## AMUL DAIRY

Amul dairy is located at Mogar, 7.5 kms. south of Anand on National Highway No.8. The world famous co-operative dairy 'Amul' is one of the main features of Anand. Amul is the biggest dairy not only in India, but in Asia too. It is owned by thousands of small and medium farmers. Amul has created revolution. The experiment has led to small dairies at district and village levels. Other states and even many countries have been inspired by it.

Amul contributed to the scientific education of animal husbandry and increased production of milk. The dairy developed a plant of milk powder. The farmers could earn more for their produce. Lately Amul entered into milk-chocolate market besides butter, ghee, cheese, and baby food. It also established veterinary hospitals, artificial insemination centres for animals and hybrid-cow breeding centres at village Ode. Amul has turned into a large complex and the main stream of white revolution.

Annexure - VIII : Distribution of different Mother Tongues returned in 2001 Census	455

## Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.
3. The 1991 census of DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (C.D.Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluka/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.
4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums in instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic

amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of **Shri Jayant Parimal**, Director of Census Operations, Gujarat. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi  
Dated : 17.10.2006

**D.K. Sikri**  
Registrar General &  
Census Commissioner, India

## P r e f a c e

Census is being conducted in the country every ten years as per the programme laid down by the Government of India. In these day and age of information technology, an individual has access to a variety of information covering a Kaleidoscope of interest and fields. Availability of relevant information is very vital for planners, policy makers and researchers.

The Five Year Plans have come to stay in the country and whatever development is achieved as a result of implementation of planning from the bottom level such as development of infrastructure facilities as well as basic amenities, etc. is reflected in the District Census Handbooks and they give to the readers a searching eye whether the development over the years in villages/talukas/districts is lopsided or upto the mark. This is the basic requirement of this type publications and an attempt has been made to show whether the census handbooks reasonably fulfill these aspirations/requirements.

These district Handbooks are thus useful to planners in planning from bottom as well as to administrators, researchers, educational institutions including universities and other socio-economic research centres as well as students conducting research in demography, social and economic studies as well as to the local bodies like Panchayats, Municipalities and Municipal Corporation etc.

District Census Handbook of Gujarat is a joint venture of the Government of Gujarat and the census organization of the Government of India. In the preparation of the DCHB, the role played by the census organisation is that of Census data collection, scanning of collected information, analysis of PCA. DCHB Unit of the State Government collected the basic non-census information on availability of amenities relating to infrastructure in the villages of the district presented in the part A of this book. The cost of this publication is borne by the State Government. In accomplishing this task we had the ready and whole hearted co-operation of the staff at various levels of different department of the State Government. Most of the data supplied by the various departments have been cross-checked and an attempt has been made to reconcile the discrepancies as well.

I express my deep gratitude to the officers of Gujarat Government particularly Shri P.K.Laheri, Chief Secretary of Gujarat State, Smt. Netraben Shenoy, Additional Chief Secretary of General Administration Department (Planning), Shri George Joseph, Principal Secretary, General Administration Department (Personnel), Shri K.R.Vasava, Deputy Secretary, Kum.P.S. Mevada, Under Secretary and Shri P.D.Kulkarni, Section Officer of General Administration Department, Planning, Shri S.D.Mehta, Deputy Secretary and Shri I.M.Sheikh, Under Secretary, Shri Bipin Patel, Section Officer and Shri P.N.Christian, Deputy Section Officer of G.A.D. (Kh-3) for their valuable help and co-operation in fulfilling all administrative requirement in time for bringing out this publication. I am also thankful to Shri P.M. Patel, Director, Economics and Statistics helped this organisation not only by placing the competent personnel on disposal of census services on deputation but also provided valuable official statistics for this publication.

The District Collector, the District Development Officer, District Statistical Officer, District Information Officer and their staff members extended their warm and whole hearted co-operation for carrying out field work of the census and collection of non-census data for this District Census Handbook.

I am deeply grateful to Shri J.K. Banthia, I.A.S., the Ex-Registrar General and Census Commissioner, India for the benefit I have derived by the way of guidance and advice. I also express my thanks to Shri R.G. Mitra, Deputy Registrar General(C&T) Shri C. Chakravorty, Joint Director, Shri I.C. Agrawal, Senior Research Officer(SS), Shri S.L. Jain, Deputy Director(SS), Shri R.K. Mehta, Assistant Director(SS), Shri R.P. Singh,

Dy. Registrar General(Map), Shri Himakar, Addl. Director (EDP) and Shri Anil Kumar Arora, Deputy Director (EDP) for providing technical guidance in finalising this publication. I am extremely thankful to Shri D. K. Sikri, IAS, Registrar General & Census Commissioner, India for his valuable guidance in finalizing of this publication.

Shri Jayant Parimal, I.A.S. who held the office of Director of Census Operations, Gujarat, had guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the able direction and guidance of Shri Parimal. Our sincere and grateful thanks for all the projects of census to him.

In state office Smt. B.B. Chauhan, Deputy Director, District Census Handbook Unit, Kum.S.B.Dabhi, Assistant Director, Shri S.B. Dalvi, Deputy Section Officer of District Census Handbook Unit, and their team of able assistants meticulously collected and scrutinized the non-census data from various sources and prepared draft of DCHB etc. with the help of Census section. The other officials of D.C.H.B. Unit, who scrutinised, edited and supervised the work of D.C.H.B. have been mentioned in the "Acknowledgement". The maps provided in the D.C.H.B. are prepared by the Map Section of the Census Directorate under the supervision of Shri J.P. Purohit, R.O(Map). I am thankful to all of them. I am thankful to the census section of the Directorate for scrutinizing the PCA data, specially Shri J.N.Pithadia, Investigator Grade-I and Kum.N.V.Shah, Investigator Grade-III who provided assistance to me in finalizing P.C.A. data at every stage. Smt. J.R.Sanghani, Investigator Grade-III of this Directorate assisted me for final scrutiny of D.C.H.B., I am thankful to her.

Lastly, I am thankful to the Government of Gujarat for having agreed readily to bear the cost of publication of the District Census Handbook volumes and for the special efforts of Shri R.B. Raval, Director, Printing and Stationary and his colleagues to print out the publication in a very nice fashion.

## District highlights – 2001 census

- (1) Anand district ranks 12<sup>th</sup> among 25 districts in terms of population of the State.
- (2) Anand district has eight talukas and 350 villages. The urban area is about 9 per cent of the district area while the rural area is 91 per cent of total district area.
- (3) Population density in the district is 631 persons per sq km.
- (4) Anand district is the 3<sup>rd</sup> dense district in the State.
- (5) Anand district is having 23<sup>rd</sup> rank in sex ratio.
- (6) Village Samarkha of Anand taluka is the most populated village having 20,148 persons whereas Vank-Talav village of Tarapur taluka is the least populated village in the district with population of 270 persons.
- (7) The economy of the district is basically dependent on agricultural activities as 56.4 per cent of total district workers are engaged in agricultural activities, while 41.2 per cent of total district workers are in activities classified under 'other activities', which are non agriculture and non household activities.
- (8) Milk powder, tobacco products, tur dal, glass products, industrial machinery, agate jewellery are major products of the district.
- (9) Akhol Village of Khambhat taluka has the largest area of 8,697.6 hectares and Navapura village of Umreth taluka has the lowest area of 42.0 hectares among the villages of the district.
- (10) The most Important crop of the district is Tobacco.

	Females	2,044,397	30.2	114,292	45.9

**Note :** Five villages are fully covered as out growths (OGs) and therefore not included under the item, 'Number of Villages'.

**Definition of Census Town : -**

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

- i) A minimum population of 5,000;
- ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and
- iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

## Ranking of Talukas in the District

### District: Anand

Sl. No.	In Term of	Tarapur		Sojitra		Umreth		Anand	
		Value	Rank	Value	Rank	Value	Rank	Value	Rank
1	2	3	4	5	6	7	8	9	10

**Note :** \* These figures represent 'Geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local Bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of talukas will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records.

## ANALYTICAL NOTE

### (i) History and Scope of the District Census Handbook :

Before the 1951 Census, the Census figures were published in a booklet known as 'Village Handbook', which contained only village wise population figures. These books were prepared and published by the Directorate of Census Operations of the State.

The Directorates introduced the District Census Handbook for the first time in 1951 Census. It comprised the villagewise primary census abstract figures and information on available amenities. It also contained several statements relating to the district. It varied in content and size from State to State depending upon the resources offered by the respective State Governments.

In 1961 Census, an uniform pattern of District Census Handbook was adopted throughout the country. The Directorate of Census and the State Government jointly executed the project. In addition to the English version, it was published for the first time in Gujarati language also. The District Census Handbook 1961 was published in three parts. Part I related to Introductory Note i.e. general and economic information for the district and a brief gazetteer of place names. Part II pertained to census statements, villagewise list of industrial establishments, statements on handicrafts and departmental statistics. Part III consisted of village directory covering the amenities and primary census abstract data combined in one statement. It also covered district and taluka maps.

It is worthwhile here to note that the State Government has created a separate unit for preparing and publishing the District Census Handbook from 1971 Census onwards. In the 1971 Census, the contents of District Census Handbook were modified. In the preceding censuses the data on amenities and primary census abstract were covered in one statement whereas in 1971 Census, the data on amenities and primary census abstract were separated into two different parts. Thus, the coverage of amenities data was extended and the land use data were introduced for the first time

since 1971 District Census Handbook. Moreover, a separate portion known as 'Town Directory' was also incorporated for the first time in the District Census Handbook. The 1971 District Census Handbooks were published in three parts. Part A contained the village and town directory. Part B contained village and townwise primary census abstract data and Part C contained official statistics, besides full count census statements, urban census statements and analytical report on census and related statistics socio-economic and cultural statements (Rural areas) and housing statements. Part A and Part B were combined and published in one volume.

The District Census Handbook –1981 was brought out in two parts, Part-A and Part-B. Part-A contained the village and town directory whereas Part-B included the primary census abstract data for both General population and Scheduled Castes/Scheduled Tribes. Both parts were published in one volume. Part C brought out for 1971 Census was dropped in 1981 Census. However, official statistics and some portion of analytical notes of part C of 1971 Census were included in the 1981 District Census Handbook also. For the 1991 Census, the District Census Handbooks were prepared more or less on the same lines of the preceding Census of 1981. In 2001, the scope of both Part A and Part B has been enlarged by giving several additional information due to large scale computerization.

The District Census Handbook has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several innovations have been introduced mostly at all the stages of the Census of India, 2001, right from the preparatory efforts of data processing to data dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Number (PLCN) has been adopted by assigning a village number to each village within the State/UT a continuous series from I to N. Each village has been

assigned an eight-digit code. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001 are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series. At the 2001 census age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census, the type of educational institution attended by a person was enlarged to include school, college, vocational institute. The scope of the definition of 'work' was expanded in the Census of India, 2001, this includes production of milk for domestic consumption. In the 1991 Census, cultivator of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetations and fodder crops etc. This meant that activities related to production of all the above-mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India 2001.

- At the 1991 Census, the question on seeking/available for work was canvassed for only non-workers. At the Census of India 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census was dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on reason for migration to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census is covered under category of 'Other'.

- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census but in 1991 Census there was no provision for question on disability. At the present Census of 2001, a question to elicit information on total or partial disability was canvassed. The five types of disabilities on which information was collected are - in seeing, in hearing, in speech, in movement and for mentally disorderness.
- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work was collected under this question.

The mode of presentation of DCHB in 2001 will by and large be same as that of 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc. pertaining to 1991 Census of the respective district in the DCHB in the form of Annexure II to VIII. Similarly Statements based on Houselist data pertaining to Census 2001 has also been included in DCHB.

#### (ii) Brief History of the District :

The district of Anand is a newly created district. Up to October 1997 it was a part of Kheda district. Therefore the history of the district narrated below will practically be the history of Kheda district.

The authentic data for the early period of historical times are supplied by the archeological excavations conducted at Nagara (Near Khambhat) in 1963-65 by the Department of Archeology and Ancient History, M.S. University, Baroda. This reveals that the earliest habitation of this site could be traced to the Iron age people. This village began to expand rapidly and established contacts with the Genetic valley. This

village emerged as a large town on account of commercial activities. A hoard of hundred Kshatrap coins of silver was found at Viral near Petlad. Sojitra near Petlad is referred to as Sazantin by Ptolemy in his Geography. A hoard of about 200 Silver coins of Kumargupta-I was found at Anand in 1951. The discovery of Kshatrap and Gupta coins indicates the region of the western Kshatrap and the Gupta sovereigns respectively (Circa 89-470 A. D.). Thenafter, there was a period of Maitraka (470-788 A.D.). The period from 788-950 A.D. was the period of post Maitraka . After this period, there was a period of Chalukya (from 950-1300 A.D.). Period in between years 1299 A.D. to 1758 A.D. was known as medieval period. Again this period can be subdivided into three parts viz (1) rule of early sovereigns of Delhi (from 1299-1407 A.D) (2) rule of Ahmedabad sultans (from 1407-1573 A.D.) and (3) rule of Moghul Emperors (from 1573-1758 A.D.). From 1751 A.D. to 1753 A.D. skirmishes between Marathas and Moghuls continued. From A.D.175 to 1803 A.D., the rivalry between Peshwa and Gaekwad continued unabated. The district accordingly came under the sway of one or another party depending upon their strength. In 1802 A.D. a treaty of Bassein between Peshwa and English was done and from 1803 A.D. the district came under the possession of British.

From 1817, the district remained under the control of British rule and formed part of the Bombay province. After independence, the former Indian states of Cambay, Balasinor, Punadra, Khedal, Ghodasar, the non jurisdictional estates of far and Nirmali, Bhadra and Petlad talukas and 38 villages of Attarsuba (Antarsuba) taluka of the former Baroda state and six of Ahmedabad district, were put into the district of Kheda.

After bifurcation of the bilingual Greater Bombay State on 1<sup>st</sup> May 1960, the Kheda district became a part of newly created Gujarat State. As mentioned in the beginning, this district was a part of Kheda district till 2<sup>nd</sup> October 1997. After this date, as a process of reorganisation of districts, the Anand district came into existence, with the eight talukas namely (1) Tarapur (2) Sojitra (3) Umreth (4) Anand (5) Petlad (6) Khambhat (7) Borsad and (8) Anklav.

### (iii) Administrative Set-up :

With a view to run the administration of the State smoothly, it has been divided into Districts, which in turn have been further sub-divided into Talukas (Tahsils). In the State of Gujarat, the community

development blocks are co-terminus with the Talukas. The Talukas contain large number of villages and possibly several towns. The villages have Village Panchayats to run the local administration. A Village Panchayat may constitute of one revenue village, several revenue villages or a part of a large village. Similarly, the towns have Municipality or Municipal Corporation as the seat of local self-government.

In the State of Gujarat, as on December 1999 there were 25 districts and 226\* Talukas, against 19 districts and 184 Talukas in 1991 Census. In 1997 by several notification(s), Government of Gujarat reconstituted some districts and talukas of the State. The Government of Gujarat reconstituted former Kheda district by bifurcating it and created new Anand District with effect from 2<sup>nd</sup> October 1997 vide Notification No.GHM/97/80/L dated. 24<sup>th</sup> September, 1997 by separating Khambhat, Petlad, Borsad and Anand talukas. Under the Government Notification No. GHM/97/119/M/PFR/2297/2592/L dated the 15<sup>th</sup> October 1997, the Government of Gujarat created new Tarapur taluka from Khambhat taluka, Umreth taluka from Anand taluka, Anklav taluka from Borsad taluka and Sojitra taluka from Petlad taluka.

The District Collector looks after the general administration, maintenance of collection of land revenue and settlement of law disputes, civil supplies, district planning, mid-day meal scheme, etc at the district level. At the Taluka level, Mamlatdar looks after the land development and revenue collection and law and order. The functions of administration of law and order and control and investigation of crime are done by the Superintendent of Police of the district with the help of Police Stations working under him. For the purpose to maintain the law and order there are 18 police stations, 15 police chowky and 18 out-posts as per statement below.

#### Police Station in the District

Sl. No.	Particulars	1998	2000
1	2	3	4
1	Police Station	18	18
2	Police Chowky	14	15
3	OutPost	18	18

Source : Director General of Police, Gandhinagar ,2000

During the period 1998 to 2000 one police chowky was increased while police station and the out-post remained unchanged.

\* Vagdod taluka merged in the Patan taluka of the Patan district on 3<sup>rd</sup> July 2001.

The Panchayati Raj institution is fairly strong and most of the developmental works have been transferred to the District Panchayats and its subordinate bodies. The District Panchayat has an elected President and District Development Officer appointed by the Government as its Secretary, who looks after day-to-day work related to the developments. Similarly, at the Taluka level, Taluka Panchayats have been constituted which have an elected President. The Taluka Development Officer, placed by the Government as Secretary of the Taluka Panchayats and conducts the regular administrative work. Like wise, an elected President heads the Municipality and the Chief Officer works as the Secretary of the Municipality, who looks after the day-to-day work. In case of the large cities, the State Govt. has constituted Municipal Corporation, which are headed by an elected Mayor and the Municipal Commissioner, appointed by the Government, who looks after the normal work. At the Village level, the Sarpanch is the elected Chief and the Talati (Village Mantri) works as the Secretary to the Village Panchayat and looks after the day-to-day work. In view of the expanding role of the public administration in a developed state like Gujarat, the Government has taken-up multiple facet activities and has set up several offices. Such offices came into the existence as under:

- (1) Education (Primary and Higher Education)
- (2) Agricultural and Research
- (3) Animal Husbandry and Poultry
- (4) Forest and Environment
- (5) Roads & Buildings, Bridges
- (6) Co-operation and Co-operative Societies
- (7) Industries, Small and Large Cottage
- (8) Health and Medical Services, Medical Education and Research, Family Welfare and Nutrition
- (9) Information Department
- (10) Irrigation Minor and Major
- (11) Social Welfare and Social Defence

The functions of above offices are managed and controlled by concerned Head of Departments and in some cases also by District and Taluka Panchayats. The task of providing primary education in rural areas has been entrusted to District Panchayats. The functions related to Government of providing primary education is assigned to District Primary Education Officer of District Panchayat who works under District

Development Officer. The secondary education is looked after by District Education Officer of Education Department. Primary education as well as higher secondary education of all types is governed by District Education Officer.

Agriculture activities have been delegated to District Panchayat to a large extent and District Agriculture Officer is in-charge for looking after the agricultural produce including crops and vegetables. Similarly Animal Husbandry is also a Panchayats activity and routine work is controlled by the Deputy Director (Animal Husbandry) who sits in District Panchayat taking care of Animals and Poultry Farms. Besides District Agricultural Officer in Panchayat Offices such as Deputy Director (Agriculture) and other officials are looking after various aspects of agriculture for developing the sector as well as to extend necessary assistance to farmers at District level.

Besides Director, Animal Husbandry Office of Panchayat Offices such as Deputy Director (Animal Husbandry) Special Officers at Veterinary Offices etc. in State Government. Animal Husbandry Department are also monitor activities of the sector at district level.

Public Health in rural area assigned to the District Panchayat under the Chief District Health Officer who looks after epidemic, malaria control, water born diseases and district administration of Public Health Centres. District and Taluka Hospitals and Referral Hospitals are looked after by the District Civil Surgeon under medical services of the State, while Medical Colleges and Research attached with the respective Civil Hospitals are controlled by Medical Education and Research Wing.

Family welfare activities are also motivated by the District Health Officer. Chief District Health Officer is also functioning as a District Registrar of Birth and Death of the district and Talati cum Mantri is Registrar of Birth and Death for the respective villages. Animated mother and children upto to the age group of 14 are also administrated by Nutrition Officer under the Nutrition Programme.

District Ayurvedic Officer is looking after the Ayurvedic dispensaries and hospital. They also look after the Ayurvedic plants and medicinal and gardens. The District Food and Drugs Offices are generally looking after the quality of the food and drugs in the district.

Labourers and workers who registered under Employee State Insurance Scheme are governed by the E.S.I. Scheme.

The rural roads have been transferred to the District Panchayats and their maintenance is done by the Executive Engineer, Roads and Buildings Department. Minor irrigation works are transferred to the District Panchayat. Executive Engineer (Panchayat) of the Panchayat's irrigation office looks water harvesting and check dams.

The Roads and Buildings Department of State Government looks after the maintenance of roads, buildings, bridges and government multi-storey buildings etc. Besides Panchayat Officials, major district roads and the State Highways are looked after by the Executive Engineer called Executive Engineer, Roads & Buildings (state). The large multi purpose irrigation projects are controlled by State Government directly through its Executive Engineer.

District Industrial Centre are functioning to develop the small and village industries, handloom industries and the scope of industrial growth in the district by the respective member of district.

Besides, this department is working for the rights of the industrial workers and rural labourers for agriculture and other sectors in rural areas.

Social welfare activities to the Scheduled Castes, Scheduled Tribes, Other Backward Castes and Other Backward Communities under the District are organized by the District Welfare Officer. Generally the scheme under T.A.S.P. and Special Component Plan are organized by the District Welfare Officer. So far social defence is concerned; social defence is working for physically handicapped, dumb and deaf, blind, bidders home, widows and old age human being.

In each District Panchayat District Statistical Officer of Directorate of Economics and Statistics is looking after the work for co-ordination of different developmentd programmes. He is also Member Secretary of District Planning Board. Similarly in every Collector Office District Planning Officer looks after the developmental work under various Governments (State & Centre) sponsored programme.

Concepts of co-operation and co-operative societies are given by our Late Chief Minister Shri Balvantrai Mehta, who is a pillar of co-operative movement in the state. Co-operative Societies i.e. Co-operative Milk Societies, Agricultural Produce Market Societies, Co-operative banking and other co-operative societies are governed under the District Registrar Co-operative Societies.

The talukawise break up of towns and villages in the district are shown in the following Statement.

### Talukawise Number of Towns and Villages

Sl. No.	Name of Taluka	Number of Towns	Number of Villages	
			Total	Inhabited
1	2	3	4	5
1	Tarapur	-	42	42
2	Sojitra	-	25	25
3	Umreth	1	36	36
4	Anand	6	39	39

6	Khambhat	1	57	57
7	Borsad	2	64	64
8	Anklav	1	31	31
<b>Total :</b>		<b>12</b>	<b>350</b>	<b>350</b>

Source : Village / Town Directory, 2001

The civic status of the 12 towns is as under.

Municipality	:	10
Industrial Notified Area	:	2
<b>Total</b>	:	<b>12</b>

#### (iv) Physical Features :

Anand district is situated in central Gujarat. It lies between the parallels of latitude 22° 6' and 22° 43' and the meridians of longitude 72° 20' and 73° 12'. The length from north to south of this territory is about 63.6 km. and from east to west about 89.8 km. It is bounded on the north by the Kheda district and south by the Gulf of Khambhat, on the west by Ahmedabad district and on the east by Vadodara district. The total area of this district is 2,941 sq.km. It is 20<sup>th</sup> largest district in terms of geographical area in the state.

#### Physiography :

Anand district is a part of Gujarat plain and is sub-divided into three sub-micro regions, viz. Khambhat silting, Nadiad plain and Mahi plain on the basis of topography, climate, geology, soils and natural vegetation.

#### Khambhat silting plain:

The region covers the southern part of the district and extends over Khambhat, Petlad and Borsad talukas. It is enclosed by Ahmedabad district from west, Sabarmati-Vatrak plain and Nadiad plain from north, by Mahi plain from east while Gulf of Khambhat surrounds it from south.

Topographically, the region is a low-lying area of the district having 50 metres height above M.S.L. in the north while in the salt watery area of coastal portion is between 10 to 16 metres and is usually remained flooded in monsoon season.

#### Nadiad plain :

This region extends over Anand, Petlad and Borsad talukas. It makes its limits with Sabarmati-Vatrak plain in the west, district Sabar Kantha in the north Mahi plain in the east and Khambhat silting plain in the south.

The general slope of this region is from north to south and elevation of this region ranges between 32 metres and 100 metres above M.S.L. The geological structure of this region is mainly composed of alluvium, blown sand etc. and Deccan Trap formations.

#### Mahi plain:

The region covers the eastern part of the district and extends over parts of Anand and Borsad talukas. It makes its limits with Vadodara and Panchmahals districts in the east, Nadiad plain in the west and Khambhat silting plain in the south-west.

So far as slope of the region is concerned, it is having 60 metres heights above M.S.L. in the northern portion and 35 metres in the Southern port.

#### Hills :

There is no hill area in the district.

#### Drainage :

The Mahi and the Sabarmati are the main rivers of the nine rivers in the district. The Mahi flows out of the Mehad Talav situated in the Vindhyachal

mountains and empties into the Gulf of Khambhat. The Sabarmati rises from the Aravalli hills and enters the district and empties into the Gulf of Khambhat. Unlike the Mahi, which is most useful for irrigation, the main purpose served by the Sabarmati is that of drainage. The Shedhi, the Vatrak, the Meshwo and the Khari meet the Sabarmati at various points on its left bank. The Varansi and the Mohar are shallow and seasonal rivers.

#### Climate:

The climate of this district is characterized by a hot summer and dryness in the non rainy seasons. The year may be divided into four seasons. The cold season from December to February is followed by the hot season from March to May. The south-west monsoon season is from June to September while the months of October and November form the post monsoon season.

#### a) Temperature :

Anand district has a Meteorological observatory in city itself. The records of this observatory may be taken as representative of the Meteorological condition prevailing in the district as a whole. The period from March to May is one of continuous rise in temperatures. May and June are the hottest months with the mean daily maximum temperature and the mean daily minimum temperature reaching their peak. Mean daily maximum and minimum temperatures start decreasing thereafter. During the months November to January, night temperature drops rapidly and usually January is the coldest month. The details of the maximum and minimum temperatures for the period from 1996 to 1999 are given below.

### TEMPERATURE

(in centigrade)

Name of Months	1996		1997		1998		1999	
	Max	Min	Max	Min	Max	Min	Max	Min

**b) Winds :**

Winds are generally light and moderate in summer and the south-west monsoon season. They become stronger westerly to south-westerly winds prevailed in the south-west monsoon season. In October winds are from directions between west and north east. In November and December winds are mainly from directions between north and east. In January and February winds are again from direction between west and north-east. In the summer season the winds are pre-dominantly from directions between south-west and north-west.

**c) Rainfall :**

The annual rainfall in the district is received during the south-west monsoon season from June to September. July is usually the month of the highest rainfall. The annual rainfall of this district is 786.3 mm in the year 1998 and 463.4 mm in the year 1999. Monthly average rainfall of this district is given below.

**Monthly Rainfall (From 1998 to 1999)**

( in mm.)

Sl. No.	Month	1998	1999

**Economic Resources :**

Economic resources are an important means for the subsistence of the working people of the district. The details about economic resources of important sectors are given here under in brief.

**(1) Minerals and Mining :**

There is no production of any major minerals in the district. However, minor mineral products in the district are Brick clay, Building stone, Gravel, Lime stone, Road Metal and sand. As can be seen from the table that total mineral production in the district was

764,812 MT and 463,863 MT respectively for the years 1999-2000 and 2000-2001. The income from mineral production for these two years was Rs. 3,779,682 and Rs. 2,530,663 respectively.

**Major and Minor Mining Products & Income**

**(3) Soil and Cropping Pattern :****Soils :**

The soils of the district can be classified into two main types; the *Goradu* (Gravelly) and black. The *Goradu* type is mainly found in the *Charotar* tract comprising Anand, Borsad, Petlad and parts of Khambhat talukas. The black type of the Bhal tract is found in Khambhat taluka.

The river Mahi takes a steep curve and forms a peninsula on the border of the Borsad taluka of the district. This peninsula once contained large areas of fertile *bhatha* land and important crops like Tobacco, pearl millet, oilseeds and pulses are grown. Part of this area was privately owned by cultivators, and the some part is remained under the Government. However, heavy and repeated floods in the river Mahi during 1927, 1941, 1949 and 1973 washed away *bhatha* land and deposited deep layers of sand, thus rendering a large portion of the land useless for cultivation. As a result, a large number of cultivators in this area became landless.

**Cropping Pattern :**

Tobacco is the most valuable crop produced in thousands of acres in the *Charotar* tract (Borsad and Petlad) of the district. Bajri is another main crop and the staple grain food grown in the lighter soils with a mixture of *math*, *mug* and other pulses. Jowar is grown, to a much lesser extent, as an important fodder. The other important crops of the district are paddy, wheat, groundnut and pulses. The cultivation of cotton has considerably extended and the crop occupies large acres of land. Among the main crops, Cotton and Tobacco are grown for better economic returns.

**(4) Land and Land use Pattern :**

The total areas in the district was 2,941.0 sq.km.during 1998-1999. The land classification for the rural area of the district is given below on the basis of information collected for the Village Directory.

**Land Classification of Rural Areas**

(In '00 Hectares)

Sl. No.	Classification	Area as on 31.3.99
1	2	3
1	Forest	2.2
2	Irrigated	1,663.2
3	Unirrigated	381.5
4	Cultivable waste (including Gauchar and Groves)	131.9
5	Area not available for cultivation.	497.3
<b>Total</b>		<b>2,676.1</b>

Source: Village Directory,2001

**(5) Tenancy :**

There was no separate Act on tenancy in the former Bombay State before 1939. There were provisions of Section 83 of Land Revenue Code and Mamlatdar Court law only. The tenant was not secured of his tenancy rights in the Act. This tenancy lease was considered yearly and had to pay tenancy as per tradition or according to the agreement made with the land owner. In order to protect the tenants, the Bombay Tenancy Act, 1939 came into force in the erstwhile Bombay State.

On the independence of the country, it was necessary that the country is self-sufficient in agricultural production. It can be done only when the tillers of the land should have some definite rights over the land. With a view to effect control on efficient utilization of agricultural land and also to protect the tenants further and also to accept a definite policy and view for the country on agricultural land, The Bombay Tenancy and Agricultural Land Act, 1948 was enacted and it was brought into force since then.

The Act of 1948 was amended five times. An important provision of 'Farmer Day' was inserted in the Act on 1-8-1956. According to this provision, if any person legally tilled the land of other person on 01-04-1957, he was entitled to purchase the said land. Even though after Gujarat State was bifurcated from Bombay State in 1960, the said act applied to it was also as well.

Tenant means the person who held land on lease viz.

- (1) Tenant as per Section 4;
- (2) Protected tenant
- (3) Permanent tenant
- (4) The person who continued to possess the land with or without the consent of the land owner after appointed date and upto specified date or it is considered that he continued the possession of the land.

In all 1,049,056.4 hectares of land have been released and distributed to total of 1,278,125 beneficiaries under The Bombay Tenancy and Agricultural Lands Act, 1948.

In Anand district, in all 77,420.0 hectares of land have been relased and distributed to total 105,103 beneficiaries. Among these 19,890 belongs to Scheduled Castes who were allotted 7,974.7 hectares of land and 85,213 beneficiaries were under 'Others' category who were allotted 69,445.3 hectares of land. There is no Scheduled Tribes beneficiary in the district.

**(6) Agriculture :****a) Area under major crops:**

The area under major crops for the years 1993-94 and 1997-98 are indicated in the following statement.

**Area under Major Crops**

(in '00 Hectares)

Sl. No.	Name of crop	Area under Major Crops	
		1993-94	1997-98
1	2	3	4
1	Paddy	779	827
2	Wheat	335	400
3	Bajri	629	607
4	Jowar	3	2
5	Ragi	1	-
6	Other cereals	13	9
7	Gram	18	29
8	Other pulses	39	50
9	Sugarcane	4	20
10	Groundnut	60	16
11	Cotton	6	12

Source : Season and Crop Report, Directorate of Agriculture, 1999.

The area under Bajri, Other cereals and Groundnut

## ANALYTICAL NOTE

has decreased while the area under Paddy, Wheat, Gram, Other Pulses, Sugarcane and Cotton has increased in 1997-98 as compared to the year 1993-94. It can be seen that a majority of the cropped area was under Paddy, Wheat and Bajri.

### b) Average yield per hectare :

The average yield per hectare of the principal crops in the district during the year 1993-94 and 1997-98 is shown below.

#### Average Yield per Hectare

(In kgs.)

Sl.No.	Name of Crop	Average yield per hectare	
		1993-94	1997-98
1	2	3	4
1	Bajri (Kharif)	996	1,217
2	Bajri(Summer)	2,266	2,191
3	Jowar(Kharif)	276	743
4	Jowar(Rabi)	859	875
5	Paddy (summer)	2,530	2,812
6	Paddy	1,730	1,750
7	Wheat	1,915	1,880
8	Groundnut	1,789	1,683
9	Cotton	277	323
10	Sugarcane	7,800	7,500
11	Ragi	1,046	927

Source : Season and Crop Report, Directorate of Agriculture, 1999

The average yield per hectare was higher in Bajri (kharif), jowar (kharif), jowar (Rabi), paddy and cotton whereas the average yield per hectare was lower in Bajri (summer), Wheat, Groundnut, Sugarcane and Ragi during the year 1997-98.

### (7) Irrigation :

#### Source of Irrigation :

The area irrigated by different sources in the district are presented below during 1993-94 and 1997-98.

#### Area under Irrigation by Source

(in '00 hectares)

Sl. No.	Source of irrigation	1993-94		1997-98	
		Net	Gross	Net	Gross
1	2	3	4	5	6
1	Govt canals	666	810	823	1,061
2	Tanks	8	8	10	10
3	Wells	774	1,294	763	1,156
	<b>Total</b>	<b>1,448</b>	<b>2,112</b>	<b>1,596</b>	<b>2,227</b>

Source: Season and Crop Report, Directorate of Agriculture, 1999

The above figures indicate that wells are the main source of irrigation in the district. Next in order is the Government canals.

### (8) Animal Husbandry :

#### a) Livestock :

Cattle wealth occupies a pivotal place in the rural economy of the district. According to the livestock censuses of 1992 and 1997, the livestock population in the district is indicated below.

#### Livestock

Sl. No.	Livestock	Year	
		1992	1997
1	2	3	4
<b>(A)</b>	<b>Total Livestock</b>	<b>455,567</b>	<b>534,058</b>
1	Cattle (Cross breed)	30,369	29,142
	(a) Male over 2.5 years	1,513	1,042
	(b) Female over 2.5 years	18,756	18,375
	(c) Young stock	10,100	9,725
2	Cattle (Indigenous)	80,382	87,976
	(a) Male over 3 years	25,369	15,750
	(b) Female over 3 years	30,268	46,211
	(c) Young stock	24,745	26,015
3	Buffaloes	287,638	302,830
	(a) Male over 3 years	2,065	1,719
	(b) Female over 3 years	182,951	214,021
	(c) Young stock	102,622	87,090
4	Sheep	6,287	9,066
5	Goats	44,058	50,644
6	Horses and ponies	236	124
7	Camels	1,067	1,516
8	Pigs	2,501	19,609
9	Other livestock	3,029	33,151
<b>(B)</b>	<b>Poultry</b>	<b>879,965</b>	<b>2,076,439</b>

Source : (1) Directorate of Economics and Statistics, Livestock Census, 1992

(2) Directorate of Animal Husbandry, Livestock Census, 1997

Statement shows that the livestock in the district increased from 455,567 in 1992 to 534,058 in 1997. It is seen from the statement that buffaloes, cattle (indigenous) and goats form the major portion of the total livestock in the Anand district for the years 1992 and 1997. The number of buffaloes rose from 287,638 in 1992 to 302,830 in 1997. The number of cattle

(indigenous) was 80,382 in 1992 and 87,976 in 1997. Number of goats in the district increased from 44,058 in 1992 to 50,644 in the year 1997. There was sharp rise in the number of sheep during 1992 to 1997 from 6,287 to 9,066. Similarly number of poultry also increased significantly from 879,965 in 1992 to 2,076,439 in 1997.

#### b) Agricultural Implements :

According to the livestock census conducted in the State, the comparative data for agricultural implements in the district for the years 1992 and 1997 are shown in the following statement .

#### Agricultural Implements

Sl. No.	Name of Agricultural Implements	Year	
		1992	1997
1	2	3	4
1	Plough	<b>26,697</b>	<b>16,128</b>
	(a) Wooden	14,634	9,309
	(b) Iron	12,063	6,819
2	Carts	6,775	3,393
3	Oil engines	2,761	2,731
4	Electric Motors and Pumps	2,767	3,029
5	Tractors	4,287	5,884
6	Wheat Thresher	913	—

**Source:** (1) Directorate of Economics and Statistics, Livestock Census, 1992  
(2) Directorate of Animal Husbandary, Livestock Census, 1997

It is observed that use of traditional implements like plough and carts is on the decrease as their count during the year 1997 is significantly gone down as compared to 1992. As against this, the number of tractors increased from 4,287 to 5,884 during 1997. No wheat thresher was reported during 1997 in the Anand district as compared to 913 for 1992 census.

#### (9) Fisheries :

The district covers mostly inland fisheries except two marine centers at Khambhat and Dewhan. The district has a large number of small and medium tanks connected with the Mahi canal which offers a good scope to develop fresh water fisheries. The main fishes available in the district are *catla*, *rohu*, *mrigal*, mullet, Bombay-duck, prawn etc.

#### (10) Industry:

The total numbers of registered factories and average number of daily workers employed by major groups of industries for the year 1998 and 1999 are shown in the following statement. Among registered factories the most important establishment from the point of employment is transport equipment and parts.

#### Distribution of Important Industrial Establishments by Major Industry Group

Sl. No.	Major Group of NIC (National Industrial Classification)	Description of Manufacture	As on 31.12.98		As on 31.12.99	
			Number of Establishment	Average Number of persons working per day	Number of Establishment	Average Number of persons working per day
1	2	3	4	5	6	7
1	20-21	Food products	62	3,906	62	2,450
2	22	Beverages, tobacco and related products	134	2,924	124	2,738
3	23	Cotton textiles	4	1,268	6	1,220
4	24	Wool, silk and man made fiber textiles	1	12	1	8
5	25	Jute and other vegetable fibre textiles (except cotton)	1	23	1	26
6	26	Textile products (incl wearing apparel)	5	181	3	71
7	27	Wood and wood products Furniture's and fixtures	30	197	36	259
8	28	Paper and paper products and printing, publishing and allied industries	12	396	9	238
9	30	Basic chemical and chemical products (except products of petroleum and coal)	45	1,110	47	1,071
10	31	Rubber ,plastic petroleum and coal products processing and nuclearfuels.	12	239	12	142

## ANALYTICAL NOTE

Sl. No.	Major Group of NIC (National Industrial Classification)	Description of Manufacture	As on 31.12.98		As on 31.12.99	
			Number of Establishment	Average Number of persons working per day	Number of Establishment	Average Number of persons working per day
1	2	3	4	5	6	7
11	32	Non metallic mineral products	42	1,750	35	982
12	33	Basic metal and alloy industries	28	787	27	3,371
13	34	Metal products and parts except machinery and equipments.	58	2,247	52	1,430
14	35-36	Machinery and equipment other than transport equipment (scientific, equipment, photographic/ cinematographic equipment and watches and clocks is classified in division 38)	65	4,545	59	4,282
15	37	Transport equipment and parts	1	12	1	12
16	38	Other manufacturing industries	3	297	3	285

18	40-43	Electricity Gas and water Generation transmission distribution water works supply etc	2	1,156	1	576
19		Other Industries	9	501	11	1,039
		<b>Total :</b>	<b>515</b>	<b>21,646</b>	<b>491</b>	<b>20,289</b>

Source : Chief Inspector of Factories, 2000

Registered establishments have provided average daily employment for 21,646 and 20,289 persons as on 31<sup>st</sup> December of the years 1998 and 1999 respectively while the total number of registered establishments for these two years was 515 and 491 respectively. Among the registered establishments for both years 1998 and 1999 the four most important establishments in terms of the number and employment therein are; (1) Beverages, tobacco and related products, (2) Food products, (3) Machinery and equipment other than transport equipment (scientific equipment) and (4) Metal products and parts except machinery and equipments. The above data indicate a decrease in the industrial activities in 1999 as compared to the year 1998.

### (11) Trade and commerce :

Trade and Commerce includes wholesale and retail trade of all kinds. It also includes other commercial activities like financial, insurance, real estate and business services. Tobacco and tobacco products, milk powder, *tur dal*, industrial machinery, agate jewelry, electrical goods, glass products, machinery spare parts are major items traded in the Anand district. Broad gauge railway line between Ahmedabad and Mumbai passes through Anand town which provides good opportunities for trading for above products.

The important commodities manufactured and exported out from various towns of the district are mentioned in table 47. The major commodities

manufactured and exported out from the each town in the district are Sugar, Confectionery, Marbles, Diamonds, Isabgul, Potatoes and Red Turmeric Powder. Other items produced /manufactured and exported are Mustard seeds, Cumin seeds, Castor seeds and Agricultural Implements. Cut diamonds is also a major item of export.

### Villages Having Banking Facility

Sl. No.	Name of Taluka	Number of Villages where Banking facility is Available	Number of Banking Institutions	
			Commerical	Co-Operative
1	2	3	4	5
1	Tarapur	2	3	2
2	Sojitra	7	9	3
3	Umreth	7	5	3
4	Anand	21	24	9
5	Petlad	15	19	8
6	Khambhat	8	9	1
7	Borsad	16	18	7
8	Anklav	3	3	1
	<b>Total:</b>	<b>79</b>	<b>90</b>	<b>34</b>

Source : Village Directory, 2001

It can be seen from the above statement that there are 79 villages in the district having banking facilities. There are 90 commercial and 34 co-operative banking institutions in these 79 villages. Of the 8 talukas of the district, Anand taluka has the highest number of

21 villages having banking facility with 24 commercial and 9 co-operative banking institutions.

### a) Banking

Statement given below details the occupation wise classification of outstanding credit of commercial banks, as on 31<sup>st</sup> March 1999 for Anand district and

the Gujarat state. It is seen that the outstanding credit for Anand district was Rs.4, 003,137,000 with number of accounts being 66,918. It can be seen that direct finance for occupations under agriculture had maximum outstanding credit of Rs.1, 485,023,000 with 29,808 accounts.

### Occupation wise classification of outstanding credit of Scheduled Commercial Banks (At the end of March '99)

(Amount In Rs. '000)

Sl. No.	Occupation	Gujarat State		Anand District	
		Number of Accounts	Outstanding Credit	Number of Accounts	Outstanding Credit
1	2	3	4	5	6
I	Agriculture	797,379	22,325,870	29,808	1,485,023
	1. Direct Finance	791,685	17,882,575	29,678	936,993
	2. Indirect Finance	5,694	4,443,295	130	548,030

### (12) Transport and Communication :

Transport and Communication facilities are considered as administrative necessity as well as a public convenience. Moreover; a well-knit transportation system is a pre-requisite for the social and economic development of any district.

### a) Road:

The linking of one place with other by road is very essential to provide good transport system. According to the classification of road, made by the Indian Roads Congress, road length in the district by category is given below for the years 1999-2000 and 2000-2001. This statement includes the information of National highway, State highway, district and village roads.

### Road Length of Different Category

Sl. No.	Year	Type of Road (in Kms.)								Village Roads		Total
		Highways				District Roads						
		National		State		Main		Other				
		GOVT. DN.	PNCH DN.	GOVT. DN.	PNCH DN.	GOVT. DN.	PNCH DN.	GOVT. DN.	PNCH DN.	GOVT. DN.	PNCH DN.	
1	2	3	4	5	6	7	8	9	10	11	12	13
1	1999-2000	26	0	488	0	374	235	52	123	44	529	1,871
2	2000-2001	26	0	488	0	374	235	52	123	44	529	1,871

**Note:** GOVT. DN= Government Division.  
PNCH. DN= Panchayat Division.

**Source:** Road and Building Department, Government of Gujarat, 2001.

Statement indicates that no new road was constructed during the period, though existing roads were maintained by the authorities concerned. According to 2001 census, 345 villages and all the towns are connected with pucca roads and 171 villages are connected with kachcha roads in the Anand district.

#### b) Railway :

There are 42 villages having railway facilities in the Anand district.

#### c) Ports :

Anand district has only one minor port at Khambhat for minor navigation.

#### d) Posts and Telegraphs:

The following statement shows the number of villages in the district possessing post, telegraph and phone facilities. As regards rural areas of the districts the facilities of post, telegraph and telephone are available to 287, 40 and 304 villages respectively.

#### Communication Facilities

Sl. No.	Type of Communication amenities	Number of Villages having facilities
1	2	3
1	Post Offices	287
2	Telegraph Offices	40
3	Telephone	304

**Source :** Village Directory, 2001

#### e) State Road Transport :

Out of 350 villages, 346 villages are having bus facility.

#### Number of villages having bus facility

Sl.No.	Year	Number of villages
1	2	3
1	1998-99	346

**Source:** Village Directory, 2001

#### (13) Electricity:

Electricity is the chief necessity for the economic development of the district. The main source for power supply in the district is Gujarat Electricity Board. All villages are electrified in the district.

#### (14) Gram Panchayats, its composition, jurisdiction and role in the Development of Village and its Economy :

The system of Panchayati Raj was introduced in the year 1963 in Gujarat State. Under this set up, the three tier system was introduced namely, The District Panchayat, The Taluka Panchayat and The Gram Panchayat.

Gram Panchayat is an important institution of self-government. The Gram Panchayat is formed for a village or a group of villages. The Gram Panchayat is constituted for a local area with the population of less than 10,000. Such local area may be revenue village or a group of revenue villages or hamlets forming part of a revenue village or such other administrative unit or part of thereof. The number of members of Gram Panchayat varies from 9 to 15. The tenure of Gram Panchayat is of five years. The people of village elect Sarpanch and Vice-Sarpanch (Up-Sarpanch) and other members of the Panchayat. Various Committees like; Social Justice Committee and Standing Committee are formed. In the year 1993 Government of India enacted 73<sup>rd</sup> Constitutional Amendment regarding provisions of Panchayati Raj and implementation of this Act in Gujarat was enforced from 15<sup>th</sup> April 1994. By this constitutional amendment, Panchayats are given constitutional status. Regular and timely election, participation of women and backward classes, formation of separate State Election Commission and rotation system in electing the heads of the various

committees are other significant amendments in the act. Decentralised planning process and active participation of people is the soul of the Panchayati Raj Act. The powers for decentralised planning, implementation and development are delegated to the Panchayats.

The primary functions of the District/Taluka Panchayats are providing facilities for primary education, health, drinking water, electricity, constructions and maintenance of roads, bridges etc., maintenance of Gauchars, organising relief work at the time of scarcity and drought situation, sanitation and social welfare. Arrangements for housing facilities for below poverty line people and rural development schemes are implemented by panchayats. Gram Panchayats also implement important programmes like, 'food for work' and other programmes beneficial for the local people. Thus, Panchayats play an important role in the development of village and its economy. There are 13,761 Gram Panchayats in Gujarat State. Out of 350 villages in Anand district, there are only 11 Group Panchayat and 339 independent Gram Panchayats.

#### (v) Census Concepts :

##### **Building :**

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate building.

##### **Permanent Houses :**

Houses, the walls and roof of which are made of permanent materials. The Material of wall can be anyone from the following namely Galvanized iron sheets or other metal sheets, Asbestos sheets, burnt bricks, stonnes or concrete. Roof may be made of from

any one of the following materials namely tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stonnes or concrete.

##### **Semi-permanent Houses :**

Houses in which either wall or roof is made of permanent materials and the other is made of temporary material.

##### **Temporary Houses :**

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

##### **Dwelling Room :**

A room is treated as a dwelling room if it has walls with a doorway and a roof should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of a 2 meters. A dwelling room would include living room, bedroom, dining room drawing room study room, servant's room and other habistatement rooms. Kitchen, Bathroom, latrine, Store-room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office. etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servants household tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room which is shade by more than one household has not been counted for any of them. If two household have a dwelling room each but in addition also share a common dwelling room. Then the common room has not been counted for either or of the household.

##### **Census House :**

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common

courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of a different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two

independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work shed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

#### **Village :**

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data.

In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Town/Urban Area :**

The following areas are treated as towns/urban areas :

- (a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.
- (b) All other places which satisfy or are expected to satisfy the following criteria simultaneously
  - i) A minimum population of 5,000;
  - ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and
  - iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

**City :**

Towns with population of 1,00,000 and above are called cities.

**Urban Agglomeration :**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

- (a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and
- (b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

- i) a city or town with one or more contiguous outgrowths;

- ii) two or more adjoining towns with their outgrowths; and

- iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

**Household :**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

**Institutional Households :**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless Household :**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Household.

**Scheduled Castes and Scheduled Tribes :**

Article 341(1) of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342(1) similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions,

the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State is given below

#### List of Scheduled Castes :

1. Ager
2. Bakad, Bant
3. Bawa-Dedh, Dedh Sadhu
4. Bhambi, Bhambhi, Asadaru Asodi, Chamadia, Chamar Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Nalia, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar.
5. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
6. Chalvadi, Channayya
7. Chenna Dasar, Holaya Desar
8. Dangashia
9. Dhor, Kakkayya, Kankayya
10. Garmatang
11. Garoda, Garo
12. Halleer
13. Halsar, Haslar, Hulasvar, Halasvar
14. Holar, Valhar
15. Holaya, Holer
16. Lingader
17. Mahar, Taral, Dhegu Megu
18. Mahyavansi, Dhed, Dhedh, Vankar, Maru Vankar, Antyaj
19. Mang, Matang, Minimadig

20. Mang-Garudi
21. Meghaval, Meghwal, Menghvar
22. Mukri
23. Nadia, Hadi
24. Pasi
25. Senva, Shenva, Chenva, Sedma, Rawat
26. Shemalia
27. Thori
28. Tirgar, Tirbanda
29. Turi
30. Turi Barot, Dedh Barot

#### List of Scheduled Tribes :

1. Barda
2. Bavacha, Bamcha
3. Bharwad (In the Nesses of the forests of Alech, Barada and Gir)\*
4. Bhil, Bhil Garasia, Dholi-Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
5. Charan (In the Nesses of the forests of Alech, Barada and Gir) \*
6. Chaudhri (In Surat and Valsad districts)
7. Chodhara
8. Dhanka, Tadvi, Tetaria, Valvi
9. Dhodia
10. Dubla, Talavia, Halpati
11. Gamit, Gamta, Gavit, Mavchi, Padvi
12. Gond, Rajgond
13. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
14. Kokna, Kokni, Kukna
15. Koli (In Kachchh district)
16. Koli Dhor, Tokre Koli, Kolcha, Kolgha
17. Kunbi (In The Dangs District)
18. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
19. Padhar
20. Paradhi (In Kachchh district)
21. Pardhi, Advichincher, Phanse Pardhi (Excluding Amreli, Bhavnagar, Jamnagar, Junagadh, Kachchh, Rajkot and Surendranagar districts)
22. Patelia
23. Pomla
24. Rabari (In the Nesses of the forests of Alech, Barada and Gir)\*
25. Rathawa
26. Siddi (In Amreli, Bhavnagar, Jamnagar, Junagadh, Rajkot and Surendranagar Districts)
27. Vaghri (in Kachchh district)
28. Varli
29. Vitola, Kotwalia, Barodia

\* The area comprised of Jamnagar and Junagadh districts.

**Language and Mother Tongue :**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate :**

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy Rate :**

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

**Educational Level :**

The highest level of education a person has completed.

**Work :**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

**Main Worker :**

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as "Main worker".

**Marginal Worker :**

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal- worker'

**Non Worker :**

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

**Cultivator :**

For purposes of the Census a person is classified as cultivator, if, he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural laborers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetatement growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (area).

**Agricultural Labourer :**

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural laborer has no right of lease or contract on land on which she/he works.

**Household Industry Worker :**

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

**Other Worker :**

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural Labourer or in Household Industry is termed as an 'Other-Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural laborers or household industrial workers, are 'Other Workers'.

**Work Participation Rate :**

Percentage of workers (main + marginal) to total population

**Population Density :**

Population density is the number of persons inhabited per square kilometer of the area.

**Age :**

Age is measured in terms of the completed number of years.

**Sex Ratio :**

Numbers of females per 1000 males in a population.

**(vi) Non Census Concepts :****Improved Drinking Water :**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well

(protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

**System of Sewerage :**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are, not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

**Type of Latrine and Method of Disposal of Night Soil :**

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suistatement device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility :**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially lives births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

**Crude Birth Rate (CBR) :**

Ratio of the numbers of live births in a year to the mid year population. (normally expressed per 1,000 population).

$$\text{CBR} = \frac{\text{Numbers of live births during the year}}{\text{Mid -year Population}} \times 1,000$$

**Crude Death Rate (CDR) :**

Ratio of the numbers of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Numbers of deaths during the year}}{\text{Mid -year Population}} \times 1,000$$

**Natural Growth Rate (NGR) :**

Natural Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

$$\text{NGR} = \text{CBR} - \text{CDR}$$

**Age - Specific Fertility Rate (ASFR) :**

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Numbers of live births in a particular age group}}{\text{Numbers female population of same specified age group}} \times 1,000$$

**Age - Specific Marital Fertility Rate (ASMFR):**

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year married female population of the same age group}} \times 1,000$$

**General Fertility Rate (GFR) :**

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

**General Marital Fertility Rate (GMFR) :**

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age group (15-49) years}} \times 1,000$$

**Total Fertility Rate (TFR) :**

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{45-49}{5 \times \sum \text{ASFR}} \times 1,000$$

**Total Marital Fertility Rate (TMFR) :**

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{45-49}{5 \times \sum \text{ASMFR}} \times 1,000$$

**Age-Specific Mortality Rate (ASMR) :**

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age group}}{\text{Mid-year population of the same age group}} \times 1,000$$

**q1 :**

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**q2 :**

Probability of dying between birth and age 2.

**q5 :**

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (q5 MR)

**Infant Mortality Rate (IMR) :**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

**Neo-natal Mortality Rate (NMR) :**

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days under during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Early Neo-natal Mortality Rate (ENMR) :**

$$\text{ENMR} = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Late Neo-natal Mortality Rate (LNMR) :**

$$\text{LNMR} = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Post Neo-natal Mortality Rate (PNMR) :**

$$\text{PNMR} = \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Peri-natal Mortality Rate (PMR) :**

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

**Stillbirth Rate (SBR) :**

$$\text{SBR} = \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

**Maternal Mortality Rate (MMR) :**

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and childbirth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

**Eligible Couple (Couples per 1,000 population):**

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

**Child Woman Ratio (0-4) :**

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

**Child Woman Ratio (5-9) :**

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

**Migration :**

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

- (i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.
- (ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.
- (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

#### **Internal and International Migration :**

The migrational movements are of three types

- (i) Migration within the state itself with its components
  - (a) Migration within the district of enumeration (intra district migration)
  - (b) Migration from one district of state to another district of state (inter district migration),
- (ii) Migration from one state to another State of the country (inter-state migration),
- (iii) Migration from one country to another country.

The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

#### **Rural-Urban Components of Migration :**

Rural or Urban status in respect of migrants had been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

#### **Civic Status of Urban Units :**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

#### **Size Class of UA/Town :**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population is classified as Class I UAs./towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5(1,000,000-1,999,999) M4(500,000-999,999); M3(300,000-499,999), M2(200,000-299,999) & M1(100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

#### **Slum Area :**

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

#### **Mega City :**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of

## ANALYTICAL NOTE

management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

### (vii) 2001 Census Findings – Population and its Distribution

#### (a) Distribution of population in rural-urban areas:

According to the 2001 Census, the total population of Anand district is 1,856,872 comprising 972,000 males and 884,872 females. This population of the district forms 3.7 percent of the State population and ranks at 12<sup>th</sup> place among the 25 districts of Gujarat state. Out of the total population of the district 72.6 percent, that is 1,348,901 lives in rural area while 27.4 percent, that is 507,971 lives in urban area. Rural population of the district is distributed among 8 talukas and urban population is spread over in 12 towns. The total urban population in the district is 507,971 persons comprising 265,315 males and 242,656 females. The total rural population in this district comes to 1,348,901 persons and is composed of 706,685 males and 642,216 females as per 2001 Census. This rural population is distributed in 350 villages of the district. No village is uninhabited.

#### (b) Size class & status of towns, Population growth, Density, Sex ratio, Work participation rate, Details of Literacy , availability of University education in the District :

The statement given below gives the status, size and class of twelve towns with population in the district for 2001 Census.

Sl. No.	Name and Civic Status of Town	Size Class of Town	Population
1	2	3	4
1	Anand (M)*	I	156,050
2	Karamsad (M)	III	28,955
3	Vallabh Vidyanagar (M)	III	29,378
4	Vithal Udyognagar INA (INA)	VI	4,103
5	Anklav (M)	IV	19,803
6	Boriavi (M)	IV	17,805
7	Borsad (M)	II	56,548

Sl. No.	Name and Civic Status of Town	Size Class of Town	Population
1	2	3	4
8	Khambhat (M)*	II	93,194
9	Ode (M)	IV	18,459
10	Petlad (M)	II	51,147
11	Umreth (M)	III	32,191
12	Vasna (Borsad) INA (INA)	VI	338

**Note :** \*Towns having outgrowths

According to the 2001 Census the total population of the Anand district is 1,856,872. There has been net addition of 214,257 persons during 1991-2001. The decadal growth rate of population for the district is 13.0 per cent. The growth rates for the rural and urban areas of the district are 9.7 and 22.9 per cent respectively. The overall growth rate of urban population is higher in the district. The highest growth of urban population is in Anand taluka where urban population has shown the highest growth rate of 46.0 per cent during the decade from 174,480 in 1991 to 254,750 in the year 2001.

The density of population in Anand district is 631 persons per sq.km. against the state average of 258 persons.

There are 910 females for every thousand males in Anand district. The sex ratios for rural and urban areas of the district are 909 and 915 respectively. Among the talukas, the highest sex-ratio of 923 females has been recorded in Tarapur and Khambhat talukas and the lowest of 903 is recorded in Anklav taluka. The urban areas of Khambhat taluka have the highest sex ratio of 943 and urban area of Anand taluka has the lowest sex-ratio of 899 females per 1,000 males. Sex ratio in age-group 0-6 comes to 849 females per 1,000 males in the district, as a whole. In rural areas, this proportion is 853 while in urban areas the sex-ratio of child population works out to 833 females per 1,000 males.

The work participation rate is defined as percentage of total workers to total population. In the same way it is defined for main workers and marginal workers. According to 2001 Census, the total workers including main and marginal workers constitute 42.3 percent of the total population of the district. Of the total workers the share of the main workers is 33.3 per cent and the marginal workers is 9.0 per cent. The remaining population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 50.3 and

corresponding proportion for female is 14.5 per cent. Male and female marginal workers account for 4.8 and 13.6 per cent respectively.

A person who can read and write in any language with understanding is taken to be literate in census. All children of age below 7 years are treated as illiterates.

As per 2001 census Anand district reported 1,193,404 persons as literates constituting 74.5 per cent of the total population. The proportion of male and female literates in the district is 86.1 and 61.9 per cent respectively. The gap of male and female literacy rate is 24.2 percentage points in the district.

The total literacy rates of rural and urban areas are 71.6 and 82.1 per cent respectively. Male and female literates in rural are 84.8 and 57.1 per cent respectively. In urban areas these proportions are 89.4 and 74.3 per cent respectively. The gap between male and female literacy rates in urban areas is 15.1 percentage points against 27.7 percentage points in rural areas. Urban females have significantly higher literacy rate than rural females in the district.

There are several arts, commerce and science colleges in the district. The famous Sardar Patel university of Vallabh Vidyanagar is in this district, which is famous for various educational faculties comprising several science & technology institutions.

#### Religion:

Religion forms an integral part of Indian Social system. In the pre-Independence census reports, the data on religions was being presented for 9 major religions viz. Hindu, Muslim, Tribals, Christian, Sikh, Jain, Buddhist, Parsi, Jew and others. However, since the 1951 census the data on religion has been presented for 6 major religions viz. Hindu, Muslim, Christian, Sikh, Jain and Buddhist. Besides, the minor religions have been classified under the category of 'other'. The data on religion collected and presented by the Indian Census is the basic data of intense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

In 2001 the Indian Census collected the religion data in question No.7 of the Household Schedule and recorded the same under the six major religions. Other religions were recorded in actual as returned by the respondent and classified under the category of 'others'. Religion not stated has been added for those persons who have not stated their religion at the time of canvassing the status of religion.

### Percentage distribution of population by major religions in Gujarat State and Anand district in 2001 Census

Sl. No.	Religion	Gujarat State		Anand District	
		Population	Percentage	Population	Percentage
1	2	3	4	5	6
1	Hindu	45,143,074	89.1	1,616,127	87.0
2	Muslim	4,592,854	9.1	199,263	10.7
3	Christian	284,092	0.5	29,461	1.6
4	Sikh	45,587	0.1	1,004	0.1
5	Buddhist	17,829	0.0	81	0.0
6	Jain	525,305	1.0	10,151	0.6
7	Other	28,698	0.1	60	0.0
8	Religion not stated	33,578	0.1	725	0.0

Source : Census of India, 2001

The comparative data of Gujarat State and Anand district for major religions is given in the above statement. It is observed that at State level 89.1 percentage of population follows Hindu religion, whereas in Anand district, followers of Hindu religion are recorded at 87 per cent of population. In Gujarat State 9.1 per cent of population follows Muslim religion against 10.7 per cent Muslim in Anand district. The percentage of other major religions is very low in comparison to Hindu and Muslim.

The distribution of the population for major religions in rural and urban areas of the district is as under according to 2001 Census. It is observed that 76 per cent of Hindus has been recorded in rural areas just followed by Muslims (51.5 per cent) and Christians (48.6 per cent). In case of Buddhists, Jains and Sikhs, maximum of 96.3 per cent Buddhist is netted in urban areas just followed by Sikhs (82.6 per cent) and Jain (78.2 per cent). Maximum of 79.2 per cent population has not stated their religion in rural areas while followers of other religions are 70.0 per cent in urban areas.

Religion	Number of followers	Population	
		Rural	Urban
1	2	3	4
Hindu	1,616,127	1,228,924 (76.0)	387,203 (24.0)
Muslim	199,263	102,688 (51.5)	96,575 (48.5)
Christian	29,461	14,311 (48.6)	15,150 (51.4)
Sikh	1,004	175 (17.4)	829 (82.6)
Buddhist	81	3 (3.7)	78 (96.3)
Jain	10,151	2,208 (21.8)	7,943 (78.2)
Others	60	18 (30.0)	42 (70.0)
Religion not stated	725	574 (79.2)	151 (20.8)

Table 2 details the absolute number and percentages of inhabited villages falling in various population sizes of village and number of male and female for each population size of village at taluka level in the district. Out of 350 inhabited villages, no village has population below 200 persons. The size class of 200-499 persons claims 7 villages having 2.0 per cent villages of the district while the size class of 500-999 population is having 22 villages with 6.3 per

cent of the total villages. As many as 78 villages accounting for 22.3 per cent of village are netted in the population size class of 1,000-1,999 and 158 villages (45.1 per cent) are in population size class of 2,000-4,999. 62 villages (17.7 per cent) are having the population range of 5,000-9,999. 23 (6.6) villages in the district have population of more than 10,000. Borsad taluka has the highest number of 64 villages while Sojitra has the least number of 25 villages.

11	2001	920	945	880	910	909	915

Table 5 gives detail of sex ratio of state and Anand district for census years of 1901 to 2001. As per 2001 census the district sex ratio is 910 against the state sex ratio of 920. In Anand district during the census years of 1901 to 2001 the highest sex ratio of 912 females for every 1,000 males is recorded in the years of 1991 while the lowest sex ratio of 865 is recorded in 1911. It can be observed that except the census years of 1951 to 1971, urban sex ratio in Anand district is found to be higher than the rural sex ratio in all other census years.

## ANALYTICAL NOTE

Table 8 gives the detail of the distribution of sex ratio for rural population by 9 different ranges for the district. The maximum number of villages i.e. 179 accounting for 51.1 per cent of the total villages and covering 58.1 per cent of the rural population have been recorded in sex ratio range of 900-949. Sex ratio range of 850-899 has 126 villages (36.0 per cent) and covers of 34.2 per cent of population. There is no village having sex ratio less than 800. There are 7 villages having the sex ratio of 1,000 or more.

Table 10 gives the details about population in age group 0-6 years and sex ratio for population in rural and urban areas of each taluka of the district. Total population in age group 0-6 years is 255,231 persons comprising 138,074 males and 117,157 females. The sex ratio in this age group works out to 849 females per 1,000 males in the district. The sex

ratio in this age group for rural areas of is 853 while urban areas it is 833. The rural sex ratios among talukas varies in between 830 in Sojitra taluka and 879 for Anklav taluka. In case of urban areas of the talukas in the district, the sex ratio for age group 0-6 varies between 806 in Anand and 888 in Khambhat taluka.

Table 14 shows the details about the distribution of Scheduled Castes and Scheduled Tribes with their percentage to total population at taluka level for rural and urban areas of the district. It can be seen that out of total district population of 1,856,872, 5.3 per cent population belongs to Scheduled Castes and 1.2 per cent population belongs to Scheduled Tribes. The percentage of Scheduled Castes population

is 5.5 per cent in rural areas and 4.8 per cent in urban areas. The highest percentage of Scheduled Castes population is recorded in Tarapur taluka (11.3 per cent). The proportion of Scheduled Tribes population is 1.0 and 2.0 per cent in rural and urban areas respectively. The highest Scheduled Tribes population of 2.5 per cent is observed in the Anand taluka.

Table 21 shows talukawise literacy rates with the absolute number of literates and illiterates for rural and urban areas separately at taluka level. As per 2001 Census, the proportion of effective literates to total population is 74.5 per cent in the district, while this proportion in rural area is 71.6 per cent against 82.1 per cent in urban areas. In the district the literacy rate for males is 86.1 per cent which is higher as compared to literacy rate of 61.9 per cent for females. Among the talukas Anand taluka tops with 80.7 per cent

literates. Tarapur taluka shows the lowest literacy rate of 66.6 per cent in the district. The gap between male and female literacy is 24.2 percentage points in the district as a whole. Gap in male-female literacy rates for urban area is 15.1 percentage points whereas the gap between male and female literacy is 27.7 percentage points in rural areas. Literacy gap in males and females is the highest of 30 percentage points in Anklav taluka whereas the lowest gap of 19.7 percentage points has been seen in Anand taluka.

Table 22 reveals the effective literacy and illiteracy rates along with absolute number of literates and illiterates for the rural population at taluka level in the district. As much as 71.6 per cent for the total population in the rural areas of the district is literate. A gap of 27.7 percentage points in literacy rate between males and females has been registered. Among the talukas of the district, Anand taluka shows the

maximum literacy rate of 76.1 per cent while Tarapur taluka shows the lowest literacy rate of 66.6 per cent. Among talukas, Anand taluka also has the maximum literacy rate for males and females having 88.2 per cent and 62.9 per cent literacy respectively. Anklav taluka has the highest gap of 31.3 percentage points in male- female literacy rates whereas the lowest gap of 24.9 percentage points has been seen in Petlad.

UA = Urban Agglomeration

Table 24 shows the absolute number of literates and illiterates along with literacy rates in Urban Agglomeration /Towns. As much as 82.1 per cent of the urban population excluding the population of age group of 0-6 years is literate in the district. As high as 89.4 per cent of the male population is literate while corresponding figure for females is 74.3 per cent. Vallabh Vidyanagar (M) has the highest literacy rate

of 89.5 per cent while Vasna Borsad INA has the lowest literacy rate of 68.6 per cent among urban areas. Anklav(M) has the lowest female literacy rate of 59.8 per cent. Among all urban areas, the gap in male female literacy rate for the district is 15.1 percentage points. It is the highest of 27.1 per centage points in Boriavi(M). While the lowest of 10.6 percentage points is in Anand (M).

Table 25 gives the details about number and percentage of Scheduled Castes literates and illiterates by sex in taluka. 76.7 per cent of the total Scheduled Castes population excluding the population of age group of 0-6 years is literate in the rural district. 88.1 per cent of male Scheduled Castes is literate while corresponding figure for female is 63.9 per cent in the rural areas of the district. There is a gap of 24.3

percentage points between the literacy rates of male and female for the Scheduled Castes population in the rural areas. Among talukas rural areas of Petlad taluka has the highest literacy rate of 81.7 per cent while the lowest literacy rate of 64.2 per cent is recorded in Tarapur taluka. The highest gap of 32.2 percentage points in literacy rates between male and female is seen in Tarapur taluka.

Table 31 shows absolute number and percentage of main workers, marginal workers and non workers by sex at taluka level in the district as per 2001 Census. 42.3 per cent in the total population have been registered as workers in the district. Of which 33.3 per cent are main workers and 9.0 are marginal workers. Percentage of non-workers in the district is 57.7 per cent of total population. Among the main workers male participation rate in the district is 50.3 per cent while corresponding rate for females is 14.5

per cent. As far as marginal workers are concerned, the female participation rate of 13.6 per cent is much higher than male participation rate of 4.8 per cent. Among talukas, Anklav taluka has the maximum of 36.1 per cent main workers. Tarapur taluka has highest of 14.0 per cent marginal workers. The highest of 52.2 per cent main workers in male working group has been recorded in Anklav whereas the highest of 22.8 per cent marginal workers in females has been registered in Tarapur taluka.

Table 32 gives the details about absolute number and percentage of main workers, marginal workers and non workers by sex for rural population of the district. It can be seen that in the rural areas 34.6 per cent of the population has been categorized as main workers whereas the marginal workers are 11.0 per cent. 54.4 per cent of rural population is 'non-worker'. Sex-wise break up shows that participation in main work for male and female is 51.0 per cent and 16.6 per cent

respectively. Male and female marginal workers out respectively 5.5 per cent and 17 per cent. The percentage of marginal workers in female is higher as compared to the marginal workers in male. Similar trend is also observed at taluka level. At the taluka level Anklav taluka has the highest of 49.7 per cent workers. Whereas the lowest percentage of 40.9 per cent workers was observed in Anand taluka.

UA = Urban Agglomeration

Table 33 shows the absolute number with percentage of main workers, marginal workers and non-workers by sex for urban areas at U.A/Town level in the district. Of the 507,971 total urban population of the district, 29.7 per cent is main workers whereas only 3.7 per cent marginal workers. Non-workers are 66.7 per cent. Sex-wise break in the urban areas of the

district shows that 48.5 per cent of males and 9.0 per cent of females are main workers. Male and female marginal workers are 2.8 per cent and 4.6 per cent respectively. The highest of 48.2 per cent of workers is observed in Anklav(M) and the lowest of 25.6 per cent in Vallabh Vidyanagar (M) .

**Note:** Percentage of Worker to total worker are given in brackets

Table 34 reveals economic activities at taluka level in the district. From the table it is evident that total workers including main and marginal workers are 42.3 per cent of the total population. Cultivators are 19.8 per cent while agricultural labourers are 36.6 per cent. Only 2.4 per cent workers are in household industry

while 41.2 per cent are engaged in other works. Umreth taluka has highest of 28.0 per cent cultivators, Sojitra taluka has highest 47.5 per cent, agricultural labres, Anand taluka has highest of 53.6 per cent of other workers.

**Note :** Percentage of Worker to total worker are given in brackets

Table 35 gives talukawise distribution of workers by sex in four categories of economic activity for rural areas of the district. It can be seen that total workers in the rural areas of Anand district are 45.6 per cent . Among workers, cultivators are 23.8 per cent while Agricultural labourers are 42.7 per cent. Persons engaged in other works are 31.4 percent in rural areas of the district 56.5 per cent of the male population of

the district is engaged in economiactivites, 32.7 per cent of male workers are agricultural labourers and 25.0 per cent are engaged in other works. In case of female workers, 48.2 per cent agricultural labourers Among talukas,the of highest 31.2 per cent of cultivators is found in Umreth taluka. Sojitra taluka has the highest of 47.5 per cent agricultural labourers in the district.

UA = Urban Agglomeration

Table 36 details the distribution of workers by sex in four categories of economic activities in urban areas of the district. Total workers (Main + Marginal) in urban areas are 33.3 per cent of total urban population in Anand district. Among these workers, cultivators constitute 5.4 per cent, agricultural labourers in 14.5 per cent, household industry workers 3.3 per cent and other workers 76.9 per cent. Of the total male working population, 80.1 per cent are engaged in other works. In case of females this proportion is 63.7 per cent.

Proportion of total workers to total urban population is highest at 48.2 per cent for Anklav(M) among all urban areas of Anand district. Among urban areas, Vasna Borsad INA (99.2 per cent) and Vithal Udyognagar INA (99.0 per cent) towns have almost entire working population engaged in activities under 'other works'. Total workers as percentage to total population of the towns is minimum at 25.6 per cent for Vallabh Vidyanagar(M) town of district.

**Note :** Percentage are given in brackets.

\* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

\$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 given above shows the talukawise distribution according to the availability of different amenities such as education, medical, improved drinking water, post office, telephone, transport communication, banks, agricultural credit societies, approach to village by pucca road and power supply. All the 350 inhabited villages in the district have availability of atleast some educational facility, improved drinking water supply facility and power supply facility. Medical facilities of one kind or other

are available in all the 301 villages of the Anand district. As many as 288 (82.3 per cent) villages are equipped with one or more facilities of post and telegraph. Telephone facility is available to 304 i.e.86.9 per cent of villages in the district. Out of 350 villages, 346 villages are well connected with the transport facility. Agricultural Credit Societies are available in 191 (54.6 per cent) villages. Only 79 (22.6 per cent) villages have banking facility. As much as 345 (98.6 per cent) villages are linked by pucca roads.

**Note :** Percentages are given in brackets.

\* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a and pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

\$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 gives the details about the number and percentage of rural population served by different amenities. Entire population in 350 villages of Anand district is covered under the education the facilities of some kind, improved drinking water and power supply. Amenities like medical, postal, telephone, transport

and communication and approach by pucca roads are available to more than 92 per cent of the population in the district. Banking facility is available to 43.6 per cent of population in the district while 66.9 per cent of the population is covered under facility of agricultural credit societies.

TABLE 39

**DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY  
DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001**

Village not having the Amenity of	Distance Range of Place from the Villages where the Amenity is available

**Note :** \* In Gujarat State, the levels of education are classified as under

- (i) Primary (from Std. I to VII passed)
- (ii) Secondary/Matriculation (From Std. VIII to X passed)
- (iii) Higher Secondary (From Std. XI to XII passed). Hence, details under 1(b) are not shown.

Table 39 shows the minimum distance at which a certain facility is available to all villages. Table shows that out of 296 villages having no primary health centre facilities, inhabitants of 143 villages have to move a distance of upto 5 kms, 91 vilages have this facility available within the distance range of 5-10 kms while inhabitants of 62 villages have to move more than 10 kms to avail primary health facilities. Out of the 63 villages of the district having no facilities of post office, 47 villages have it at a distance of less than 5 kms., 12 villages have it in the distance range of 5-10 kms. and 4 villages have it at a distance of more than 10 kms. Telephone facility is available for 28 villages within a distance of 5 km whereas 11 villages have this facility at the distance of more than 5 km but less than 10 km. and 7 villages have this facility at a distance of more

than 10 kms. Out of 4 villages having no bus facilities, 2 villages have it within 5 kms of distance while 2 villages have it within distance range of 5-10 kms. Commercial banking facility is available to as many as 139 villages outside the village and within the distance of 5 kms. Out of 159 villages having no amenity of agricultural credit society, inhabitants of maximum number of 91 villages have to move upto 5 kms of distance to avail this facility. Out of 348 villages having no degree college, inhabitants of 65 villages have to cover a distance of less than 5 kms. for availing this facility, whereas such educational facilities are available to the inhabitants of 178 villages at a distance of more than 10 kms.

# Post office includes Post office, Telegraph office and Post and telegraph office.

\$ Transport communication includes bus service, rail facility and navigable waterways.

In the Table 40 the villages are distributed according to four ranges of the distance from the nearest statutory town along with number of villages and availability of different amenities. Out of 350 villages, 36 villages are at a distance of less than 5 kms. from the nearest statutory town and all these villages have some educational facility. Out of these 36 villages, 30 villages are having Medical facilities, 26 are having Post Office, 34 villages are having telephone facilities, 36 villages are having transport and communications facility, 18 villages have

Agricultural Credit Societies and 35 villages are having approach by pucca road. Only 5 villages are having facilities of banking. No village is situated at a distance of more than 51 kms. from the nearest statutory town. 105 villages are situated at a distance range of 16-50 kms from the nearest statutory town. Facilities of banks and agricultural credit society are available to 17 villages and 58 villages respectively situated at a distance range of 16-50 kms. from the nearest statutory town.

\* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, Telegraph office and Post and telegraph office.

\$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 reveals the distribution of villages according to different population ranges and amenities available. 23 villages having population of 10,000 and above have all the facilities except the facilities of banks and agricultural credit societies.. The lowest population range of 1-499 has 7 villages having facilities of education, improved drinking water and power supply while medical facilities are available in 4 villages. None of the village in the lowest population

range of 1-499 has bank facilities. More than 50 per cent villages of all villages are having the population range of 2,000-4,999. Facilities like education, improved drinking water and power supply are available to these villages while facilities like medical, post office, telephone, transport communication and approach by pucca road are available to more than 85 per cent villages.

**TABLE 42**  
**DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001**

Sl. No.	Name of Taluka/ C.D.Block	Number of Inhabited Villages	Total area (In Hectares)	Percentage of Cultivable area to Total Area	Percentage of Irrigated area to Total Cultivable Area (In Hectares)
1	2	3	4	5	6
1	Tarapur	42	33,765.2	86.2	70.2
2	Sojitra	25	16,571.8	85.5	85.9
3	Umreth	36	21,572.7	80.6	85.1

6	Khambhat	57	77,373.7	53.4	71.2
7	Borsad	64	39,359.4	86.5	85.9
8	Anklav	31	16,738.9	85.5	78.0
<b>District Total :</b>		<b>350</b>	<b>267,600.4</b>	<b>76.4</b>	<b>81.3</b>

**Note** : - Cultivable area = irrigated area + unirrigated area

Table 42 gives the talukawise distribution of villages according to land use. It also gives the total area and percentage of cultivable area to total area of villages in the district. Cultivated area includes irrigated as well as unirrigated. There are 350 inhabited villages in the district having a total area of 267,600.4 hectares. Of this 76.4 per cent is cultivable area and out of which 81.3

per cent of area is irrigated. At taluka level, Petlad taluka has the maximum percentage of cultivable area that is 92.2 per cent. Khambhat taluka has the least of 53.4 per cent of cultivable area to total area in the taluka. Petlad taluka has the highest of 92.8 per cent irrigated area and Tarapur taluka has the minimum of 70.2 per cent of irrigated area in the district.

Source : Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

Table 48 gives the number of households by tenure status and number of rooms occupied for the district. The total number of households in the district is 355,572 having 259,956 households in rural areas and 95,616 in urban areas. Out of total households, 25,507 households belong to Scheduled Castes and 5,625 belong to Scheduled Tribes. Out of the total households of the district, 3,653 do not have exclusive rooms, while there are 35,514 households having more than three rooms. Majority households i.e. 139,692 have one-

room houses. In the district there were 434 households of Scheduled Castes who do not have exclusive rooms and there are 112 Scheduled Tribes households in the same category. In the category of households with more than three rooms, there are 1,100 and 206 households respectively for Scheduled Castes and Scheduled Tribes. Median number of rooms for all households and Scheduled Castes is 2 and for Scheduled Tribes it is 1 room.

**Source** : Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

**Note** : \* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

@ Bathroom means bathroom within the house.

\$ Toilet means toilet within the house.

# Drainage means closed and open.

Percentages are given in brackets.

Table 50 indicates that 87.0 per cent households in the district have been provided with improved drinking water facility, 73.3 per cent households have the provision of electricity in their houses. The facilities of bathroom, toilet and drainage are available to 46.3 per cent, 43.2 per cent and 25.5 per cent households respectively and these facilities are significantly in low

proportion in rural areas as compared to urban areas. Among talukas of the district, Anklav taluka lacks maximum facilities of bathroom, toilet and drainage, as these are available to 21.0, 19.0 and 3.8 per cent of households respectively. Urban area of Anklav taluka has only 0.9 per cent of households with drainage facility.

**Source :** Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 gives the details about the number and percentage distribution of households by type of fuel used for cooking purposes in the district. There are nine types of fuels used for which data is presented in the table. It is observed that at the district level, fire wood is being used by majority of 58.5 per cent of the

households followed by cooking gas (LPG) by 29.1 per cent of total households. Cooking gas (LPG) is used by 59.6 per cent of urban households followed by fire wood with 27.0 per cent of urban households in the district.

**Source** : Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

Table 52 details about number of households availing banking services and number of households having possession of assets such as radio/transistor, telephone, bicycle, scooter and car etc. There are 355,572 households in the district, of which, 38.2 per cent households are availing banking services. These proportions for rural and urban areas are 31.7 per cent and 56.1 per cent respectively. Among talukas, Anand taluka has the maximum proportion of households i.e. 51.4 per cent using banking services. As regards the usage of different assets by the households of the district, television is used by 24.5 per cent, bicycle by

32.4 per cent and radio/transistor by 24.5 per cent households. It can be seen that 46.7 per cent of households do not have any of the specified assets. In case of rural areas of Anand, bicycle is used by maximum proportion of households i.e. 27.4 per cent as compared to other specified assets. 54.4 per cent of rural households do not have any of the specified assets. In urban areas of Anand district, television is available to maximum 55.9 per cent of the households followed by availability of bicycle to 46.0 per cent of urban households. Only 25.6 per cent of urban households do not have any of the specified assets.

**(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade**

The Government of Gujarat reconstituted former Kheda district by bifurcating it and created new Anand District with effect from 2<sup>nd</sup> October 1997 vide Notification No.GHM/97/80/L dated. 24<sup>th</sup> September, 1997 by separating Khambhat, Petlad, Borsad and Anand talukas. Under the Government Notification No. GHM/97/119/M/PFR/2297/2592/L dated the 15<sup>th</sup> October 1997, the Government of Gujarat created new Tarapur taluka from Khambhat taluka, Umreth taluka from Anand taluka, Anklav taluka from Borsad taluka and Sojitra taluka from Petlad taluka.

During the decade Vidyanagar town of the district has developed into an important education destination of the state. 41 institutions affiliated to renowned Sardar Patel University are in Vidyanagar town providing various graduate as well as post-graduate courses. New engineering and pharmacy colleges, Industrial Training Institute, Ayurvedic college, Law college, Institutes of Language Studies and Applied Social Sciences as well as English and Gujarati medium schools are started. New branches of Automobile Engineering and Food Technology are started in A.D. Patel Institute of Technology.

**(ix) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district.**

**Name of Taluka : Anand**  
**Name of Village : Adas**  
**Location Code : 01057500**

*(Memorial to Martyrs near Railway Station Adas)*

Adas is a railway station on the Bombay Ahmadabad broad gauge line of the Western Railway. It is also connected by bus service with other parts of

the State. It has been the site of historical battles in the past. At the time of the 'Quit India' movement in 1942, five students were shot dead by the police at Adas. A memorial column has been raised near the railway station in their memory. Adas is centre of trade in tobacco and pulses. There are tobacco and *bidi* factories, a pulse mill and saw mill. Adas is famous for pottery and iron implements like sickles, knives, cobbler's tools and its well-known handicraft items.

**Name of Taluka: Borsad**  
**Name of Village :Bochasan**  
**Location Code: 01071100**

*(Swaminarayan Temple, Bochasan)*

Bochasan is said to have been established in Vikram Samvat 1352 and named after Bucheshvar Mahadev. It is a railway station on broad gauge railway lines.

A Swaminarayan Temple has been built by the founder of Bochasan Swaminarayan Sect, Shri Yajanapurushdasji or Shri Shastri Maharaj, who owing to some difference in the mode of worship, established own sub-sect and separated from the main sect of Swaminarayana. The festival of *Jaljhilni Ekdashi* at this temple on *Bhadrapad Sud 11* is attended by thousands of followers.

**Name of Taluka: Khambhat**  
**Name of Village:Kanisa**  
**Location Code: 01064800**

*(Shiv-linga with Brahmasutra, Kanisa)*

Kanisa is 3 km from the Sayama station on the Anand-Khambhat broad gauge railway line. There is an ancient temple of Kamnath Mahadev, with a *kund* or holy tank, a bath in which is believed to cure leucoderma and skin disease. Handloom textiles and cement pipes are its principal industries. The fair held at the Kamnath Mahadev temple in the month of *Shravan* is attended by about 8,000 persons.

**Name of Taluka: Anand**  
**Name of Town: Karamsad**  
**Location Code: 41506000**

(House of Sardar Patel)

Karamsad is famous as the native place of Sardar Vallabhbhai Patel and his brother Vithalbhaji Patel and it is one of the important centres of the *Patidar* community. Many *Patidar* families from here have migrated to East Africa and England.

The university township of Vallabh Vidyanagar, for the establishment of which lands from Karamsad were donated, is at a distance of less than 3 km. Karamsad is industrially developed. The industrial township known as Vithal Udyog Nagar has about 50 factories.

**Name of Taluka : Khambhat**  
**Name of Town: Khambhat**  
**Location Code: 41509000**

(An idol of Lakulisha, Metpur, Khambhat)

Khambhat is situated at the head of the Gulf of the same name at the place where the great river Mahi discharges itself into the sea. In ancient and medieval times, Khambhat ranked as one of the richest and greatest cities of India and upto the 17<sup>th</sup> Century A.D. it was a great centre of maritime activity. In an ancient times, Khambhat enjoyed great fame for its precious stones (*maneks*) which were very popular in the market of Aden and Mecca. Moreover, it was famous in Baghdad for its shoes. It was called the “garment of the world” as it supplied textile goods to the whole of the East and the greater part of the West. It was a great centre of literature, art, architecture, trade and commerce. Its strategic importance as a gateway to Lat, Saurashtra and North Gujarat made it source of conflict between various dynasties. After beginning of the 16<sup>th</sup> century the control of the sea trade of Khambhat passed from the hand of Gujarat to the Portuguese, who for several years spared no efforts to injure the harbour and shipping of Gujarat even they became the acknowledged rulers of the Cambay seas. It was in their interest to reduce Khambhat to a local port and draw the foreign trade to their own cities of Diu and Goa. Khambhat was a cosmopolitan city where many tongues were spoken. It has always been famous for its handicrafts, chief among them being Agate or Akik. Raw agate stones and miscellaneous foreign stone were brought to Khambhat for being cut and polished into finished articles of great artistic value which were in great demand in foreign markets. The artistic skills which had once reached its zenith no longer exists though Khambhat lapidary still excels in cutting and polishing of stones.

Khambhat acquired a new importance owing to the discovery of the petroleum and natural gas struck on 12<sup>th</sup> September 1958.

**Name of Taluka : Anand**  
**Name of Town: Vallabh Vidyanagar**  
**Location Code: 41505000**

Vallabh Vidyanagar, a new township spread over an area of 6 sq.km. has grown up as an educational centre. It was well-known for the rural residential university established with the object of bringing to villages prosperity culture and character and offering solutions to the numerous problems. With these aims in view, the Charotar Vidya Mandir was established in 1945. Plans were drawn up to pool and develop the lands donated by people of Karamsad and neighbouring villages and the work was started in 1947 with the blessing of Gandhiji and Sardar Patel. Educational institutions like Arts, Science, Commerce and Engineering Colleges and a multipurpose technical

school sprang up rapidly. Finally, Sardar Vallabhbai Vidyapith came into being in 1955. The University campus consists of about 500 acres of land of various colleges, laboratories, farms, hostels and residential quarters for staff.

**(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.**

Anand district is endowed with economic resource viz. agriculture. The principal crops which have registered an increase in their turn are bajari, rice, wheat, jowar and maize. Among cash crops substantial increase has been registered in tobacco and cotton.

Anand district is one of the most advanced and developed district of Gujarat State so far as agriculture and animal husbandary activities are concerned. Anand has the largest number of buffaloes in Gujarat. The artificial insemination is the modern technique of cattle breeding by which an outstanding breeding bull can be used to breed ten to twenty times the usual number of cows or buffaloes for a rapid breed improvement, Anand district covers mostly inland fisheries except at two centres, viz. Khambhat and Dahewan.

Anand is the main town of Charotar. Anand is mainly the centre of agriculture and trade, schools, colleges, hospitals, marketing yards the world famous co-operative dairy 'Amul' are a few of the main features of Anand. Amul is the biggest dairy not only in India, but in Asia too. It is owned by thousands of small and medium farmers. The administration of the dairy is run by elected representative through democratic process. Amul has created a white revolution. The experiment has led to small dairies at district and village levels. Other states and even many other countries have been inspired by it.

The seeds of this experiment were sown by Sardar Patel way back in 1946. The fruits were seen in its early days itself. Tribhuvanbhai Patel played a pivotal role in nourishing the small plant from the seeds sown by Sardar Patel. Dr. Verghese Kurien, a non-Gujarati Engineer made Gujarat his home and devoted his life to the dairy activity in Gujarat. Amul contributed to the scientific education of animal husbandry and increased production of milk. The farmers could get more for their products. Lately, Amul entered into the milk-chocolate market besides butter, ghee, cheese and baby food.

Amul established a factory of cattle feed at Kanajari near Anand. It also established veterinary hospital, artificial insemination centres for animals and hybrid-cow breeding centre at village Ode. Amul has turned into a complex and the mainstream of white revolution.

The Charotar Education Society of Anand is worth its mention. It has contributed a great deal in developing public awareness among other things.

With the Agricultural College, Krishi-Gau-Vidyabhavan, Engineering Colleges, Vallabh Vidyanagar is a university of distinction today. The foundation of the educational campus were laid by Bhaikaka. Vitthal Udyognagar, a nearby township which is a center of many small and medium industries. The birth place of Sardar Patel and his brother Vitthalbhai Patel, Karamsad is adjacent to it. A big hospital and a medical college has been established at Karamsad.

The sea at Khambhat is known a 'Bay of Khambhat' throughout the world. The natural gas from Lunaj and Khambhat is taken to Dhuvaran Thermal Power Station at about 20 km. from here. Dhuvaran is the biggest Thermal power station in Gujarat. The electricity provided by this station has played a very big role in developing numerous industries in and around the area. The town of Khambhat in the district has gained international reputation for the craft of Akik or agate.

Politically the district has been active ever since the first Satyagrah movement and the subsequent Satyagrah at Borsad. The town of Karamsad, located in the district has given two prominent person to the country. Shri Vitthalbhai Patel and shri Vallabhbai Patel. In the post- Independence era, Sardar Patel played a leading role in building up a unified India.

**PANDIT OMKARNATH THAKUR (1897-1967)**

By all means a Gujarati, Pandit Omkarnath Thakur earned international fame, glory and recognition as one of the greatest exponents of Indian classical music. He was conferred with a reverential degree of D.Lit. by Benaras Hindu University, which was rare honour. Omkarnathji was born in a small village named Jahaj near Khambhat.

Omkarnathji had unusual inclination for music right from his childhood days. A Parsi gentleman Shapurji from Bharuch helped him to go Bombay to have systematic training in classical music. He went to Bombay and joined Gandharva Mahavidyalaya of Pandit Vishnu Digambar Paluskar. He pleased his mentor with sheer hard work and dedication. Pandit Paluskar appointed him as the Chief Principal of Gandharva Mahavidyalaya, Lahor in 1917. He participated in International Music Conference held at Florence in 1933 and brought glory to Indian Music. He joined Benaras Hindu Vishwa Vidyalaya in 1950 as the Dean. He also remained present at the world peace conference held at Budapest in 1953 as an Indian

representative. His style of presenting bhajans and lyrics was unique. He also wrote few very useful books on music.

### ISHWAR PETLIKAR (1916-83)

Shri Ishwar Petlikar was very much impressed by the novels of Ramanlal Desai during his schooling years and he saw the dreams to write novels. But with the passage of time, he found a big gap between the cultured characters of the novels and the actual life that he had himself witnessed in the villages. At a later stage, he was impressed by Pannalal Patel and his style. He wrote his first novel '*Janamtip*' in 1944.

The first novel itself brought him in the front rank of novelists. Zaverchand Meghani lauded his efforts by a personal letter. He was given the responsibility of 'Patidar' monthly published from Anand. Later on he changed its name to 'Sansar' only to give it a wider scope. He started discussing social problems through this monthly.

Petlikar wrote about 25 novels, 10 to 12 short stories, collections and articles as well as some other books. 'Loksagar Ne Tire Tire' was his popular newspaper column which continued to be published for years together. He became a respectable journalist also. He never used pompous language. His style was simple, straight forward and fearless.

### VISHNUPRASAD TRIVEDI(1899-1991)

It is simply difficult to receive both love and honour from a very vast community of writers inspite of continuously being engaged in fearless criticisms. Vishnuprasad Trivedi was able to enjoy such kind of an achievement.

Vishnuprasad Trivedi, born in *Baj Khedaval* Brahmin caste of Umreth, was very bright at his studies. After obtaining his M.A. degree, he joined M.T.B. College of Surat and served the institution unto retirement. He constantly worked for bringing about the true understanding about the literature among the people who had some inclination towards literature. He started his career in writing in 1924-25. Though the volume of his works is not impressive, the influence is.

He was always looked to his commitment towards high quality literature and fearless statements of whatever he felt. He has critically studied and responded to the works of writers from Narmad to the contemporary ones 'Vivechana' 'Porilshilan' and 'Bhavanasar' are few of his important works.

### SARDAR VALLABHBHAI PATEL (1875-1950)

Pandit Jawaharlal Nehru said that Sardar would always be remembered as the true patriot, a leading freedom fighter, the architect of modern India and the one who did everything to make India a united country. The homage paid to Sardar by Pandit Nehru gives the total picture of his personality.

Vallabhbhai was born in a farmer family of Charotar. Karamsad was his native place. It was not feasible for him to study further after matriculation because of the economic condition of his family. He passed the examination for district pleader and started his practice in Godhra. He had an ambition to go abroad and become a barrister. He fulfilled his dream. He started his legal practice in Ahmedabad after returning from England in 1913.

He was elected to Ahmedabad Municipality in 1917. He came in contact with Gandhiji during the same year. He became the leading soldier of Gandhiji's crusade since then.

He became the President in Congress Convention of 1931. He was minister for Home and Information in the Provisional Government of 1946. He was in charge of the Home Affairs in the first cabinet of free India. The greatest task of amalgamation of princely states was successfully carried out by him.

#### (xi) Scope of Village Directory and Town Directory :

As mentioned earlier, the District Census Handbook is brought out in two parts-Part A and Part B. Part A covers the non-census data of village directory and town directory whereas part B covers the primary census abstract data of 2001 Census. The scope of village directory and town directory is discussed below.

#### Scope of Village Directory

For the census work, the villages in the district have been arranged taluka wise and within the taluka they are shown location code wise. Each village is assigned a location code number for the purpose of identification. In 2001 Census, all the villages have been given unique 8-digit code number, which will remain constant across the census, and shall make it easy to do comparative study. Eight digit code's last two digits are especially provided to take into account exigencies arising due to jurisdictional changes of villages by partition, amalgamation etc. This time it has been kept '00'. Prior to the village directory information, a map and alphabetical list of villages for each taluka is given in

Part A. Village directory contains the non-census data of each village. It gives the village wise basic information relating to infrastructure and amenities available in the sphere of education, medical, drinking water, power supply, post and telegraph, communications, approach road to village and distribution of land use area. In addition, it contains information about total area of each village, total population and number of households and the nearest town and its distance from the village. The information on number of households and total population has been included with a view to examine the co-relation of amenities with the number of households and population they serve. If an amenity is not in existence in the referent village, the distance in broad ranges from the nearest place along with name, where the amenity is available is given. The broad range are (-5 kms), (5-10 kms.) and (10+ kms.). Some additional information has been added viz.(1) Number of Banks, (2) Credit Societies, (3) recreational and cultural facilities, (4) Receipt of Newspaper/Magazine, (5) Income & Expenditure of the village and (6) Name of the three most important commodities imported, manufactured/ produced & exported. One information has been deleted this time, i.e., Market & Hat facility.

The village directory also carries the following appendices.

Appendix-I	It gives the taluka wise abstract of educational, medical and other amenities available in the villages of the district.
Appendix-I-A	Indicates number of villages Taluka wise having one or more primary schools.
Appendix-I-B	Indicates number of villages Taluka wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages Taluka wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns/non-municipal Towns.
Appendix-IV	Taluka wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates Taluka wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

### Scope of Town Directory

Town Directory covers the non-census data for each town. It presents important and useful information like civic and other amenities available in all the towns of the district. The information in town directory is covered in following seven statements, viz. statements I to VII.

Statement-I	Town wise class, name, civic administrative status of the town, its area, growth rates, density and sex ratio.
Statement-II	Physical aspects of each town.
Statement-III	Income and expenditure of each town.
Statement-IV	Civic and other amenities in respect of each town.
Statement-V	Availability of medical, educational, recreational and cultural facilities in each town.
Statement-VI	Trade, commerce, industry and banking activities in each town.
Statement-VII	Civic and other amenities in slum areas of each town.

In all the Statement except VII the towns are arranged in the alphabetical order within the district. The details of these statements are given in the analytical portion of the town directory. In addition to the above statements, an appendix showing the towns with their outgrowths with population, is also given after the town directory statements.

**SECTION - I VILLAGE DIRECTORY**

# Village Directory

## (a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The “Village Directory” is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The ‘uninhabited’ villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

### Column 1 : Serial Number

Self explanatory. All the villages within the Taluka/ CD Block are presented serially in the ascending order of their location code number.

### Column 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

### Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

### Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

### Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

### Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

### Column 6 : Educational

Classes upto class VII included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class VII.

Classes from VIII to X included in higher secondary school. Classes XI and XII are included in senior secondary school.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M*
(iii)	Higher Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

**Note :** \* - There is no Middle school in the Gujarat State.

**Column 7 : Medical**

Availability of medical facility within the village is indicated by following codes :

(i) Allopathic Hospital	H
Ayurvedic Hospital	HA
Unani Hospital	HU
Homeopathic Hospital	H Hom
(ii) Allopathic Dispensary	D
Ayurvedic Dispensary	DA
Unani Dispensary	DU
Homeopathic Dispensary	D Hom
(iii) Maternity & Child Welfare	MCW
(iv) Maternity Home	MH
(v) Child Welfare Centre	CWC
(vi) Health Centre	HC
(vii) Primary Health Centre	PHC
(viii) Primary Health Sub-Centre	PHS
(ix) Family Welfare Centre	FWC
(x) T.B. Clinic	TB
(xi) Nursing Home	NH
(xii) Registered Private Medical Practitioner	RMP
(xiii) Subsidised Medical Practitioner	SMP
(xiv) Community Health Worker	CHW
(xv) Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

**Column 8 : Drinking Water**

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i) Tap Water	T
(ii) Well Water	W
(iii) Tank Water	TK
(iv) Tubewell Water	TW
(v) Handpump	HP
(vi) River Water	R
(vii) Canal	C
(viii) Lake	L
(ix) Spring	S
(x) Others	O

**Column 9 : Post, Telegraph and Telephone**

It is indicated by codes as shown below whether within the village exists the following amenities:

(i) Post Office	PO
(ii) Telegraph Office	TO
(iii) Post & Telegraph Office	PTO
(iv) Telephone Connection	PH

**Column 10: Commercial and Co-operative Banks**

If the village is served by any banking service, commercial bank, Co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i) Commercial Bank	CM
(ii) Co-operative Bank	CP

**Column 11: Credit Societies**

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i) Agricultural Credit Society	ACS
(ii) Non- Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

**Column 12 : Recreational and cultural facilities**

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i) Cinema / Video Hall	CV
(ii) Sports Club	SP
(iii) Stadium / Auditorium	ST

**Column 13 : Communications**

If the village is served by any mode of public/private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus	BS
(ii) Railway Station	RS
(iii) Navigable Waterway	NW

**Column 14 : Approach to village**

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road	PR
(ii) Mud Road	MR
(iii) Foot Path	FP
(iv) Navigable River	NR
(v) Navigable Canal	NC
(vi) Navigable Waterways other than River, Canal	NW

**Column 15 : Nearest Town and distance**

The distance is given in kilometers in brackets against the name of the town nearest to the village.

**Column 16 : Power supply**

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use	ED
(ii) Electricity for agricultural use	EAG
(iii) Electricity for other purposes	EO
(iv) Electricity for all purposes	EA

**Column 17 : News Paper / Magazine**

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i) News Paper	N
(ii) Magazine	M

**Column 18 : Most important commodities manufactured**

The name of three most important commodities manufactured in the village is recorded against this column.

**Column 19 to 23 : Land use i.e. area under different types of land use**

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Cultivable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different

types of irrigation facilities available in the village are indicated below:

(i) Government Canal	GC
(ii) Private Canal	PC
(iii) Well (without electricity)	W
(iv) Well (with electricity)	WE
(v) Tubewell (without electricity)	TW
(vi) Tubewell (with electricity)	TWE
(vii) Tank	TK
(viii) River	R
(ix) Lake	L
(x) Waterfall	WF
(xi) Others	O
(xii) Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages Taluka/ C.D. Block wise of the district.
Appendix-I-A	Indicates number of villages Taluka/ C.D. Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages Taluka/ C.D. Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages Taluka/ C.D. Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities available.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	Taluka/C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.

Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.	Appendix-VIII	Indicates Taluka/C.D. Block wise number of villages under each Gram Panchayat.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges.	Appendix-IX	Shows number of different types of girls school in the village.

# GUJARAT TALUKA UMRETH DISTRICT ANAND

TOTAL AREA	235.93 Km <sup>2</sup>
TOTAL POPULATION	162 428
TOTAL NUMBER OF VILLAGES	38
TOTAL NUMBER OF TOWN	1
DISTANCE FROM DISTRICT HEADQUARTERS TO TALUKA	34 Kms

- BOUNDARY, DISTRICT .....
- " TALUKA .....
- " VILLAGE WITH PERMANENT LOCATION CODE NUMBER.....
- HEADQUARTERS : TALUKA .....
- POPULATION SIZE CLASS OF VILLAGES : 500-999, 1000-4999, 5000 AND ABOVE .....
- URBAN AREA WITH LOCATION CODE NAME.....

- STATE HIGHWAY .....
- IMPORTANT METALLED ROADS .....
- RAILWAY LINE WITH STATION, BROAD GAUGE .....
- RIVER AND STREAM...
- POST OFFICE / TELEGRAPH OFFICE..
- HIGH SCHOOL/SENIOR SECONDARY SCHOOL..
- PRIMARY HEALTH CENTRE ...
- BANK...

C.D. BLOCK BOUNDARY OF UMRETH IS CO-TERMINUS WITH TALUKA BOUNDARY EXCLUDING STATUTORY TOWN.

\* PART OF PLCN 01053900

## TALUKA KHAMBHAT

### DISTRICT ANAND

- BOUNDARY, DISTRICT.. . . . .
- " TALUKA ... . . . .
- " VILLAGE WITH PERMANENT LOCATION CODE NUMBER... . . . .
- HEADQUARTERS : TALUKA ... . . . .
- POPULATION SIZE CLASS OF VILLAGES : 200-499,  
500-999, 1000-4999, 5000 AND ABOVE... . . . .
- URBAN AREA WITH LOCATION CODE NAME... . . . .
- STATE HIGHWAY ... . . . .
- IMPORTANT METALLED ROADS ... . . . .
- RAILWAY LINE WITH STATION, BROAD GAUGE ... . . . .
- RIVER AND STREAM... . . . .
- POST OFFICE / TELEGRAPH OFFICE. ... . . . .
- HIGH SCHOOL/SENIOR SECONDARY SCHOOL.. . . . .
- PRIMARY HEALTH CENTRE ... . . . .
- BANK... . . . .

TOTAL AREA	853.98 Km <sup>2</sup>
TOTAL POPULATION	261 012
TOTAL NUMBER OF VILLAGES	57
TOTAL NUMBER OF TOWN	1
DISTANCE FROM DISTRICT HEADQUARTERS TO TALUKA	69 Kms

C.D. BLOCK BOUNDARY OF KHAMBHAT IS CO-TERMINUS WITH TALUKA BOUNDARY EXCLUDING STATUTORY TOWN.  
KANSARI, SHAKARPUR AND METPUR ARE TREATED AS URBAN AREA i.e. OUTGROWTH OF KHAMBHAT URBAN AREA.

Based upon Survey of India map with the permission of the Surveyor General of India. The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line.

**Note :** \* In Gujarat State the levels of education are classified as under

- (i) Primary School (From Std. I to VII passed)
- (ii) Secondary/Matriculation (From Std. VIII to X passed)
- (iii) Higher Secondary (From Std. XI to XII passed). Hence details under column 7 and 8 are not shown.

## **SECTION – II – TOWN DIRECTORY**

# Town Directory

## (a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

### Town Directory statements (I to VII)

#### Statement I : Status and Growth History

##### Column 2 : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one lakh (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I) Municipal Corporation	M. Corp.
(II) Municipal Committee	MC
(III) Municipal Council	M Cl
(IV) City Municipal Council	CMC
(V) Town Municipal Council	TMC
(VI) Municipal Board	MB
(VII) Municipality	M
(VIII) Cantonment Board/Cantonment	CB
(IX) Notified Area	NA
(X) Notified Town	NT
(XI) Notified Area Committee/ Notified Area Council	NAC
(XII) Notified Town Area	NTA
(XIII) Industrial Notified Area	INA
(XIV) Industrial Township	ITS
(XV) Township	TS
(XVI) Town Panchayat	TP
(XVII) Nagar Panchayat	NP
(XVIII) Town Committee/Town Area Committee	TC

(XIX) Small Town Committee	ST
(XX) Estate office	EO
(XXI) Gram Panchayat	GP
(XXII) Census Town	CT

Other columns need no comments.

#### Statement II - Physical Aspects and Location of towns, 1999.

##### Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

##### Column 6, 7 and 8:

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

##### Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

##### Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

#### Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

#### Statement IV : Civic and Other amenities, 1999

##### Column 1 to 5 : Self explanatory.

##### Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i) Pucca Road	PR
(ii) Kutcha Road	KR

**Column 7 : System of Sewerage**

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

**Column 8 to 11 : Number of latrines**

Number of various types of latrines both Public and Private are given in these columns.

**Column 12 : Method of disposal of night soil**

The various prevalent method of disposal of night soil are given below with codes :

HeadLoads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

**Column 13 and 14 : Water supply**

Source and capacity of storage system. The following codes are used in these columns:

**Column 13:**

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

**Column 14 :**

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

**Column 15 : Fire Fighting Service**

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

**Column 16 to 20 : Electrification (Number of connections)**

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

**Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999****Column 1 to 3 : Self explanatory.****Column 4 & 5 :**

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

**Column 6 to 9 :**

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

**Column 10 : Recognized shorthand, typewriting and vocational training institutes**

“Recognised” should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

- |       |                               |         |
|-------|-------------------------------|---------|
| (i)   | Vocational Training Institute | VT      |
| (ii)  | Shorthand                     | SH      |
| (iii) | Typewriting                   | Type    |
| (iv)  | Shorthand & Typewriting       | SH Type |
| (v)   | Others                        | O       |

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher’s Training Institute, Music / Dance School, Nursing School etc. are covered under ‘Others’.

**Column 11 to 14 :**

Classes upto class VII included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class VII.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are included in senior secondary school.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

- |        |  |     |
|--------|--|-----|
| (i)    | Primary School   | P   |
| (ii)   | Middle School  | M*  |
| (iii)  | Higher Secondary School  | S   |
| (iv)   | Senior Secondary School  | PUC |
| (v)    | College  | C   |
| (vi)   | Industrial School  | I   |
| (vii)  | Training School  | Tr  |
| (viii) | Adult literacy class/centre  | AC  |
| (ix)   | Others (specify)e.g. Sanskrit Pathshala,Senior basic school, Navodaya Vidyalaya, Makhtab, etc. | O   |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Note : \* - There is no Middle school in the Gujarat State.

**Column 15 : Adult literacy class/centres**

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

**Column 16 : Working Women’s hostels with number of seats**

The number of working women’s hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

**Column 17 to 19 : Recreational and Cultural Facilities**

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

**Column 20 : Public Libraries, Reading Rooms**

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

- |      |                |    |
|------|----------------|----|
| (i)  | Public Library | PL |
| (ii) | Reading room   | RR |

**Statement VI : Trade, Commerce, Industry and Banking, 1999****Column 3 to 8 :**

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

**Column 9 : Number of Banks**

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

**Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

**Statement VII : Civic and other Amenities in Slums, 1999**

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

**Note :**

\*In Gujarat State, the levels of Education are classified as under :

- (i) Primary (From standard I to VII passed)
- (ii) Secondary / Matriculation (From standard VIII to X passed )
- (iii) Higher Secondary (From standard XI to XII passed )

Hence, the details under Col.13 are not shown.

**Part – B**

**PRIMARY CENSUS ABSTRACT**

# Primary Census Abstract

## (a) Brief note on Primary Census Abstract :

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-district, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

### Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential prerequisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

### Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about

its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly

on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

### **Primary Census Abstract**

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Household, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the

four broad industrial categories, namely (i) Cultivators, (ii) Agricultural labourers (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely India, State/Union Territories, Districts and Cities, Urban Agglomerations (Population 100,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

### **Level of presentation in District Census Handbooks :**

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading ‘Census Concepts’ in the Analytical Note. The term ‘Total Population’ includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district

because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

The following Abbreviations have been used in the Primary Census Abstract for facility of presentations:

1	Municipal Corporation/ Corporation	M. Corp.
2	Municipality	M
3	Municipal Council	MCI
4	Cantonment Board/ Cantonment	CB
5	Notified Area/Notified Area Committee/Notified Committee	NAC
6	Industrial Notified Area	INA
7	Gram Panchayat/ Village Panchayat	VP
8	Nagar Panchayat/ Town Panchayat	NP
9	Census Town	CT
10	Total	T
11	Rural	R
12	Urban	U

The following conversion factor has been used for converting areas into hectares and hectares into km<sup>2</sup>

Acres x 0.40467 = hectares

100 Hectares = 1 Km<sup>2</sup>

**Note:** \*These figures represent 'Geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local Bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of talukas will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records.

**Note:** { Represents Group Gram Panchayat.

The Government of Gujarat reconstituted former Kheda district by bifurcating it and created new Anand District with effect from 2<sup>nd</sup> October 1997 vide Notification No. GHM/97/80/L dated 24<sup>th</sup> September, 1997 by separating Khambhat, Petlad, Borsad and Anand talukas. Under the Government Notification No. GHM/97/119/M/PFR/2297/2592/L dated the 15<sup>th</sup> October 1997, the Government of Gujarat created new Tarapur taluka from Khambhat taluka, Umreth taluka from Anand taluka, Ankjav taluka from Borsad taluka and Sojitra taluka from Petlad taluka.

The data for Anand district have been discussed for annexure II, III assuming that the data values are same for both Kheda and Anand districts. The details of undivided Kheda have been discussed in Annexure II and III. The details of 2001 Census data of Anand district have been discussed in Annexure IV, VI, VII and VIII, while Annexure V provides the recast data of 1991 Census and separate data of 2001 Census.

## ANNEXURE – II

## FERTILITY AND MORTALITY-1991 CENSUS

**Fertility Level :**

Population is a dynamic variable and keeps on changing. Increase due to birth and decrease due to death affect the population size of an area. Thus the birth and death are the two most important vital events. Natural increase is the excess of population by births over decrease of population by deaths at a given point of time. The births have direct correlation with the fertility.

The data on fertility levels and trends as revealed by the fertility indices of the 1991 Census like Crude Birth Rate (CBR), Age Specific Fertility Rate (ASFR) and Total Fertility Rate (TFR) are presented and analyzed below. The definitions and concepts of fertility indices frequently used have already been explained in Analytical Note.

**Death Rate:**

Death process in demographical terminology is called as mortality. The rate at which death events occur reveals about the standard of living and state of health. Statistical data on causes of death help us in controlling the spread of diseases and suggests new curative methods to medical authorities.

**Child Mortality:**

Information about questions on children ever born and children surviving canvassed for all ever married women was tabulated by age of the mother. From this estimate of child mortality have been worked out by using Brass technique.

It may be noted that the level of child mortality in the Anand (Kheda) district was much higher as compared to the State for children below one year, below two years and below five years of age,

irrespective of gender. Mortality rates for female children were found to be higher than male children for respective age groups in the district.

Source: Occasional Paper No 1 of 1997.

The Annexure III shows various fertility indicators of all the districts and State as per 1991 Census. It can be observed that Anand (Kheda) district had Crude Birth Rate (CBR) of 33.7 and Total Fertility Rate (TFR) of 4.1. CBR is marginally higher than State CBR of 33.6 while TFR is marginally lower than State TFR of 4.2. Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) of Anand (Kheda) district were 5.1, 132 and 162 respectively, while TMFR, GFR and GMFR of Gujarat State were 5.4, 136 and 175 respectively.

The child woman ratio, in the district, was 432 for the age group of (0-4) which was lower than the State CWR of 467 whereas CWR (5-9) of the district was 528 which was also lower than the State CWR of 571.

Mean age at marriage means age at which a woman was married. In case a woman was married more than once the age at which she was first married was recorded. The mean age at marriage in Anand (Kheda) district as per 1991 Census was 18.5, which was lower than the State mean age at marriage recorded at 19.0.

**NUMBER OF CHILDREN EVER BORN AND SURVIVING PER EVER MARRIED WOMAN IN AGE GROUP 45-49, 1991 CENSUS**

	<b>STATE</b>	<b>4.2</b>	<b>4.4</b>	<b>3.8</b>	<b>3.8</b>	<b>4.0</b>	<b>3.6</b>

**Source:** Gujarat State District Profile 1991.

Statement shows that as per 1991 Census there were 3.9 children ever born per ever married woman in the age group of 45-49 with 3.5 surviving children per woman in the Anand (Kheda) district against 4.2 and 3.8 respectively for the State. The rural areas of Anand (Kheda) district had 4.0 children ever born to the women in the age group 45-49 against 4.4 for rural areas in Gujarat. Urban areas of the district had 3.7

children ever born to the woman in the age group 45-49 against 3.8 for urban Gujarat. It can also be observed from the table that number of children ever born per ever married woman and number of children surviving per ever married women were lower for both the areas of rural and urban in Anand (Kheda) district as compared to rural and urban areas in the Gujarat State.

## ANNEXURE – IV

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH/ PLACE OF LAST RESIDENCE,  
2001 CENSUS**Migration**

Migration is a factor in changing the size and structure of the population. The migration process affects the areas to which migrants have moved and areas which they have left. Migration is a form of geographical mobility between one geographical unit to another, involving a change of residence from the place of origin/birth to the place of destination or place of new settlement from the last residence. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

**Internal and International Migration**

The migration movements are of four types –

1. Migration within the district of enumeration (intra-district migration)
2. Migration from one district to another but within the State
3. Migration from one State to another State of the country (inter-state migration) and
4. Migration from one country to another country.

The first three together constitute internal migration while the last type of movement is called international migration.

**Migration by place of birth :**

As Anand district is created from Kheda district the separate data of Anand district is not available for 1991 Census however the absolute number and percentage distribution of migrants by place of birth to total population in Anand district and in the State 2001 Census are as following :-

## PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH-2001 CENSUS

Migration By Place of Birth	Gujarat			Anand

Source: Gujarat State-D-Series Tables-2001

As per 2001 Census, there were 18,810,592 migrants in Gujarat whose place of birth was different than the place of enumeration. Out of such migrants in 2001 Census, 56.9 per cent were born elsewhere in the district of enumeration, 29.2 per cent were born in other districts of the State, 13.4 per cent were born in other States of India and 0.4 per cent were born in other countries. There was no migrant in category

“Unclassified”, in State as well as in the district in 2001 Census.

As per 2001 Census in Anand district, 61.6 per cent were born elsewhere in the district of enumeration, 33.6 per cent were born in other districts of the State, 4.5 per cent were born in other States of India and 0.3 per cent were born in other countries.

**INTER STATE IN-MIGRANTS TO GUJARAT STATE AS PER 2001 CENSUS BY PLACE OF BIRTH**

Place of Birth	Gujarat		Anand	
	Migrants	Percentage to Total Migrants	Migrants	Percentage to Total Migrants
1	2	3	4	5
<b>Total Migrants</b>	<b>2,520,676</b>	<b>100.0</b>	<b>32,744</b>	<b>100.0</b>
Madhya Pradesh	159,055	6.3	3,627	11.1
Maharashtra	734,945	29.2	6,372	19.5
Rajasthan	471,109	18.7	7,609	23.2
Uttar Pradesh	520,094	20.6	7,398	22.6
Other States	635,473	25.2	7,738	23.6

**Source:** Gujarat State-D-Series Tables-2001

The above statement shows migration in Gujarat and in Anand district from other States as per 2001 Census. It can be seen that as per 2001 Census, there were 2,520,676 persons in the State who were born in other States of India. Out of these 29.2 per cent were born in Maharashtra while the proportion of migrants born in Rajasthan and Uttar Pradesh was 18.7 and 20.6 per cent respectively. As per 2001 Census out of total inter state migrants 6.3 per cent were born in Madhya Pradesh and the remaining 25.2 per cent were born in other States of India.

As regards Anand district, it can be seen that there were 32,744 migrants in this category in 2001. The

State-wise distribution reveals that as per 2001 Census 19.5 per cent of migrants were born in Maharashtra. In 2001 the proportion of migrants born in the States of Rajasthan, Uttar Pradesh and Madhya Pradesh was 23.2 per cent, 22.6 per cent and 11.1 per cent respectively. The proportion of migrants born in other States was 23.6 per cent in 2001 Census.

**Migration by place of last residence:**

Distribution of migrants by place of last residence in Gujarat and Anand as per 2001 Census and percentage distribution of in-migrants from other States to Gujarat by place of last residence are presented below.

**DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE IN GUJARAT - 2001 CENSUS**

Place of Last Residence	Gujarat			Anand		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
<b>Total Migrants</b>	<b>19,221,602</b> <b>(100.0)</b>	<b>6,694,122</b> <b>(100.0)</b>	<b>12,527,480</b> <b>(100.0)</b>	<b>749,256</b> <b>(100.0)</b>	<b>221,509</b> <b>(100.0)</b>	<b>527,747</b> <b>(100.0)</b>
Last residence elsewhere in the district of enumeration	12,248,452 (63.7)	3,506,051 (52.4)	8,742,401 (69.8)	532,735 (71.1)	147,764 (66.7)	384,971 (72.9)
Last residence in other districts of the State	4,731,665 (24.6)	1,892,862 (28.3)	2,838,803 (22.7)	190,395 (25.4)	60,350 (27.2)	130,045 (24.6)
Last residence in other States of India	2,182,741 (11.4)	1,262,884 (18.9)	919,857 (7.3)	24,798 (3.3)	12,755 (5.8)	12,043 (2.3)
Last residence in other countries	58,744 (0.3)	32,325 (0.5)	26,419 (0.2)	1,328 (0.2)	640 (0.3)	688 (0.1)
Unclassified	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)

**Source:** Gujarat State-D-Series Tables-2001

There were 19,221,602 migrants by place of last residence in Gujarat according to 2001 Census. The proportion of male and female migrants whose place of last residence was elsewhere within the district of enumeration was 52.4 per cent and 69.8 per cent respectively in 2001 Census in the case of Gujarat State. The reason for higher proportion of female migration is marriage. In Gujarat as per 2001 Census,

63.7 per cent migrants were residing elsewhere in the district of enumeration, 24.6 per cent were such whose last residence was in other districts of the State while last residence of 11.4 per cent migrants was in other States of India and only 0.3 per cent were such whose last residence was in other countries. There were no migrants in the category titled "Unclassified".

ANNEXURE

In the district as per 2001 Census, there were 749,256 migrants by place of last residence. Out of total migrants, 71.1 per cent of migrants were such whose place last residence was elsewhere in the district of enumeration, 25.4 per cent were such whose last residence was in other districts of the State while last residence of 3.3 per cent migrants was in other States

of India and 0.2 per cent migrants' last residence was in other countries. There were no migrants in the category titled "Unclassified".

**Migration by reason :**

The following statement gives distribution of migrants by reasons of migration from other States of India.

**MIGRATION FROM OTHER STATES OF INDIA BY PLAC E OF LAST RESIDENCE IN GUJARAT 2001**

States	Total Migrants	Reasons

Source: Gujarat State-D-Series Tables-2001

It can be seen from the data given above that the main reason for the migration was "Work/employment". As much as 30.3 per cent of migrants moved due to work or employment as per 2001 Census, this was followed by 26.5 per cent of migration which was due to the reason of "Moved with household". In 2001, the proportion of migration due to marriage was

17.0 per cent. The reason for 9.4 per cent of migration was Business, and 6.2 per cent of migration was due to the reason titled "Moved after birth" and only 0.6 per cent of migration was for Education. The remaining 10.2 per cent of migration was due to other reasons.

**ANNEXURE – V**

**BRIEF ACCOUNT OF MAIN RELIGIONS IN THE DISTRICT AS PER 1991 AND 2001 CENSUSES**

Religion is the basic cultural characteristics of the population. In secular country like India several religions have thrived and every decennial Census provides an interesting picture of the religious persuasions of the people. The data on religion yielded by the Census are of immense use for the Anthropologists, Sociologists, Demographers, Administrators, Planners and also for laymen.

The six main religions are i) Hindu, ii) Muslim, iii) Christian, iv) Sikh, v) Buddhist, and vi) Jain were recorded. In respect of 'Others', the actual religion returned was recorded. If a person said that he has no religion, it was recorded accordingly and if any person refused to state his religion it was recorded as 'religion not stated'.

**Source:** Gujarat State-C-Series Tables-2001

The statement above gives the details of distribution of population for Gujarat State and Anand district by six major religions as per 2001 Census. The 2001 Census data reveals that the proportion of Hindus was 89.1 per cent in the State of Gujarat against 87.0 per cent recorded in Anand. In comparison to 1991 data a decline of 0.4 per cent is registered in proportion of Hindus at State level as well as for Anand district. The proportion of Muslims was 8.7 per cent at State level and 10.3 per cent at district level in 1991 Census

whereas in 2001 Census at State level this proportion was 9.1 per cent and in district it was 10.7 per cent.

The proportion of Christians in the district has decreased marginally from 1.7 per cent in 1991 to 1.6 per cent in 2001. As per 1991 Census, proportion of Christians was 0.4 per cent in total population of the State which in 2001 Census, increased to 0.5 per cent. The proportion of Jain, Sikh, Buddhists, people following other religions and of people who did not state any religion was negligible in Anand in 1991 as well as in 2001 Census.

## ANNEXURE-VI

## MARITAL STATUS OF POPULATION AS PER 2001 CENSUS

The details of sex-wise marital status for Gujarat State and Anand District as per 2001 Census are given below:-

## MARITAL STATUS BY SEX-2001 CENSUS

Sl.No.	Marital Status	Gujarat			Anand		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8

Source: Gujarat State -C- Series Tables-2001

The above statement show marital status by sex in the State as well as in the district. As per 2001 Census the number of married persons were 24,222,087(47.8 per cent ) in Gujarat and 916,830 (49.4 per cent) in Anand district. As per 2001 Census the proportion of never married persons was 47.6 per cent in Gujarat

and 44.7 per cent in Anand. The proportion of widows, divorced/separated was 4.2 per cent and 0.4 per cent respectively in the State while, in the district, the same were at 5.3 per cent and 0.6 per cent respectively. There were no persons under marital status category 'Unclassified' in the State as well as in the district.

## DISTRIBUTION OF RURAL URBAN POPULATION BY MARITAL STATUS-2001

Sl.No	Marital Status	Gujarat			Anand		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
1	Never married	24,132,905 (47.6)	15,144,193 (47.7)	8,988,712 (47.5)	829,779 (44.7)	593,239 (44.0)	236,540 (46.6)
2	Married	24,222,087 (47.8)	15,058,801 (47.4)	9,163,286 (48.4)	916,830 (49.4)	672,544 (49.9)	244,286 (48.1)
3	Widowed	2,111,678 (4.2)	1,403,972 (4.4)	707,706 (3.7)	99,010 (5.3)	74,292 (5.5)	24,718 (4.9)
4	Divorced/Separated	204,347 (0.4)	133,801 (0.4)	70,546 (0.4)	11,253 (0.6)	8,826 (0.7)	2,427 (0.5)
5	Unclassified	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)
	<b>Total</b>	<b>50,671,017</b> <b>(100.0)</b>	<b>31,740,767</b> <b>(100.0)</b>	<b>18,930,250</b> <b>(100.0)</b>	<b>1,856,872</b> <b>(100.0)</b>	<b>1,348,901</b> <b>(100.0)</b>	<b>507,971</b> <b>(100.0)</b>

Source: Gujarat State -C- Series Tables-2001

It can be seen that proportion of never married persons was lower at 44.7 per cent in the district as compared to 47.6 per cent recorded in Gujarat State as per 2001 Census. In rural areas the proportion of never married persons was 47.7 per cent in State and 44.0

per cent in the district. In urban areas the proportion of never married persons was at 47.5 per cent in State and 46.6 per cent in the district. As per 2001 Census the proportion of married persons, in rural areas, was 47.4 per cent in Gujarat and 49.9 per cent in Anand.

ANNEXURE

In 2001 Census, in urban areas the proportion of married persons was 48.4 per cent in Gujarat and 48.1 per cent in Anand. The proportion of widowed in rural areas was 4.4 per cent in the State and 5.5 per cent in the district, while the same for urban areas was 3.7 per

cent in the State and 4.9 per cent in the district. The proportion of divorced/separated was 0.4 per cent in the State and 0.6 per cent in the district. There was no population reported under the category titled "Unclassified".

ANNEXURE – VII

AGE, SEX AND EDUCATION IN THE DISTRICT AT THE 2001 CENSUS

Literacy has occupied an important position in Indian Census in one form or the other from the very beginning. The definition of literates as adopted is "A person who can both read and write with understanding in any language is to be taken as literate". A person who can merely read but can not write was not treated as literate. It is not necessary that a person who was literate should have received any formal education or

should have passed any minimum educational standard. All children below the age 7 are treated as illiterate. While processing the literacy data population of age group 0-6 is excluded.

The following statement gives the distribution of literates and illiterates by broad age groups and sex in the district as well as the State at the time of 2001 Census.

LITERACY BY AGE -GROUP AND BY SEX -2001

Age Group	Particular	Gujarat			Anand		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8
7-14	Population	9,091,764	4,814,440	4,277,324	316,283	170,962	145,321
	Literates	7,599,713	4,206,428	3,393,285	276,871	154,707	122,164

	Literacy rate	( 44.5)	( 50.0)	( 37.4)	( 36.2)	( 39.1)	( 32.8)

Source: Census of India, C- Series Tables-2001

It can be seen from the statement that for 2001 Census, the highest proportion of 83.6 per cent literacy rate in Gujarat State is registered in age group of 7-14 years followed by 77.6 per cent in 15-29 years age group. The same trend can be observed in Anand district where the highest proportion of 87.5 per cent is registered in the age group of 7-14 years followed by 82.6 per cent in the age group of 15-29 years. The

lowest proportion of 39.5 per cent in State is found in the age group of 60 + years while the lowest proportion of 36.2 per cent is found under category 'age not stated' for Anand district in 2001 Census. As per 2001 Census the female literacy rate was lower than that of males in each age group in the State as well as in Anand District.

## LITERACY BY EDUCATION LEVEL-2001 CENSUS

Sl . No.	Education level	Gujarat			Anand		
		Persons	Males	Females	Persons	Males	Females
