ACKNOWLEDGEMENTS

At the 1971 Census it has been our endeavour to compile census statistics at the village and block level in a uniform manner. These statistics are available to the users as soon as these are compiled after the 1891 Census. District Census Handbook has been divided into three parts. Directories were prepared in series, the Village and Town Directory, which mostly comprise all districts in the form of the Censuses. A list of the Censuses. Due to the out break of the Second World War, the District Census Handbooks are valuable data. At the time of the 1971 Census, the District Census Handbooks were published. The District Census Handbooks were published in this State. I am also grateful to Sri P. C. Pandey, Secretary, G. A. D. (Census, assistant, Rohilkhand Division, Bareilly) and his successor, Sri A. P. Dixit, for the addition given by them in sorting out various administrative matters relating to the publication of these Handbooks. I am extremely thankful to the District Officers for their wholehearted co-operation in furnishing the desired information and the District Census Officers for hard work and sustained efforts in collecting the same.

The programme for the printing of District Census Handbooks has been heavy indeed, more so as three parts are being published, one in Hindi and two in English. The arrangements made by Sri A. Dar, Superintendent, Printing and Stationery, U.P., Allahabad for the printing of these volumes, are thankfully acknowledged. Joint Superintendent, Sri J. S. Gupta, In-charge New Government Press, Aishbagh, Lucknow has also been extremely helpful in bringing out the maps.

In the Census Office, everyone has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I am grateful to Sri K. S. Sinha, Deputy Director, Headquarters, the Tabulation Officer, and other staff of the Technical Section, who have shared the burden and helped in bringing out these Handbooks.

I must also express my gratitude to Sri A. Chandra Sekhar, Registrar General, India, Sri K. D. Ballal, and Dr. B. K. Roy Burman, Deputy Registrars General and Sri K. K. Chakravorty, Central Tabulation Officer for their constant help and guidance despite their own heavy preoccupations.

D. M. SINHA

Director of Census Operations

Uttar Pradesh,

Lucknow

Dated : October 3, 1972,

INTRODUCTORY NOTE

1. History of District Census Handbook

It has been customary to bring our vital statistics at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. Such information was, however, not brought out in 1901. Village Directories were prepared for all districts in 1911, but could be published only for thirteen due to the out break of the First World War. At the 1921 Census, these were published for all districts in the form of District Census Statistics. In 1931 villagewise statistics were compiled but could not be published owing to financial stringency, resulting in loss of valuable data. At the 1941 Census, restricted tabulation was undertaken in the wake of the Second World War, but the utility of Census statistics was recognised and these were published. The District Census Handbook in its present form was brought out at the 1951 Census, and was published alongwith another volume titled District Population Statistics. In 1961 Census, attempts were made to render the District Census Handbook more informative, as in addition to Census data pertaining to each village, data about its level of development and amenities were also collected. At the 1971 Census, efforts have been made to compile both Census and Non-census statistics at village/town level in a uniform manner with an enlarged scope.

As the District Census Handbook makes Census statistics available for the smaller territorial units, it is constantly referred to for several purposes of administration, demarcation of electoral constituencies, planning and development and so on. To ensure that these statistics are available to the users early, the District Census Handbook has been divided for being published separately into three parts :

Part A : Town and Village Directory.

Part B : Village and Town-wise Primary Census Abstract.

Part C : Analytical Report and Administrative Statements—District Census Tables.

2. Scope of District Census Handbook

Part A of the Handbook comprises the Town and Village Directory. In Village Directory, particulars of amenities in regard to Education, Medical, Power supply, Drinking-water supply, Post and Telegraph and Communications have been given. Besides, it contains land-use statistics, days of weekly markets and places of religious, historical or archaeological interest in each village. The Town Directory comprising seven statements throws light on the status of the town, its origin, growth of population, functional category, location and physical aspects, Municipal finances, Civic and other amenities, Medical and Education facilities and statistics pertaining to Trade, Commerce, Industry and Banking. Apart from these, it also gives the distribution of population of a town by religion and Scheduled Castes/Scheduled Tribes.

Part B represents data down to village level for rural area and block level for towns. It contains the Primary Census Abstract which incorporates figures of area, number of occupied residential houses and households, total population and its break-up by sex, scheduled caste and scheduled tribe, literate population, working population by nine broad industrial categories of cultivators, agricultural labourers, workers engaged in forestry and live stock etc., in mining and quarrying, in manufacture or repair, in construction, in trade and commerce, in transport and communications and in other services as well as the non-working population.

Part C deals with the administrative statistics pertaining to the district in all fields of development. The Census tables pertaining to language, religion, migration and economic activities are being reproduced in this part. A write up indicating changes in socio-economic and demographic characteristics of the district during the last decade is also being included in it.

3. Town Directory—Given in Part A presents data for all the Census towns of the district. There is no uniformly accepted definition of a town. The historical, political, cultural and administrative considerations are generally taken as criteria for rural-urban classification. An urban area, in contradistinction to the rural, comprises a large majority of inhabitants who are engaged in industrial and non-agricultural activities. In addition to its size, population and occupational characteristics, an urban area provides such facilities as transportation, banking, commercial and technical services, community facilities and other civic services. According to the State Government, all Municipal Corporations, Municipal Boards, Cantonment Boards, Notified Areas and Town Areas are considered as towns, and according to their average annual income from their own resources, these have been classified into different classes of local bodies. The criteria adopted under the Census Operations is slightly different from the State Government. In 1971 Census all places satisfying the following conditions have been treated as Towns —

1. All Municipal Corporations, Municipal Boards, Cantonments & Notified Areas.
2. All localities though not in themselves local bodies but forming part of a city or town agglomeration.
3. Other places satisfying all the three under mentioned conditions :
 - (i) Population exceeds 5,000,
 - (ii) At least 75 % of the male working population engages in non-agricultural pursuits, and
 - (iii) The density of population exceeds 1,000 persons per sq. mile (386 persons per sq. km.).

The information given in the Town Directory relates to the year 1969. The data has been presented in the following seven statements :

(a) Statement I—This statement presents the population of the towns at the end of each decade from 1901 to 1971, the Civic status of the towns and their functional categories at 1961 and 1971 Censuses. The functional categories given in columns 14 and 15 have been determined on the basis of the predominant functional character of the town, to derive which the working population under the broad industrial categories has been regrouped into five broad functional classifications.

- (i) Primary Activities-Categories I, II, III & IV
- (ii) Industry-Categories V (a), V (b) and VI
- (iii) Trade and Commerce-Category VII
- (iv) Transport-Category VIII and
- (v) Services-Category IX

For each town, the percentage of workers under each of the aforesaid classes to total workers is worked out, and where the workers under one of the classes comprised 40 % or more of the total workers, the town is taken as mono-functional. In other cases, the next predominant occupation is taken into account and if the total of the two comes to 60 % or

above, the town is designated as bi-functional. If the total does not yield 60%, the third predominant occupation is also taken and such a town is treated as multi-functional.

The notations used in column 5 of the statement are :

C—Municipal Corporation

M—Municipal Board

NAC—Notified Area Committee

TC—Town Area Committee

CB—Cantonment Board

(b) **Statement II**—This statement gives the physical aspects and location of towns. The annual rainfall, maximum and minimum temperature, nearest city with its distance, name of district and tahsil headquarters, railway stations and bus routes etc. have been indicated. The Geographical Co-ordinates of towns given in col. 3 have been supplied by the Director of Regional Meteorological Centre, New Delhi

(c) **Statement III**—It reveals the municipal finances for the year 1968-69. The receipts through taxes and other sources alongwith the expenditure on general administration, public works and conveniences have been given therein.

(d) **Statement IV**—In the statement, the Civic and other amenities available in the town have been shown such as the system of sewerage, drainage, the number of latrines and method of disposal of night soil, the source and capacity of protected water supply, fire fighting service and electrification. The notations used in the statement are as below :

Col. 3	PR	For	Pucca Road
	KR	,,	Kachcha Road

	MCW	,,	Maternity and Child welfare Centre
Col. 5	AS	. ..	,,	Arts and Science College
Col. 17	PL	,,	Public Library
	RR	,,	Reading Room

(f) **Statement VI**—This statement contains information relating to trade, commerce, industry and banking facilities in the towns. The names of important commodities manufactured, imported and exported, the number of banks and agricultural as well as non-agricultural credit societies are given in the statement. The commodities mentioned therein are those

having the highest value in currency. In a few cases if the town is famous for manufacturing or exporting some particular item, even though the money value is not high, such items have been included.

(g) **Statement VII**—The census table C-VII giving distribution of population by religion and scheduled castes/scheduled tribes has been reproduced in this statement. While sex-wise following of the more common religions viz. Hinduism, Islam, Buddhism, Jainism, Sikhism and Christianity has been given separately, the persons belonging to other religions and persuasions have been shown in columns 15 and 16 under the heading of 'Others.

(4) **Village Directory**—reveals the general living conditions of peasantry and the over all development that has taken place in the country side. The amenities available within each village in the field of education, medical and health, power-supply, drinking water, communications, post and telegraph have been given in columns 4 to 9 of this Directory. Besides, the information relating to staple food, distance from nearest town, days of market/*hat* and places of religious, historical or archaeological interest is also given in the statement. If the village is uninhabited or power is being used for agricultural purpose only, these characteristics have been indicated in the remarks column.

The land use statistics are constantly in demand for agricultural production programme. These statistics have been given in columns 11 to 15 under the headings (i) Forest, (ii) Irrigated, (iii) Unirrigated, (iv) Cultivable waste and (v) Area not available for cultivation. In column 12, the irrigated area under different sources of irrigation has been separately given.

The villages have been arranged according to the code numbers allotted to them at 1971 Census. The information has been presented with the help of the following abbreviations :

An appendix has been included summing up the amenities at district level with tahsil wise break up.

THE DISTRICT

A—Town Directory

(a) **Statement I**—Banda district has five towns, namely Atarra, Banda, Chitrakut Dham, Manikpur Sarhat and Rajapur. In 1961 there were four towns in the district and Atarra has now been added to the list. The functional distribution of the towns is as below :—

Table 1

Functional Category	Name of Town
(i) Primary Activities-cum-Commercial	Atarra
(ii) Primary Activities-cum-Transport	Manikpur
(iii) Services-cum-Commercial-cum-Industry	Banda
(iv) Primary Activities-cum-Commercial-cum-Services	{ Chitrakut Dham and Rajapur

It would be seen from the above table that three towns viz., Banda, Chitrakut Dham and Rajapur are multi-functional towns. Among these towns, Primary Activities predominate in Chitrakut Dham and Rajapur with percentages 27.85 and 32.54 respectively. Service class (33.56%) predominates in Banda. Atarra and Manikpur are bi-functional towns with primary activities as its predominant function with percentages 34.35 and 39.86 respectively followed by Commercial and Transport workers.

(b) **Statement II**—The physical and locational aspects have been covered in this statement. The figures of annual rainfall and the maximum and minimum temperature were not available for each of the towns with the Director of Meteorological Centre, Delhi, so the information given in Col. 4-6 relates to the observatory in Banda.

(c) **Statement III**—The Per capita receipt and expenditure by the local bodies in the five towns is as below :

Table 2

Class of Towns	No. of Towns	Per Capita						
		Receipt (Rs.)			Expenditure (Rs.)			
		Total Receipt	Receipt through Taxes etc.	Receipt from all other sources	Total expenditure	Expenditure on public health and convenience	Expenditure on public institutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9
Class II 50,000 to 99,999 Banda	1	17.69	9.70	7.99	18.02	6.53	4.99	6.50
Class IV 10,000 to 19,999 Atarra and Chitrakut Dham	2	16.03	7.43	8.60	14.96	2.23	0.81	11.92
Class V 5,000 to 9,999 Manikpur Sarhat and Rajapur	2	3.09	0.74	2.35	3.54	0.73	...	2.82

The per capita receipt of Class II, IV & V towns is Rs. 17.69, 16.03 and 3.09 respectively. Against this the per capita expenditure is Rs. 18.02, 14.96 and 3.54 respectively.

(d) **Statement IV**—All the towns have protected water supply and road lighting arrangements. Fire fighting arrangement is, however, not available. There is no mechanical transport for removing night soil and hand devices are used for the purpose in all the towns of the district.

(e) **Statement V**—The total number of beds in the Hospitals of the towns has increased from 121 in 1960 to 141 in 1969. Banda has 5 hospitals, 1 dispensary, 1 T. B. Clinic, 1 Family Planning Centre and 1 maternity and Child welfare Centre. Chitrakut Dham has 1 hospital, 1 dispensary, 1 Family Planning Centre and 1 maternity and Child welfare Centre. Atarra has 2 hospitals and 1 Family Planning Centre whereas Rajapur has, 1 hospital, 1 dispensary and 1 Family Planning Centre. Manikpur Sarhat is the only town which has no hospital, but it has 1 Health Centre and 1 Family Planning Centre.

Table 3

Total No. of beds in Medical Institutions	No. of beds per 1,000 population
183	2 (1.87)

One Degree College with faculty of Arts and one Ayurvedic College alongwith a Degree College with Arts and Science faculties are located in Atarra and Banda respectively. Chitrakut Dham, Manikpur Sarhat and Rajapur have no facility of College education. Higher secondary, Middle and Primary School facilities are available in all the towns of the district. The following table gives details of the number of institutions (1969) per 1,000 population.

Table 4

Name of Town	No. per 1,000 population		
	Higher Secondary	Middle	Primary
1. Atarra	0.12	0.29	0.29
2. Banda	0.10	0.10	0.53
3. Chitrakut Dham	0.22	0.17	0.67
4. Manikpur Sarhat	0.15	0.31	0.31
5. Rajapur	0.34	0.17	0.34
Average	0.14	0.16	0.49

The average number of Higher Secondary schools per 1,000 population for all the towns is 0.14. It would be seen that Chitrakut Dham and Rajapur towns have better facilities in regard to educational institutions.

The average number of Middle and Primary Schools per 1,000 population for all the towns comes to 0.16 and 0.49 respectively.

Atarra and Banda towns have Cinema halls, public libraries are available in Banda, Chitrakut Dham and Rajapur whereas 2 reading rooms are functioning in Banda.

(f) **Statement VI**—The articles manufactured in Atarra town are rice and Pulses. Most important articles manufactured in Banda, Chitrakut Dham, Manikpur Sarhat and Rajapur are ice, wooden toys, *Kattha* and leather respectively. The articles imported in Banda and Manikpur Sarhat are spices and food grains respectively, whereas cloth is imported in Atarra, Chitrakut Dham and Rajapur. Articles exported from Atarra, Manikpur and Rajapur are rice, wood and food grains respectively, whereas wheat is exported from Banda and Chitrakut Dham.

(g) **Statement VII**—The population of all the towns is largely shared by Hindus (82.46 %) and Muslims (16.38 %). The percentage growth rate of Muslim population of these towns during the last decade is 37.19 which is short of the growth rate of 58.24 of Hindu population. The percentage of Scheduled Caste persons is higher (13.73 %) in comparison to Scheduled tribes (0.01).

B—Village Directory

(a) According to the area in acres the villages have been stratified in the following table :

Table 5

Area (in acres)	No. of Villages	Percentage
50 acres or less	15	1.16
51-100	21	1.62
101-200	56	4.31
201-500	237	18.26
501-1000	388	29.89
1001-2000	324	24.96
2001-5000	205	15.79
5001 acres and above	52	4.01
* Total	1,298	

* Total is exclusive of one village whose area figure is not available in this table.

It is evident from the above table that the number of villages having an area of more than 200 acres but not more than 1,000 acres are highest claiming the percentage of 48.15. Thereafter, the number of villages goes on decreasing as the size of villages increases. There are 52 villages having an area exceeding 5,000 acres. As regards smaller villages, there are only 15 having an area of less than 50 acres.

(b) The distribution of villages having educational institutions is given in the following table.

Table 6

Distance from the nearest town (in kms.)	Total no. of villages	No. of villages having				
		Primary School	Middle School	Higher Secondary School	Colleges	Others
0-5	73	46	4	2		1
6-10	164	103	15	1
11-15	254	151	24	3		..
16-25	326	195	29	3	.	..
26-50	349	226	28	4	..	.
51-100	133	96	14	1		.
101-200
201 and above
Total	1,299	817	114	14	..	1

The above table shows that the largest number of institutions (83.46%) including Higher Secondary Schools exist in the villages situate between 51 to 100 kilometers from the nearest town. The villages which lie within the radius of 16 to 25 kms. have the least no. of institutions (69.63%).

(c) 21 villages in district Banda have hospitals. If all kinds of medical institutions including dispensaries, health centres etc. are taken into account, 140 villages out of 1299 have medical institutions.

The following table presents the number of medical institutions per 100 Sq. Kms.

Table 7

Name of Tahsil.	Total area (in sq. kilometres)	No. of medical institution of any kind per 100 sq. kilometres
Banda	1642.1	3
Baberu	1590.3	1
Naraini	1386.3	1
Karwi	2337.4	1
Mau	1035.6	1

It transpires that Tahsils Baberu, Naraini, Karwi and Mau each have one medical institution per 100 sq. kms. Banda is slightly better of having 3 institutions per 100 sq kms.

(d) 87 villages are electrified in the district out of 1299 villages. Their percentage comes to 6.70.

The largest number of electrified villages (32) lie in Tahsil Karwi and minimum in Tahsil Mau (1). The power supply in villages with reference to their distance from the nearest town is given in the following table :

Table 8

Distance from the nearest town	Total No. of villages	Number of villages with Electric Power supply	
		Total Villages	Percentage of total electrified villages to total villages
0-5	73	22	30.14
6-10	164	16	9.75
11-15	254	22	8.66
16-25	326	20	6.13
26-50	349	7	2.01
51-100	133
101-200	.	.	.
201 and above
Total	1,299	87	6.70

The percentage of electrified villages to the total villages is highest i. e. 30.14 for those situate within a radius of 5 kilometres and the minimum percentage of 2.01 is for those situate at a distance of 16 to 25 kms. from the nearest town. It is evident from the above table that the percentage of electrified villages to total villages generally decreases with the increase of distance from the nearest town.

As many as 1 85 % villages of the district are connected by rail, out of the total number of 1299 villages. 15.93 % are connected by pucca road and 1.23 % by kachcha and Pucca roads. The percentage of villages having only kachcha road is 61.05 %. The

nature of communications have been shown in the following table, where the villages have been classified according to their distance from the nearest town.

Table 9

Distance from the nearest town	Total No. of villages	No. of villages connected by							
		Pucca Road	Kachcha Road	Pucca & Kachcha Road	Pucca Road & Train	Kachcha Road & Train	Pucca Road & River	Kachcha Road & River	Others
0-5	73	39	34	2	..	4			6
6-10	164	23	101	3	5	2	.	.	8
11-15	254	41	138	3	5	2	..	3	36
16-25	326	60	189	1	3	3	...		7
26-50	349	43	232	6	..		1	6	10
51-100	133	1	99	1	5	11
101-200
201 and above
Total	1,299	207	793	16	13	11	1	14	78

It is evident from the above table that the villages nearest to the town have better facilities of communications.

(f) There are in all 165 Post Offices in the rural areas of the district. On an average, 1 Post Office caters to the need of about 8 villages. The number of Post Offices per 100 Sq. kms. in the various tahsils have been shown in the following table :

Table 10

Name of Tahsil	Total area (in sq kilometres)	No. of Post Offices per 100 sq. kilometres
Banda	1642.1	4
Baberu	1590.3	2
Naraini	1386.3	2
Karwi	2337.4	1
Mau	1035.6	1

Tahsils Karwi and Mau have the lowest number of Post Offices, the average being 1 per 100 sq. kms. Tahsils Baberu and Naraini are slightly better off with 2 Post Offices per 100 sq. kms. Highest number of Post Offices per 100 sq kms. are situate in Banda i.e. 4.

(g) Wheat and gram are the staple food in the district.

The cultivated area is 69.24 percent of the total rural area of the district, of which 14.49 percent is irrigated area.

The following table shows the average cultivated land, average cultivable waste and its percentage to average cultivated area per village. The villages in this table have again been classified according to their distance from the nearest town.

Table 11

Distance from the nearest town	Number of villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	percentage of average cultivated waste per village to average cultivated land per village
0-5	73	57,528	788	13,744	188	23.86
6-10	164	151,613	924	25,573	186	16.88
11-15	254	241,038	949	43,770	172	18.12
16-25	326	317,125	973	63,513	195	20.04
26-50	349	335,851	962	104,653	300	31.19
51-100	133	174,327	1311	27,632	208	15.87
101-200
201 and above
Total	1,299	1,277,482	983	278,885	215	21.87

The average area of cultivated land per village is highest (1,311) in the distance group of 51 to 100 kms. followed by 973 in the distance group of 16 to 25 kms. It is lowest (788) in the distance group 0 to 5 kms. The average cultivable waste per village is 300 in the distance group of 26 to 50 kms. It is (208) per village in the distance group of 51 to 100 kms. The average area of cultivable waste per village is lowest (156) in the distance group 6 to 10 kms. The percentage of average cultivable waste to average cultivated land per village is highest (31.19) in the distance group 26 to 50 kms. Whereas it is only 15.87 in the case of villages in the distance group 51 to 100 kms.
