CENSUS OF INDIA 1971
LIST OF PUBLICATIONS

Central Government Publications—Census of India 1971—Series-5—Gujarat is being published in the following parts :

<i>Part Number</i>	<i>Subject covered</i>
I-A	General Report.
I-B	Detailed Analysis of the Demographic, Social, Cultural and Migration Patterns.
I-C	Subsidiary Tables.
II-A	General Population Tables ('A' Series).
II-B	Economic Tables ('B' Series).
II-C(i)	Distribution of Population, Mother Tongue and Religion, Scheduled Castes & Scheduled Tribes.
II-C(ii)	Other Social & Cultural Tables and Fertility Tables, Tables on Household Composition, Single Year Age, Marital Status, Educational Levels, Scheduled Castes & Scheduled Tribes, etc., Bilingualism.
III	Establishments Report and Tables ('E' Series).
IV-A	Housing Report and Housing Subsidiary Tables.
IV-B	Housing Tables.
V	Special Tables and Ethnographic Notes on Scheduled Castes & Scheduled Tribes.
VI-A	Town Directory.
VI-B	Special Survey Reports on Selected Towns.
VI-C	Survey Reports on Selected Villages.
VII	Special Report on Graduate and Technical Personnel.
VIII-A	Administration Report—Enumeration.
VIII-B	Administration Report—Tabulation.
	} For official use only
IX	Census Atlas.

PREFACE

The District Census Handbooks are being published regularly since 1951. Earlier they were brought out under the name of "Village Handbooks" and contained only the population totals. They are prepared by the Census Organisation on behalf of the State Government and published by the latter. They are the first to be published in the series of 1971 Census publications, which are now to follow. The need for making available to the State Government, the Census data as early as possible after the taking of the count, has been recognised since long. It is a matter of deep satisfaction that the present volume is being published within a year of the taking of the Census.

The data collected during 1971 Census was tabulated initially at three Regional Tabulation Offices at Surat, Rajkot and Bhavnagar for rural areas and one more Tabulation Office at Ahmedabad which dealt with the slips of urban areas only. The data abstracted at the Regional offices was brought to Ahmedabad where it was compiled for the State as a whole and is now being published.

The District Census Handbook contains primary data upto the village level for rural areas and enumerator's block level for urban areas. It is for the first time that in 1971 Census we are giving information about urban areas of the State in a separate part called the "Town Directory". We are also giving comprehensive information about rural areas in the "Village Directory". This is further supplemented by the Alphabetical List of Villages for facility of reference.

It has been decided to bring out the District Census Handbooks of 1971 in three parts as under :—

Part A

- (1) Town Directory
- (2) Village Directory

Part B

- (1) Urban Block and Villagewise Primary Census Abstract

Part C

- (1) Analytical Report
- (2) Administrative Statistics
- (3) Census Tables

It was originally decided that each part would be brought out separately. But since the data for parts A and B has been prepared almost at the same time, it is decided to combine these parts into one volume. Part C which has to await the collection of official statistics from various Departments of the State Government and preparation of Census Tables, would be published separately.

The Town Directory consists of information about the status, growth history and functional category of towns and their physical aspects, location, Municipal finances, civic and other amenities like sewerage, protected water supply, fire fighting service, electrification etc. It also contains information about medical, educational, recreational and cultural facilities available at the towns. Detailed information about trade, commerce, industry and banking is also provided here. The population of the towns according to 1971 Census by religion and Scheduled Caste and Scheduled Tribe is furnished here. The Town Directory is a new feature of 1971 Census and the above information has been compiled in it for the first time.

The Village Directory contains comprehensive information about the amenities available at the village such as educational and medical, supply of electric power, drinking water facility, communication through road, rail, kutcha road, pucca road and bus route, existence of post, telegraph and telephone facilities, etc. Further information about staple food, area under various

uses like forest, cultivable land, source and extent of irrigation, cultivable waste and name of the nearest town and its distance, day on which 'bazar' is being held, if any, and its importance from religious, historical and archaeological point of view is recorded here.

The Primary Census Abstract contains information about the number of occupied residential houses and households, total population including houseless and institutional population, literacy, Scheduled Caste and Scheduled Tribe population and the distribution of working population into nine industrial categories of workers and non-workers.

The Analytical Report in Part C takes note of the social, economic and demographic changes which have occurred in the District during the last ten years. The administrative statistics are obtained from various Departments of the State Government and presented in this part which also incorporates a few of the tables generated from the data derived during 1971 Census.

There are 217 towns in Gujarat and 18,709 villages. Compilation of data for such a large number of units within such a short time was indeed a formidable task. The terms and definitions used in the schedules of the Directories were carefully studied and detailed instructions with explanatory notes, about the manner in which they were to be filled, and the source from which data was to be collected were issued by this Directorate to the Taluka Development Officers. The collection of land use data and tallying of area figures for each administrative unit presented an uphill task. The Settlement Commissioner and Director of Land Records was requested in August 1969 to confirm some of the presumptions and furnish necessary guidelines to this Organisation as to how the various figures required could be culled out from the revenue forms maintained at village level.

The printed forms of Village Directories were sent to the Taluka Development Officers with a request that they should be filled by

the village officials and scrutinised at taluka level by the Statistical Assistant before returning to this office. The Development Commissioner and the Director, Bureau of Economics and Statistics, issued firm instructions to the field staff to ensure that the information was filled and scrutinised with the utmost care. After this information was received in the Census Directorate, it was subjected to a very close and rigorous checking by a cell which was specially created for the purpose. There were a number of points on which further probe became necessary, where the information was found to be incomplete or inconsistent. Our greatest hurdle was the reconciliation of area figures as reported by the village officials and those reported by the District Inspector of Land Records. A series of meetings had to be held at each District Headquarter, where the Deputy Director in charge of the District Census Handbook Unit had to remain present and point out the glaring inconsistencies reported to the Taluka Development Officers and District Inspectors of Land Records. Thanks to the dedicated efforts of all concerned, we were ultimately able to reconcile completely the area figures for each Village, Taluka and District.

It was noticed that there were minor differences in the spellings of village names reported by the Mamlatdar, Taluka Development Officer and District Inspector of Land Records. Similar differences were also noticed in the total number of villages reported by each agency. These discrepancies were reconciled on the basis of the list of villages published by Revenue Department, information obtained from taluka offices and other published sources. Location code number was given to each administrative unit at the time of taking of the Census in order to avoid repetition of their names.

The Census Directorate had obtained village-wise data relating to drinking water facility, primary and secondary school, post, telegraph and telephone, electrification etc., from the concerned Departments. The data reported in the Village Directory was cross-checked with the

official data to make it accurate and upto date. The data so processed was ultimately posted in the Village and Town Directory statements and typed in four copies. The typed data was again compared with the original manuscripts by a special cell handpicked for the purpose. The taluka totals for the area and amenities have been struck for each column. A number of inset tables have been prepared and included in the note to the District Census Handbook, as desired by the Registrar General, India.

The Town Directory statements were likewise scrutinised by a special cell in the Directorate, and the local authorities were asked to reconcile incomplete or inconsistent information wherever necessary. On account of the instructions issued by the Director of Municipalities, these references received immediate attention. The figures reported by the Municipalities have been cross checked with available statistical data.

Maps

No District Census Handbook can be complete unless it is accompanied by District and Taluka maps. We have, therefore, included at the beginning of each volume a District map showing the taluka boundaries, location of towns and large villages with population size 5000 +, communications, water features etc., and an inset map showing the position of the District in the State in hatching. A Taluka map is inserted before the Primary Census Abstract of each taluka, indicating the boundaries of each village and town within the taluka and the location code number of each village. The villages have been shown by dots of various sizes. One key map showing the location of the taluka within the District in hatching, and another key map showing the position of the District in the State have been inserted here. The urban area is hatched in both the District and Taluka maps, and is further represented by a sphere of varying size according to population.

The District and Taluka maps show several particulars by use of an appropriate symbol.

The preparation of District and Taluka maps, containing such varied information was a task of no small magnitude. The District Inspectors of Land Records had considerable difficulty even in preparing the basic maps and authenticating them. The problem was solved by requesting the Settlement Commissioner and Director of Land Records to call the District Inspectors of Land Records personally to the Office of Director of Census Operations and reconcile all the discrepancies pointed out to them and asking them to authenticate the same on the spot as far as possible, after due verification.

ACKNOWLEDGEMENTS

Compilation of such a large mass of data is impossible without the active help and co-operation of State Government. I am deeply indebted to Shri L. R. Dalal, ICS, Chief Secretary to Government of Gujarat, for agreeing to extend whatever help was sought for. I would like to make a special mention of the warm and wholehearted co-operation which was throughout extended by Shri K. V. Bhatt, Deputy Secretary in the General Administration Department, who was looking after the subject of Census. Whether it was a matter of sanction of staff or for supply of typewriters, or for additional funds for printing of the District Census Handbook volumes, it always received his most immediate attention and sanction was never denied or delayed. He showed a deep understanding of the problems of an organisation like ours, which could function in the State effectively only with the full backing of the State Government.

Shri P. B. Buch, Director of the Bureau of Economics and Statistics, Government of Gujarat, placed at my disposal the entire resources at his command for any work connected with Census. Not only he spared me a few of his best officers and men but his valuable guidance in the matter of presentation of data at several places has served us in good stead. He issued instructions to the District Statistical Officers to attend to

the collection and scrutiny of any Census data and its timely submission, as if it wa Bureau's own work. We were always assured that we could fall back upon the resources of the Bureau unreservedly in time of need. But for the wholehearted and most willing cooperation of the Bureau at all levels, the District Census Handbook volumes would not have been what they are today.

I also owe a deep debt of gratitude to Shri U. M. Bhatt, IAS, the then Settlement Commissioner and Director of Land Records for his help in finalising the meanings of terms and definitions used in the Village Directory. It is a matter of deep regret that he is no more with us today. His successor, Shri B. R. Mane Patil, IAS, was equally enthusiastic and helpful and but for the keen interest he took in the finalisation of District and Taluka maps, we would have been placed in serious difficulty.

My sincere and heartfelt thanks are due to the Collectors of the Districts for the wholehearted response I have received from them towards the efficient conduct of Census Operations. The interest and energy evinced by them in organising this vast operation is indeed praiseworthy. Their active participation and involvement in the programme had a far reaching effect on the countless enumerators and supervisors working under them. Their direct interest in the training programme has vastly improved the quality of our returns. The Assistant/Deputy Collectors working under them were made responsible for the urban areas of their jurisdiction. The Mamlatdars and Chief Officers of Municipalities who were appointed as Charge Officers of rural and urban areas respectively bore the real brunt of the work, and displayed great zeal and enthusiasm in shouldering these additional responsibilities. To the Commissioners of Ahmedabad and Surat Corporations I am particularly indebted for providing excellent accommodation for housing the Regional Tabulation Offices. To the Special Charge Officers of Railways, Police, S.R.P., Irrigation Colonies and Forest Department and others I express my

gratitude for the readiness with which they stood by us. Last but not the least, my grateful thanks are due to a large number of young boys and girls, coming from schools and colleges, to work as Sorters, Compiler Checkers and Supervisors, for the hard work they put in under difficult conditions of work. They displayed a very high sense of discipline and duty and enabled us to complete our work, at every stage, according to the deadlines set. I have no doubt the traditions of hard and systematic work they have imbibed will serve them in good stead and they will advance in life. They carry our best wishes with them wherever they go.

The District Development Officers who helped us so much in collection of data at the village level through the Taluka Development Officers and the District Statistical Officers working under them, who arranged for the scrutiny of the Town and Village Directory schedules at the taluka level through the Statistical Assistants, deserve a special mention. Had the basic work not been done by them accurately we would have been faced with a serious problem at the time of compilation. To the Heads of various other Departments, who always responded readily to any request made to them for help, I am also indebted. Limitation of space prevents me from making a separate mention of each one of them.

Shri G. J. Gonsalves, Director of Government Printing and Stationery, Government of Gujarat, who very kindly undertook to arrange the printing of some of the District Census Handbooks at Government presses and others through private presses had always been helpful in solving our difficult problems of printing. I hereby acknowledge the valuable help, guidance and assistance rendered by him in the matter of printing. Thanks are also due to the Manager, Government Photo Litho Press, Ahmedabad, at which all the District and Taluka maps as also the cover page have been printed. The care and patience with which they have attended to this work, has beautified our volumes to no small extent and increased their utility to the reader greatly.

Shri Hashim Ali Sayed, Printing Inspector, whose services were obtained on deputation from the Director, Government Printing and Stationery, rendered exemplary service by looking after the entire printing arrangement. His initiative, drive, and readiness to assume responsibility were a source of great strength to us. Everything he handled, he did perfectly well, and knew his job inside out.

I wish to place on record the valuable contribution made by my colleagues in bringing out this volume. Shri K. F. Patel, Deputy Director of Census Operations (HQ) was looking after this section before a separate staff was sanctioned by the State Government, headed by Shri S. C. Merh, Deputy Director from the Bureau of Economics and Statistics. Even after the creation of this separate cell, there were many occasions on which I had to look to him for help on account of the experience gained by him during 1961 Census. He never objected to the encroachments made on his time and energy, in spite of the fact that they were sometimes substantial. Shri S. C. Merh, Deputy Director of Census Operations (DCHB) put in hard and gruelling hours of work in spite of indifferent health to catch up with the time schedule which was once upset. Shri S. M. Shelke, Research Assistant, from the Bureau working under him, undertook almost the entire burden of Town Directories in addition to other work. Shri S. M. Nayak, Assistant Director of Census Operations, put in an indefatigable effort to ensure accuracy of the data at every stage and successfully coordinated the work throughout. The enthusiasm and energy displayed by Shri C. P. Vyas, Assistant Director of Census Operations, in the matter of preparation of inset tables for District Census Handbook volumes and several other matters connected with it deserve a special mention. The interpretation of the data of the Town and Village Directory is his personal contribution. Shri R.M. Pancholi, Statistical Assistant, prepared the inset tables to be included in the Town and Village Directory. Shri K. M. Patel, Tabulation Officer put in a very strenuous effort for the reconciliation of area figures and final checking of maps.

Kr. Fateh Singh Jasol, IAS, Deputy Director of Census Operations, Urban Tabulation Unit, took upon himself, as a labour of love, the scrutiny of work with regard to the preparation of District and Taluka maps and the selection of different motifs which now decorate different volumes of the District Census Handbook. He involved himself in this work with the ardency and fervour so characteristic of him and greatly relieved me of the anxiety on this account. Shri K. D. Vaishnav, Geographer, and his team of draftsmen have produced excellent District and Taluka maps by working on them again and again to incorporate details which were pointed out or received after the maps were once prepared. Shri N. S. Bhatt, Statistical Assistant, has checked them thoroughly. Shri B. I. Patel, Tabulation Officer, in charge of the Central Tabulation Unit took upon himself the entire responsibility for the scrutiny of Primary Census Abstracts and their typing in record time. He discharged his duties with diligence and a high sense of duty. I had in him a pillar of strength on which I could lean for work demanding precision and exactitude. His capacity to turn out work at optimum efficiency in the face of time schedules rigidly set merits avowal. Shri V. A. Dhagia, Tabulation Officer, proved himself a stalwart by shouldering the burden not only of work entrusted to him, but part of the burden of every section, including the Map Section, and rendered yeoman's service. Both the Central Tabulation Units benefited greatly by the care and attention bestowed on them by Shri K. F. Patel, Deputy Director of Census Operations (HQ), whose trained eye could detect the slightest inaccuracy or inconsistency in compilation or presentation. It was due to this team work that we were able to compile such faultless data with admirable speed, and were the first to send the Primary Census Abstracts of all the Districts of the State in one bunch to the Registrar General's Office at New Delhi. Shri Patel's patience and thorough handling of work has yielded rich dividends to us. I have relied heavily on the expertise, acumen and experience of my colleagues and they have undoubtedly

given their best to the Organisation, for which I am deeply indebted to them.

Limitations of space prevent me from making an individual mention of all those who have contributed to the making of this volume so complete and faultless to all of whom I wish to express my sincere thanks.

Finally, I would like to express my very deep gratitude to Shri A. Chandra Sekhar, IAS,

AHMEDABAD
1st March, 1972.

Registrar General, India and Dr. B. K. Roy Burman, Deputy Registrar General (Social Studies) for the valuable guidance received from them from time to time. The amount of advance thinking and planning done by them on the subject has now resulted in the production of volumes which will be of lasting value and interest to the general reader, research worker, scholar, administrator and academician.

C. C. DOCTOR,
Director of Census Operations,
Gujarat.

PART X-A
TOWN AND VILLAGE
DIRECTORY

TOWN AND VILLAGE DIRECTORY

The Town and Village Directory of the District Census Handbook 1971 differs widely in content and presentation from the corresponding volume of 1961. The earlier volumes mainly contained the Primary Census Abstract for each village for rural area and town/ward/enumerator's block for urban area and was supplemented by some additional information which was collected from (a) village notes specially devised for the purpose and (b) information supplied by Heads of Departments on certain amenities. It was presented in Col. 2 in run on fashion for each village and town followed by the Primary Census Abstract in the remaining columns.

The Town and Village Directory of 1971 Census is presented in Part A of the District Census Handbook. An attempt has been made to interpret the data thrown up in the Town and Village Directories at the beginning under the heading "Introductory Note on Town and Village Directory".

Part B of the District Census Handbook contains purely the Primary Census Abstract.

A number of abbreviations have been used in both the Directories to facilitate presentation. The abbreviations used in each statement of the Town Directory are given below in Statement A. Statement B gives a list of abbreviations used in Village Directory.

STATEMENT A

INTRODUCTORY NOTE ON TOWN AND VILLAGE DIRECTORY

1. History of District Census Handbook

In 1941, the population figures were exhibited according to communities in the "Village Handbooks" published by the erstwhile Government of Bombay. In 1951, the basis of classification of the Census was changed from a social to an economic one and the figures were given in the Primary Census Abstract according to eight Livelihood Classes. The Primary Census Abstract contained the basic information in respect of every village and town. A decision to bring out the District Census Handbooks giving the Primary Census Abstract and important Census tables for every district of the State was taken for the first time in 1951. Census statistics given in the Primary Census Abstract related to the area of the village, number of houses and households, total population, houseless and institutional population, literates and agricultural and non-agricultural classes distributed under eight main Livelihood Classes. These census statistics were further supplemented by the addition of useful administrative information on the availability of amenities in villages and towns on items like post offices, railway stations, the distance of a bazar from the village, primary schools, village panchayats, cooperative societies, etc. This was a unique achievement of the Indian Census. The 1951 series of District Census Handbooks, however, varied in content and size from State to State depending upon the resources offered by the State Governments. It was, therefore, decided during the Census of 1961 that the District Census Handbooks of 1961 Census should contain a certain minimum of statistical data, maps and other useful information to be adopted uniformly throughout the country. Thus the District Census Handbook of 1961 Census differed widely in the matter of content and coverage from that published in the 1951 Census. The District Census Handbooks of 1961 were sub-divided into the following three parts :—

PART I—THE DISTRICT

- (i) Introductory Essay
- (ii) Brief Gazetteer of place names

PART II—STATISTICS

- (i) Census Tables
- (ii) Villagewise list of Industrial Establishments
- (iii) Handicraft Tables
- (iv) Departmental or official Statistics

PART III—VILLAGE DIRECTORY

- (i) Explanatory Note
- (ii) Village Directory
- (iii) Taluka Maps

Besides Census data, the 1961 District Census Handbooks covered villagewise and townwise information on the availability of different types of amenities, such as educational facilities, public health and medical facilities, supply of drinking water, electricity and its uses etc., shown by means of abbreviations placed against the name of each village. Thus, in the 1961 Census an attempt was made to make the District Census Handbooks more informative.

During the 1971 Census, efforts have been made to compile both census and non-census statistics in a uniform manner under an enlarged perspective. The District Census Handbook of 1971 Census has been divided into three sub-parts with a view to making the census and non-census information available to the data users as quickly as possible. Part A of the District Census Handbook contains the Town Directory and Village Directory. Part B contains the Primary Census Abstracts and Part C contains the Introductory Essay, Official Statistics, Census tables, etc. The details of the contents in each of the parts are described in the following paragraphs.

2. Scope of District Census Handbook 1971

The District Census Handbooks are the only publications which incorporate the data down to the village and block level of a town, which are urgently and frequently required by the data users. They are constantly referred to for several purposes by the administrator, planner, policy-maker and academician. The delay in the publication of the District Census Handbooks would reduce the value of these very useful publications.

In order to avoid delay in the publication the District Census Handbooks of 1971 are subdivided into three parts, two of which are combined in one volume, and the third published separately. The details of the contents of each of the parts are as follows :—

Part A : Town and Village Directory

Part A contains the non-census statistics of each village and town. The Town Directory portion furnishes the data for each town in the district in seven statements covering (1) the status of the civic administration and the functional category of towns and the growth of population since 1901; (2) physical aspects and location; (3) civic finances; (4) civic and other amenities; (5) medical, educational, recreational and cultural facilities; (6) trade, industry, commerce and banking facilities and (7) Population by religion.

The Village Directory Section of Part A gives particulars of amenities available for each village in the matter of educational and medical institutions, power supply, drinking water facilities, post and telegraph facilities, communications, particulars of land use, weekly markets and places of religious, historical and archaeological interest in the village.

Part B : Primary Census Abstract

Part B gives for each village and for each block and ward of a town the primary census data incorporating area of the town in square kilometres, and of village in acres and gunthas, the number of occupied residential houses, the number of households, total population and its break up by sex, scheduled caste and scheduled tribe population, literate population and working population by nine broad industrial categories namely (1) cultivators, (2) agricultural labourers, (3) those working in livestock, forestry, fishing, plantations, etc., (4) mining and quarrying, (5) manufacturing, processing, servicing and repairing, (6) in constructions, (7) in trade and commerce, (8) transport, storage, and communications, and (9) in other services and the non-working population.

Part C : Administrative Statistics and Report

Part C would incorporate the administrative

statistics, pertaining to the district in various fields of development. The census tables pertaining to the district regarding mother tongue, religion, migration, etc., will also be reproduced here. A write up indicating the changes in the socio-economic and demographic characteristics of the district in the last decade would also be given.

The non-census data of the village directory and town directory were collected from the local bodies. The village-wise details regarding different types of amenities available at the village, land use data and other information were collected in the village directory form through the Taluka Panchayat offices. These forms were filled by the village officials and were scrutinised by the Statistical Assistants at the Taluka level. The District Statistical Officers supervised the work and carried out percentage scrutiny. The details regarding the number of villages having post and telegraph facilities in the State, those connected with electric power supply, those having all weather and fair weather bus facilities, and those without drinking water facilities etc., were obtained from the concerned departments by the Office of the Director of Census Operations. The information recorded in the village directory forms was cross checked with the data obtained from concerned departments, confirmed, and made up-to-date.

The non-census data for each of the towns were obtained from the municipal authorities in the case of municipal towns and for other towns the data were obtained from the concerned Nagar and Gram Panchayats. The information received from the concerned municipalities and panchayats was scrutinised and cross checked with other published official statistics for a few items wherever it was possible.

THE DANGS

General :

The Dangs District is entirely rural and underdeveloped. There is a complete absence of institutions of local self Government constituted under the Panchayat Act and Panchayati Raj

has not yet been introduced in the District owing to certain socio-economic reasons. Welfare activities are, however, looked after by the District Development Board, the Dangs District Local Board, and the Housing Board. The Dangs Development Council is also in existence to lend greater impetus to development activities in the District.

Notes and explanations on Village Directory :

Being an entirely rural District there is naturally no town in the Dangs. It is a single Taluka District with 311 villages. Village-wise particulars regarding the different types of amenities available and land use data for each of the villages have been incorporated in the Village Directory.

The abbreviations used for explaining the various terms are detailed below :—

Sl.No.	Item	Abbreviation	
4.	Primary School	Pr.S	
	Secondary School	Sec.S	
	College	C	
	Industrial School	IS	
	Training School	Tr.S

(a) Taluka abstract of amenities :

A Talukawise Abstract showing the educational, medical and other amenities available at the villages is given in an Appendix to the Village Directory. It can be seen from the Abstract that 278 villages have primary school facilities. There are thus only 33 villages without primary schools. No village is deserted. The details of villages without a primary school are as follows :—

Sl. No.	Name of Taluka	Number of villages without primary school	Number of deserted villages
1	The Dangs	33	..
	Total	33	..

Only 2 villages have secondary schools and 11 villages have other educational institutions.

It can also be seen from the Abstract that only 5 villages have dispensaries. Only one village has the facility of a hospital and 3 villages have maternity homes. No village has a child welfare centre. 9 villages have primary health centres (including subcentres) and 8 villages have family planning centres. Thus only a limited number of villages in the district have medical facilities.

Only 13 villages are electrified.

Ordinary surface wells are the main source of drinking water facility. Only 2 villages have tap water supply. There are 186 villages which can also obtain drinking water from rivers.

Only 84 villages or 27.01 per cent are connected with Pucca road. 35 villages or 11.35 per cent have post offices, and only 2 villages have post and telegraph offices. Three villages in the District have telephones.

(b) Bus facilities :

The details of villages connected by bus services have been incorporated in the village directory. Bus facility is considered to be available at the village if a bus stop is available within one mile from the village.

In all there are 311 villages in the Dangs district of which only 43 villages which form 13.82 per cent of the total are connected by bus services throughout the year. There are 69 villages or 22.19 per cent of the total number of villages which enjoy this amenity only during fair season. The district being undeveloped and hilly, there are 199 villages (63.99 per cent) which are yet to be connected by bus services even during fair season.

(c) Distribution of villages by area :

The distribution of villages by their area in acres is given in the following table in 8 size groups.

TABLE No. 5

Distribution of the villages by their areas in acres

Sl.No.	Area in Acres	No. of villages
1	2	3
1	50 acres or less	..
2	51 — 100	1 (0.32)
3	101 — 200	4 (1.29)
4	201 — 500	53 (17.04)
5	501 — 1000	120 (38.59)
6	1001 — 2000	78 (25.08)
7	2001 — 5000	46 (14.79)
8	5001 acres and above	9 (2.89)
Total		311 (100.00)

(Figures in brackets indicate percentage.)

It can be seen from the above Table that 38.59 per cent of the villages have an area ranging between 501 to 1000 acres, and 25.08 per cent have an area between 1001 to 2000 acres. It can also be seen that more than 75 per cent i.e. three-fourth of the villages have an area of more than 500 acres. There is no village having an area of less than 51 acres.

(d) Distribution of villages by educational amenities :

Table No. 6 below shows the distribution of villages having educational amenities by distance from the nearest town.

TABLE No. 6

Distribution of villages having educational amenities by distance from the nearest town.

Sl. No.	Distance from the nearest town	Number of villages	Number of villages having				
			Primary school	Middle school	Higher Secondary school	College	Others
1	5 km. or less
2	6 .. 10 km.
3	11 .. 15 km.	1	1(100.00)

7	101 .. 200 km.	12	12(100.00)
8	201 km. and above
Total		311	278(89.39)	..	2(0.64)	..	10(3.22)

(Figures in brackets indicate percentage to total number of villages in each distance groups)

89.39 per cent villages in the District have the facility of a primary school. Only 0.64 per cent villages have secondary schools and 3.22 per cent have other types of educational facilities. All the villages in the distance group of 11 to 15 km, 16 to 25 km. and 101 to 200 km. have primary schools. In the distance group of 26 to 50 km. and 51 to 100 km. this proportion is 87.59 per cent and 88.89 per cent respectively.

(e) Medical facilities

Distribution of medical institutions per 100 sq. km. is given in the following table.

TABLE No. 7

Medical facility per 100 sq. km.

Sl. No.	Name of Taluka	Total area (in sq. km.)	Number of medical institutions of anykind per 100 sq. km.
1	The Dangs	1,708	1.52

The number of medical institutions per 100 sq. km is only 1.52.

(f) Electricity

Only 13 villages have electricity. The distribution of these villages by their distance from the nearest town is as under :—

TABLE No. 8

Distribution of villages with electricity and distance from the nearest town.

Sl. No.	Distance from the nearest town	Total No. of villages	No. of villages with electric power supply
1	2	3	4
1	5 km. or less
2	6 — 10 km.
3	11 — 15 km.	1	..
4	16 — 25 km.	17	2(11.76)
5	26 — 50 km.	137	10(7.39)
6	51 — 100 km.	144	1(0.69)
7	101 — 200 km.	12	..
8	201 km. and above
Total		311	13(4.18)

(Figures in brackets indicate percentage to total number of villages in each distance groups.)

Only 4.18 per cent of the villages are electrified. The proportion of number of villages electrified sharply decreases with the increase in distance from the nearest town.

(g) Communications

The following table gives the distribution of villages having different type of communication facilities by distance from the nearest town.

TABLE No. 9

Distribution of villages with different communication facilities and distance from the nearest town

Number of villages connected by

Sl. No.	Distance from the nearest town	Total No. of villages	Number of villages connected by					
			Pucca Road	Kutchra Road	Pucca road and river	Pucca road and rail	Kutchra road and rail	Others
1	2	3	4	5	6	7	8	9
1	5 km. or less
2	6 — 10 km.
3	11 — 15 km.	1	..	1(100.00)
4	16 — 25 km.	17	7(41.18)	10(58.82)
5	26 — 50 km.	137	40(29.20)	93(67.88)	..	3(2.19)
6	51 — 100 km.	144	34(23.61)	107(74.31)	1(0.69)	..
7	101 — 200 km.	12	..	12(100.00)
8	201 km. and above
Total		311	81(26.05)	223(71.70)	..	3(0.96)	1(0.32)	..

(Figures in brackets indicate percentage to total number of villages in each distance groups.)

Only 26.05 per cent of the villages have the facility of a Pucca Road. 71.70 per cent have only Kutcha roads. Only 0.96 per cent have Pucca road and Rail and only 0.32 per cent have Kutcha road and rail. The proportion of Pucca road sharply decreases with the increase in distance from the nearest town. There is no such trend for other types of communication facilities.

(h) Number of Post offices

The following table gives the distribution of post offices per 100 sq. km.

TABLE No. 10

Number of post offices per 100 sq. km.

Sl. No.	Name of Taluka	Total area in sq. km.	Number of post offices per 100 sq. km.
1	The Dangs	1708	2.05

It can be seen that there are only 2.05 post offices per 100 sq. km. in the District.

(i) Staple food

Rice and Maize constitute the staple food of the District. Details are as under :—

Distribution of villages by staple food

Sl. No.	Name of Taluka	No. of villages reporting staple food				
		Nagli	Jowar	Wheat	Rice	Maize
1	2	3	4	5	6	7
1	The Dangs	296	2	17	281	124

(j) Land use

The following table gives the percentage of average cultivable waste per village to average cultivated land per village by distance from the nearest town. The cultivable waste land includes pastures and grazing land and area under miscellaneous trees and groves but does not include orchards.

TABLE No. 11

Percentage of average cultivable waste per village to average cultivated land per village by distance group from the nearest town

Sl. No.	Distance from the nearest town	No. of villages	Total cultivated land (in acres)	Average cultivated land per village (in acres)	Total cultivable waste (in acres)	Average cultivable waste per village (in acres)	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7	8
1	5 km. or less
2	6 — 10 km.
3	11 — 15 km.	1	483	483.0	13	13.0	2.69
4	16 — 25 km.	17	6276	369.2	282	16.6	4.50
5	26 — 50 km.	137	61391	448.1	4402	32.1	7.16
6	51 — 100 km.	144	68573	476.2	4857	33.7	7.08
7	101 — 200 km.	12	5678	473.2	378	31.5	6.66
8	201 and above
Total		311	142401	457.9	9932	31.9	6.97

It would be seen that the average area of cultivated land per village is 457.9 acres. The average cultivable waste per village is 31.9 acres for the district. The average cultivable waste per village increases with the increase in distance from the nearest town with the exception of the villages in the distance group 101 to 200 km. The percentage

of the average cultivable waste per village to average cultivable land per village is 6.97 for the district. It is a minimum of 2.69 for the villages in the distance group 11 to 15 km. and a maximum of 7.16 for the villages in the distance group 26 to 50 km.

Note :-

The figures in the last line indicate Taluka totals. The figures in brackets in this line under Col. 4 indicate the number of primary, secondary and other schools. The figures in brackets under Cols. 5 to 9 indicate the number of villages having those particular amenities.

The area figures shown in Col. 3 may not tally with the total of Cols. 11 to 15 in some cases due to rounding.

PART X-B
VILLAGE AND TOWNWISE
PRIMARY CENSUS
ABSTRACT

PRIMARY CENSUS ABSTRACT

Primary Census Abstract of 1971 Census provides information in respect of each village in rural area and town/ward/enumerator's block in urban area. It gives information about the area of the village in acres and towns in square kilometres, number of occupied residential houses and households, total population with sex break-up (including Houseless and Institutional Population) and population of Scheduled Castes and Scheduled Tribes, literate and educated persons. The entire population of each village/urban enumerator's block is divided into nine industrial categories of workers and non-workers as under :—

- I Cultivators
- II Agricultural Labourers
- III Livestock, Forestry, Fishing, Hunting & Plantations, Orchards & Allied Activities
- IV Mining and Quarrying
- V Manufacturing, Processing, Servicing and Repairs
 - (a) Household Industry
 - (b) Other than Household Industry
- VI Construction
- VII Trade and Commerce
- VIII Transport, Storage and Communications
- IX Other Services
- X Non-workers

The sexwise break-up of total workers (industrial category I to IX) have been presented, in addition to similar break-up for each industrial category of Worker and Non-worker.

The following abbreviations have been used in the Primary Census Abstract for facility of presentation :—

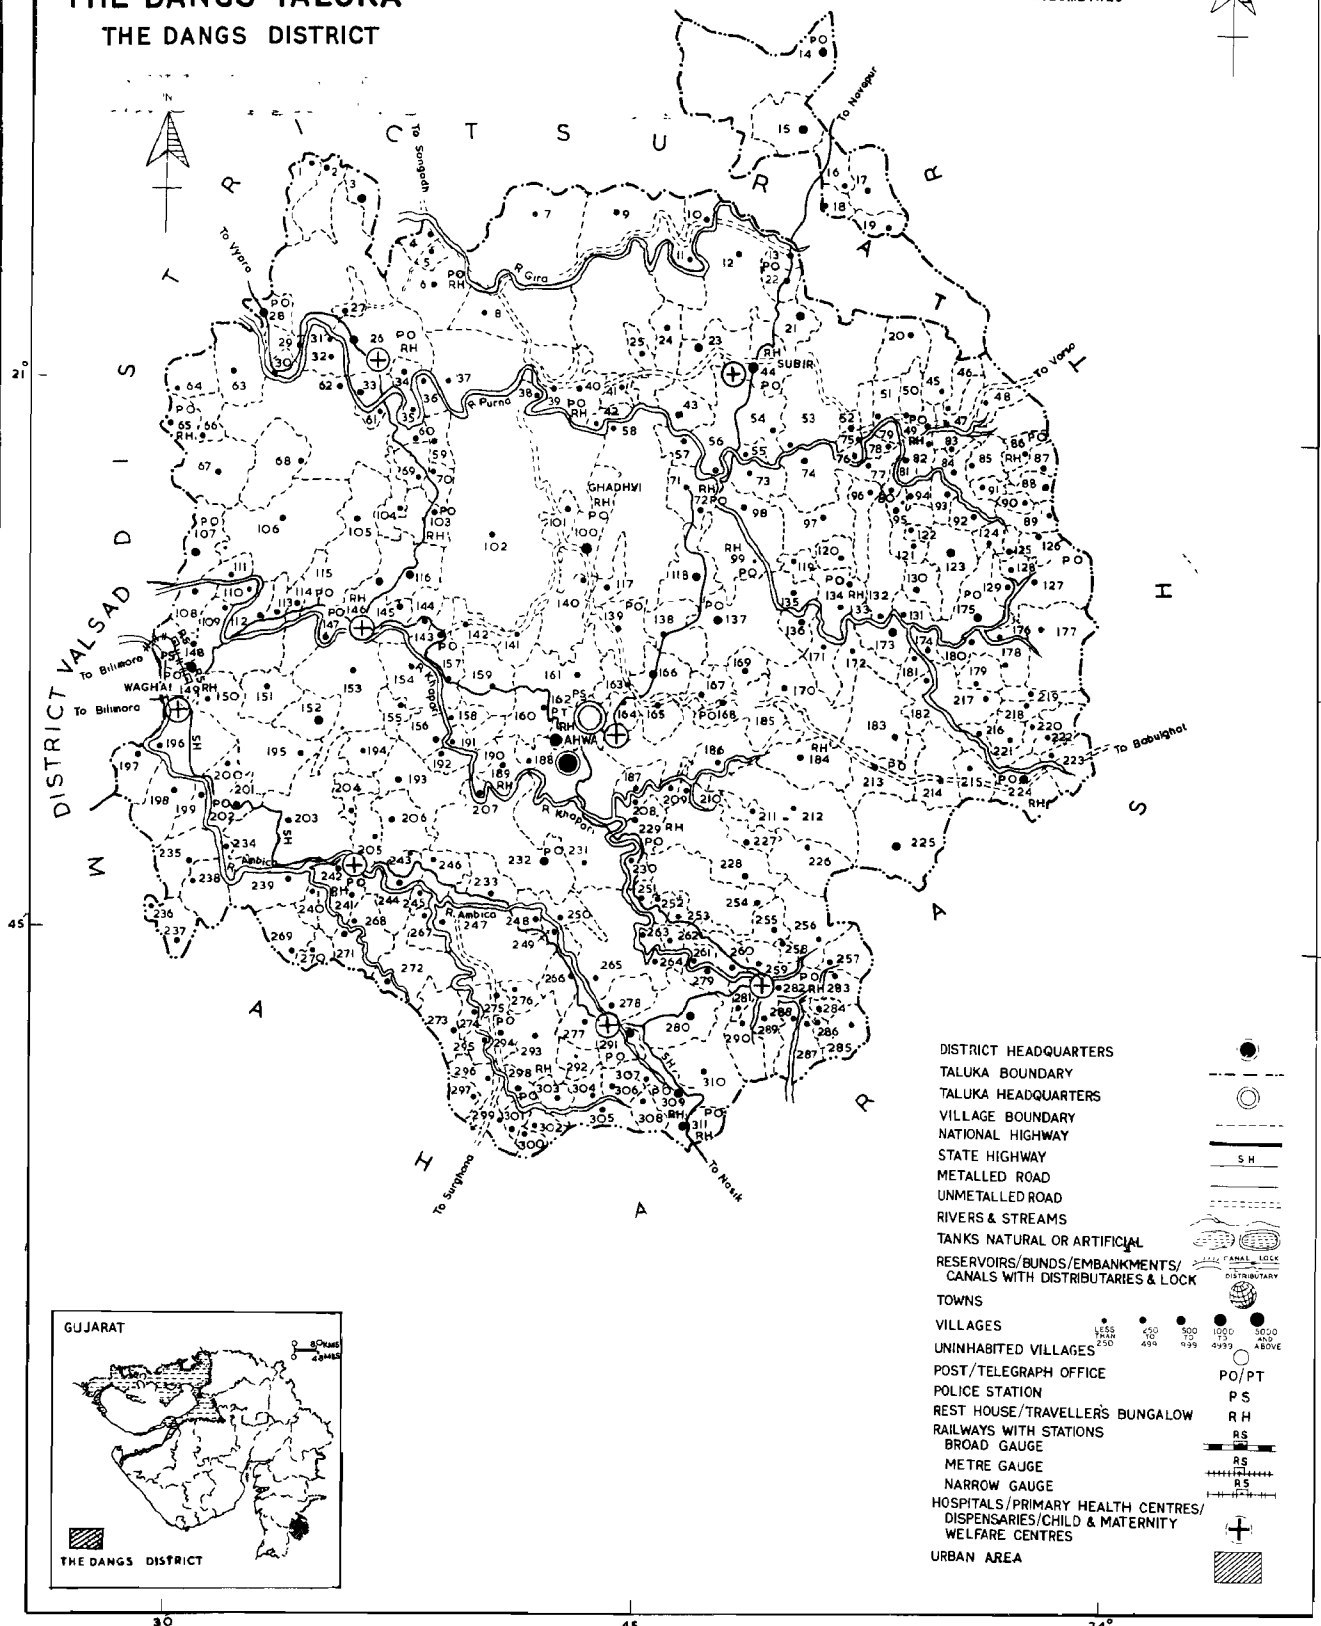

1 Municipal Corporation	MC
2 Municipality	M
3 Non-Municipal Area	NM
4 Nagar Panchayat	NP
5 Village Panchayat	VP
6 Cantonment	Cantt.
7 Not Available	NA
8 Outgrowth	OG

The following conversion factor has been used for converting acres into Km.²

$$\text{Acres} \times 0.004047 = \text{Km.}^2$$
