## P R E F A C E

The Standard Urban Area is a new concept developed during 1971 Census and replaces the "Town-group" concept of 1961. The intention behind developing the new concept was to provide comparable data for the next two or three successive Censuses so as to yield a meaningful picture in the light of which urbanisation around large urban nuclei could be properly studied.

According to the Tabulation Plan as originally contemplated the data relating to the Standard Urban Areas were to be included in Part II-A-General Population Tables. But later it was decided that it should be published separately, as a Supplement to Part II-A, and contain the maps of all the Standard Urban Areas along with Table A-V and its appendix.

The maps of the Standard Urban Areas were originally prepared by the Consulting Surveyor to Government of Gujarat and furnished to the Town and Country Planning Organisation, Government of India. As the maps were prepared well ahead of 1971 Census, they did not depict the latest changes which had occurred in municipal boundaries. All the Standard Urban Area maps were, therefore, prepared afresh in the office of the Director of Census Operations and the municipal boundaries as they obtained at the 1971 Census have been correctly shown therein.

The maps also show, besides the core town, the contiguous areas of both the rural as well as urban administrative units. The decision about what should constitute such areas was taken jointly by the State and Central Governments and the Registrar General's office. These areas have close mutual sociological link and the entire area is likely to be fully urbanised in two or three decades.

AHMADABAD:  
10th July, 1973.

This Supplement includes the maps of 20 Standard Urban Areas which have been very carefully drawn by our Map Section headed by Shri K. D. Vaishnav, Geographer. It also includes Table A-V and its Appendix which were prepared by the Central Tabulation Unit under the guidance of Shri B. I. Patel, Tabulation Officer. I am grateful to both Sarvashri Vaishnav and Patel and the staff working under them, who have so assiduously completed the maps and the tables.

I have to express a deep debt of gratitude to Shri A. Chandra Sekhar, Registrar General, and Census Commissioner, India and Dr. B. K. Roy Burman, Deputy Registrar General (Social Studies) for the valuable guidance received from them from time to time.

I am grateful to Shri S. R. Sethi, Manager, Government of India Press, Nasik for the expeditious printing of this publication. Many thanks are also due to Shri Arvind Mahendle, Manager, Government Photo Litho Press, Ahmadabad, and the Assistant Manager, Shri P. K. Dey for printing the maps with due care and concern.

The Supplement has been brought out, specially with a view to make available, as early as possible, the data on the Standard Urban Areas for the urban development programmes of the State Government and for research and study by scholars in the field. I hope the publication will fulfill this purpose.

C. C. DOCTOR,  
*Director of Census Operations,  
Gujarat.*

## STANDARD URBAN AREAS INTRODUCTORY NOTE

'Standard Urban Areas' is a new concept that has been developed for the 1971 Census for the tabulation of certain urban data. Its intention is to provide comparable data for a definite area of urbanisation continuously for three decades which would give a meaningful picture. It replaces the concept of town-group that was in vogue at the 1961 Census.

### Background

While preparing Master Plans for selected cities and towns, difficulties were experienced in assembling census data for the urbanisable areas around towns and cities in our country. Many times the census primary data were not readily available to throw light on problems concerning population composition as well as working force. It had, therefore, become difficult to assemble it for the urbanisable area as a whole. The 1961 Census had used the concept of town-groups and provided data for these town-groups in the Census Volumes. This, however, was not so useful as the town-groups did not include contiguous rural areas around the city/town and they could not be conceived in terms of potentially urbanisable areas. No doubt the town-groups indicated closely linked urban areas in terms of economic activity and growth. However, as the town-group concept was not adopted uniformly all over the country and as it did not also envisage a contiguous tract of land, the concept proved somewhat inadequate for the purpose for which it was evolved. Therefore, the census organisation had been considering how best to modify this concept for the purpose of 1971 Census. The International Geographical Congress Conference held in 1969 at Delhi also laid stress on the need for clarifying the idea of town-group and to evolve a concept which will ensure comparability over space and time.

As a result of the discussions held between the Registrar General of India, the Town and Country Planning Organisation and other interested organisations, it was decided that the town-group concept be replaced by the concept of 'Standard Urban Area'.

### Definition

The Standard Urban Area may be defined as the projected growth area of a city or town as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. Such a tract will include all extra-municipal urban growth such as the suburbs (industrial and residential), railway colonies, civil lines and cantonments and also such of those villages and towns which are likely to be urbanised by 1991. The Standard Urban Areas will thus be an area which will extend beyond the main city or town and would contain all likely developments over the next

20 years upto 1991. Thus it will remain as a statistical reporting unit during the next 3 successive censuses, irrespective of the changes in the boundaries of the local administrative units within the tract. The Standard Urban Area is identified by the administrative units that it encompasses namely, city, town or village. The boundaries of the Standard Urban Areas are the administrative boundaries of the peripheral units.

### Essentials

The Standard Urban Areas are proposed to be delimited only for towns whose population is likely to be 50,000 or more by 1971.

Standard Urban Areas will include all areas which have any or all the following characteristics :

- (a) Predominant urban land use ;
- (b) Intensive inter-action with the urban centres as reflected in commutation for the purposes of work and secondary education facilities; extension of city bus service; sale of commodities like milk, dairy products, vegetables (other than those transported by rail or truck-haul) and purchase of food-grains, cloth and general provisions, etc., by the consumers directly.
- (c) Anticipated urban growth as a result of locational decisions relating to industry, market, transport and communication, administrative and servicing functions.
- (d) Existence of big villages with a large proportion of working force engaged in non-agricultural industrial categories.

The work relating to the demarcation of the Standard Urban Areas for 1971 Census was jointly undertaken by the Town and Country Planning Departments in the States, the offices of the State Directors of Census, the Central Town & Country Planning Organisation, New Delhi and the office of the Registrar General of India, New Delhi.

### Finalisation of Standard Urban Areas of the State

The State Town & Country Planning Departments were required, in the first instance, with the assistance of the State Census Directors to formulate tentative proposals showing (1) the urbanisable limits of the principal city and (2) the villages and towns on the periphery of the main city which are to be included in the 'Standard Urban Area'. This information is to be shown on a map which shows the administrative areas included in each 'Standard Urban Areas' and a list of these administrative areas had to be prepared. In order that the criteria adopted is uniform and all the impor-

tant information is collected and recorded, a proforma was prepared for the use of the State Town Planning Department. This proforma was filled for each of the 'Standard Urban Areas' that has been indentified, by the Consulting Surveyor to Government of Gujarat.

To ensure uniformity of approach in the use of the criteria and consistency in definition, the officers of the Town & Country Planning Organisation and of the office of the Registrar General of India held discussions as soon as the tentative proposals were ready with the State Officials before finalising the scheme. These discussions were arranged at the State Headquarters to facilitate closer acquaintance with the data.

Accordingly the Registrar General, India accompanied by Shri C. S. Chandra Sekhar from the Town and Country Planning Organisation of the Government of India visited Gujarat during the month of August 1969 when a meeting was held with the Consulting Surveyor to Government of Gujarat. After due deliberations 14 Standard Urban Areas were delineated. This list was extended to 20 on further consideration.

#### **Reference to Statistics**

The data in respect of 20 Standard Urban Areas have been compiled and given in Table A-V and its appendix. Table A-V gives particulars such as civic

status, area in Km.<sup>2</sup> population per Km.<sup>2</sup> number of occupied residential houses, houseless population, institutional population, total population and population during 1951-1971 in respect of the Standard Urban Areas and their component units.

Appendix to Table A-V gives Primary Census Abstract data for Standard Urban Areas and their component units. It gives area, occupied residential houses number of households, total population, population of Scheduled Castes and Scheduled Tribes, literate and educated persons and population according to nine industrial categories of workers and non-workers by sex.

#### **Maps of Standard Urban Areas**

Maps showing the boundaries of Standard Urban Areas, names of urban and rural components, National and State highways, railways etc., are prepared by this organisation on the basis of the maps prepared by the Consulting Surveyor to Government and given in this volume. This will add to the utility of the publication.

A short note on each Standard Urban Area with a summary showing the area and population for total, rural and urban components of the Standard Urban Areas and the growth rate during 1961-71 is given hereafter.

## SHORT NOTE ON EACH OF THE STANDARD URBAN AREAS

### Jamnagar

Jamnagar is a district headquarter town. It was a Class I city in 1961 with service as its main economic function followed by moderate industry and low trade and transport. It is linked by rail, road, air and sea with other cities of India. It is a big commercial centre being the largest grain market of Saurashtra region. It is classified as Class I city during 1971 Census with industry-cum-service as its functional category.

The rate of growth of population of Jamnagar Standard Urban Area during the last decade (1961-71) is 43.28 per cent.

The city has tended to grow along the Jamnagar-Rajkot Highway to the east and along the Jamnagar-Khambhalia road to the west. The developments to the north and south are comparatively insignificant. The river Rangmati to the east is a barrier for contiguous development. Among the important developments envisaged in the city are the growth of industries, the development of a new port and the conversion of the metre gauge railway into a broad gauge.

### Dhoraji

It was a Class III town in 1961 with service as its main economic function followed by moderate trade and transport and low industry. It is classified as Class II town in 1971 with service-cum-primary activities-cum-commerce, as its functional category.

The rate of growth of population of Dhoraji Standard Urban Area during the last decade (1961-71) is 23.53 per cent.

The town has tended to grow to the west (along the highway to Upleta) and east (along the highway to Jetpur). Developments to the south-east and north are comparatively insignificant.

Among the important developments likely to influence the future growth of the town are the proposed location of a sugar factory, the establishment of higher educational institutions and expansion of commercial activities.

### Gondal

Gondal is a mandi town. It was a Class III town in 1961 with service as its main economic function followed by moderate trade and transport and low industry. It is a Class II town in 1971 with service-cum-commerce-cum-industry, as its functional category.

The rate of growth of population of Gondal Standard Urban Area during the last decade (1961-71) is 22.77 per cent.

The town has tended to grow to the south and west along the highways leading to Rajkot and Jetpur respectively. The river Gondali flows to the east of the old town.

The only developments likely to occur in the next few years are the growth of higher educational institutions and expansion of commercial activities in the town.

### Morvi

It was a Class II town in 1961 with service as its main economic function followed by moderate industry and low trade and transport functions. It is also Class II town in 1971 with industry-cum-service as its functional category.

The rate of growth of population of Morvi Standard Urban Area during the last decade (1961-71) is 25.00 per cent.

The town has tended to grow towards the west (along Morvi-Rajkot Highway) and south (towards Lilapur). There is little development towards north and east. The River Machhu flows to the east of the old town. Among the important developments that might influence the growth of the town are the growth of Mangalore tiles factories, ginning and pressing factories and engineering industries, growth of educational institutions and the proposed conversion of the metre gauge railway into broad gauge.

### Rajkot

Rajkot is the administrative headquarter of the district of the same name. It was a Class I city in 1961 with service as its main economic function followed by moderate industry and low trade and transport. It is also a Class I city in 1971 with industry-cum-service as its functional category.

It is very well connected by rail and road to all important towns in the State. Besides a number of State and Central Government Offices, the Prototype Production-cum-Training Centre, (A Central Government Undertaking), the Small Industries Service Institute and the Government Polytechnic are also located here. It is an important industrial centre producing machinery spare parts, hand-pumps, barbed wire, machine tools, diesel engines, wall-clocks, electric accessories, plastic articles, etc.

The rate of growth of population of Rajkot Standard Urban Area during the last decade (1961-71) is 55.07 per cent.

The city has tended to grow towards the south-west and the south. The Saurashtra University campus is located at a distance of about four miles from this city.

Some steel rolling mills and oil extraction plants are located to the south of the town. The Lalpari tank and the Randarda tank towards the east and the Thorala tank and Aji dam to the south-west are the important physical constraints to the development of this city along the respective directions.

#### **Surendranagar**

Surendranagar was a Class III town in 1961 with trade and transport as its main economic function followed by moderate industry and low service. The Standard Urban Area consists of two towns viz. Surendranagar and Wadhwan. It is a Class II town in 1971 with industry-cum-service-cum-commerce as its functional category. The town is the largest business centre of the district and has several manufacturing establishments related to small engineering works.

The rate of growth of population of Surendranagar Standard Urban Area during the last decade (1961-71) is 28.55 per cent.

The development potential of the town has increased with the opening of the Viramgam-Halvad broad gauge railway line. The town shows a tendency to grow along the western, eastern and northern directions. Among the major developments likely to influence the growth of the town are the growth of industries like oil mills, oil extraction plants, ginning and pressing factories and the growth of higher educational institutions.

#### **Bhavnagar**

Bhavnagar is the administrative headquarters of the district of the same name and is a port on the western coast. It was a Class I city in 1961 with manufacturing as its main economic function followed by moderate service and low trade and transport functions. It is an important commercial centre for cotton, silk, and timber. It is well connected by rail and road to all important towns of Gujarat and other important towns such as Bombay, Delhi, etc. Manufacture of salt is an important industry within the Standard Urban Area boundary. It is Class I city in 1971 with industry-cum-service as its functional category.

The rate of growth of population of Bhavnagar Standard Urban Area during the last decade (1961-71) is 26.58 per cent.

The town has mostly tended to grow to the west along the Bhavnagar-Rajkot Highway and to the east along the Bhavnagar-Mahuva State Highway. Among the large scale developments which are likely to have substantial impact on the growth of the town are (i) the development of chemical and mineral based industries, (ii) the development of metal-based and timber industries, (iii) the establishment of a machine tool factory, (iv) the development of a new all weather port with automatic lock gates, (v) the extension of the existing air port and (vi) the construction of the proposed Bhavnagar-Tarapur broad gauge railway line.

#### **Junagadh**

Junagadh is the administrative headquarters town of the district of the same name. It was a Class II town in 1961 with service as its main economic function followed by moderate trade and transport and low industry. It is also Class II town in 1971 with service as its functional category.

The rate of growth of population of Junagadh Standard Urban Area during the last decade (1961-71) is 28.97 per cent.

The town has tended to grow towards the north (along the State Highway to Rajkot) and west (along the State Highway to Veraval). Developments are restricted to the east because of the presence of Girnar hills and to the south because of Gir forest.

The main large scale activities anticipated in the town are (a) the growth of chemical and mineral industries, (b) the establishment of a Government industrial estate and (c) the development of Agricultural University, and (d) Establishment of oil mills and oil extraction plants.

#### **Patan-Veraval**

Patan-Veraval is a port town. It was a Class II town in 1961 with service as its main economic function followed by moderate trade and transport and low industry. The town has a rayon factory. It is also a Class II town in 1971 with industry-cum-commerce-cum-service as functional category.

The rate of growth of population of Patan-Veraval Standard Urban Area during the last decade (1961-71) is 24.22 per cent.

Patan-Veraval town has tended to grow to the west (along the Junagadh-Veraval State Highway) and east (along Veraval-Una State Highway) in a linear pattern. The development towards the north is of lesser significance.

Among the major developments which might influence the growth of the town are the development of Veraval Port into a good fishing port, and the growth of industries based on fishery development, and oil mills and oil extraction plants.

#### **Porbandar**

Porbandar is a port town. It was a Class III town in 1961, with manufacturing as its main economic function followed by moderate service and low trade and transport function. It is also Class II town in 1971 with industry-cum-service as its functional category.

The rate of growth of population of Porbandar Standard Urban Area during the last decade (1961-71) is 35.01 per cent.

The town has tended to grow along the coastal highway and the railway track towards the east.

Among the major developments anticipated during the next few years which are likely to have an impact

on the growth of the town are the development of Porbandar port as an all weather port, the growth of the paints and chemical industries, and developments in cement and soda ash industries and quarrying and mining and establishment of industrial estates.

### **Bhuj**

Bhuj was a Class III town in 1961 with service as its main economic function followed by moderate trade and transport and low industry. It is a Class II town with service as its functional category.

The rate of growth of population of Bhuj Standard Urban Area during the last decade (1961-71) is 32.16 per cent.

The town has tended to grow towards south and south-west along the Bhuj-Mundra State Highway. The development to the east is comparatively less significant due to forest and hilly areas. Among the anticipated major developments which are likely to influence the growth of the town are the construction of the Wankaner-Morvi-Kandla National Highway, the extraction of bauxite and aluminium and other minerals occurring near the town and the development of industries based on them.

### **Patan**

Patan is a commercial and educational centre. It was a Class II town in 1961 with manufacturing as its main economic function followed by moderate service and low trade and transport functions. It is the retail trade centre for the entire Patan Taluka. It is also a Class II town in 1971 with industry-cum-commerce-cum-service as its functional category.

The rate of growth of population of Patan Standard Urban Area during the last decade (1961-71) is 25.09 per cent.

The town is developing towards the east since an industrial zone is proposed to be developed in that area. The river Saraswati to the north and the low-lying lands and burial ground to the west restrict the growth of town in these directions. The town can grow without any hindrance in the southern direction.

The Gujarat Industrial Development Corporation has already set up an industrial estate in Patan. The industries department has also proposed to reserve some government lands in Hansapar village for industrial development purposes.

### **Ahmadabad**

Ahmadabad was a Class I city in 1961 with manufacturing as its main economic function followed by moderate trade and transport and low service functions. It is Class I city in 1971 with industry as its functional category.

The rate of growth of the Ahmadabad Standard Urban Area during the last decade (1961-71) is 42.90 per cent.

Urban development is fast taking place along the railway lines, and the National and State Highways

radiating from the city with the result that the fringe towns and villages like Sahijpur, Bogha, Naroda, Sarkhej, Odhav, Narol, Kali, Ranip etc., located along the transportation routes are growing rapidly and have virtually become part of the socio-economic life of the city.

Among the numerous developments which are likely to have a substantial impact on the further growth of the city may be mentioned the following :

- (i) The construction of the new capital Gandhinagar, which is only 15 miles from Ahmadabad city.
- (ii) The setting up of industrial estates at Naroda, Odhav and Vatwa by the Gujarat Industrial Development Corporation.
- (iii) The construction of a road parallel to the railway line connecting the city with Mehmedabad and Nadiad, and
- (iv) The electrification of the broad gauge railway from Sabarmati to Bombay.

### **Anand**

Anand is the taluka headquarter. It was a Class III town in 1961 with service as its main economic function followed by moderate trade and transport and low industry. The town is noted for its dairy industries. It is an industrial-cum-commercial centre and a Railway Junction on the Bombay-Baroda-Ahmadabad line. It is a trading centre for tobacco and food grains. It is a Class II town in 1971 with service-cum-commerce-cum-industry as its functional category.

The rate of growth of population of Anand Standard Urban Area during the last decade (1961-71) is 42.62 per cent.

Most of the development activities have taken place along the railway line and the arterial roads.

Among the anticipated major developments which are likely to influence the growth of the town are the location of an industrial estate, the expansion of dairy industries and the proposed electrification of the broad gauge railway track.

### **Cambay**

Cambay is a commercial and industrial centre. It was a Class II town in 1961 with manufacturing as its main economic function followed by moderate service and low trade and transport functions. It is a retail trade and educational centre. It is class II town in 1971 with industry as its functional category. It is a centre of trade of precious stones, used both in jewellery and in industries. Recent findings of natural gas in this area have been changing the face of this town which is now an important centre of O.N.G.C.

The rate of growth of population of Cambay Standard Urban Area during the last decade (1961-71) is 23.41 per cent.

The town is developing along the Cambay-Ahmadabad and Cambay-Petlad roads and the Cambay-Petlad-Anand railway line.

An industrial estate has already been established in the town.

#### **Dohad**

Dohad town is located on the Bombay-Delhi broad gauge line and is the headquarters of Dohad Taluka. It was a Class III town in 1961 with trade and transport as its main economic function followed by moderate service and low industry. It is a marketing centre for local products like food-grains, (especially gram) and castor oil, animal products, vegetables and forest produce. There is a railway workshop in this town. It is a Class II town in 1971 with commerce-cum-primary activities-cum-service.

The rate of growth of population of Dohad Standard Urban Area during 1961-71 is 22.03 per cent.

Most of the development activities have taken place along the railway lines, and the arterial roads.

#### **Vadodara**

Vadodara is the administrative headquarters of the district of the same name. It was a Class I city in 1961 with manufacturing as its main economic function followed by moderate service and low trade and transport functions. It is a University town as well as an industrial centre noted for its chemical industries, cotton mills and engineering industries. It is well connected by National Highway and broad gauge railway lines with Ahmadabad, Bombay and Delhi. It is Class I city in 1971 with industry-cum-service as its functional category.

The rate of growth of population of Vadodara Standard Urban Area during the last decade (1961-71) is 43.81 per cent.

Development activities are taking place mainly along the railway lines and National and State Highways with the result that villages like Chhani, Bajva, Ranoli, Makarpura, Bhayli, etc. located along the transportation routes are growing rapidly and have become part of the socio-economic life of the city.

Among the other developments which might influence the growth of the city are (i) establishment of a fertilizer factory, a refinery, and a petro-chemical complex, (ii) the electrification of the broad gauge railway from Sabarmati to Virar via Vadodara, (iii) the industrial estate at Nandesari and Makarpura, and (iv) expansion of pharmaceutical and glass industries.

#### **Bharuch**

Bharuch is the administrative headquarters town of the district of the same name. It was a Class II town in 1961 with service as its main economic function followed by moderate industry and low trade and transport. It is the largest town and a very important industrial-cum-commercial centre in the district. It is well connected by rail and road to important centres like Ahmadabad, Vadodara, Surat, Anklesvar, etc. It is Class II town in 1971 with industry-cum-service-cum-commerce as its functional category. It is an important centre for cotton with a number of ginning and pressing factories.

The rate of the growth of population of Bharuch Standard Urban Area during the last decade (1961-71) is 26.40 per cent.

Development activities are taking place to the north and north-east of the town along the railway line and the National and State Highways and also along the river bank to the south. The river Narmada flows along the southern boundary of the town.

Among the large-scale projects which might influence the growth of the town are the electrification of the broad gauge railway track and the multipurpose development of the Narmada river valley. The construction of a road bridge on the Narmada river would influence the pattern and direction of growth of the town. The town has a great potential for development as a minor port.

#### **Surat**

Surat is administrative headquarters of the district of the same name. It was a Class I city in 1961 with manufacturing as its main economic function followed by moderate service and low trade and transport function. It is an important centre of stone cutting industry, manufacture of textiles from synthetic fibre, rayons and nylons and jari-weaving. This city is well connected by a broad gauge railway line and National and State Highways. A number of small and large scale industries are located in and around the town. It is also an important market town. It is also a Class I city in 1971 with industry as its functional category. It is an important centre of trade for orchard products like bananas, mangoes, etc., and other agricultural products.

The rate of growth of population of Surat Standard Urban Areas during the last decade (1961-71) is 44.47 per cent.

The city has grown in all directions. Industrial developments are taking place to the south of the city between the Surat-Navsari State Highway and the broad gauge railway line from Ahmadabad to Bombay towards the Bhestan, Udhana, Bhadvad and Katargam.

#### **Navsari**

Navsari was a Class II town in 1961 with manufacturing as its main economic function followed by moderate service and low trade and transport functions. It is also Class II town in 1971 with industry as its functional category.

The rate of growth of population of Navsari Standard Urban Area during the last decade (1961-71) is 26.86 per cent.

Most of the developments have taken place along the Surat-Navsari and Navsari-Gandevi State Highways and the broad gauge railway line. The growth of the town to the north is handicapped by water logging problems caused by the Purna river. Favourable natural conditions for developments exist to the south-east of the town, i.e., along the Surat-Valsad State Highway.
