PREFACE

After the 1951 Census, figures for villages and towns were published in the District Census Hand books. The population of each village and town was exhibited under eight broad livelihood classes. Other data relating to mother-tongue, religion, civil condition, etc. were not sorted and tabulated by villages and towns but by larger units called Tracts, which consisted generally of the rural or urban areas of several talukas. Indeed, in the State Reports, the District was the smallest unit for which figures were exhibited. The result of this was that figures of mother-tongue were not available according to villages.

In 1954 the Government of India decided to obtain language data according to villages for all multi-lingual talukas in India by means of a special sorting of the 1951 census slips. The Government of Bombay agreed to share the cost of this operation for Bombay State equally with the Central Government, and a temporary office was organised in Bombay City to handle the operations. I was appointed Superintendent of Census Operations for Bombay State in addition to my normal work as Collector of Bombay, and the services of Shri K. F. Patel, who had been in charge of the Tabulation Office set up at Baroda after the 1951 Census, were made available for appointment as Deputy Superintendent in charge of the linguistic sorting office at Bombay.

After the termination of the 1951 Census Sorting Operation, the census enumeration slips had been arranged not according to villages but according to livelihood classes and tracts. The present linguistic sorting operation involved the detailed sorting by villages and mother-tongues of approximately 40 lakhs of slips pertaining to 31 multi-lingual talukas, but to obtain these 40 lakhs of slips 50 lakhs of slips had to be sorted. These slips were obtained from the Collectors of Baroda, Ahmednagar and Belgaum, in whose charge the census slips were placed at the conclusion of the 1951 census sorting and tabulation at these centres.

The work of linguistic sorting was handled by six supervisors and thirty sorters, who worked for a period of four months. Thereafter the services of supervisors, typists and calculating machine operators were required for approximately three months more to prepare the data for publication. The coloured maps which accompany this booklet were prepared under the supervision of Shri B. W. Khadilkar, Manager of the Photozincographic Press, Poona, with the assistance of the staff of the Settlement Commissioner and the Director of Land Records, Poona. As far as possible the separate boundaries of each village have been shown; but in the case of unsurveyed areas this was not possible and such villages have been indicated by dots. The boundaries of the villages and towns may not be exactly to scale; but they will serve adequately enough to indicate the location of the villages. The maps are self-explanatory. Colours representing mother-tongues have been applied to areas where the speakers constituted an absolute majority i.e., exceeded 50 per cent. of the population.

Every village or town was assigned a Location Code number at the 1951 census; and these Location Code numbers were written on all the census slips. In general, the instructions in regard to the Location Code numbers were fully understood and followed in 1951, though inevitably cases did occur where enumerators had omitted to write the Location Code numbers and this caused trouble at the time of the linguistic sorting. However, reference to the National Registers and comparison of the hand writing on the slips enabled most of the puzzles to be solved. Where the enumerators had failed to indicate the mother-tongue—and such cases were not numerous—the slips are now shown in the category of 'Unspecified'.

In this booklet, the absolute figures of population arrived at as a result of the resorting of the slips have been shown. In some cases these figures differ slightly from the figures given in the District Census Hand books. Wherever the difference has been other than slight, attention to the fact has been drawn in a footnote. According to the District Census Hand books the population of the areas dealt with in this

Hand-book was 1,375,891. According to the present linguistic sorting operation, the population was 1,373,221, a difference of —0.19 per cent. Inevitably as a result of packing, transporting, unpacking and resorting slips some slips do get misplaced or destroyed; but the proportion of such cases is so minute as not to affect the authenticity of the linguistic pattern that emerges from the present resorting operation.

The linguistic data after the 1951 Census were extracted according to Tracts. At the present linguistic sorting the areas sorted usually did not coincide with these Tracts. It is not possible therefore, to compare the percentages of persons speaking different languages that emerged from the 1951 and 1955 sorting for languages. In the case of Belgaum District, however, the areas sorted did coincide with the 1951 Tracts. The two sets of figures can, therefore, be compared. The satisfactory nature of the sorting done for Tracts in 1951 and now for individual villages and towns will be obvious from the following results :—

BELGAUM DISTRICT.

Percentages to total population of the mother-tongue speakers of :—

		Kannada.	Marathi.	Others.	Unspecified.
According to 1951 Census	...	64.3	26.6	9.1	...
According to present sorting	...	63.8	26.4	9.7	0.1
Difference	...	—0.5	—0.2	+0.6	+0.1

The resorting of the data for Sholapur City has disclosed a rather disquieting discrepancy between the results of the 1951 and 1955 sorting for mother-tongue data. In the table below the break up of the population according to the percentages tabulated as speaking specified mother-tongues is shown :—

SHOLAPUR CITY.

Percentage speaking as mother-tongue.

		Marathi.	Kannada.	Telugu.	Urdu.	Other languages.	Unspecified.
1951	...	47.1	14.8	17.5	14.3	6.3	...
1955	...	38.9	12.8	23.9	17.2	6.9	0.3
Difference	...	—8.2	—2.0	+6.4	+2.9	+0.6	+0.3

The cause of the error in 1951 is not known. The 1955 figures have been checked and re-checked and may be taken to be authentic.

I should like to express my thanks to the staff of sorters and supervisors who worked with great devotion at a task that required accuracy and unflagging attention. The fact that the cost of the linguistic sorting operation, exclusive of the cost of publication of the data, has been kept as low as Rs. 22,462-6-6 or Rs. 5-9-9 per 1,000 slips is largely due to the good work of the sorters. Shri K. F. Patel, the Deputy Superintendent, deserves great credit for the way in which he handled the sorters, many of whom had never had a job before, maintaining discipline with tact and sympathy and getting their willing best out of the hard-working teams of sorters.

I should also like to thank Shri B. W. Khadilkar, Manager, Photozincographic Press, Poona, Shri S. A. Sapre, Assistant Director, Government Printing and Stationery, Bombay, Shri J. W. D'Souza, Manager, and Shri S. R. Desai, Assistant Manager, Government Central Press, Bombay, for their valuable advice and co-operation in the production of these booklets.

Lastly I should like to express my gratitude to Shri Rajeshwari Prasad, I.A.S., Deputy Registrar General, India, who visited Bombay and inspected the work in progress, and whose sound advice and guidance was made available throughout the course of the linguistic sorting operation.

J. B. BOWMAN,
Superintendent of Census Operations,
Bombay State, Bombay.

Bombay, 17th September 1955.
