salcete. During 2001 Census C.D. Block Salcete-Mormugao were made into two separate C.D. blocks by the Govt. but while forming the C.D. blocks. The five villages namely Nagoa, Verna, Calata, Majorda and Utorda of the Salcete taluka are included in the C.D. block Mormugao. The Taluka of Salcete is most populous taluka of the district with population of 262035 while Canacona is the least population taluka with 43997 persons. Other talukas in order of population size are (i) Mormugao (144949), (2) Quepem (74034), and Sanguem (64080).

Rural and Urban Dwellers:

Out of 589095 people enumerated in the district of South Goa, 262035 or 44.18 per cent are rural dwellers and 328828 or 55.82 per cent are urban dwellers. The corresponding proportion of State is 38.44 per cent and 49.04 per cent respectively. There are 138 inhabited villages in South Goa district and 17 towns. The average number of town per hundred inhabited villages is often considered as an index of urbanization. In South Goa District, there are 12 towns for every hundred villages indicating that the district is quite urbanized. Out of five talukas two talukas viz. Mormugao is the most urbanized with 83.04 per cent urban population and Salcete with 57.85 per cent urban population followed by Quepem 45.90 Canacona and Sanguem taluka are least urbanized talukas in the district with 27.05 and 17.18 per cent urban population.

The following table presents population, number of villages and towns in the district in 2001 Census.

TABLE-A
POPULATION AND NUMBER OF VILLAGES AND TOWNS, 2001

Taluka	Population										Number						
	Total					Rural					Urban					Number of Villages	of Towns
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Total	Inhabited	Towns					
1	2	3	4	5	6	7	8	9	10	11	12	13					
Mormugao	144,949	76,570	68,379	24,587	12,135	12,452	120,362	64,435	55,927	12	11	3					
Salcete	262,035	129,798	132,237	110,456	53,491	56,965	151,579	76,307	75,272	39	39	9					
Quepem	74,034	37,527	36,507	40,054	20,279	19,775	33,980	17,248	16,732	36	36	2					
Sanguem	64,080	32,575	31,505	53,074	27,017	26,057	11,006	5,558	5,448	51	45	2					
Canacona	43,997	22,276	21,721	32,096	16,080	16,016	11,901	6,196	5,705	8	7	1					
Total	589,095	298,746	290,349	260,267	129,002	131,265	328,828	169,744	159,084	146	138	17					

Out of 146 villages in the district of South Goa 138 Villages are inhabited. The average number of villages inhabited villages per taluka works out to 28. In terms of rural population, Salcete taluka is the most populous taluka with 110456 or 42.44 per cent of the rural population of the district, while Mormugao taluka with 24587 persons or 9.45 per cent stand at the lowest level. In terms of villages, Sanguem taluka leads with 45 inhabited villages while Canacona taluka has only 7 villages. Out of 51 villages in Sanguem taluka 6 villages are inhabited and 1 village each in Mormugao and Canacona taluka is uninhabited.

Urban population of the district is spread among 17 urban units consisting of 7 Municipal Councils and 10 Census Towns. Mormugao Urban Agglomeration consisting of one Core Town and one Census Town Chicalim (CT) has been considered as one urban unit and Margao Urban Agglomeration consisting of one Core Town and two Census Towns Aquem (CT) and Navelim (CT) has been considered as an urban unit.

Mormugao Urban Agglomeration is the most populous town with 104758 persons followed by Margao urban Agglomeration with 94,383 persons while Census Towns Aquem, Varca and Sanvordem are the least populated towns below 5000 population with 4987 persons, 4865 persons and 4833 persons respectively.

Table below presents population and number of towns in 2001.

TABLE - B
POPULATION AND NUMBER OF TOWNS

Sl. No.	Name and Civic administration status of Town	Persons	Males	
			Persons	Females
1	2	3	4	5
1	Mormugao M Cl	97,154	51,560	45,594
2	Chicalim CT	7,604	4,394	3,210
3	Sancoale CT	15,604	8,481	7,123
4	Margao M Cl	78,382	39,802	38,580
5	Benaulim CT	10,158	4,949	5,209

The table below presents the decadal variation in population since 1991 and 2001 Census for South Goa District in comparison with State of Goa.

TABLE-C
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE

Sl. No.	State/ District	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001			Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Goa	1,169,793	690,041	479,752	1,347,668	677,091	670,577	15.2	-1.88	39.78	41.01	49.76
2	South Goa	504,989	250,841	254,148	589,095	260,267	328,828	16.66	3.76	29.38	50.33	55.82

Density of Population :

In order that the true implication of the distribution of population in different areas of the territory are properly understood it is necessary to examine the land people ratio or what is known in census terminology as density of population. Density of population has been defined as the number of persons per square kilometer of area and is arrived at by dividing the population by its area. Population density helps to identify the areas of varying population concentration and its pressure of population on land, which is affected by population growth while the area remaining constant.

An area of 1966 Sq. km. of South Goa district supports a population of 589095, which gives a density of 300 persons per Sq. km. of area as compared to 364 for the State. The corresponding figures during 1991 census was 257 for the district and 316 for the State. Thus, there is an increase of 43 persons per sq. km. during the period 1991-2001. South Goa district occupies 2nd place in matter of density among the two districts of the State. Among the talukas of the district, Mormugao has recorded the highest density of population 1328 followed by Salcete 895, and the lowest density is found in Sanguem 77. The other talukas in order of density are Quepem 233 and Canacona 125.

The density of population in rural areas of the district works out to 149 as compared to 212 for the State. During 1991 Census the rural density was 142 for the district. Thus, there is an increase of 7 persons per Sq. km. during 1991-2001. Among the talukas the rural density is found to be highest in Salcete 554, followed by Mormugao 533 and the lowest in Sanguem 64. The density of population in urban areas works out to 1480 for the district as compared to 1311 for the State.

During the 1991 Census, the urban density was 1315 for the district. Thus, there is an increase of 165 persons per sq. km. during the decade 1991-2001. The urban density is obviously very high as compared to rural density of population. In the urban areas of the talukas, the density of population varies from one taluka to another. The taluka of Mormugao has recorded the highest density being 1909 persons per sq. kms., followed by Salcete 1618, Sanguem 1097. The lowest urban density is recorded in Canacona 637 preceded by Quepem 926. The table below presents density of population of rural and urban areas of the district in 2001 Census.

Density of Population, 2001

Sl. No.	Taluka	Density		
		Total	Rural	Urban
1	2	3	4	5
1	Mormugao	1,328	533	1,909
2	Salcete	895	554	1,618
3	Quepem	233	142	926
4	Sanguem	77	64	1,097
5	Canacona	125	96	637
District Total		300	149	1,480
Goa		364	212	1,311

(a) Brief Analysis of Primary Census Abstract

The Primary Census Abstract (PCA) presents the basic data collected at 2001 Census.

The Primary Census Abstracts are presented separately for the State, for the district of South Goa and for village/towns. Primary Census Abstracts for the Scheduled Castes and Scheduled Tribes are also presented.

While State PCA provided data at the State and district level, the district PCA provided data at District/ C.D. Blocks/Town/Urban Agglomeration level. The Village/Town PCA provides the basic census data for each village and each town and its wards.

TABLE 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED
POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages
			Persons	Males	Females		Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Mormugao	16	40,281	19,665	20,616	1 (6.3)	83	80	0 (0.0)	0	0	1 (6.3)
2	Salcete	34	94,762	45,961	48,801	0 (0.0)	0	0	4 (11.8)	527	594	5 (14.7)

Out of 138 inhabited villages in the district 13 (9.4 per cent) are small sized villages with population below 200, in size class of 200-499 there are 19 (13.8 per cent) villages, 26 (18.8 per cent) villages in the size class 500-999, 32 (23.2 percent) villages in the size class 1,000 – 1,999, there are 38 (27.5 per cent) villages in the size class of 2,000 – 4,999, 9 (6.5 per cent) villages in the size class of 5,000 – 9,999, and only 1 (0.7 per cent) villages in the highest range of 10,000 and above. It is to be seen that within the district small size villages of less than 500 persons together accounts for 23.2. per cent of the total inhabited villages with 2.9 per cent of the rural

population of the district. Medium sized villages with population 500-1999 constitute 42 per cent of total inhabited villages with 26.0 per cent of the district rural population. Large Size Villages with population 2,000 - 4,999 are 27.5 per cent of total inhabited villages with 44.1 per cent of the district rural population and the largest sized villages with population 5,000 and above are 6.5 per cent of the total inhabited villages and having 22.7 per cent of the districts rural population. Exceptionally largest size villages in the district with population 10,000 and above is only one in number accommodates 11,187 or 4.3 per cent of the population of the district.

TABLE 4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total		Population	Percentage distribution of population
	number of villages in each population density range	Percentage of villages in each population density range		
1	2	3	4	5
0-10	6	4.3	568	0.2
11-20	5	3.6	2,202	0.8

301-500	13	9.4	33,574	12.9
501 +	39	28.3	109,828	42.2
Not known	0	0.0	0	0.0
District				
Total:	138	100.0	260,267	100.0
Population Density (Rural) of the district:			149	

The villages are distributed in 8 different ranges of population in the South Goa district. The highest number of villages are found in the population range 501+, in 39 villages with the percentage of 28.3 and covering 109,828 half the rural population of the district with the percentage distribution of 42.2 per cent, followed by the population ranges 101-200.

Covering 24 villages with 17.4 per cent, the lowest is recorded in the population range 11-20. Covering only 5 villages with 3.6 per cent and the population of 2202 with 0.8 per cent.

Sex Ratio :

The table below presents sex ratio of state and district, 1901-2001.

TABLE 5
SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,091	N.A.	N.A.	1,074	N.A.	N.A.
1911	1,108	N.A.	N.A.	1,091	N.A.	N.A.

1951	1,128	1,145	1,017	1,107	1,119	1,003
1961	1,066	1,081	980	1,041	1,052	952
1971	981	1,025	864	959	1,033	807

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1981	975	1,010	906	971	1,022	894
1991	967	993	930	971	1,008	936
2001	961	988	934	972	1,018	937

Note: Sex ratio has been defined here as the number of females per 1000 males.

The sex ratio has been defined as the number of females per 1000 males. In the total population of South Goa district there were 2,98,746 males and 2,90,349 females. The sex ratio works out to 972 females for every 1000 males corresponding to State average of 961. Generally, rural areas have higher population of females per 1000 males than the urban areas which is also confirm by South Goa district, the sex ratio of the rural and urban areas of the district is 1017 and 937 respectively. Among the two districts South Goa occupies the first place.

The following table present Sex Ratio for talukas of the district in 2001.

TABLE 6
SEX RATIO BY TAHSILS, 2001

Sr. No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Mormugao	893	1,026	868
2	Salcete	1,019	1,065	986
3	Quepem	973	975	970
4	Sanguem	967	964	980
5	Canacona	975	996	921
District Total:		972	1,018	937

Within the district the sex ratio varies from Taluka to Taluka. It is highest in Salcete 1019 favoring females, 975 in Canacona and 973 in Quepem which is higher than the district average. In the remaining two talukas it is 967 in Sanguem and the lowest in Mormugao 893 both below the district average of 972.

From the table, it is observed that the rural sex ratio is higher than the urban sex ratio in most of the talukas except Sanguem. Taluka-wise also rural sex ratio vary from Taluka to Taluka. In Salcete and Mormugao the sex ratio is 1065 and 1026 respectively, females for 1000 males, which is in favour of females. The lowest rural sex ratio is found in Canacona 996, Quepem 975 and Sanguem 964, which is below district rural sex ratio 1018.

Chicalim 731 females for every 1000 males. The district urban sex ratio is 937 females for every 1000 males, is exceeded in 11 towns and 6 towns have sex ratio below district average.

The following table presents sex ratio of the population in the age group 0-6 for Tahsils, 2001.

TABLE 10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6
FOR TAHSILS, 2001

Sr. No.	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	Mormugao	Total	16,887	8,919	7,968	893
		Rural	2,548	1,329	1,219	917
		Urban	14,339	7,590	6,749	889
2	Salcete	Total	28,428	14,528	13,900	957
		Rural	11,485	5,742	5,743	1,000
		Urban	16,943	8,786	8,157	928
3	Quepem	Total	8,711	4,528	4,183	924
		Rural	4,702	2,428	2,274	937
		Urban	4,009	2,100	1,909	909
4	Sanguem	Total	7,253	3,661	3,592	981
		Rural	5,986	2,998	2,988	997
		Urban	1,267	663	604	911
5	Canacona	Total	4,560	2,346	2,214	944
		Rural	3,357	1,744	1,613	925
		Urban	1,203	602	601	998
District Total:	Total	65,839	33,982	31,857	937	
	Rural	28,078	14,241	13,837	972	
	Urban	37,761	19,741	18,020	913	

As per 2001 Census it is quite interesting to examine the sex ratio among the population of 0-6 years in the district. The total 0-6 population in the district is 65839 or 11.18 per cent of the district's total population of these 33,982 were males and 31,857 were female children. There is deficit of 2125 females for equity of females with male population. The sex ratio among children age group 0-6 works out to 937 which is lower than district's average sex ratio of 972. Rural and urban sex ratio in children population works out to 972 and 913 respectively as against 1018 and 937 in the rural and urban population in the district.

Among the talukas Sanguem, Salcete and Canacona have recorded sex ratio higher than the district average which works out to 981, 957 and 944 respectively. In the remaining two talukas, it is found to be lower being 924 in Quepem and 893 in Mormugao. As regards rural sex ratio in the district

the highest rural sex ratio is recorded by Salcete being 1000 and lowest in Mormugao being 917. The Urban Sex ratio in child population varies between 889 to 998, the highest being reported by Canacona and the lowest in Mormugao talukas.

The following table presents sex ratio of population in the Age group 0-6 for C.D. blocks 2001.

TABLE 11
SEX RATIO OF POPULATION IN THE AGE GROUP
0-6 FOR C.D. BLOCKS, 2001

Sr. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	Mormugao	4,174	2,185	1,989	910
2	Salcete	9,859	4,886	4,973	1,018
3	Quepem	4,702	2,428	2,274	937
4	Sanguem	5,986	2,998	2,988	997
5	Canacona	3,357	1,744	1,613	925
District (Rural)					
Total:		28,078	14,241	13,837	972

At C.D. Block level for rural areas the sex ratio among children in age group 0-6 varies from 910 in Mormugao C.D. Block to 1018 in Salcete C.D. Block. The district average is 972 and is exceeded in C.D. block Salcete 1018 and Sanguem 997. The lowest sex ratio is observed in Mormugao 910.

Sex Ratio (Rural) for District:

Sex ratio has been arranged into nine groups viz. (i) Less than 700 (ii) 700 – 749 (iii) 750 – 799 (iv) 800 – 849, (v) 850-899 (vi) 900 – 949 (vii) 950 – 999 (viii) 1000 – 1099 and (ix) 1100 and above.

The following table presents sex ratio of rural population in the age group 0-6 by Ranges, 2001.

TABLE 12
SEX RATIO OF RURAL POPULATION IN THE AGE
GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages		Percentage distribution of population 2001	Percentage of population
	of villages	Percentage of villages		
Less than 700	14	10.1	563	2.0
700-749	1	0.7	145	0.5
750-799	5	3.6	376	1.3
800-849	11	8.0	2,164	7.7
850-899	17	12.3	4,615	16.4
900-949	9	6.5	2,586	9.2
950-999	17	12.3	5,404	19.2

recorded in South Goa District. The proportion of Scheduled Tribes to total population of the district was only 0.05 per cent as compared to 0.04 per cent for the State. Of the total scheduled tribe population in the district 72 are found in rural areas and 213 in urban areas. The proportion of scheduled tribes to total rural population of the district works out to only

0.03 per cent and proportion of Scheduled Tribe to total urban population of the district works out to 0.06 per cent.

The following table presents the number and percentage of Scheduled Castes and Scheduled Tribes population in Tahsil, 2001.

TABLE 14
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Sr. No.	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Mormugao	Total	144,949	1,877	91	1.3	0.1
		Rural	24,587	77	-	0.3	0
		Urban	120,362	1,800	91	1.5	0.1

		Rural	53,074	621	8	1.2	0
		Urban	11,006	246	5	2.2	0
5	Canacona	Total	43,997	232	28	0.5	0.1
		Rural	32,096	210	28	0.7	0.1
		Urban	11,901	22	-	0.2	0
District Total:		Total	589,095	6,708	285	1.1	0
		Rural	260,267	1,760	72	0.7	0
		Urban	328,828	4,948	213	1.5	0.1

The population of Scheduled Caste is spread in all the talukas of the district. Numerically Salcete Taluka has recorded the highest number of Scheduled Caste persons 3,107 followed by Mormugao 1,877 and the lowest number of Scheduled Caste is recorded in Canacona Taluka 232. The other talukas in population size are Sanguem 867 and Quepem 625 persons.

The percentage of scheduled caste population to total population of the district, works out to 1.1. per cent exceeds in the talukas of Sanguem 1.4 per cent, Mormugao 1.3 per cent and Salcete 1.2 per cent. It is less than the district average in Quepem 0.8 per cent and Canacona 0.5 per cent.

Among the rural areas of the talukas, numerically Sanguem has recorded the highest number of scheduled caste persons 621, followed by Salcete 579,

Quepem 273, Canacona 210 and the lowest recorded in Mormugao 77 persons. In terms of percentage of Scheduled Caste population to total rural population of respective talukas the highest is recorded in Sanguem taluka 1.2 per cent and the lowest in Mormugao 0.3 per cent.

In the urban areas of the district, the highest number of Scheduled Caste population is recorded in Salcete being 2,528 or 51.1 per cent followed by 1,800 or 36.4 per cent and the lowest in Canacona being only 22 persons or 0.4 per cent.

In terms of percentage of scheduled caste population to total urban population of the respective talukas, Salcete tops the list with 1.7 per cent followed by Mormugao 1.5 per cent both talukas executing the district average of 1.5 per cent in remaining three talukas of Quepem, Sanguem and Canacona it is below the district average.

TABLE 17
PROPORTION OF SCHEDULED TRIBES
POPULATION TO TOTAL POPULATION IN
VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage

Viz. Sao Jose De Areal CT and Cuncolim M CI recording Sex Ratio of 1500 each, followed by Quepem with 1250 and Margao Urban Agglomeration and Margao M CI reporting 1048 each in the remaining town it is favouring males. The Sanvordem CT reported a very poor sex ratio of 250 for the scheduled tribe population.

Literacy:

Literacy is one of the important characteristics on which information is obtained of every individual in the Census. For the purpose of Census a person aged 7 years and above who can both read and write with understanding in any language is treated as literate. A person who can only read but cannot write is not literate.

The ability to read and write with understanding is not ordinarily achieved until one had some schooling or at least some time to develop these skills. It was decided therefore at the 1991 census that all children in the age group 0-6 will be treated as illiterate. The same criterion has been retained at the Census of India 2001 also. It is not mandatory that to be treated as literate, a person should have received any formal education or acquired any minimum educational standard. Literacy status can be acquired through adult literacy classes or by attaining any non formal educational system, persons who unfortunately blind and can read in Braille were also treated as literates in Census.

In census till 1981, it was customary to work out the literacy rate taking into account the total

population, since literacy rate is more meaningful, if the sub-population in the age group 0-6 is excluded from the total population, it was decided in 1991 to use the term literacy rate for the population relating to seven years and above. The same concept has been continued in the 2001 Census also.

As per 2001 Census, South Goa district has reported 4,18,894 persons as literate. They constitute 80.1 per cent of total population of the district. The literacy rate of south Goa district is lower than the State average of 82.0 per cent and occupies second position among the two districts of the State. The literacy rate for males works out to 86.3 per cent compared to 88.4 per cent for the State and corresponding rate for females works out to 73.7 as compared to 75.4 per cent for the State.

Rural and Urban literacy:-

The rural literacy rate for the district works out to 76 per cent. Among the rural males 83.2 per cent and among females 69 per cent were literates thus showing a gap of 14.2 per cent between male and female literacy rate in rural areas.

The literacy rate in urban areas of the district are generally higher than that observed in rural areas, the literacy rate of urban population of the district works out to 83.3 per cent. The literacy is higher among urban males 88.7 than among urban females 77.6 per cent. The gap in male female literacy is 11.1 per cent.

The table below presents number and percentage of literates and illiterates by Tahsils 2001.

TABLE 21
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

found in C.D. block Quepem 61.4 per cent. The gap between male and female literacy varies between 11.6 to 19.1 percentage points it is observed more in three C.D. block-wise viz. Sanguem 19.1, Canacona 15.7 and Quepem 15.4 per cent. It is comparatively lower in C.D. blocks Mormugao 12.7 and Salcete 11.6 per cent.

In the districts rural tables of South Goa 83,813 persons were reported as illiterates during the 2001 census. The C.D. Block-wise break-up shows C.D. Block Salcete has recorded 27,132 persons illiterates followed by Sanguem 18,133, Quepem 15,579, Mormugao 11,786 and the lowest 11,183 illiterates are recorded in C.D. block Canacona.

The following table presents distribution of villages by literacy rate range, 2001.

TABLE 23**DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001**

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	1	17	-
1-10	-	-	-	-
11-20	-	-	-	-
21-30	-	-	-	-
31-40	-	-	-	-
41-50	1	1	471	-
51-60	14	10	14,233	5
61-70	30	22	39,728	15
71-80	50	36	132,303	51
81-90	40	29	73,215	28
91-99	2	1	300	-
100	-	-	-	-
District Total:	138	100	260,267	100
Literacy rate for District:	80.1			

It may be seen from the statement above that there is only one village where in not a single literate person is recorded. The population of this village is 17 persons. In the literate range 41-50 there is only one village with population of 471 or 0.2 per cent, the literacy rate 51-60 there are 14 villages or 10.11 per cent of total villages of the district and in the range 61-70 there are 30 village or 21.7 per cent, covering 15.3 per cent of the total population of the district, in the range 71-80 there are 50 villages or 36.2 per cent of villages covering 50.8 per cent population of the district and in the next higher range of 81-90 there are 40 villages or 29.00 per cent covering 28.1 per cent population. In the range 91-99 only 2 villages or 1.4 per cent with population of 300 and not a single village is reported in the range 100. It is interesting to note that the majority of villages out of 138 inhabited villages 120 or 87 per cent have literacy rate ranging 61-90 per cent, these villages covers 94.2 per cent of the total population of the district.

So far as rural literacy rates are concerned the district is quite advanced in literacy with 80.1 per cent that means out of every 10 persons 8 are literates in rural areas.

The following table presents number and percentage of literates and illiterates by sex in urban agglomeration/towns, 2001.

TABLE 24**NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001**

Sr. No.	Name and urban status of UA/Town	Number of literates and illiterates									Gap in male-female literacy rate

average, in the remaining four C.D. blocks it is lower than the district rural average. The gap between male and female literacy varies between 16 to 28.

The following table presents distribution of villages by literacy rate range for scheduled caste population 2001.

TABLE 26
DISTRIBUTION OF VILLAGES BY LITERACY
RATE RANGE FOR SCHEDULED CASTES
POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	6	8.0	13	0.7
1-10	-	-	-	-
11-20	1	1.3	24	1.4
21-30	2	2.7	48	2.7
31-40	7	9.3	67	3.8
41-50	9	12.0	148	8.4
51-60	4	5.3	95	5.4
61-70	11	14.7	241	13.7
71-80	20	26.7	693	39.4
81-90	11	14.7	409	23.2
91-99	1	1.3	15	0.9
100	3	4.0	7	0.4
District Total:	75	100.0	1,760	100.0
Literacy rate for District (Rural)			69.4	

It may be seen from the above table that in the Scheduled Caste Literacy rate 11-20 and 91-99 there are one village each or 1.3 per cent, in the range 21-30 there are 2 villages or 2.7 per cent, 4 villages in the range 51-60 with 5.3 per cent. In the range 31-40 there are 7 villages or 9.3 per cent, 9 villages in the range 41-50 with 12.00 per cent, 11 villages each in the range of 61-70 and 81-90 with 14.7 per cent and the highest number of villages are recorded in the ranges 71-80 i.e. 20 villages or 26.7 per cent with the scheduled caste population of 693 and 39.4 per cent distribution of population. 6 villages are recorded in the literacy range 0 with 8.0 per cent and 3 villages are recorded in the range 100 with hundred percent literacy. The scheduled castes literacy rate in the district is 71.4 per cent that means out of every 10 persons 7 are literates.

The following table presents number and percentage of scheduled casts literates and illiterates by sex in towns., 2001.

TABLE 27
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

South Goa (Urban)		106	62	44	107	52	55	57.6	63.3	51.2	12.1

The scheduled tribes population is found in the 8 towns of the district. The literacy rate in the towns varies from 22 to 100 per cent. The three towns in the district has reported 100 per cent literacy viz. Benaulim CT, Cuncolim M Cl. and Sanvordem CT followed by Davorlim CT and Quepem M Cl. 87.5 per cent each, Mormugao M Cl. 80.2 per cent, all above district average of 57.6. Only two towns namely Sao Jose De Areal with 50 per cent and least in Margao M Cl. being 22.7 are below the district average. The male literacy is reported 100 percent in four towns and one town Mormugao M Cl. has reported 91.3 per cent only town with low literacy is Margao M Cl. with 20.5 per cent.

Female literacy is reported 100 per cent in 3 towns Benaulim, Cuncolim and Sanvordem. Out of the 8 towns 7 has reported literacy rate above the district average of 51.2 per cent and Margao M Cl. With 25 per cent is below district average.

The gap between male and female literacy rate is favouring females in Benaulim CT (-100), Sao Jose

De Areal CT (-66.7) and Margao M Cl. (-4.5). It is high in Mormugao M Cl. And Quepem M Cl. 25 per cent and Davorlim CT reporting 20 per cent. Gap is shown 0 per cent in Cuncolim M Cl. And Sanvordem CT as the male and female literacy is observed equal.

Distribution of workers and non-workers:-

It is census tradition to present data on workers and non-workers on the basis of census concepts workers adopted during the respective census. The workers are further classified as main workers, marginal workers and non-workers. The definition of the term 'work', work participation rate and the concept of workers, non-workers categories adopted in the 2001 census is discussed in the volume under V Concepts and definition.

The following table present number and percentage of Main workers, marginal workers and non-workers by sex in tahsils, 2001.

TABLE 31
NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Sr. No.	Name of Tahsil	Persons / Males / Females	Total population	Total workers (Main and marginal workers)								Non workers	
				Main workers		Marginal workers		and marginal workers)		Non workers			
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

		Females	36,507	6,644	18.2	3,384	9.3	10,028	27.5	26,479	72.5		

Sanguem Taluka being 56.5 per cent and the lowest was recorded in Salcete taluka being 50.8 per cent. In respect of females the highest percentage of workers was recorded by Quepem taluka 27.5 per cent and Mormugao taluka with 14.7 per cent is the lowest.

Non-workers:

Non-workers who did not work at all during the last year prior to the date of enumeration. They comprised students, persons engaged in household duties, dependent, pensioners, beggars and others. According to 2001 census 3,73,868 persons were recorded as non-workers, non-workers constituted 63.5 per cent of the total population of the district as compared to 61.1 per cent of the State. Sex-wise the

proportion of male non-workers is considerably lower being 47.1 per cent when compared to female non-workers 80.3 obviously, indication of non participation in economic activity by males.

Among the talukas the proportion of the non-workers the highest in Salcete 66 per cent followed by Mormugao 64.5 per cent, Canacona 59.9 per cent, Sanguem 58.4 per cent and Quepem has reported the lowest with 59 per cent. Among the males, proportion varies between 43 to 49 per cent and the proportion varies between 72 to 85 per cent among females.

The following table presents number and percentage of Main workers, Marginal workers and non-workers by sex in CD Blocks, 2001.

TABLE 32
NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Males			129,002	57,560	44.6	9,483	7.4	67,043	52.0	61,959	48.0
Females			131,265	21,077	16.1	10,823	8.2	31,900	24.3	99,365	75.7

Main Workers:

In the total population of 2,60,267, 78,637 are main workers. Their percentage to total population works out to 30.2 per cent for the district. The percentage of male main workers works out to 44.6 per cent and female main workers works out to 16.1 per cent. The percentage of female main workers is found to be considerably lower than the male main workers.

Among the C.D. blocks of the district the percentage of main workers to total population of respective C.D. blocks varies from one C.D. block to another. The percentage of main workers is found to be higher than the district average of 30.2 in two

C.D. blocks viz. C.D. block Quepem 33.9 and C.D. block Sanguem 32.6. The other C.D. blocks are below the district average, C.D. block Canacona 32.0, Mormugao 28.7 and Salcete 27.3 per cent. The highest percentage of male main workers is recorded in C.D. block Sanguem 48.5 per cent and the lowest work participation rate is found in C.D. block Salcete 42.1 percent. In case of female the percentage of main workers varies from 13.4 to 20.8 per cent C.D. block Quepem 20.8 per cent, C.D. block Canacona 19.8 and C.D. block Sanguem 16.3 per cent are above the district average of 16.1 per cent and C.D. block Mormugao and C.D. block Salcete 13.4 are below the district average.

ANALYTICAL NOTE

Sr. No.	Name and urban status of UA / Town	Persons/ Males/ Females	Total Population	(Main and marginal workers)

Note: Percent of Worker to total worker are given in brackets

The distribution of the total workers (Main and Marginal) on the four industrial categories is as follows. Cultivators 18,894 or 8.8 per cent, Agricultural labourers 13,590 or 6.3 per cent, workers in household industry 5,525 or 2.6 per cent and others 1,77,218 or 82.3 per cent. Agricultural sector is declining in the district and other category is absorbing a major proportion of working force.

The main and marginal workers are distributed in all the four industrial categories in varied proportions. However, the category of other workers play an important role in the field of economic activity by engaging the highest percentage of total workers being 82.3 per cent. Cultivators from 8.8 per cent to total workers following agricultural labourers 6.3 per cent and household industry workers 2.6 per cent. Agricultural sector engage only 15.1 per cent of the total working force of the district.

Sex-wise comparison of distribution of total workers in the four industrial categories brings out the fact percentage of male workers is considerably

higher 87.2 per cent than female workers 69.0 per cent in other workers. However, in case of cultivators, Agricultural labourers and Household industry there is a female predominance absorbing 14.8, 12.9 and 3.3 per cent respectively as against for males 6.6, 3.9 and 2.3 per cent respectively.

Among the talukas, the four categories of workers are distributed in varied proportions. It is observed that in all the talukas, the highest percentage of workers are engaged as other workers. Mormugao tops the list with 96.1 per cent, followed by Salcete 90.5 per cent and is higher than the district average and the other three talukas are below the district average and the lowest being recorded in Canacona 54.8 per cent, the same position holds good for male and female. The talukas of Quepem, Sanguem and Canacona proportionately engages more male and female workers in cultivation, agricultural labour and household industry as could be seen from table 34.

The below table presents distribution of workers by sex in four categories of economic activity in C.D. blocks, 2001.

TABLE 36
DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN
AGGLOMERATIONS / TOWNS , 2001

Serial number	Name and urban status of UA / Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

		Females	3,044	505 (16.6)	54 (10.7)	43 (8.5)	14 (2.8)	394 (78.0)
19	Canacona (M Cl)	Persons	11,901	4,075 (34.2)	105 (2.6)	49 (1.2)	88 (2.2)	3,833 (94.1)
		Males	6,196	3,236 (52.2)	87 (2.7)	20 (0.6)	76 (2.3)	3,053 (94.3)
		Females	5,705	839 (14.7)	18 (2.1)	29 (3.5)	12 (1.4)	780 (93.0)
District (Urban) Total:		Persons	328,828	116,284 (35.4)	1,553 (1.3)	2,078 (1.8)	2,942 (2.5)	109,711 (94.3)
		Males	169,744	90,920 (53.6)	826 (0.9)	1,013 (1.1)	1,915 (2.1)	87,166 (95.9)
		Females	159,084	25,364 (15.9)	727 (2.9)	1,065 (4.2)	1,027 (4.0)	22,545 (88.9)

The town-wise distribution of the total workers in 17 towns of the district including Mormugao Urban Agglomeration and Margao Urban Agglomeration in the four industrial categories is as follows: Cultivators (1.3), Agricultural labourers (1.8), workers in household Industry (2.5) and other workers (94.3). Sex-wise comparison of distribution of total workers in four industrial categories brings out the fact that percentage of male workers is considerably higher (95.9) per cent than female workers (88.9) in other workers. However, in case of cultivators, Agricultural labourers and Household Industry there is a female predominance absorbing 2.9, 4.2 and 4.0 respectively as against for male 0.9, 1.1 and 2.1 per cent respectively.

It is observed that in all the 17 towns, the highest percentage of workers engage in other works are Mormugao M Cl (98.7), Chicalim CT (98.6), Margao M Cl. (96.8), Sancoale CT (96.5), Aquem CT (96.0) Navelim CT (95.8) and Davorlim CT (95.2) have recorded other work participation rate above the district average of 94.3 and the remaining 10 towns have recorded below the district average. The lowest other work participation rate is found in Quepem M Cl. (74.9) per cent. Mormugao M.Cl. (99.1) and Chicalim CT (98.7) records the highest other work participation rate among the males and the lowest is recorded in Quepem M Cl. (83.4) per cent. In case of female the highest is recorded in Chicalim CT (98.5) and the lowest is in Quepem M Cl. (55.8) per cent.

Out of the 138 inhabited villages of the district 120 accounting for 87 per cent had at least one Primary School each located within the villages and thus offer educational facilities at least at the minimum level to the villages concerned while the villages of Canacona block had 100 per cent coverage in this respect, it ranged between 84 to 94 per cent in rest of the blocks. It is observed that on an average South Goa District had 3.1 Primary School for every inhabited village in the district. The corresponding figures block wise shows that Canacona topped the list with 12.3 and the other C.D. blocks varies between 2.6 to 3.6 the least being recorded in C.D. block Salcete 2.6,

98 middle schools and 77 high schools were reported in 61 and 57 villages respectively in the district. The average number of schools per inhabited village works out to 0.7 and 0.6 for Middle school and High School respectively. Block-wise their average varied between 2.6 for Canacona and 0.9 for Mormugao in respect of middle schools and between 1.7 for Canacona and 0.4 in respect of C.D. blocks Quepem and Sanguem in respect of high schools. There were 11 higher secondary schools in the district of which four in C.D. block Salcete 3 in C.D. block Mormugao and two each in C.D. blocks Sanguem and Canacona. There were 2 colleges one each in C.D. block Mormugao and Salcete block Canacona block topped the list in the district in terms of average number of institution for inhabited village.

Medical facilities of one type or the other were available in 74 villages or 54 per cent of the total inhabited villages in the district. Canacona block have 100 per cent villages with medical facility and the lowest 33.3 per cent reported in the C.D. blocks Quepem and Sanguem the other C.D. blocks of Mormugao and Salcete reported 75.0 and 82.4 per cent respectively.

As regard improved drinking water 135 villages have this facility within the village it self. Almost 98 per cent of the villages in the district have improved drinking water supply i.e. tap water/hand pump/tube well etc. In fact, in three blocks viz. Mormugao, Salcete and Canacona 100 per cent of the villages have this water facility. In C.D. blocks Quepem 97.2 and Sanguem 95.6 per cent villages have improved drinking water facility.

Postal facilities were available in 44 per cent of the villages in South Goa district block wise the

proportion of villages with postal facilities was highest in Canacona 100.00 per cent and the lowest in Sanguem 28.9 per cent in the district.

Telephone facilities is available to 38 per cent villages in the district. The villages in Canacona and Salcete with 71 per cent and Mormugao with 63 per cent are better placed in this facility Quepem block and Sanguem block has 17 and 16 per cent villages availing telephone facility.

Transport and communication facilities mainly in the form of public transport by modes such as bus services, rail facility and navigable waterways are available in 94 per cent of the villages in the district. While 100 per cent of the villages of the Canacona block was enjoying such facility, 97 per cent in respect of Salcete, 94 per cent in respect of Quepem and Mormugao and 89 per cent in Sanguem block. Bus transport was the most common public transport in the district.

Banking facility is available to about 28 per cent villages in the district. Canacona block is better served in this respect with 57 per cent of villages having banks followed by Salcete 47 per cent and Mormugao 44 per cent and the lowest number of banks in the district being in Quepem 11 per cent and followed by Sanguem 18 per cent.

Agricultural credit societies are found only in 18 per cent villages of the district. Salcete block with 32 per cent has the highest percentage of agricultural credit societies followed by Mormugao 31 per cent, Sanguem 13.3 per cent, Quepem 8.3 per cent and the Canacona block was not having any agricultural Credit Societies in any of the villages.

The facility of approach to village by pucca road i.e. road which could be used all the year round were available in the case of 95 per cent of the villages in the district. The C.D. blocks Mormugao, Salcete and Canacona enjoys 100 per cent facility followed by Quepem 9.7 per cent. In Sanguem block about 13 per cent of the villages had no approach by pucca roads.

Power supply was available in 99 per cent of the villages in the district only one inhabited village in Sanguem block did not have power supply.

The proportion of rural population served by different amenities is presented in Table 38.

The above table clearly indicates that a majority of the rural population of this district are well served by important amenities like education, medical, improved drinking water, post offices, transport and communication approaching pucca roads power supply etc. For the district as a whole the population served by educational facilities was 97 per cent, medical 84 per cent, improved drinking water almost 100 per cent, post offices 75 per cent transport and communication 99 per cent, bank 56 per cent agricultural credit societies 36 per cent approach by road and power supply 99 and 100 per cent respectively, telephone facility is availed by 69 per cent. As could be seen from the above table, among the blocks low coverages was observed in all blocks particularly in respect of post office, telephone, banks and agricultural credit societies.

In the village directory for the village for which a particular amenity was not available, the distance in broad ranges viz. less than 5 kms, 5 10 kms. And above 19 kms. Of the nearest place where that particular amenity was available has been indicated.

Table 39 presents the distribution of such villages by distance ranges.

Distribution of villages not having certain amenities is presented in table 39.

TABLE 39
DISTRIBUTION OF VILLAGES NOT HAVING
CERTAIN AMENITIES, ARRANGED BY DISTANCE

Village not having the amenity of	Distance range of place from the villages where the amenity is available			Total (Col. 2 - 4)
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	
1	2	3	4	5
1. Education :-				
(a) Primary School	16	2	0	18
(b) Middle School	49	27	1	77
(c) Degree College	13	52	71	136
2. Medical:-				
(a) Hospital	6	32	99	137
(b) PHC	26	62	45	133
3. Post Office	44	24	9	77
4. Telephone	33	32	21	86
5. Bus Service	8	1	1	10
6. Banks				
(a) Commercial Bank	48	37	15	100
(b) Cooperative Bank	31	65	31	127
7. Agricultural Credit Societies	42	43	28	113

Out of 138 villages in the district, 18 villages did not have primary schools, 77 villages did not have middle schools and in 136 villages, there is no degree

college. Majority of villages where there is no primary schools and middle schools have to cover a distance of less than 5 kms. However, in case of degree education, a majority of the villages have to cover 5-10 kms. And 10 + kms. distance to avail the facility.

In respect of medical amenity, 137 villages did not have hospitals within the village and a majority of the villages had to cover 10+ kms. distance. Primary Health Center was not available for 133 villages. Majority of these villages had to cover 5-10 kms. distance and 10+ kms. distance to avail the facility.

Postal facilities were not locally available in 77 villages in the district of these only 9 villages had to cover a distance of more than 10+ Kms. to reach the nearest place with post office, 24 villages were located in the distance range of 5-10 kms. and the remaining 44 villages had postal facilities within 5 km distance.

Telephone facility was not available in 86 villages, however, for a majority of villages 33 and 32 avail a facility within a distance of less than 5 kms. and 5-10 km. Only 21 villages had to cover a distance of 10+ kms.

Bus services were locally not available to only 10 villages and 8 villages had to cover a distance of less than 5 km and 1 village each had to cover a distance of 5-10 km. and 10+ kms. to avail the facility.

Out of 138 inhabited villages 100 villages did not have commercial banks and 127 villages did not have cooperative banks. To avail the services of commercial banks 15 villages had to cover a distance of 10+ kms., 37 villages had to cover 5-10 kms. distance, however, a majority of 48 villages had to cover less than 5 kms. distance. In case of cooperative banking facility, 31 villages each had to cover 10+ kms. distance and less than 5 kms. distance and a majority of 65 villages had to cover 5-10 kms. distance to avail the facility.

Agricultural credit societies are not established in 113 villages out of 138. To avail the facility 43 villages had to cover 5-10 kms. distance and 42 villages had to cover a less than 5 kms. and the remaining 28 villages had to cover 10+ kms. distance to avail the facility.

The distance from the nearest statutory town and availability of different amenities is presented in table 40.

In South Goa 28 per cent of the Villages were in the population range less than 2000 – 4999 followed by 23 per cent each in the population range less than 499 and 1000-1999 and 19 per cent in the population range 500-799 and 7 per cent of the villages in the population range 5000-9999 and 1 per cent in the range of 1000+ as could be observed from the above table, larger the population size of the villages, larger the extent of availability of different amenities thus the proportion of villages having different amenities generally increased with the size of the population in the villages above 5000 population almost all the amenities were available.

Table 42 presents block-wise percentage of cultivated area to total area and the percentage of irrigated area to total cultivated area.

TABLE 42
DISTRIBUTION OF VILLAGES ACCORDING TO
LAND USE, 2001

Sr. No.	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
				5	6
1	Mormugao	16	7,440	54.3	5
2	Salcete	34	16,998	64.7	10
3	Quepem	36	28,156	37.8	2.5
4	Sanguem	45	77,777	26.7	3.5
5	Canacona	7	33,301	39.7	1
District Total:		138	163,672	36.4	4.1

Note : - Cultivable area = irrigated area + unirrigated area

The proportion of cultivated area to total area works out to 36 per cent for the district. Block wise this proportion ranges between 26 per cent for Sanguem and 64 per cent for Salcete. The proportion of irrigated area to total cultivated area was very low for the district as a whole being only 4 per cent. Block-wise Salcete topped the list with 10 per cent and the lowest in Canacona block with only 1 per cent.

The land use data presented in the village Directory are based on Cadastral Survey results, which relates to the year 1977. The above data, being more than 22 years old, do not depict the present position. As such the same may be used with due caution.

Town Directory:

As already explained under Section V, the Town Directory comprising a set of seven statements presented data on Socio-economic and administrative

aspects of each town in the district. A brief analysis of the data presented in these statements is attached below:

Statement I : States and Growth History

There are 17 towns in the district of which 7 are municipal towns and the remaining 10 are census towns in 2001 census as compared to 13 in 1991, out of which 7 were municipal towns. As many as 6 new census towns have been formed in 2001.

Statement I of the Town Directory depicts the growth history of the towns for the period 1900-2001.

The progress in the number of towns in the district since 1900 is given below:

Census Year	No. of Towns	Name of towns(s)
1	2	3
1921	1	Vasco-da-gama
1931	1	Vasco-da-gama
1940	2	Vasco-da-gama, <i>Margao</i>
1950	2	Vasco-da-gama, <i>Margao</i>
1960	5	Vasco-da-gama, <i>Margao</i> , <i>Sanguem</i> , <i>Quepem</i> , <i>Chauri</i>
1971	5	<i>Margao</i> , <i>Mormugao</i> , <i>Sanguem</i> , <i>Quepem</i> , <i>Chauri</i>
1981	7	<i>Margao</i> , <i>Mormugao</i> , <i>Sanguem</i> , <i>Quepem</i> , <i>Chauri</i> , <i>Cuncolim</i> , <i>Curchorem</i>
1991	13	<i>Benaulim</i> , <i>Canacona</i> , <i>Chicalim</i> , <i>Chinchinim</i> , <i>Cortalim</i> , <i>Cuncolim</i> , <i>Curchorem-Cacora</i> , <i>Margao</i> , <i>Navelim</i> , <i>Mormugao</i> , <i>Quepem</i> , <i>Raia</i> , <i>Sanguem</i>
2001	17	<i>Mormugao</i> , <i>Chicalim</i> , <i>Sancoale</i> , <i>Margao</i> , <i>Aquem</i> , <i>Navelim</i> , <i>Cuncolim</i> , <i>Davorlim</i> , <i>Benaulim</i> , <i>Varca</i> , <i>Chinchinim</i> , <i>Sao Jose De Areal</i> , <i>Sanguem</i> , <i>Sanvordem</i> , <i>Quepem</i> , <i>Curchorem-Cacora</i> , <i>Canacona</i> .

Note : Places treated as towns for the first time are shown in italics.

As could be seen from the above table till 1931 there was only one town in the district and in 1940 there were two towns. However, no population data in respect of these towns are available for the decadal censuses up to 1940. As such, town-wise population data have been presented in Statement – I from 1950 census onwards. For the district as a whole the urban population has steadily increased from 0.22 lakh in 1950 to 3.28 lakh in 2001 and the proportion of urban population to total population has also steadily increased during the above period from 10.19 per cent to 55.82 per cent as could be seen from the table given below:

It may be seen from the Statement III that a major proportion of the receipts of the towns were from taxes, government grants and property income. As regards expenditure the major proportion was generally spent on General Administration followed by Public works and other works.

Margao is the district headquarter of South Goa district being the most populous town in the district had the highest receipts (Rs.3644.58 lakhs) followed by Mormugao (Rs.2052.36 lakhs) and Sancoale (Rs.1145.75 lakhs). Among the town Curcholem-Cacora had the least receipts (Rs. 8.48 lakhs) in the matter of expenditure also Margao topped the list

(Rs.3832.08 lakhs) followed by Mormugao (Rs.2620.58 lakhs and Sancoale (Rs.1343.75 lakhs). The least expenditure had been incurred by Curcholem-Cacora town (Rs.4.94 lakhs) However, a comparison of the per capita figures under receipts and expenditure show that it was the highest for Sanguem (Rs.86) followed by Sancoale (Rs.73) and Margao (Rs.46) and the lowest was in Curcholem-Cacora (Rs.0.4) in respect of receipts and expenditure wise the highest was Sancoale (Rs.86) followed by Sanguem (Rs.81) and Canacona (Rs.63) and the lowest was (Rs.0.2) in Curcholem-Cacora. The following table - 43 shows the per capita receipts and expenditure under broad groups.

TABLE 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sr. No.	Class, name & urban status of the Town	Per capita receipt Total	Per capita expenditure

Statement – IV Civic and other amenities, 1999

Information on amenities such as road length, System of Sewerage, number of latrines, method of disposal of night-soil, water supply, fire fighting services, electrification etc. are presented in this statement. It also presents 2001 population and scheduled caste and scheduled tribe population.

The road length in the town varied between 210 kms. in Margao and 11 kms. in Sanguem and 16 kms each in Navelim and Chinchinim. In terms of road length per 1000 inhabitants Varca CT topped the list with a ratio of 10-28 Kms. and the same was vary low in Mormugao being 0.29 kms. respectively.

As regards system of sewerage open surface drains have been provided in all the towns in the district. Only Mormugao Town has underground sewerage system. The information provided includes private latrines and public latrines. As regards, method of disposal of night soil, with the exception of Mormugao town where sewerage system is provided, the most common system is septic tank and pit system.

All the towns in the district were provided with water supply i.e. tap water and well. Fire fighting services were available in four town viz. Mormugao, Margao, Curcholem-Cacora and Canacona.

Facility for higher education at college/university level is provided in the towns of Margao, Cuncolim, Navelim, Quepem and Canacona. However, Margao town the district headquarter of South Goa District tops the list as out of seven degree colleges in the district three are located in this town. The other institutions in the towns provide diploma/certificate courses in professional and technical courses. The district only Engineering College is located at Verna of Salcete taluka 10 kms. away from Margao town.

Medical facility of one sort or the other is available in all the towns of the district. There are altogether 4 hospitals of which three are in Margao and one located at Chicalim. The primary health centers also have attached hospitals with beds. Such facility is provided at Canacona, Chicalim, Curchorem-Cacora, Margao and Sanguem. The following table 45 shown the number of beds per 1000 population in medical institutions.

TABLE 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

District Total		19

Working women's hostel is not available in the district. This facility is available in the Panaji town of the North Goa District.

In respect of stadium, only Margao town has a beautiful stadiums one at Fatorda named as Fatorda stadium and other as Rajendra Prasad Stadium

followed by one at Mormugao named as Lockmanya Tilak Stadium. Cinema houses are available in five towns in the district viz. Mormugao, Margao, Curchorem-Cacora, Cuncolim and Canacona. Auditorium/drama/community halls are available in 8 towns of the district out of 17. Public libraries and reading room are available in 13 towns as could be seen from Statement – V.

Statement VI – Trade, Commerce, Industry and Banking, 1999

Information about the commodities, exported and manufactured in the towns is furnished in Statement VI. Number of banks, agricultural and non-agricultural credit societies existing in the towns are also given in this statement.

The important commodities exported comprise of Iron ore , country liquor, coconut, cashew nut, fish, steel grills, medicines, bakery products, wooden furniture etc. the important commodities manufactured in the towns comprise of country liquor, Medicines Iron grills, Ice, Wooden furnitures, soft drinks etc.

Civic and other amenities in slum:

The table below presents proportion of slum population in towns in 2001.

TABLE 46
PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sr. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Margao	78,382	2,800	3.6
2	Mormugao	97,154	55,300	56.9
District Total		175,536	58,100	33.1

In the district there are in all 8 slum areas 6 in Mourmagao UA namely Baina, Mangor, Karewada including Non Mon and Pishedongor, Jetty/Sada/Bogda, Gandhi Nagar, Shanti Nagar and New Vaddem and 2 in Margao UA. Namly Monte Hill Tolisinzor and Calconda Konkam Railway Rehabilitation. There were 55,300 and 2,800 inhabitants in these slums respectively. The proportion of slum population to the total population of the Mormugao and Margao towns works out to 56.9 and 3.6 respectively. The information on this regards is presented in Statement VII also.

household availing banking services. This information has been brought out in the form of various tables. The information has been presented herewith a brief analysis of data for the talukas of South Goa District.

Ownership status and number of dwelling rooms:

This is one of the important information that has regularly collected in the census whether household lives in a house 'Owned' by it or in a rented house or any other. If a household is occupying the census house owned by itself and is not making payment in the form of rent to any one than the household was considered as living in owned house. A household was treated as living in a rented house if rent is paid or contracted for by the household in cash or excess kind. If a household neither lived in owned house nor rented house was included in any other category. The number of dwelling rooms occupied by the households are presented in 6 classes Viz. no exclusive room, one room, 2 room, 3 room, 3+ room and medium number of rooms.

A room is treated as dwelling room if it has walls with a door way and a roof and should be wide and long enough for a person to sleep in i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A detailed explanation for ownership status and dwelling room has been given under IV concept and definition in this book.

During the house listing operations of the census of India 2001, in all 123489 households were listed in the district of South Goa of these 55,646 were listed in rural areas and 67,843 were listed in urban areas. 92,181 or 74.65 per cent of the household in the district lived in owned houses 27,143 or 21.98 per cent lived in rented houses and the remaining 4,165 or 3.37 per cent in others.

Living space or number of dwelling rooms available per household is an important dimension of the quality of housing in relation to ownership.

The table 48 presents households by tenure status and number of dwelling rooms occupied by them.

TABLE 48
HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

	Median number of rooms	3	3	2	2	3	2	2	2	2

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It may be seen that in the district as a whole 74.16 per cent household live in permanent houses among the talukas the percentage of households living in permanent houses varies between 85.99 to 52.77 per cent. The taluka of Mormugao is leading with 85.99 per cent households occupying permanent houses followed by Salcete 77.23 per cent Quepem 67.20 per cent, Sanguem 58.43 per cent and Canacona 52.77 per cent.

Rural Ares:

Households living in permanent houses accounted for 65.30 per cent in rural areas of the district 31.81 per cent households lived in semi permanent houses and those living in temporary houses were 2.82 per cent in rural areas of the district at talukas level households living in permanent houses varies between 78.06 per cent to 48.26 per cent Mormugao taluka tops the list with 78.06 followed by Salcete 72.56 per cent, Quepem 60.78 per cent, Sanguem 56.67 per cent and Canacona being the least 48.26 per cent.

Urban areas:

The household living in permanent houses in urban areas accounted for 81.43 per cent 17.14 per cent

lives in semi permanent houses and the remaining 1.34 per cent lived in temporary houses. At taluka level in urban areas a majority of the households are living in permanent houses, which varies between 87.81 per cent to 65.09 per cent the taluka of Mormugao tops the list with 87.81 per cent followed by Salcete 80.80 per cent, Quepem 74.16 per cent, Sanguem 66.42 per cent and the least being Canacona 65.09 per cent.

It is observed that the percentage of households living in permanent house is obviously higher in urban areas than rural areas.

Amenities available to the household:-

Like tenure status amenities available to the household is one of the economic characteristics to access the status of living of the households for this purpose amenities available to the household like drinking water source, electricity, bathroom and toilet in the house and drainage system were also collected during the 2001 Census. The following table 50 present distribution of households having improved drinking water source, electricity, bathroom, toilet and drainage facility in the rural and urban areas of the talukas of south Goa District.

TABLE 50
PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	Tahsil	Total / Rural /	Number of households	Number and percentage of households having

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households. Bathroom means bathroom within the house. Toilet means toilet within the house. Drainage means closed and open drainage.

More than 61 per cent and 72 per cent respectively reported the households in these talukas living in rural and urban area reported having toilet facility within the house, Quepem reported 51 per cent and the lowest was observed in Sanguem and Canacona 40 per cent each have reported having access to toilet facility within the house.

Household by type of fuel used for cooking:-

Eight types of fuel viz. firewood, crop residue, cowdung cake, electricity, coal/lignite(charcoal), cooking gas, bio-gas and kerosene were specially identified while collecting data on fuel under used for cooking while reckoning the type of fuel most commonly used by the household was considered. The table 51 presents number and percentage of households by type of fuel used for cooking for rural and urban areas of the talukas of South Goa District.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Household availing banking Services:

Out of the total households listed in the district, 74.78 per cent are availing banking facilities. In rural areas 72.16 per cent of households are availing banking facilities and in urban 76.93 per cent in the district. The households availing banking facilities in the talukas ranges from 78.53 to 64.84 Salcete topped the list with 78.53 per cent followed by Mormugao 76.71 per cent, Canacona 70.01 per cent, Sanguem 69.61 per cent, lowest in Quepem being 64.84 per cent. In the rural and urban areas of the talukas of Salcete, Mormugao and Canacona the percentages are 78 per cent, 76 per cent and 70 per cent respectively, households availing banking facilities and in the talukas of Quepem and Sanguem the urban percentage is more than the rural percentages.

Household Assets:

Radio/Transistor:

In the district 59.68 per cent households possess radio/transistor, 59.05 per cent in rural areas and 60.20 per cent in urban. Among the talukas the percentage of households having radio/transistor varies from 66.28 per cent to 48.57 per cent. Salcete taluka tops the list with 66.28 per cent followed by Mormugao 59.70 per cent, Canacona 50.73 per cent, Quepem 50.69 per cent and the least in Sanguem taluka being 48.57 per cent. In the rural areas of the talukas Salcete with 68.30 tops the list followed by Mormugao, Canacona, Quepem and the least at Sanguem 46.89 per cent. In respect of urban households the proportion varies from 64.74 per cent

to 50.33 per cent the highest reported in the taluka of Salcete 64.74 per cent followed by Mormugao, Sanguem, Quepem and the least in Canacona being 50.33 per cent.

Television:

In the district 62.08 per cent of the households reported to be having television. The proportion of rural households having television is 52.36 per cent this percentage is obviously high in urban households being 70.05 per cent.

Among the talukas, the percentage of households having television in the house varies from 70.89 per cent to 42.92 per cent. Mormugao taluka tops the list with 70.89 per cent followed by Salcete, Quepem, Sanguem and least in Canacona being 42.92 per cent.

In rural areas Salcete and Mormugao talukas tops the list with 64.48 and 61.85 per cent respectively and the least reported in Canacona 38.86 per cent. Among the urban households the percentage varies from 72.97 per cent to 54 per cent the highest being in Mormugao 72.97 per cent followed by Salcete, Sanguem, Quepem and the lowest 54 per cent in Canacona.

Telephone:

Telephone facility is available to 30.17 per cent households in the district. In rural areas only 25.72 per cent households reported having telephone in the house where as in urban areas 33.81 per cent were having telephone facility in the house. Among the talukas the proportion of households reporting

(viii) Major Social and Culture, Natural and Major Administrative Developments and Significant Activities During the Decade

1. Directorate of Art and Culture, 1991:

The Directorate of Art and Culture was established in the year 1991. The main aim was to maintain, preserve, promote and develop the cultural traditions of the State through its network of institutions and implementation of new schemes/activities including promoting literacy and performing arts, awarding scholarships to young talent and honoring the outstanding artists for their significant role in the field of culture. The Directorate of Art and Culture also acts as a, Nodal Department schemes of Government of India, Department of Culture.

2. Goa Panchayat Raj, 1994:

The Goa Panchayat Raj Act 1994 has been enacted keeping in view the provisions of the 73rd Amendment to the Constitution of India. With enacting of this Act, the Panchayat Raj System was introduced in the State in 1994. The new Act provided for establishment of two-tier system of the Panchayat Raj at the Village and District level. Therefore, it is for the first time, the State has to constitute the Panchayat at the District level. Since, there are two districts in the State, there are two Zilla Panchayats viz., North Goa Zilla Panchayat with Head Quarter at Panaji and South Goa Zilla Panchayat with Head quarter at Margao.

3. Konkan Railway, 1998:

The Konkan Railway is the first railway project in the country to be executed on Build, Operate & Transfer Principle. It is a company formed with participation of the four States viz. Maharashtra, Goa, Karnataka and Kerala along with the Ministry of Railway. The work on construction began in 1990 and the whole 760 Km. line was completed in 1998 and dedicated to the nation at the hands of Hon'ble Prime Minister of India, Shri. Atal Behari Vajpayee on 1st May 1998.

The new railway line constructed by Konkan Railway Corporation Ltd. extends from Roha to Manglore. The line passes through Goa for the length of 129 Kms. and covers four talukas in North Goa District viz. Pernem, Bardez, Bicholim and Tiswadi and three talukas in South Goa District viz. Salcete, Quepem and Canacona with station at Pernem, Thivim, Karamali, Verna and Margao and Canacona. The introduction of Konkan Railway has brought down the pressure on road transport in Goa making it

comfortable and reducing distance and travel time from Goa to other parts of the country mostly Northern and Southern India. There are 12 pairs of Mail/Express Trains and five pairs of Passenger Trains running over Konkan Railway route including the prestigious Nizamuddin-Trivendrum Rajadhani Express. The passenger and goods traffic on inter and intra State routes have been diverted through Konkan Railway reducing air pollution and traffic hazards.

4. Ravindra Kala Mandir, 1999:

The Art and Cultural Department, Government of Goa at Curchorem-Cacora Municipal Council of Qupem Taluka constructed this cultural complex in South Goa District. The complex is having an Auditorium with seating capacity of 800 audience and other infrastructures. It provides facilities to budding artists and organizations to present their program, festivals in a befitting manner.

5. Bal Bhavan Kendras, 2001:

Goa has immense talents in drama, music, art, craft etc. and has excelled in these fields at the national and international level. In order to search and develop these talents among the young and budding children, the institution of Bal Bhavan was established in the Capital Town of Panaji in the year 1986. This facility has been extended to other parts of Goa by establishing Bal Bhavan Kendras in rural and urban areas of North Goa and South Goa Districts. As on 2002, twenty (20) Bal Bhavan Kendras have been opened in the State, fifteen (15) in North Goa and five (5) in South Goa.

During the decade 1991-2001, the Bal Bhavan has opened 7 Kendras in North Goa District at Curti CT and Ponda M Cl, Siroda Village of Ponda Taluka and Siolim CT, Assonora Village of Bardez Taluka and Thane and Parye Village of Satari Taluka. The Bal Bhavan is opened to all the children from the age group 5 years to 16 years. Enrollment is done after following the procedure of registration. These Bal Bhavans are aimed at developing the talent in creative and performing abilities of the children and developing in them good hobbies, scientific temper, creativity and vision in order to enable them to develop their personality and be worthy citizen of our country.

During the decade 1991-2001, the Bal Bhavan has opened three (3) Kendras in South Goa District, located at Curchorem -Cacora M Cl of Quepem Taluka, Char marg and Agonda in Cancona Taluka.

constructed in a simple style. Unlike other temples, there is no deity or idol of Parashuram but a round black stone, which is venerated as a symbol of Shri Parashuram, the sixth incarnation of Lord Vishnu. The Gokarn Partagal Jevottam Monastery (Math) revered mostly by the Gauda Saraswat Vaishnava Brahmin sect is located amidst fascinating natural surroundings in a hamlet called Partagal in Poinguinim. The Math was established by Shreemad Narayanteerth Swamiji in 1475 A. D. and is about two Kms. from the Canacona-Sadashivgad road (NH 17).

The temple dedicated to Shri Mallikarjun is situated in Canacona Village. The area where the temple stands at present is known as Shristhal meaning the abode of God. As per the local tradition, the temple is said to have been constructed by Habhu Brahmins belonging to the Dravidian race.

Margao is the most important commercial town in South Goa District. It is the headquarters of the South Goa as well as that of Margao sub-division. It is a busy commercial town linked by rail and road to Belgaum, Pune, Bombay, Bangalore, Hyderabad and Delhi. It is noted for its old palacial houses, imposing modern buildings, parks, and gardens. Colva beach, the famous beach after Calangute in North Goa is within a reach of six kilometers from the town. Margao is 33 Kms. away from Panaji, the capital of Goa.

Mormugao is another important and most populous town in the district. It is the headquarters of Mormugao sub-division located on the bank of river Zuari as well as the seacoast. Its importance lies in the location of the natural harbour, the Mormugao port, which is one of the largest ports of India and plays a vital role in Goa's economy. Cargo ocean-liners call here from all over the world. The airport of Goa, Dabolim, lies just on the outskirts of Mormugao town. It is also the rail terminus of Goa. Mormugao is 33 Kms. away from Panaji town. A launch service also operates from Mormugao Harbor to Dona Paula (Panaji), and vice versa during fair weather viz. October to May. Mormugao and Margao are linked by road as well as by rail.

(x) Major Characteristics

Goa An Idyllic Land, a Tourist Paradise :

Famed in legend as the land created by Lord Parshuram and in history as Golden Goa coveted by princes and potentate down the centuries, since vedic time, through successive rulers of Rashtrakutas, Silaharas, Chalukas, Kadambas, the Bahamani Muslim Kings and the 451 year long Portuguese domination,

Goa is today known nationally and internationally and occupies a high place on tourist map of the world.

Goa, apart from its historicity is also renowned for its scenic beauty. Indeed, it is a tiny paradise with some of the loveliest beaches of the world girdling its 105 Kms. long palm fringed coast, interspersed with enchanting coves and estuaries against a back-drop of green hills covered with lovely woods rolling down to emerald paddy fields, cool and shady coconut groves, betel nut garden, cashew and mango groves dotted with tiny, picturesque villages, towns, temples, churches forts and monuments which offer a fantastic panoramic kaleidoscope of unrivaled beauty.

The rich heritage of Goa is expressed in the traditional folk music, dances, drama and literature, colorful festivals pageants and feasts besides the superb specimen of temple architecture.

Goa has been always a tourist paradise. Nature has been very generous to Goa to make it an idyllic land, which offers the tourists many memorable moments including peace and tranquility. One of Goa's most discerning assets is its rich cultural heritage. Its natural beauty and hospitality together with this heritage has put Goa on the international tourist map, and it acclaimed as one of the most popular tourist destination in the world. The State has attracted a large number of tourists both from India and abroad mainly for its scenic beauty, famous beaches, ancient temples and churches and the various festivals attached to them. The tourist traffic in Goa has increased in leaps and bounds since liberation in 1961, it almost corresponds to population of the State. The following Statement reveals the tourist trend in Goa from 1991 to 2001.

Year	Number of Tourist		
	Domestic	Foreign	Total
1991	756,786	78,281	835,067
1992	774,568	121,442	896,010
1993	798,676	170,658	969,234
1994	849,404	210,191	1,059,595
1995	878,487	229,218	1,107,705
1996	888,914	237,216	1,126,130
1997	928,925	261,673	1,190,598
1998	953,212	275,047	1,228,259
1999	960,114	284,298	1,244,412
2000	976,804	291,709	1,268,513
2001	1,120,242	260,071	1,380,313

Whereas domestic traffic is growing steadily, there has been a spurt in tourism traffic to Goa in the

of nature appreciating sights. The Mayem Lake is one of the tourist attraction and State's most popular picnic spot in North Goa. Boating facilities are available at the Lake.

(xi) Scope Of Village Directory And Town Directory :

As already mentioned earlier Part – A of District Census Hand Book contains the Village and Town Directories presented under Section I and II respectively.

Village Directory :

The Village Directory is presented in the form of a Statement containing 25 columns under the caption "Amenities and Land use". The Village Directory as the very name suggests gives for each C.D. Block the list of villages arranged according to their location code beginning in Col. 1, name of village in Col. 2 total area of village in hectares in Col. 3. This is followed by 2001 total population in Col. 4 and total number of households in Col. 5, Column 6 to 23 furnished information about the following important amenities and facilities given for each village.

Sr. No.	Amenities and Facilities	Columns
i	Educational	6
ii	Medical	7
iii	Drinking Water (Potable)	8

Column 18 of the Village Directory presents information on most important commodities manufactured in the village.

Column 19 to 23 shows land use pattern of each village. The village area has been classified under the following heads in the respective columns.

Sr. No.	Head	Columns
i	Forest	19
ii	Irrigated by source	20
iii	Un-irrigated	21
iv	Culturable waste (including gauchar and groves)	22
v	Area not available for cultivation	23

Column 24 & 25 repeats the name and serial number of the villages.

Particulars of amenities and facilities available in the villages are indicated by means of abbreviations and these abbreviations have been explained in the beginning of the Village Directory. In case an amenity is not available in the village itself the distance in kms. of the nearest place where the facility is available is indicated in broad ranges i.e. less than 5 kms., 5-10 kms. and 10+ kms. The non-census data for the Village Directory have been obtained from the relevant State Government Department. Every Census there has been an endeavor to enlarge the scope of the Village Directory by introducing new items of information, to meet the ever-increasing demand for non-census data by data users. The 2001 Census Village Directory is more or less on the pattern of 1991 Census Village Directory except for deletion of one column on day or days of the market/hat and addition of some more columns incorporating some more useful information on facilities available in the villages. The 1991 Village Directory contained 18 columns as against 25 in 2001. In all 7 more columns have been introduced in the Village Directory of 2001 Census. The innovation in introduction of new items of information in the Village Directory at the Census of India 2001 is explained below:-

Information on commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities (cinema, video hall, sports club, stadium/auditorium) news papers/magazines and most important commodity manufactured under column 10, 11, 12, 17 and 18 is also a new feature of 2001 Census. Information on newspapers/magazines received in the villages was presented in the remark column of 1981 Village Directory, which was dropped in 1991 Village Directory. However, this information is being collected and presented again under a separate column 17 in the 2001 Village Directory.

Data on amenities and facilities presented in the Village Directory Statement is obtained from the Taluka Revenue Officers, Department of Education, Health, Land Survey, Co-operative Societies, Post offices etc.

Town Directory :

The Town Directory comprises of seven Statements presenting useful data on socio-economic and administrative aspects of each town in North Goa District. These Statements deal with (i) status and

Column 3 shows population (2001 Census). Under Medical Facilities information has been presented for Hospitals/Dispensaries/T. B. Clinics etc. in Column 4 and beds in Medical Institutions (noted in Column 5) in Column 5. Under Educational Facilities information has been presented for Arts/Science/Commerce/Law/Other colleges (of degree level and above) in Column 6, Medical Colleges in Column 7, Engineering Colleges in Column 8, Polytechnics in Column 9, Recognized Shorthand, Typewriting and Vocational Training Institutions in Column 10, Higher Secondary/Intermediate/Senior Secondary/PUC(Pre-University College)/Junior College Level in Column 11, Secondary/Matriculation in Column 12, Junior Secondary and Middle Schools in Column 13, Primary Schools in Column 14 and Adult Literacy Classes/Centers, Others (specify) in Column 15. Column 16 presents information on Working Women's Hostels with Number of Seats. Column 17 to 20 presents information on Number of Recreational and Cultural Facilities e.g. Stadium in Column 17, Cinema in Column 18, Auditorium/Drama/Community Halls in Column 19 and Public Libraries including Reading Rooms in Column 20.

Statement V is also on the same pattern presented in 1991 Census.

Statement VI : Trade Commerce, Industry and Banking, 1999 :

This Statement contains 11 Columns and gives for each town information on Trade, Commerce, Industry and Banking as on 1999. Column 1 and 2 as usual shows Serial Number, Class and Name of Town respectively. Column 3 to 5 shows the Names of three Most Important Commodities exported in the Town in order of their 1st Importance (Column 3), 2nd Importance (Column 4) and 3rd Importance (Column 5), Column 6 to 8 shows the Names of three Most Important Commodities Manufactured in the Towns in order of their 1st Importance (Column 6), 2nd Importance (Column 7) and 3rd Importance (Column 8). Column 9 of the Statement gives the

Number of Banks Functioning in the Towns, which includes both the Commercial and Co-operative Banks. Column 10 gives Number of Agricultural Credit Societies and Column 11 presents Number of Non-agricultural Credit Societies functioning in the Towns. This Statement is similar to that presented in 1991 Census. Except, column on the three most important commodities imported in the town, which was in 1991 Census has not been presented in 2001 Census.

Statement VII : Civic and Other Amenities in Slums, 1999 :

This Statement contains 17 Columns and provides information on Civic and Other Amenities in Slums such as Serial Number of Town and Class and Name of Town in Column 1 and 2. Column 3 gives Names of Slum(s), Column 4 gives particulars in regard to Status of Slum whether it is notified, Number of Households in the Slum are shown under Column 5 followed by Population of Slum in column 6. Column 7 shows Paved Road (in kms) Column 8 shows System of Sewerage and Column 9 to 12 shows number of Latrines like Water Borne (Column 9), Service (Column 10), Other (Column 11) and Community (Column 12) followed by Method of Disposal of Night Soil (Column 13). Column 14 gives Number of Tap points/public hydrants installed for supply of Protected Water. Columns 15 to 17 gives Electric Connections in the Slum separately for Domestic (Column 15), Road Lighting Points (Column 16) and Others (Column 17).

The Statement is similar to one presented in 1991 Census except for Statement number, which was captioned as IV-A in 1991.

The data on amenities and facilities presented in the Town Directory Statements are obtained from the respective Municipal Councils in respect of Statutory Towns and for Non-statutory Towns (Census Towns) from the respective Taluka Revenue Offices and Village Panchayats.

PART - A

VILLAGE AND TOWN DIRECTORY

Section - 1 Villages Directory

Note explaining the abbreviations used in the village directory :

The “Village Directory” is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The ‘un-inhabited’ villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column are for the village are as follows:-

Columns 1 & 25: Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 & 24: Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i) Primary School	P	(iv) Tubewell Water	TW
(ii) Middle School	M	(v) Handpump	HP
(iii) Secondary School	S	(vi) River Water	R
(iv) Senior Secondary School	PUC	(vii) Canal	C
(v) College	C	(viii) Lake	L
(vi) Industrial School	I	(ix) Spring	S
(vii) Training School	Tr	(x) Others	O
(viii) Adult literacy class/centre	AC	(xi) Summer Sorce	SS-
(ix) Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O		

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i) Allopathic Hospital	H
Ayurvedic Hospital	HA
Unani Hospital	HU
Homeopathic Hospital	H Hom
(ii) Allopathic Dispensary	D
Ayurvedic Dispensary	DA
Unani Dispensary	DU
Homeopathic Dispensary	D Hom
(iii) Maternity & Child Welfare	MCW
(iv) Maternity Home	MH
(v) Child Welfare Centre	CWC
(vi) Health Centre	HC
(vii) Primary Health Centre	PHC
(viii) Primary Health Sub-Centre	PHS
(ix) Family Welfare Centre	FWC
(x) T.B. Clinic	TB
(xi) Nursing Home	NH
(xii) Registered Private Medical Practitioner	RMP
(xiii) Subsidised Medical Practitioner	SMP
(xiv) Community Health Worker	CHW
(xv) Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i) Tap Water	T	(i) Cinema / Video Hall	CV
(ii) Well Water	W	(ii) Sports Club	SP
(iii) Tank Water	TK	(iii) Stadium / Auditorium	ST

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i) Post Office	PO
(ii) Telegraph Office	TO
(iii) Post & Telegraph Office	PTO
(iv) Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.

the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i) Commercial Bank	CM
(ii) Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i) Agricultural Credit Society	ACS
(ii) Non-Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i) Cinema / Video Hall	CV
(ii) Sports Club	SP
(iii) Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

- (i) Bus BS
- (ii) Railway Station RS
- (iii) Navigable Waterway NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

- (i) Paved Road PR
- (ii) Mud road MR
- (iii) Foot path FP
- (iv) Navigable River NR
- (v) Navigable Canal NC
- (vi) Navigable waterways other than River, Canal NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

- (i) Electricity for domestic use ED
- (ii) Electricity for agricultural use EAG
- (iii) Electricity for other purposes EO
- (iv) Electricity for all purposes EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes

- (i) News Paper N
- (ii) Magazine M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area

not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

- (i) Government Canal GC
- (ii) Private Canal PC
- (iii) Well (without electricity) W
- (iv) Well (with electricity) WE
- (v) Tubewell(with electricity) TW
- (vi) Tubewell(with electricity) TWE
- (vii) Tank TK
- (viii) River R
- (ix) Lake L
- (x) Waterfall WF
- (xi) Others O
- (xii) Total T

The village directory also carries the following appendices.

- Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
- Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.
- Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.
- Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.
- Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
- Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.
- Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.
- Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
- Appendix-V Summary showing number of villages having or not having Scheduled Castes population

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A, VII B
The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

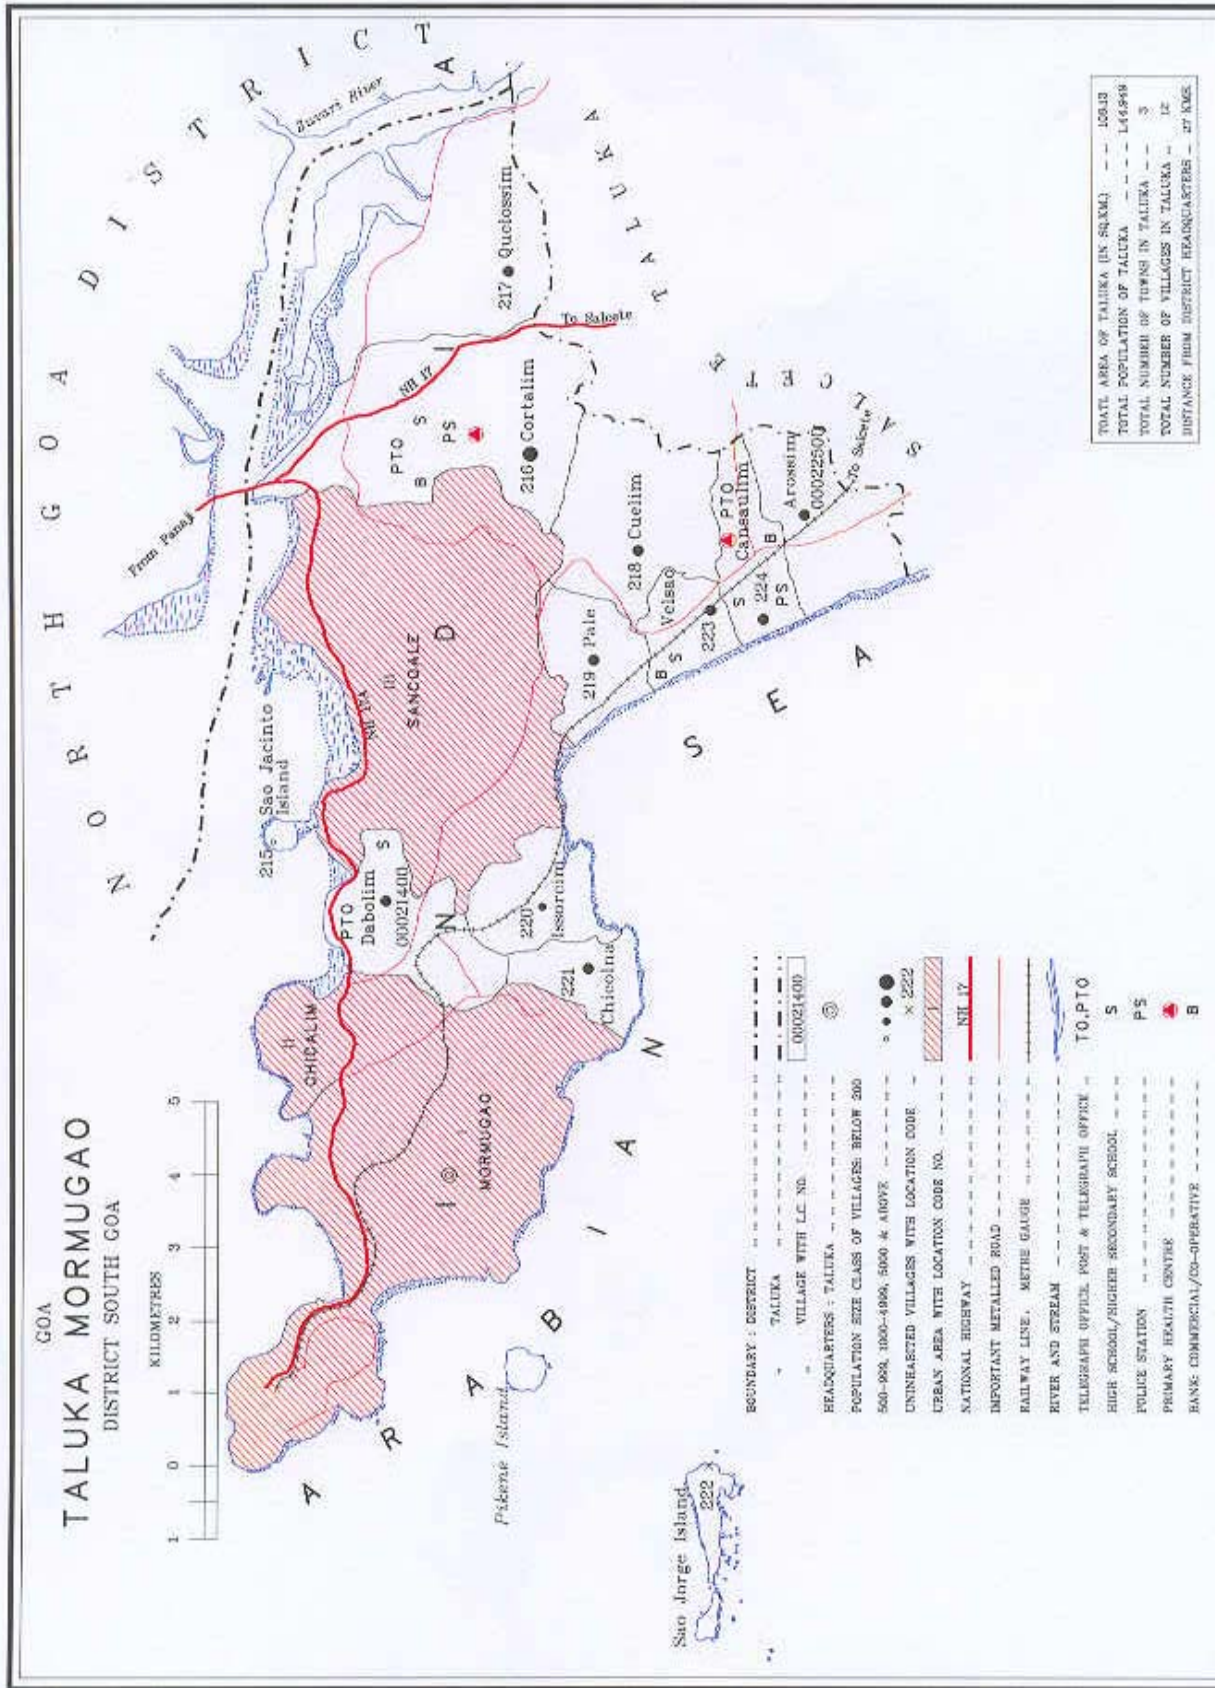

Appendix-VIII Indicates C D Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

List Of Villages Merged In Towns And Outgrowths At 2001 Census:

During the 2001 Census no town or village is merged in any of the town nor any Out Growth is formed.
