I N T R O D U C T I O N

In pursuance of Government policy there was limited enumeration and tabulation of castes in 1951 census. Even in the case of Scheduled Castes, Scheduled Tribes and Backward Classes, the figures of each caste were not separately extracted; only the group totals were ascertained. The Backward Classes Commission require the figures of population of each individual caste. In order to assist them, an estimate of population of each caste in 1951 has been made on the basis of the figures of the previous censuses.

2. In the case of Rajasthan, however, the figures of population of individual castes in 1951 were separately sorted for all castes at the initiative of the State Government. Of these, the figures of Scheduled Castes and Scheduled Tribes are reproduced in this brochure.

3. The figures have been presented in three tables viz. (i) Scheduled Castes, Hindus only, (ii) Scheduled Tribes, and (iii) Other Castes, Hindus and Muslims separately. The figures of the first two tables are reproduced from the figures specially sorted at the 1951 census, as explained in paragraph 2 above. In the case of

Other Castes, the 1951 census figures could not be reproduced. The reason is that the figures of these castes have been sorted only by districts and no state totals have been struck. In the census slip the castes have been returned by many synonymous names and in many cases sub-castes and not the caste have been returned. Unless a rationalised list of castes with their synonyms and sub-castes is prepared no state totals of castes can be given. There was not enough time for this process. The figures of Other Castes in table III have, therefore, been estimated for 1951 on the basis of the figures of previous censuses ^{by} applying the growth rate of general population.

4. No caste-wise figures are available for the 1941 census. The tables of 1941 census give figures for only a few selected castes and these also for a few selected districts.

5. Extracts from the previous census reports explaining the causes for variation in the figures of individual castes have been given in an Appendix.

=====

T A B L E I
SCHEDULED CASTES.

The figures given in this table relate to territory of Rajasthan as in 1951.

2. The table presents the figures of 44 castes (as specified in the President's Order of 1950) determined at the 1951 census. The population of each caste given in this table refers only to the population of Hindus.

TABLE I.

POPULATION OF SCHEDULED CASTES (NOTIFIED UNDER PRESIDENT'S ORDER 1950), IN THE CENSUSES OF 1911 - 1931 and 1951.

T A B L E III.

O T H E R C A S T E S

This table presents figures for 485 castes. The list has been prepared with reference to the caste tables given in 1911, 1921 and 1931 census \angle after eliminating the castes given in Tables I & II. Out of these 485 castes 285 are included under Hindus and 200 under Muslims.

2. Column 5 of this table gives the estimated population in 1951. The estimates have been made by applying the percentage increase of general population of the State to the latest available census population of each caste. The total estimated population in 1951 of these castes shows a \angle ^{decrease} over the 1951 census total of these Castes. On account of wide variation in the two totals no attempt has been made to adjust the estimated population figures.

3. Although the figures of castes were sorted by districts in Rajasthan for 1951 census they have not been reproduced here, for reasons given in para 3 of the Introduction.

Notes :-

- * Figures are not available.
- (a) Indicates the actual 1951 figures.
- (b) In 1911 and 1921 figures for Mirasi are included in Dholi whereas in 1931 and 1951 the figures for Mirasi have been shown separately.

The total estimated population of Other Castes (Hindus and Muslims) both) in 1951 according to above tables came to 13,002,247 while the enumerated population of these castes in 1951 is 13,459,936. As there is wide variation in the two totals no attempt has been made to adjust the estimated figures.

APPENDIX

EXTRACTS FROM THE PREVIOUS CENSUS
REPORTS OF RAJPUTANA AGENCY FOR
CENSUSES 1911, 1921 AND 1931.

RAJASTHAN.

'A'

SCHEDULED TRIBES :-

Bhils :- In Rajputana the increase shown by them this time amounts to more than one fifth as much as their population in 1911 and is due to their being by nature very prolific as also to their more accurate enumeration.

1921 Census Report Page 219.

'B'

OTHER CASTES :-

Fakirs :- The variation is very excessive in this group which can be due to nothing but to change of caste names by the enumerated.

1921 Census Report Page 220.

Grassias:- The causes for such a large excess in their population this time are the same as those for Bhils.

1921 Census Report - Page 219.

Jats:- The increase of 17.9 per cent in Jats is due to recent Sikh immigration to the northern parts of Bikaner.

1931 Census Report Page 127.

Meghwals and Bambhis :- There is a big drop among Meghwals this time, and a rise among Bambhis. This is partly due to the vagaries of classification and partly to natural growth. For instance, as many as 42,150 Meghwals were registered in Marwar in 1911 but none this time, while Balais have increased there by 10,985. This shows that Meghwals have also returned themselves as Balais or Chamars.

1921 Census Report - Page 220.

Prohits and Brahmans :- Prohits are Brahmans and so are the Dakots, but both of them are treated as separate castes for

census purposes. In the last census, some of the states included these two among Brahmans and the rest tabulated them separately, but this time they have been classified separately everywhere. This explains the loss in Brahmans and gain in Prohits.

1921 Census Report - Pages 219-220.

Pathans and Sheikhs:- Pathans and Sheikhs show an increase of 25.0 and 44.9 per cent respectively since 1921, owing to the absorption of minor Muslim occupational castes.

1931 Census Report - Page 127.

Rajputs:- Rajputs have increased by only 7.6 per cent during the decade but at every census there is ^a difficulty of excluding those who more properly belong to the caste of Daroga.

1931 Census Report - Page 127.

The largest decrease among Rajputs is found in Bikaner - 38 per cent - which has been explained by the Local Census Superintendent as follows :-

Owing to famine, and the scarcity of water, rain and fodder many of the

Rajputs have gone to the neighbouring Districts with their cattle and were absent from the state on the 18th March 1921".

1921 Census Report - Page 218.

Sindhi and Rawat :- The only castes which gave variations of 20 percent and over are Sindhi (+43.6) and Rawat (+33.1). The increase among Sindhis is mainly found in Marwar, due to immigration and natural causes and that among Rawats due apparently to a number of Mers having got themselves registered in this caste.

1921 Census Report-Page 218.
