KERALA

PART X

DISTRICT CENSUS HANDBOOK IDIKKI

K. NARAYANAN

**OF THE INDIAN ADMINISTRATIVE SERVICE
DIRECTOR OF CENSUS OPERATIONS**

KERALA

1976

P R E F A C E

The District Census Handbooks were published for the first time in 1951 as part of the Census publication programme.

Each Handbook contained a general account of the district and its people, Census tables and statistics on the area, houses, population, general amenities and distribution of population by livelihood classes for each village and town. The 1961 District Census Handbooks were a distinct improvement on the 1951 volumes. A uniform procedure was adopted for the preparation of the Handbooks. Each Handbook contained three parts as detailed below:

Part A. General, dealing with a general introduction about the district, its progress on various fields of general amenities since 1951 and an analysis of population by various demographic characteristics.

Part B. Census data, dealing with the Census tables of 1961 pertaining to the district.

Part C. Village/Town Directory, dealing with the amenities, Primary Census Abstract down to the level of karas/muris/desoms in the case of rural areas and blocks and wards in the case of urban areas and number of industrial establishments by type.

District and Taluk maps were also incorporated in each District Census Handbook.

In 1971 also it has been decided to adopt more or less the same pattern and publish the District Census Handbooks in three parts as given below:

Part A. Town and Village Directory

Part B. Village and Town Primary Census Abstract

Part C. Administrative Statistics and Report.

The collection and compilation of data for Part A were done by the office of the Director of Census Operations, Kerala through specially designed schedules for villages and towns. The information on rural areas was furnished by the Tahsildars and on the urban areas by the concerned Municipal/Corporation Commissioners. While Part B of the Handbook presents the Village and Town Primary Census Abstract, Part C gives the Report and Administrative Statistics processed from information collected from the various Central and State Government Offices.

A special feature of the publication of the Handbook in 1971 is the presentation of Primary Census Abstract not only for villages but also for the panchayats. This is the first time that an attempt has been made to present panchayat-wise figures. The additional work involved in the new venture is more than justified in view of the growing importance of panchayats in administration.

The District Census Handbooks, consisting of Parts A and B of all the ten districts as on 1st April 1971, have been published. Idikki district was formed after the 1971 Census, i.e., on 26th January 1972. The formation of the new district has necessitated the preparation and publication of a special volume on Idikki district combining all the parts coming in other Handbooks. The present volume consists of certain basic Census tables, town and village directory, Village Primary Census Abstract and Block-wise and Panchayat-wise Primary Census Abstract in addition to a short write-up on the district. It is hoped that this volume will serve as a useful reference book on Idikki district.

On the recommendation of Registrar General, India, the Government of Kerala have agreed to bring out these volumes as State Government publications and issued orders in

G.O. MS. No. 199/70/PD, dated 17th June 1970. The printing of the Handbooks was undertaken by the Superintendent of Government Presses, Trivandrum.

It is not possible to have compiled a book of this kind without the co-operation and goodwill extended by the various State and Central Government Offices. I am grateful to them for their co-operation. The District Census Handbook section of my office functioned under the direct control of Shri B. T. Pillai, Deputy Director of Census Operations (Tabulation) and he was assisted by a Tabulation Officer and necessary staff. Sri S. Jayashanker was the Tabulation Officer in charge of the section at the time of addressing the various departments for collection of information. At the time of compilation of the District Census Handbook Smt. C. Kamalam took charge as the Tabulation Officer. I feel very happy in acknowledging the valuable contributions made by these officers and other members of the staff in my office, especially Smt. K. Sulabhamma, Statistical Assistant and Shri G. Sivadasan and Smt. M. Premakumari Amma, Assistant Compilers in the compilation of this important work. The entire typing work was done by Sri M. Krishnan and Smt. S. Saraswathy Amma, Typists of this office. Sarvasri K. Krishna Pillai and M. T. Pillai have prepared the maps included in this volume. The brunt of the proof reading was cheerfully borne by Sarvasri N. Aravindan and N. Madhavan, Proof Readers.

I would like to place on record my deep sense of gratitude to Sri P. Kurien John, Superintendent of Government Presses for the warm co-operation extended by him for the timely printing of the Handbook. I am extremely thankful to the staff of the Government Press, Ernakulam for doing the job with utmost care and efficiency.

I shall be failing in my duty if I do not place on record my gratefulness to Sri A. Chandra Sekhar, I.A.S., Registrar General for the valuable guidance and help extended to me in this work.

Trivandrum,
1st September, 1975.

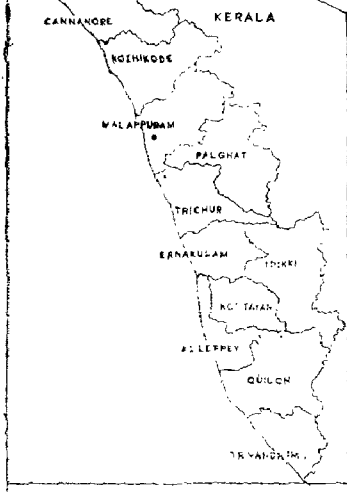

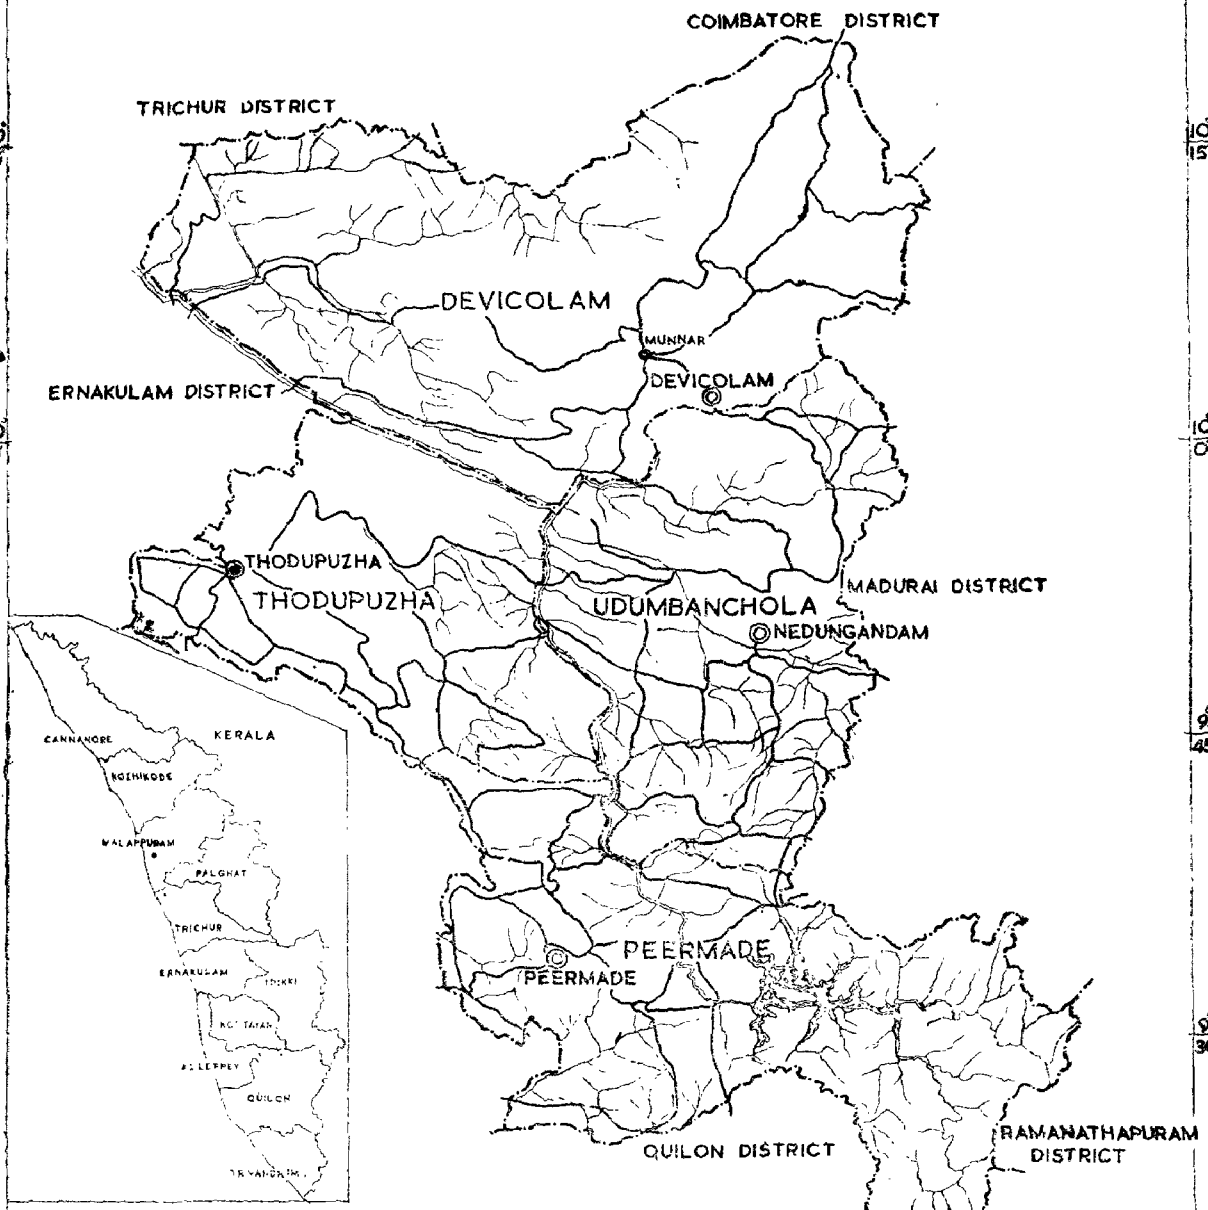

K. NARAYANAN,
Director of Census Operations.

INTRODUCTION

Idikki district, named after the mighty Idikkimala and also after the hydro-electric project, was formed after the 1971 Census by taking regions from the erstwhile Ernakulam and Kottayam districts. It actually came into existence on 26th January, 1972 as per Government Notification No. 54131/C2/71/RD, dated 24th January, 1972. The jurisdiction was slightly altered by a subsequent notification No. 7754/C2/72/RD, dated 14th February, 1972. Thus the present district consists of Devicolam, Udumbanchola and Peermade taluks of the erstwhile Kottayam district and Thodupuzha taluk (excluding Kalloorkad village and portion of Manjalloor village included in Manjalloor and Kalloorkad panchayats) of the erstwhile Ernakulam district. Consequent on the formation of the district a new taluk Kothamangalam, consisting of Kuttamangalam, Keerampara, Kothamangalam, Pindimana, Kottappady, Eramalloor, Varappetty, Kadavoor and Pothanicaud villages, was carved out from Muvattupuzha taluk and allowed to continue in the present Ernakulam district. It is also worthwhile to mention that Kalloorkad village and portion of Manjalloor village included in Manjalloor and Kalloorkad panchayats were continued to be treated as separate villages in Muvattupuzha taluk, while the portion of Manjalloor village which forms part of Kumaramangalam Panchayat retained in Thodupuzha taluk was added to Kumaramangalam village of the same taluk for administrative convenience.

Physical Features

2. Idikki, the hilly district of the State, is bounded on the north by Mukundapuram taluk of Trichur district and Pollachi and Udumalpet taluks of Coimbatore district, on the east by Kodaikanal and Uthamapalayam taluks of Madurai district and Srivilliputhur taluk of Ramanathapuram district of Tamil Nadu, on the south by Pathanamthitta taluk of Quilon district and on the west by Kanjirappally and Meenachil taluks of Kottayam district and Muvattupuzha, Kothamangalam and Kunnathumad taluks of Ernakulam district. It lies between 9° 15' and 10° 21' of north latitudes and 76° 37' and 77° 25' of east longitudes. With an area of 5,087 sq. km. Idikki ranks second among the districts in the State in respect of area. It works out to 13 per cent of the total area of the State.

3. It has definite physical characteristics. A major portion of the district is covered by dense forests and extensive tea, coffee and cardamom plantations. It is also the abode of the major hydro-electric project in the State like Pallivasal, Senkulam and Neriamangalam. Idikki project which is expected to be commissioned in 1974, is the latest addition to this list. Thekkadi, one of the famous wild life sanctuaries in the country, is located in this district.

4. Topographically the State is divided into three distinct natural divisions, the highland, the midland and the lowland based on the altitude from the mean sea level. The classification was based on the contour lines. The region which lies below 25 feet above the

mean sea level is known as lowland while the midland covers a region lying between 25 feet and 250 feet above mean sea level. The highland which lies to the east of the midland has an altitude of 250 feet and over above mean sea level. This district has no lowland division. Devicolam, Udumbanchola and Peermade taluks bordering the Western Ghats lie entirely in the highland division while Thodupuzha lies partly in highland and partly in midland.

Administrative Divisions

5. There are four taluks (Devicolam, Udumbanchola, Thodupuzha and Peermade) in this district and all these taluks fall under the revenue division of Devicolam. There are 42 revenue villages and two census towns in the district. The towns are Munnar and Thodupuzha. The following table gives the details of the administrative units in the district:

TABLE I

ADMINISTRATIVE UNITS

District/Taluk	No. of villages	No. of villages lying				No. of towns	No. of panchayats
		In rural areas		In urban areas			
		Whole	Part	Whole	Part		
1	2	3	4	5	6	7	8
IDIKKI	42	40	1	1	1	2	46
Devicolam taluk	9	8	1	..	1	1	8
Udumbanchola „	12	12	14
Thodupuzha „	15	14	..	1	..	1	17 *
Peermade „	6	6	7 †

*Portions of three panchayats lie in Muvattupuzha taluk.

†Portion of one panchayat lies in Meenachil taluk.

The number of villages and panchayats relates to 1st April 1971.

Area and Population

6. With an area of 5,087 sq. km. the district ranks second in the State in extent, the largest district being Cannanore with 5,706 sq. km. A major portion of the area of the district (96.38 per cent) lies in the highland region. The area figures given for the district is based on the provisional geographical area figures supplied by the Surveyor General, India for Kottayam and Ernakulam districts, while the taluk-wise area figures have been supplied by the Director of Survey and Land Records, Kerala except in the case of Thodupuzha taluk. For Thodupuzha taluk the area figures have been adjusted by this office taking into account the changes in the jurisdiction as per the notification issued by the Government of Kerala.

The relevant area figures for the smaller parts affected by these changes have been supplied by the Tahsildar, Thodupuzha. Since these figures related to separate agencies the total of taluk-wise figures do not agree with the district figures. The following table gives the area and population by natural divisions for the district:

TABLE 2

AREA AND POPULATION BY NATURAL DIVISIONS, 1971

District/Taluk	Total	Highland	Midland
I	2	3	4
IDIKKI	I 5,087.0*	4,902.9	184.1
	II 765,608	666,734	98,874

	II 146,841	146,841	..

I Area in km² II Population

*Provisional

7. Of the total population of the district, Udumbanchola taluk accounts for 34.60 per cent while Thodupuzha taluk has a population of 28.67 per cent. The remaining two taluks have a population of less than 20 per cent each. Udumbanchola taluk accounts for 39.73 per cent of the population in the highland division.

Occupied Houses and Households

8. As part of the 1971 Census all the houses in the State were numbered and listed. The primary intention in having a list was to ensure complete coverage of the Census and also to have a picture of the housing condition of the State. Various definitions have been adopted for a 'Census house' in the previous censuses. According to the 1971 Census, a census house is defined as a building or part of a building having a separate main entrance from the road or common courtyard or stair-case etc. used or recognized as a separate unit. It may be used either for residential or non-residential purpose or both. It may be inhabited or vacant. For the purpose of comparison of houses, only the occupied residential houses are taken into account. At the beginning of the century, as per the Census of 1901, there were less than ten thousand residential houses in the district. During the next decade it was doubled and thereafter it showed gradual increase till 1951. There were about forty thousand dwelling houses at the time of the 1951 Census, the first census after Independence. During the decade 1951-61 the number of houses again doubled and it crossed the mark of one lakh. The increase during this period was abnormal and was largely due to the migration of population from the

other taluks of the neighbouring districts for colonization purposes. In fact Government had started colonization schemes like Pattom colony etc. in Udumbanchola taluk and also allowed the people to settle down in the hilly tracts of the district. During the present decade the growth of houses was not as much as in the previous decade. Only about thirty three thousand houses have been added during the last ten years. The following table gives the number of residential houses in the district for the period 1901-71:

TABLE 3

OCCUPIED RESIDENTIAL HOUSES, 1901-71

Year	Number	Percentage decade variation
1	2	3
1901	9,421	..
1911	19,745	+ 109.58
1921	21,906	+ 10.94
1931	35,799	+ 63.42
1941	36,362	+ 1.57
1951	40,329	+ 10.91
1961	110,983	+ 175.19
1971	134,011	+ 20.75

9. Let us now examine how the number of occupied residential houses has grown during the last decade among the taluks in the district. As already mentioned the increase in the number of residential houses in the district is 20.75 per cent for 1961-71 as against the State growth rate of 21.93 per cent. The growth in the number of residential houses in Devicolam and Peermade taluks is less than the State average. The Udumbanchola taluk has shown abnormal growth of 50.32 per cent followed by Thodupuzha taluk with 30.59 per cent.

10. This phenomenon is applicable for the rural areas also. There are only two towns in the district, viz. Munnar and Thodupuzha and both of them were not towns in the 1961 Census. Therefore no comparison of the growth of the occupied residential houses in the urban areas for the earlier decades is attempted.

11. The household for the purpose of the 1971 Census consists of a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be one-member household, two-member household or multi-member household. For census purposes each one of these types is regarded as a 'household'. Again there may be a household of persons related by blood or a household of unrelated persons. At the time of the 1961 Census there were 103 households for every 100 residential houses. This proportion has gone up in the present census to 107 households for every 100 houses. All the taluks, except Peermade, have shown an increase in the proportion of households, the number for Devicolam being very high with 112 households per hundred houses. In the Peermade taluk the proportion of households to residential houses has slightly gone down from 106 to 105. The following table gives the number of occupied residential houses and households for 1961 and 1971:

TABLE 4

OCCUPIED RESIDENTIAL HOUSES AND HOUSEHOLDS, 1961-71

District/Taluk	Occupied residential houses		Households		Percentage decade variation, 1961-71	
	1961	1971	1961	1971	Houses	Households
	2	3	4	5	6	7
IDIKKI	110,983	134,011	114,287	142,871	+20.75	+25.01
Devicolam taluk	25,211	23,457	25,809	26,255	- 6.96	+ 1.73
Udumbanchola „	31,058	46,685	32,065	50,051	+50.32	+56.09
Thodupuzha „	28,101	36,698	28,325	37,933	+30.59	+33.92
Peermade „	26,613	27,171	28,088	28,632	+ 2.10	+ 1.94

12. The household congestion in the district is comparatively less when compared to the State average. The 1971 Census reveals that there were only 5.36 persons per household as against 6.03 for the State. On a comparison of the figures for the previous census the present figures show a slight increase. This trend is common for all the taluks of the district except Thodupuzha where the number of persons per household has declined from 5.93 to 5.79. The lowest number of persons per household is recorded, as per the 1971 Census, in Devicolam taluk with only 5.12, even though in the 1961 Census the lowest rank was held by Peermade taluk with 4.76. The rural areas also show the same trend. The sub-joined table gives the number of households per 100 occupied residential houses.

TABLE 5

NUMBER OF HOUSEHOLDS PER 100 OCCUPIED RESIDENTIAL HOUSES, 1961-71

District/Taluk	Number of households per 100 occupied residential houses					
	Total		Rural		Urban	
	1961	1971	1961	1971	1961	1971
IDIKKI	103	107	103	107	..	108

Thodupuzha „	101	103	101	103	..	103
Peermade „	106	105	106	105

Growth of Population

13. Idikki, the least populous district in the State, has got a population of 7.66 lakhs as per the 1971 Census of which 3.95 lakhs are males and the remaining females. Since the district was formed after the 1971 Census the population figures for the present census as well as for the earlier decades were re-adjusted with reference to the present jurisdiction. In 1901 the population was nearly forty-eight thousand and during the past seventy years it has grown up by 16 times. On a comparison of the growth of population of the district with that of the State it can be seen that the growth rate of the district has shown a higher percentage increase than the corresponding State increase. The decennial growth rates of the district especially during the decade 1921-31 and 1951-61 with 72.59 per cent and 74.98 per cent respectively, were much higher than the corresponding State figures of 21.85

and 24.76. The following table gives the growth of population of the district for the period 1901 to 1971:

TABLE 6

GROWTH OF POPULATION, 1901-71

Year	Population	Males	Females	Percentage decade variation
1	2	3	4	5
1901	47,686	25,939	21,747	..
1911	99,605	54,072	45,533	+ 108.88
1921	108,796	58,791	50,005	+ 9.23
1931	187,767	102,408	85,359	+ 72.59
1941	244,418	130,354	114,064	- 30.17
1951	331,603	173,723	157,880	+ 35.67
1961	580,235	303,106	277,129	+ 74.98
1971	765,608	395,297	370,311	+ 31.95

14. Since most of the parts of the district are covered by dense forests and plantations there is lesser area for habitation compared to other districts in the State. There is also large scale conversion of forest areas and arable lands for residential and agricultural purposes during the past two decades. This has resulted in the increase in population in the hilly taluks of the State especially in Udumbanchola and the eastern parts of the Thodupuzha taluk. The establishment of the gigantic Idikki Project in Thodupuzha taluk has influenced, in a considerable way, the growth of population of the district. During the present decade the population of the district has shown an increase of 31.95 per cent as compared to the State increase of 26.29. There is every likelihood of a much higher increase in population of the district when the present capital of the district is shifted from the existing headquarters at Kottayam to the newly proposed site at Idikki.

15. Coming to the taluk-wise growth of population Udumbanchola taluk has the largest population increase during the last fifty years with 4069.89 per cent. In the three decades prior to the 1951 Census, as compared to other taluks, Peermade taluk had the highest decennial growth rates but during the post-1951 Census period. Udumbanchola taluk had the privilege of having the highest growth rate among the taluks of the district. The following table gives the taluk-wise growth rate of population for the last fifty years:

TABLE 7

GROWTH OF POPULATION BY TALUKS, 1921-71

District/Taluk	1921-31	1931-41	1941-51	1951-61	1961-71	1921-71
1	2	3	4	5	6	7
IDIKKI	+72.59	+30.17	+35.67	+74.98	+31.95	-603.71
Devicolam taluk	+74.50	+10.14	+32.02	+48.38	+9.09	-310.68
Udumbanchola „	+84.43	+21.74	+40.61	+675.75	+70.27	+4,069.89
Thodupuzha „	+61.23	+40.40	+30.35	+18.12	+30.77	+355.75
Peermade „	+91.56	+41.01	+48.37	+54.61	+9.88	-580.89

Rural-Urban Population

16. For census purposes a territorial unit is classified either as rural or urban. The rural areas are divided into villages and karas whereas the urban areas consist of Corporations, Municipal towns, Cantonment and Township and other census towns. As far as this district is concerned there is no town with a status of a Corporation, Municipality, Cantonment or Township. The two towns of the district relate to the category of 'other census towns'.

(i) Rural Areas

17. About 97 per cent of the population in the district live in rural areas. Of the 42 villages in the district one village lies wholly and another partly within the town limits. Unlike in other parts of the State, the villages in the district, especially in the hilly

taluks of Devicolam, Udumbanchola and Peermade, are larger in size. The average size of a village in the district is about 121 sq. km. while the average population is 18,057. For a better understanding of the distribution of the population in the rural areas the villages are grouped into seven population size classes. It may be seen that the majority of the villages fall in the category of ten thousand population and above. Kalkoonthal village in Udumbanchola taluk has the highest population in the district with 63,466 persons. There is no village with a population of less than two hundred in the district. Mlappara village in Peermade taluk, however, has the lowest population with only 318 persons. A major portion of this village is covered by dense forest. It may be noted that the renowned Sastha temple at Sabarimala is located within the limits of this village. The following table gives the distribution of villages by population size classes:

TABLE 8

VILLAGES CLASSIFIED BY POPULATION, 1971

Population size	Idikki district		Devicolam taluk		Udumbanchola taluk		Thodupuzha taluk		Peermade taluk	
	No.	Popula-tion	No.	Popula-tion	No.	Popula-tion	No.	Popula-tion	No.	Popula-tion

10,000 and above	30	688,442	4	117,221	11	262,607	10	162,091	5	146,523

18. As already stated a village may contain one or more karas. The average population of a kara in the district is 2,985 persons. However it has been noticed that the size of a kara in Udumbanchola taluk is very

high as compared to other taluks of the district. The name of kara of this taluk is known as Thavalam. The following table gives the taluk-wise distribution of karas by size class of population:

TABLE 9

KARAS CLASSIFIED BY POPULATION, 1971

Population size	Idikki district		Devicolam taluk		Udumbanchola taluk		Thodupuzha taluk		Peermade taluk	
	No.	Popula-tion	No.	Popula-tion	No.	Popula-tion	No.	Popula-tion	No.	Popula-tion

(ii) Urban Areas

19. As already stated there are only two towns in the district, Thodupuzha and Munnar. The population of these two towns combined together comes to only a little over twenty-five thousand. Both of them were towns in the earlier censuses with the exception in 1961 Census. Thodupuzha was declared as a town for the first time in 1931 under the Police Regulation Act and it was provided with conservative staff. It continued as a town till 1951 Census. Munnar became a town for the first time in the 1951 Census. Till then no uniform criterion was laid down for classifying a particular place as a town. But in 1961 considering the importance of urbanization a three-fold criteria for classification of a place as a town was adopted. Accordingly only places with (i) a minimum population of five thousand persons, (ii) a density of not less than 1,000 persons per sq. mile (400 persons per sq. km.) and (iii) at least 75 per cent of the male population engaged in non-agricultural pursuits were recognized as towns. When this criterion was strictly applied Thodupuzha, Munnar, Azhutha and Vandiperiyar lost their urban status and they were declassified as rural. In the 1971 Census almost the same definition was followed with a slight modification in the third criterion. Instead of the 'male population', 'male working population' was considered. In this Census the names of all places in a district which satisfy the above criteria were sent to the concerned District Collector and Tahsildar. There was no difficulty with regard to Thodupuzha town as it had satisfied all the criteria. However, Munnar was declared as a town based on the recommendation of the District Collector, Kottayam and also by the Government of Kerala. For census purposes the towns were classified into six classes viz. Class I towns with a population of 1 lakh and over; Class II with a population between 50,000 and 99,999; Class III with a population between 20,000 and 49,999; Class IV with a population between 10,000 and 19,999; Class V with a population between 5,000 and 9,999 and Class VI with less than 5,000 population. Based on the above classification Thodupuzha comes under Class III town and Munnar under Class VI town. Since these places were not towns in 1961 the growth of population of these towns is not discussed here.

Density of Population

20. The density of population (persons per sq. km.) provides a better picture of the population distribution of the district. According to the latest Census held in 1971 the population density of the district is 151 persons per sq. km. In other words the density of population of the State is three times that of the district. At the beginning of the present century there were only 9 persons per sq. km. in the district. By 1911 the density of district rose to 20 persons per sq. km. Gradually it showed an increase and in the 1961 Census it came to 114 persons per sq. km. During the last decade there was a net addition of 37 persons per sq. km. The density of population of the taluks of the district varies considerably. As per the latest Census Udumbanchola taluk has got the highest density with 247 persons per sq. km. followed by Thodupuzha taluk with 225 persons. Devicolam taluk which has large tea plantations has a density of only 76 persons per sq. km. The growth of density from 1921 to 1971 is comparatively less for both Devicolam

and Peermade taluks. The following table gives the density of population by taluks for the period 1921-71:

TABLE 10
DENSITY OF POPULATION BY TALUKS, 1921-71

District/Taluk	Persons per km ²					
	1921	1931	1941	1951	1961	1971
1	2	3	4	5	6	7
IDIKKI	21	37	48	65	114	151
Devicolam taluk	18	32	35	47	69	76
Udumbanchola „	6	11	13	19	145	247
Thodupuzha „	49	80	112	146	172	225
Peermade „	16	32	45	66	102	112

NOTE: The density of the district has been worked on the basis of the area figures supplied by the Surveyor General, India whereas the taluk density has been calculated on the area figures supplied by the Tahsildar.

21. The density of population for the rural areas of the district for 1971 is 146 as against 477 for the rural areas of the State. Compared to this the rural areas of both Udumbanchola and Thodupuzha taluks have recorded higher density of population. Of the two towns in the district Thodupuzha town has a higher density with 956 persons per sq. km. as against 743 for Munnar town. Munnar is a small town both in extent and also in population.

Sex ratio

22. The sex ratio defined as the number of females per thousand males of the district as per the 1971 Census is 937. Unlike the pattern of sex ratio in the State this district has an excess of males over females in all the previous censuses. In 1901 the sex ratio of the district is only 838 females per thousand males. It has shown a steady increase afterwards except in 1931 where it showed a slight fall. This trend was also not in conformity with the trend of the State. Whereas for the State the sex ratio has shown a declining trend after 1951 Census, the district sex ratio has shown an increasing trend. The reason for the lower sex ratio in the district is associated with the terrain of the district. There was large scale migration of male-settlers to the hilly tracts of the district especially after 1931 Census. They took their women later when they felt that they were reasonably secure in the new surroundings. This has resulted in the higher sex ratios in the last three censuses. The following table gives the sex ratio of the district for the past seventy years:

TABLE 11
SEX RATIO, 1901-71

Census year	Number of females per 1,000 males
1	2
1901	838
1911	842
1921	851
1931	834
1941	875
1951	909
1961	914
1971	937

23. The same trend in sex ratio has been maintained by all taluks of the district except Thodupuzha. In the district the sex ratio has shown an increase from 914 in 1961 to 937 in 1971. Thodupuzha taluk has recorded a drop in sex ratio from 979 in 1961 to 934 in the present census. In 1971 the sex ratio is the highest in Peermade taluk with 965 females per 1,000 males. Udumbanchola taluk has shown the highest addition in sex ratio with 77 females for every thousand males, even though it continues to have the lowest sex ratio. The following table gives the sex ratio by taluks for 1961 and 1971 Censuses:

TABLE 12

SEX RATIO BY TALUKS, 1961-71

District/Taluk	Number of females per 1,000 males					
	1961			1971		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
IDIKKI	914	914	..	937	938	898
Devicolam taluk	899	899	..	931	937	773
Udumbanchola ,,	850	850	..	927	927	..
Thodupuzha ,,	979	979	..	934	935	926
Peermade ,,	927	927	..	965	965	..

Literacy

24. Kerala has a pride of place in literacy in the country. The State has a literacy rate of 60.42 for all persons, 66.62 for males and 54.31 for females. In respect of total, male and female literacy this district has lower percentages as compared to the State, the percentages being 56.42 for total, 62.21 for males and 50.25 for females. During the last decade the general literacy rate has gone up from 44.05 in 1961 to 56.42 in 1971. This increasing trend is maintained in all the taluks of the district. Male literacy in all the taluks of the district crosses the mark of 60 per cent except in Devicolam taluk. It may be noted that the total male and female literacy rates for Thodupuzha taluk are higher than the corresponding State rates. More than half of the female population of the district are literates. The percentage of female literates is more in Thodupuzha taluk as compared to the other taluks of the district. The following table gives the literacy rates for 1961 and 1971:

TABLE 13

LITERACY BY TALUKS, 1961-71

District/Taluk	Percentage of literates					
	Total		Males		Females	
	1961	1971	1961	1971	1961	1971
1	2	3	4	5	6	7
IDIKKI	44.05	56.42	52.06	62.21	35.31	50.25
Devicolam taluk	32.49	44.41	43.07	53.31	20.72	34.84
Udumbanchola ,,	46.81	57.02	54.10	61.55	38.24	52.14
Thodupuzha ,,	52.29	64.48	57.86	68.57	46.60	60.10
Peermade ,,	41.19	54.29	50.91	62.04	30.70	46.27

25. The literacy rates between rural and urban areas usually differ considerably because it largely depends on the educational facilities available in the area. The literacy rate of the district for rural areas is 55.99 per cent in 1971 as against 59.28 for the State. The urban literacy rate for the district (68.99) is higher than the corresponding literacy rate for the urban areas of the State (66.31). The same trend is noticed for both male and female literacy rates in the urban areas of the district for 1971. Among the towns of the district Munnar, a plantation town, has the highest literacy rate with over 70 per cent. The following table gives a comparative picture of the taluk-wise rural and urban literacy rates of the district for 1971:

TABLE 14

RURAL-URBAN LITERACY BY TALUKS, 1971

District/Taluk	Percentage of literates					
	Total		Males		Females	
	Rural	Urban	Rural	Urban	Rural	Urban
1	2	3	4	5	6	7
IDIKKI	55.99	68.99	61.80	73.94	49.81	63.48
Devicolam taluk	43.54	70.01	52.46	76.37	34.02	61.80
Udumbanchola ,,	57.02	..	61.55	..	52.14	..
Thodupuzha ,,	64.03	68.78	68.06	73.39	59.71	63.80
Peermade ,,	54.29	..	62.04	..	46.27	..

Scheduled Castes and Scheduled Tribes

26. The Scheduled Caste population of the district as per the latest census is 97,819 as against 91,566 in 1961. This shows a growth rate of 6.83 per cent as against a general growth rate of population of 31.95 per cent for the district. The Scheduled Caste population of the district is 12.78 per cent of the total population of the district in 1971 as against 15.78 per cent of the corresponding population in 1961. Except Thodupuzha in all the other taluks the percentage of Scheduled Caste population to total population has decreased. Among the taluks the percentage of Scheduled Caste population is highest in Devicolam with 29.07 per cent followed by Peermade taluk with 22.29 per cent. It is the lowest in Thodupuzha taluk with a little over 4 per cent.

27. The Scheduled Tribe population of the district is only about 23,181 which works out to 3.03 per cent of the total population. The proportion of Scheduled Tribe population to total population of the district is much above the percentage for the State as a whole which comes to only 1.26 per cent. Among the Scheduled Tribes the proportion to the total population for 1971 among the taluks of the district is much lower than the corresponding figure for 1961 except in the case of Devicolam taluk. The percentage of Scheduled Tribe population within a taluk is the highest in Thodupuzha with 5.04 per cent of the total taluk-population closely followed by Devicolam taluk with 4.98 per cent. The lowest number of Scheduled Tribes is in Peermade taluk with about thousand and eight hundred persons. The following table gives the growth rate of Scheduled Castes and Scheduled Tribes population for 1961-71:

TABLE 15

GROWTH OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION, 1961-71

District/Taluk	Scheduled Caste			Scheduled Tribe		
	1961	1971	Growth rate 1961-71	1961	1971	Growth rate 1961-71
1	2	3	4	5	6	7

Udumbanchola ,,	9,973	15,761	+58.04	3,112	3,633	+16.74
Thodupuzha ,,	6,884	10,276	+49.27	9,273	11,068	+19.36
Peermade ,,	34,325	32,727	-4.66	1,882	1,789	-4.94

Workers and Non-workers

28. In the earlier censuses income or economic independence was recognized as a criterion for measuring the economic activity of the people. In these censuses, data were collected for all persons who were economically independent and also for those who were economically dependent. An intermediate category of economic semi-dependence was introduced in 1931 Census onwards. This category was called 'working dependent' in the 1931 Census, 'partly dependent' in the 1941 Census and 'earning dependent' in the 1951 Census and for all these definitions an element of income was involved. As the application of the criterion of income or economic independence suppressed those who work in family economic activities but did not actually earn an income, it became necessary to change the definition. So in the 1961 Census stress was laid on work so that all people who work including family workers who were not in receipt of any income or working children who could not earn enough work for their maintenance were also reckoned as workers. According to these definitions work included not only actual work but also effective supervision and direction of work. As against the eight-fold livelihood classification adopted in the 1951 Census the population in 1961 was divided mainly into categories of workers and non-workers. The workers were further grouped into nine industrial categories while the non-workers into eight groups. In the 1971 Census more or less the same definition was followed. While finalising the definition of worker and non-worker in the 1971 Census it was decided to remove some of the basic anomalies that have crept in the definition of workers in the 1961 Census. In 1961 Census the workers included some of the non-workers like housewife, student etc. even though their participation was very marginal. So in the 1971 Census every individual was required to declare himself what according to him was his 'main activity'. Persons who are basically students, housewife, rent receivers etc. were classified according to their main activity. In this census, in addition to the main activity, every person was asked to state if he or she attended to any secondary work so as to get an account also of the marginal contribution to work made by persons who had declared themselves basically as a housewife or a full-time student etc. A worker for 1971 Census was defined as a person whose main activity is participation in any economically productive work by his/her physical or mental activity. Work involved not only actual work but also effective supervision or direction of work. The reference period is one week prior to the date of enumeration in the case of regular work, in trade, profession, service and business as against 15 days in the case of 1961 Census. If a person had participated in any

such regular work on any one of the days during the reference period and this had been returned as his main activity the person was categorised accordingly. In respect of seasonal work, i.e. the work which was not carried out throughout the year, a person's main activity was ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration. A man or woman who was engaged primarily in household duties such as cooking for one's own household or performing one's own household duties or a boy or a girl who was primarily a student attending institution, even if such a person helped in the family economic activity but not as a full-time worker he or she was not treated as a worker for the main activity. On the other hand if a person was primarily engaged in some economic activity but at the same time also attended to some household chorus or a night school he or she was treated basically as a worker for the main activity and categorised accordingly. Instead of the nine-way classification adopted for workers in the 1961 Census there were 10 categories for 1971 Census as given below:

- I Cultivators
- II Agricultural labourers
- III Live-stock, forestry, fishing, hunting and plantations, orchards and allied activities
- IV Mining and quarrying
- V Manufacturing, processing, servicing and repairs
 - (a) Household industry
 - (b) Other than household industry
- VI Construction
- VII Trade and commerce
- VIII Transport, storage and communications
- IX Other services

29. In the 1971 Census a separate category has been provided for 'mining and quarrying' as against a combined category of mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities adopted for the 1961 Census. The 1961 category of 'household industry' was included in the present census in the category of 'Manufacturing, processing, servicing and repairs'. In the 1961 Census 'household industry' covered establishments under Divisions '0' and '1' of the National Industrial Classification apart from Divisions 2 and 3. In the 1971 Census 'household industry' is confined to Divisions 2 and 3 only. In the Primary Census Abstract for the present census category V—'Manufacturing, processing, servicing and repairs'—is subdivided into two sub-parts (a) household industry and (b) other than household industry.

30. The number of workers as per the 1971 Census is 265,090 of which 198,739 are males and 66,351 are females. In other words 34.62 per cent of the total population of the district are returned as workers. The work participation rates in respect of males and females are 50.28 and 17.92 per cent respectively.

The percentage of workers to total population shows a declining trend from 39.28 in 1961 to 34.62 per cent in 1971. The reason for the decline in the percentage can be attributed to the change of definition adopted for workers in the 1971 Census. The following table gives the work participation rate of the district and taluks for 1961 and 1971:

TABLE 16
WORKING POPULATION, 1961-71

District/Taluk	Workers		Percentage of workers to total population	
	1961	1971	1961	1971
1	2	3	4	5
IDIKKI	227,916	265,090	39.28	34.62
Devicolam taluk	56,069	51,778	45.53	38.54
Udumbanchola „	65,239	89,769	41.93	33.89
Thodupuzha „	49,980	66,136	29.77	30.13
Peermade „	56,628	57,407	42.38	39.09

31. It may be seen from the above table that in respect of the taluks of the district the work participation rates have shown a fall except in the case of Thodupuzha taluk, where there is a marginal increase.

32. As already stated there are only 2.65 lakhs of workers in the district. Of these more than one-third

are in Udumbanchola taluk. The percentage distribution of workers in each taluk to total workers in the district is more or less in conformity with the distribution of population of the district. The following table gives the distribution of workers and non-workers by taluks in the district:

TABLE 17
WORKERS AND NON-WORKERS, 1971

District/Taluk	Total population	Total workers	Total non-workers	Percentage		
				Population	Workers	Non-workers
1	2	3	4	5	6	7
IDIKKI	765,608	265,090	500,518	100.00	100.00	100.00
Devicolam taluk	134,350	51,778	82,572	17.55	19.53	16.50
Udumbanchola „	264,913	89,769	175,144	34.60	33.86	34.99
Thodupuzha „	219,504	66,136	153,368	28.67	24.95	30.64
Peermade „	146,841	57,407	89,434	19.18	21.66	17.87

33. Of the total workers in the district about 31 per cent are belonging to the category of live-stock, forestry, fishing, hunting and plantations, orchards and allied activities. The next highest category is cultivators 25.56 per cent, followed by the category of agricultural labourers with 22.46 per cent to total workers. One peculiar feature is that more than half of the female workers are employed in the industrial category of plantations and other allied activities. This is typical of a district having very large number of tea and rubber plantations. Another feature is that the percentage of agricultural labourers, as compared to cultivators, is more among females than males. In 'other services' also the percentage of female workers is slightly high as compared to male workers.

34. The percentage of workers in the industrial categories of (i) cultivators, (ii) live-stock, forestry, plantations, etc. and (iii) construction are more than the corresponding State percentage of workers. Among the taluks of the district the percentage of cultivators is more in Udumbanchola taluk and less in Peermade taluk. Udumbanchola taluk has also the largest percentage of agricultural labourers as compared to other taluks of the district. Of the 82,116 workers engaged in forestry, plantations etc. 59,156 persons are in the two taluks of Devicolam and Peermade. The higher percentage of workers engaged in the industrial categories of 'construction' and 'other services' in Thodupuzha taluk is mainly due to the construction of the Hydro-electric Project of Idikki.

TABLE 18

WORKERS BY INDUSTRIAL CATEGORIES, 1971

Industrial category	Idikki district	Devicolam taluk	Udumbanchola taluk	Thodupuzha taluk	Peermade taluk
1	2	3	4	5	6
TOTAL WORKERS I-IX	265,090	51,778	89,769	66,136	57,407
I Cultivators	67,765	7,229	33,997	20,814	5,725
II Agricultural labourers	59,543	9,867	27,231	16,512	5,933
III Live-stock, forestry, fishing, hunting and plantations, orchards and allied activities	82,116	23,548	17,577	5,383	35,608
IV Mining and quarrying	370	39	58	132	141
V Manufacturing, processing, servicing and repairs					
(a) Household industry	2,425	404	734	793	494
(b) Other than household industry	9,834	3,430	1,726	3,040	1,638
VI Construction	8,100	309	613	6,506	642
VII Trade and commerce	11,015	1,730	2,620	4,210	2,455
VIII Transport, storage and communications	3,140	466	519	1,485	670
IX Other services	20,782	4,756	4,664	7,261	4,101

Town and Village Directory

35. In addition to the Census data some basic information on the amenities available in each town/village were collected as part of the 1971 Census programme. The details for the two towns and all the villages in the district were supplied by the concerned Tahsildars. The data thus collected are presented as Town Directory and Village Directory of this book.

(i) Town Directory

36. In the Town Directory, so far as this district is concerned, there are five statements giving the status of town administration, its origin, growth of population, functional category of the towns, physical aspects and location, civic and other amenities, medical, educational and cultural facilities, trade, industry, commerce and banking facilities. The statement on municipal finance which was given in other District Census Handbooks is not given in this volume as there is no town in the district with the status of a municipality.

37. Of the five statements given as part of the Town Directory the first statement gives the status, growth, history and functional category of a town. The functional category of a town is decided by the characteristic of a town as a centre of activity in the fields of primary, industrial, commercial, transport and services. These five functional groups are determined with reference to the nine-fold categories of the working population, as revealed by the 1971 Census. The industrial categories have been so grouped to include the five functional groups. The 'primary activity' consists of categories of 'cultivators', 'agricultural labourers' and those engaged in 'live-stock', forestry, fishing, hunting and plantations, orchards and allied activities and also in 'mining and

quarrying'. The functional category of 'industrial' includes those categories of 'household industry', 'other than household industry' and 'construction'. The industrial categories of 'trade and commerce' fall under the functional category of 'commercial', whereas transport falls under the functional category of 'transport'. Industrial category of 'other services' is treated under the functional category of 'services'. For treating a particular town under a specific functional category the following procedure was adopted. Initially the percentage of workers in each of the above five groups to the total workers in the town was worked out. If any one single group takes in 40 per cent or more of the total workers that town was designated by the corresponding functional category namely primary, industrial, commercial, transport or services as the case may be. If the highest percentage is less than 40, then the next predominant group is added to this group. If the two groups together take in a minimum of 60 per cent of the total workers, the town was then designated by both the functional groups, e.g., industrial-cum-transport. When the sum of the two groups did not reach 60 per cent, the third predominant group was taken into account and the town was classified by all the three functions. The functional category of Munnar town is 'service-cum-industrial' while that of Thodupuzha town is 'primary activity-cum-service-cum-commercial'.

38. The second statement covers the physical aspects and location of the two towns. It also furnishes details of the nearest railway station, navigable river/canal etc.

39. The next statement gives the civic and other amenities of the two towns like details of the systems of sewerage, method of disposal of night soil, drinking water facilities, electrification facilities, etc.

40. The fourth statement covers the details on medical, educational, recreational and cultural facilities available in these two towns. New Man College, located in Thodupuzha town, is an important institution with about 1,800 students on the rolls. The other college in the district is located in the rural areas. On a comparison of the two towns in the district Thodupuzha has a pride of place in regard to educational and medical facilities. There are 160 beds in the urban area of the district. This works out to an average of six beds per 1,000 population.

41. The last statement gives the important commodities imported and exported and manufactured in the two towns of the district besides the data on the number of banks, agricultural credit societies etc.

(ii) Village Directory

42. The Village Directory gives the details in respect of medical, educational, electrical and drinking water facilities available in the villages. In addition

to the pattern of land use in the village, the area of each village in square kilometre is also given in the Directory. In this connection it may be noted that the area figures given in this Directory were supplied by the Tahsildar while the area figures given in the Primary Census Abstract relate to those supplied by the Director of Survey and Land Records. In the case of certain villages the area figures given in the Village Directory do not tally with the figures given in the P.C.A. As the area figures classified by type of land use can alone be furnished by the Tahsildar it becomes necessary to adopt these figures in the Village Directory. On a perusal of the area figures given in the Village Directory it can be seen that all the villages in the district have an extent of 20 km² or over. The two important amenities given in the Village Directory are educational and medical. They are dealt in greater detail with particular reference to the proximity with the towns of the district. The following table gives the number of villages having various educational institutions and the distances from the nearest town.

TABLE 19

NUMBER OF VILLAGES HAVING EDUCATIONAL INSTITUTIONS AND THE DISTANCE FROM NEAREST TOWN, 1970

Distance from the nearest town (in km.)	Total number of villages	Number of villages having				
		Primary schools	Middle schools	High schools	Colleges	Other educational institutions

43. Most of the villages in the district have Primary Schools. Of the 41 villages in the district there are 32 villages having Middle Schools and 26 villages having High Schools. According to the figures furnished by the Tahsildar for the Village Directory there are 242 Primary Schools, 68 Middle Schools and 41 High Schools and 21 other Educational Institutions in the district. The Sabarigiri College, Nariampara managed by the Travancore Devaswom Board is located in the hilly tracts of Udumbanchola taluk. In addition to these, there are 14 villages having other educational institutions. On an average there are 5 primary schools, one middle school and one high school per 100 sq. km. of area. It is worthwhile to mention here that settlement pattern of the district is different, especially in the hilly taluks with rest of the State. There are vast areas of plantations but the habitation is centred round to specified localities. So the density of institutions with reference to population is more meaningful than the density of institutions per sq. km. as revealed in the following table.

TABLE 20

EDUCATIONAL INSTITUTIONS, 1970

District/Taluk	Total number	Density per 100 sq. km.	Density per 1 lakh population
1	2	3	4
IDIKKI	372	7	50
Devicolam taluk	115	7	88
Udumbanchola ,,	88	8	33
Thodupuzha ,,	114	12	57
Peermade ,,	55	4	37

Among the taluks of the district, Devicolam taluk has more number of institutions per 1 lakh population.

44. The history of Public Health and Medical Institutions in the district is closely associated with the history of the plantation industry. The British-owned companies who managed the tea plantations of the

district established very good dispensaries for the benefit of their employees, and even now they continue to be well-maintained institutions. Almost all the villages in the district have medical facilities of one kind or the other. On an average there are seven medical institutions per hundred sq. km. of area in the district. On a comparison of taluk-wise figures Thodupuzha has the largest number of medical institutions with 12 per every hundred sq. km. followed by Udumbanchola taluk with 10 and Peermade with 7 institutions. Devicolam taluk has only 3 medical institutions per 100 sq. km.

45. The communication facilities in the district are inadequate. There are very few roads in the district of which the most important are Alwaye—Munnar road, Munnar—Udumalpet road, Munnar—Kumali road, Kottayam—Kumali road, Thodupuzha—Idikki—Puliamalai road, Thodupuzha—Palai road and Thodupuzha—Muvattupuzha road. Kumali is also connected with Madurai with a good motorable road. It is worthwhile to point out that the entire Idikki district falls outside the railway map of the State. Even though Periyar traverses through the district for about 100 kilometres, it is not used for navigation as the river passes through gorges and deep valleys. About 15 kilometres below the junction of the Muthirapuzha river with Periyar, at Karimanal, the river becomes suitable for floating of timber. The river is navigable from its mouth up to Malayattur at all seasons and up to Bhcothathankettu at certain

periods. Even though transport facilities are comparatively meagre in the district the postal facilities have gone deep into the interior places of the district. There are 119 Post Offices, 21 Post and Telegraph Offices and 17 Public Call Offices in 1970.

46. For the purpose of land utilization the total area of each village is classified into five broad types namely the 'forest area', 'irrigated land', 'unirrigated land', the 'culturable waste' and 'area not available for cultivation'. Of the total area of the district more than half (51.14 per cent) of the area is under forests. The next highest group is 'area not available for cultivation'. More than half of the area of Thodupuzha, Devicolam and Peermade taluks have forest areas whereas a major portion of Udumbanchola taluk (58 per cent) comes under the type 'unirrigated'. Large tracts of Udumbanchola taluk have been put under the cultivation of cardamom and this has contributed to the high percentage of 'unirrigated' category of land-use.

47. Since the Idikki district was formed after the 1971 Census there was very great difficulty in furnishing all the Census data for the district. However an earnest attempt was made by the Census Organization to collect and furnish all the available information in a compact and useful manner. In addition to the Town Directory, Village Directory and Primary Census Abstracts, some of the Census tables have been incorporated.

ABBREVIATIONS USED IN VILLAGE DIRECTORY

I Educational Facilities

N	Nursery School
P	Primary School
M	Middle School
H	High School
AS	College with Arts and Science only
Comm. Inst.	Commercial Institute includes Type-writing and Shorthand Institutions
O	Others including Craft, Arabic School, Madrassa etc.

II Medical Facilities

Allopathic

H(A)	Allopathic Hospital
PHC	Primary Health Centre
NH	Nursing Home
D(A)	Allopathic Dispensary
FC	Family Planning Centre
MC	Maternity Centre
MCW	Maternity and Child Welfare Centre
FWC	Family Welfare Centre
CWC	Child Welfare Centre

Ayurvedic

H(AY)	Ayurvedic Hospital
D(AY)	Ayurvedic Dispensary

Homeopathic

H(H)	Homeopathic Hospital
D(H)	Homeopathic Dispensary

Veterinary

H(VET)	Veterinary Hospital
D(VET)	Veterinary Dispensary
KVC	Key Village Centre

III Electrification Facilities

E	Electricity
E(D)	Domestic use
E(I)	Industrial use
E(C)	Commercial use
E(S)	Street light
E(O)	Others

IV Drinking Water Facilities

W	Well water
T	Tap water
TK	Tank water
C	Canal water
R	River water
S	Spring water

V Communications

PR	Pucca road
KR	Kutchra road
R	Navigable river

VI Post and Telegraph

PO	Post Office
P&T	Post and Telegraph Office
PCO	Public Call Office.

CENSUS TABLES

NOTE: 1 This table includes area, houses and population of forest areas also.

2 The following abbreviation has been used for the status of a town, viz. NM—Non-municipal.

3 The area figures given in column 3 for the district are provisional. Figures for urban areas are those supplied by the local bodies. Area figures for rural areas are derived by subtracting the urban area figures from the total area of the district. The total area figures of taluks will not tally with the district figures because the former represent 'land use area' and are derived from the figures supplied by the Director of Survey and Land Records. The area figures by natural divisions, viz. Highland, Midland and Lowland, are compiled by the Census Office.

4 The density figures per km² shown under column 4 for urban area of District/Taluk are worked out using the area figure corrected up to 2 places of decimals obtained by adding the area of individual town in the respective unit and not by using the area figures given in the table. For 'total' and 'rural' the density is worked out on area figures corrected up to 1 place of decimal.

A-I AREA, HOUSES AND POPULATION

APPENDIX I

Statement showing 1961 territorial units constituting the present set up of Idikki District
(The units which have not undergone any jurisdictional change have been excluded from this Appendix)

District/Taluk	1961 Territorial units	Area added		Name of district/taluk from which area is subtracted	Area which has been subtracted		Name of district/taluk to which area is added	Net gain/ Loss + (gain) - (Loss) in km ²
		Name	Area in km ²		Name	Area in km ²

* The area figures presented in this table are provisional. Figures for urban area are those supplied by the local bodies. Area figures for rural area are derived by subtracting the urban area from the total area of the district. The total of the area figures of the taluks will not tally with the district figure because the former represents 'land use' area and are derived from the figures supplied by the Director of Survey and Land Records and Tahsildars.
