## INTRODUCTION

The history of District Census Handbooks dates back to 1951 when they were first introduced in almost all the States of India. In the case of Jammu and Kashmir State, however, the handbooks were published for the first time at the 1961 Census. There was no Census in the State in 1951 due to the disturbed conditions prevailing in the wake of Pakistani invasion in 1947-48. The District Census Handbooks of 1961 Census had been designed to present a uniform frame throughout the country and contained exhaustive census and non-census data, supplemented by an appraisal of socio-economic development of the district.

At 1971 Census, however, efforts have been made to further diversify the content and scope of the handbooks. For the first time village and town directory data which give diverse type of basic amenities as available in each village and town of the district was compiled to be incorporated in the handbooks in order to cater to the requirements of various government and semi-government agencies in such methods as adjustment of administrative boundaries; educational planning; man-power planning etc. In order that the data was promptly released soon after its compilation, the District Census Handbooks were divided into the following convenient parts so that atleast parts A & B, which contained the essential data down to village and ward of a town, were released quickly :—

- |        |   |
|--------|---|
| Part A | i) Town Directory, and<br>ii) Village Directory                                   |
| Part B | i) Urban Block and Village-wise Primary Census Abstract                           |
| Part C | i) Analytical Report,<br>ii) Administrative Statistics, and<br>iii) Census tables |

The parts A & B of the District Census Handbooks, the details of which were simultaneously made ready have been clubbed in one volume and have since been published for the districts of the State.

Part C of the volume was originally designed to consist of administrative, welfare and developmental statistics and census tables supplemented by a comprehensive analytical report aimed at bringing

out socio-economic and demographic changes which have in particular come about in the district during 1961-71. As the administrative, welfare and developmental statistics was not uniformly available for all the districts of the State, its inclusion in this volume has been dropped. Also analytical report and testing of various hypotheses have altogether been taken out of the purview of this publication and instead the data has been presented in two parts each preceded by a brief fly-leaf. Set A gives census tables based on 1971 Census and set B tables on village directory data and primary census abstract generated on the computer.

The following definitions on the basis of which census tables have been compiled will prove useful for appreciating the contents of these tables :—

### **Village**

A Census village is ordinarily the same thing as revenue mauza, but in some cases differs therefrom. It may contain one or many groups of houses or hamlets or on the other hand contain no houses at all. The following definition has been adopted at the 1971 Census.

Every village with well defined boundaries for revenue assessment having residential houses densely or sparsely populated was treated as a village irrespective of the number of hamlets of which it was constituted.

### **Town**

The definition of urban as adopted at the 1971 Census, is as follows :—

- a) all places with a Municipality, Corporation or Cantonment or Notified/Town area;
- b) all other places which satisfied the following criteria :—
  - i) a minimum population of 5,000 ;
  - ii) atleast 75 percent of male working population is non-agriculturists ; and
  - iii) a density of population of 400 per Km<sup>2</sup> (i.e. 1,000 per Sq. mile).

### **Census House**

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be inhabited

or vacant. It may be used for a residential or non-residential purpose or both.

### **Household**

A household is defined as the entire group of persons who commonly live together and take their meals from a common mess unless the exigencies of work prevent them from doing so. A household can be either a one person household i,e, a person who makes provision for his own food or other essentials for living without combining with any other person to form part of a multiperson household. It may be a multiperson household i,e, a group of two or more persons who make common provision for food or other essentials for living. They may be related or unrelated persons or a combination of both.

### **Scheduled Castes & Scheduled Tribes**

The definition of Scheduled Castes as laid down in article 49 (1) of the State Constitution is reproduced below :

"Scheduled Castes mean the castes, races or tribes or part of or groups within castes, races or tribes which are for the purposes of Constitution of India, deemed to be Scheduled Castes in relation to the State under the Provision of Article 341 of that Constitution."

There are no Scheduled Tribes in Jammu and Kashmir. So far as Scheduled Caste are concerned the following castes have been deemed to be Scheduled Castes for Jammu and Kashmir according to the Scheduled Castes Order of 1956 issued by the President in pursuance of the provisions of Article 341 of the Constitution of India :—

1. Barwala,
2. Basith,
3. Batwal,
4. Chamar or Ramdasia,
5. Chura,
6. Dhyar,
7. Doom or Mahasha,
8. Gardi,
9. Jolaha,
10. Megh or Kabirpanthi,
11. Ratal,
12. Saryara, and
13. Watal.

### **Literacy & Education**

The test of literacy for the 1971 Census was

satisfied if a person above the age of four could with understanding both read and write.

An educated person is one who has passed a written examination of a recognised educational standard.

### **Worker and Non-worker**

A worker was a person whose main activity was participation in any economically productive work by his physical or mental activity. Work involved not only actual work but effective supervision or direction of work.

- V(a) Household Industry,
- V(b) Manufacturing other than Household Industry,
- VI. Construction,
- VII. Trade & Commerce,
- VIII. Transport, Storage & Communications, and

**SET-B**

**TABLES ON VILLAGE DIRECTORY DATA  
AND  
PRIMARY CENSUS ABSTRACT**

### **Fly-leaf to Set—B tables**

This section covers 10 tables based on village directory data and Primary Census abstract. These tables provide useful information on such items as distribution of village with reference to area ; amenities ; infra-structure ; land use pattern ; selected demographic traits in relation to distance from the nearest town. The tables also highlight information on the average size of villages by distance range from the nearest town ; distribution of villages by size class of population having selected servicing institutions and demographic characteristics ; distribution of villages by number of hamlets and percentage of scheduled caste population ; distribution of villages by proportion of scheduled caste population ; villages by percentage of irrigated area to total cultivated area and density of population per hectare ; and villages by percentage of literacy having and not having telephone with reference to nearest town.
