**CENSUS 1981**  
**BACKGROUND NOTE**

## BACKGROUND NOTE

The 1981 Census of India, which is the twelfth of the decennial census series of India and the fourth since Independence, was conducted from 9th February to 5th March, 1981. The reference date for the 1981 Census was the sunrise of 1st March, 1981. The actual enumeration was spread over the period from 9th February to 28th February, 1981 with a revisional round from 1st March to 5th March, 1981, in order to bring the census count correct upto the reference date.

The first Census on an all-India basis was taken in 1872. Ever since it has been held regularly every tenth year in the country. For the State of Haryana, which came into existence on the 1st of November, 1966, this is the second Census.

Census seeks to create an inventory of the country's manpower and demographic characteristics at a given point of time. In keeping with the tradition of Indian Census this opportunity is taken to collect information on most of the aspects of a person's life, including his age, sex, religion, mother tongue, marital status, educational attainments and economic condition. Even though Census is taken once in ten years, it is a part of a continuing statistical system and the data, it provides, is of basic importance. Considerable forethought and planning therefore necessarily goes into the preparation of questionnaires and schedules for canvassing. The following schedules were prescribed by the Registrar General, India this time :—

- (i) Houselist
- (ii) Enterprise List
- (iii) Individual Slip
- (iv) Household Schedule

The first two schedules were canvassed in Haryana during April, 1980 as part of the Housenumbering and Houselisting Operations in advance of the actual Enumeration.

At the 1971 Census, an Establishment Schedule was canvassed along with the Houselist form. Besides the manufacturing establishments, it also covered the trade and other establishments. In 1977, the Central Statistical Organisation conducted an Economic Census which sought to collect information almost similar to what was obtained through the Establishment Schedule of the 1971 Census. The next Economic Census, normally due in 1982 i.e. after a 5 year interval, was integrated with the Census Operations or more specifically, with the Houselisting Operations. Accordingly, the Enterprise List as devised by the Central Statistical Organisation was also canvassed along with the Housenumbering and Houselisting Operations in place of the Establishment Schedule of 1971 Census.

The other noteworthy aspects of the 1981 Census questionnaires are the adoption of sampling for the first time during the Enumeration with particular regard to fertility and migration data, the generation of a household schedule (which will provide a socio-economic profile of each household in the country including the characteristics of the housing units) and the expansion of coverage through economic questions so as to acquire data on secondary and marginal workers adequately. A question was included on whether a person was "seeking or available for work" which it is hoped would provide valuable data to those concerned with policies of employment planning.

Further, it is for the first time after 1931 that an attempt has been made to gather data regarding certain categories of the hand'capped, namely, the totally blind, the totally dumb and the totally crippled.

Indian Census has been rightly described as one of the most massive administrative operations in the world. For the success of this gigantic operation, the Census Organisation has to stretch all resources of manpower and skill to their maximum. The time honoured practice of utilising the State and Local Government machinery for Census work was followed this time also to complete this tremendous task. A team of honorary workers had to be built up. This was done in consultation with the State Government. The Deputy Commissioner of each District was appointed as Principal Census Officer. He was assisted by his General Assistant who was designated as District Census Officer. The Sub-Divisional Officers (Civil) were also appointed as Sub-Divisional Census Officers. Next below were the Charge Officers, the Tehsildar for the rural areas of a Tahsil and the Administrator of the Municipality in the urban areas. For the Faridabad Complex, Panchkula Urban, Estate and Ambala Cantonment, the Chief Administrator, the Estate Officer and the Cantonment Executive Officer respectively were nominated as Charge Officers.

In addition to the statutory Urban areas, four places, namely, Babiyal, Samalkha, Gurgaon (R) and Jharsa are being treated as Census Towns. For Samalkha, the Block Development and Panchayat Officer was designated as Charge Officer while Babiyal and Gurgaon (R) and Jharsa were placed under the Charge of Tahsildars Ambala and Gurgaon, respectively.

The District Statistical Officers were designated as Additional District Census Officers and the Assistant District Statistical Officers as Additional Charge Officers in the Charge allotted to them for assisting the respective Charge Officers. Likewise, the Executive Officers and/or the Secretaries of the Municipalities and the Naib Tahsildars were also nominated as Additional/Deputy Charge Officers for their respective areas.

Lastly came the Supervisors and the Enumerators who had to work in the field for actually canvassing the various Schedules. The selection and appointment of Enumerators and Supervisors was left to the District Officers. In the state of Haryana as many as 19,687 Enumerators and 3,859 Supervisors were put on actual field duty for the Enumeration Operation. Besides, 4,303 Enumerators and 1,045 Supervisors were kept in reserve to meet any eventuality.

All the above appointments were made under the Census Act of 1948, which provides the necessary legal support for conducting the Census. The Census law makes it obligatory on every person appointed to perform Census duties to carry them out diligently. On such appointment he is clothed with the authority of a public servant and an obligation is cast on every citizen to answer his questions truthfully. The law also guarantees that the information collected would be kept confidential, being inadmissible as evidence even in a court of law unless a person is being proceeded against for transgressing any of the provisions of this Act itself.

The amount of organisation and effort that has gone into the Operation will be evident when it is realised that the data collected by thousands of Enumerators throughout the State were compiled, provisional population figures struck for each charge and consolidated for each district within four days of the completion of Census Enumeration on 5th March, 1981. The figures started rolling into this office almost immediately and the last return arrived on 9th March, 1981 which is by any standards really creditable.

This booklet, Paper 1 of 1981, presents a brief analysis of the provisional population figures for the State of Haryana and its districts, and cities/urban agglomerations so as to make them available for immediate use. The size, distribution, growth rate, sex ratio and literacy rates of the population have been discussed briefly. In a supplement to this Paper to be brought out shortly, data on work participation rate and urbanisation are proposed to be presented on the basis of provisional figures.

The Census Schedules for Haryana State will be processed in detail in the Regional Tabulation Offices set up in Ambala Sadar and Kurukshetra where the Primary Census Abstracts will be compiled down to the village level in case of rural areas and the Enumeration Block level in the case of urban areas. The provisional data now presented through this paper is subject to confirmation after the detailed processing of the Census Schedules for which an elaborate Tabulation Plan has been drawn up.

Since the last Census of 1971 there were many changes in the boundaries of some of the existing districts and some new districts have also been formed. The new districts are Kurukshetra, Sonapat, Faridabad, Bhiwani and Sirsa. Thus, in 1981 there are 12 districts as against 7 in 1971. The figures presented in this paper for the districts are as per their boundaries as on 31st December, 1979. Changes in their boundaries, if any, made thereafter could not be taken into account for Census purposes for obvious reasons. Accordingly, there were 39 tahsils in the State on 31st December, 1979. In the supplement to this Paper, it is proposed to give some basic population figures for these 39 tahsils as per their boundaries as on 31st December, 1979 and for all the 81 cities/towns including the four Census towns mentioned earlier.

## ACKNOWLEDGEMENTS

In the present arrangement of Census work the Operation could not have been a success without the active help and co-operation of the State Government at each level of administration and every stage of the work. It is, therefore, my pleasant duty to express my deep sense of gratitude to the Haryana State Government, particularly to Shri Ishwar Chander, the Chief Secretary and his predecessor Shri S.D. Bhambri as well as Shri P. P. Caprihan, Financial Commissioner (Revenue) and Shri L. C. Gupta who held this office earlier. I am also grateful to Shri V. P. Dhir, Joint Secretary (Revenue) and Shri Balbir Singh, Deputy Secretary (Revenue) who were always prompt in providing whatever help we needed.

The Director of Public Instruction, the Director of Public Relations and the Economic & Statistical Advisor, Haryana, also readily responded to our needs. So did the other State Government Departments whenever occasion demanded it. I would like to express my appreciation for their co-operation.

I must thank all the Deputy Commissioners for according personal attention to Census work and ensuring the fullest co-operation from the officers in the field. The General Assistants to the Deputy Commissioners, the Sub-Divisional Officers (Civil), the Charge Officers and the Additional/Deputy Charge Officers, both in rural and urban areas, also deserve my thanks for the keen interest they took and the efficiency they displayed in completing the Operation according to the appointed time-schedule. So do the District Statistical Officers and the Assistant District Statistical Officers who showed notable enthusiasm and devotion to duty at all stages of the Census Operations.

And it gives me much satisfaction to extend my grateful thanks to all the Enumerators and Supervisors who mainly bore the brunt of the Enumeration work and did it almost gratis and in a truly patriotic spirit of serving a national cause.

In my own Organisation, my thanks are due to Sarvashri R. K. Puri, R. K. Aggarwal, S. L. Bahi, Deputy Directors and Sarvashri J. R. Vashistha, Assistant Director, G. D. Singla, now Assistant Director (D. P.) Chandigarh Union Territory, Shri J. N. Suri, Investigator and Shri P. N. Modgil, Tabulation Officer. I must also appreciate the co-operation given by the other members of my office team who put in their best efforts in the smooth and successful completion of the Census Operations and sometimes had to work round the clock.

Finally, I must record my deepest sense of gratitude to Shri P. Padmanabha, the Registrar General and Census Commissioner, India for his constant support and guidance which served as a source of inspiration to us. I must also thank Shri V. P. Pandey, Deputy Registrar General, India and our other colleagues in the office of the Registrar General, India for their prompt assistance and active co-operation from time to time.

**ANALYSIS  
OF  
RESULTS**

## ANALYSIS OF RESULTS

The figures presented in this paper give some basic particulars of the population of Haryana State as on 1st March, 1981. These figures, however, are only the crude totals compiled from the Abstracts furnished by the thousands of Census Enumerators themselves immediately after the completion of the Revisional Round of Enumeration on 5th March, 1981. As such, they are bound to have their own limitations and are thus purely provisional, and could be confirmed only after the Census Schedules are fully processed in the Regional Tabulation Offices.

After the final Tabulation, apart from providing the primary census data down to every village and Enumerator's block in the case of a town, a series of other tables will be prepared to present the demographic, social and economic characteristics of the population. Meanwhile the provisional population figures are presented in this paper in order to make available to the Government and the people the provisional results of the 1981-Census as quickly as possible after the Enumeration.

The statement at page 3 contains a comparative picture of the population of the various States and Union Territories in the country and also gives the number of literates in each State and Union Territory.

This is followed by four Tables, first three of which present basic Census data for the State of Haryana and its districts while the fourth Table gives the population and some other information for the cities and urban agglomerations with a population of 100,000 and above.

Table 1 appearing at page 31 shows the distribution of population, sex ratio, growth rate and density of population for the State and districts. The total population of Haryana (provisional) recorded at the 1981-Census as at the sunrise of 1st March, 1981 was 12,850,902 comprising of 6,846,153 males and 6,004,749 females. The districts of Haryana can be arranged in the order of population-size as follows :—

Rank in 1981	District	Population 1981	Percentage to total population of the State
✓ 1	Hisar	1,491,490	11.61
✓ 2	Ambala	1,400,133	10.90
3	Rohtak	1,326,343	10.32
✓ 4	Karnal	1,317,823	10.25
5	Kurukshetra	1,123,545	8.74
6	Faridabad	996,814	7.76
7	Mahendragarh	949,745	7.39
✓ 8	Jind	935,292	7.28
9	Bhiwani	916,744	7.13
10	Sonapat	843,968	6.57
11	Gurgaon	840,817	6.54
12	Sirsa	708,188	5.51

The pie chart at page 7 gives a comparative picture of the relative population-size of the districts. It will be seen that Hisar District has the largest population with 1,491,490 persons while Sirsa District is the smallest with only 708,188 persons.

A comparison in terms of density of population, however, places Faridabad at the top with the figure of 464 persons per Sq. Km. Sirsa has the lowest figure of 166 per Sq. Km. closely followed by Bhiwani with 180 per Sq. Km.

Sex ratio for the State as a whole is 877 females per 1,000 males and in seven districts it varies between 857 and 879. In the remaining four districts, it is higher than the State average, the highest being in Mahendragarh (947). Faridabad district, however, has the lowest sex ratio of 814 females per 1,000 males.

The overall decennial growth rate for the State during 1971-81 is 28.04 per cent as against 32.23 per cent and 33.79 per cent respectively during the last two decades 1961-71 and 1951-61. The growth rate during 1971-81 has thus registered a slight fall.

Table 2 shows the decadal variation in population for the State and districts since 1901. Faridabad district has shown the highest increase of 39.31 per cent, while Rohtak district on the other hand has recorded a decennial growth rate of 20.74 per cent only.

Table 3 gives the comparative literacy rates in Haryana which according to the 1981-Census is 35.84 per cent as against 26.89 per cent at the 1971-Census. Literacy rate among males has increased from 37.29 per cent in 1971 to 47.78 per cent in 1981, while in the case of females it has shown an increase from 14.89 per cent in 1971 to 22.23 per cent in 1981.

Ambala district boasts of the highest literacy rate of 44.21 per cent closely followed by Rohtak district with 42.03 per cent and Sonapat district with 40.64 per cent. As in the 1971 Census Jind district has still the lowest literacy rate both among males with 37.83 per cent and females with 12.19 per cent.

In table 4 are given the population, sex ratio and the literacy rate as returned at the 1981-Census for the cities and urban agglomerations with a population of one lakh and above. There are eleven cities/urban agglomerations in Haryana, which have returned a population of over 100,000. Of these 11 cities/urban agglomerations, seven towns, namely, Faridabad Complex, Rohtak, Panipat, Karnal, Sonapat, Ambala and Bhiwani qualify to be described as 'cities' according to census terminology as they have a population of over one lakh each. Each of the remaining four units called urban agglomerations (U.A) either comprises of more than one town or of a core town and some urban outgrowths falling outside its municipal limits, as per details given below :—

Urban Agglomeration	Constituent towns or urban outgrowths
1. Yamunanagar (U.A.)	1. Yamunanagar (M.C.) 2. Jagadhri (M.C.) 3. Jagadhri Workshop Railway Colony (M.C.)
2. Hisar (U.A.)	1. Hisar (M.C.) 2. Haryana Agriculture University 3. Mini Secretariate
3. Ambala (U.A.)	1. Ambala Sad ar (M.C.) 2. Ambala Cantt (C.B.)
4. Gurgaon (U.A.)	1. Gurgaon (M.C.) 2. Gurgaon Census Town

**PROVISIONAL  
POPULATION TABLES**

TABLE—1

## Distribution of Population, Sex Ratio, Growth Rate and Density of Population by Districts

State/District	Population-1981		Sex Ratio (females per 1000 males)		Density of population per sq. km.		Decennial Growth rate of population		
	Persons	Males	Females	1971	1981	1971	1981	1961—71	1971—81
1	2	3	4	5	6	7	8	9	10
Haryana	12,850,902	6,846,153	6,004,749	867	877	227	291	+32.23	+28.04
1. Ambala	1,400,133	745,212	654,921	859	879	287	365	+24.00	+27.47
2. Kurukshetra	1,123,545	602,871	520,674	854	864	231	300	+37.11	+30.21
3. Karnal	1,317,823	709,054	608,769	855	859	266	354	+29.77	+33.32
4. Jind	935,292	503,558	431,734	858	857	231	283	+36.42	+22.33
5. Sonapat	843,968	451,556	392,412	865	869	311	383	+23.94	+22.85
