## HARYANA

Supplement to Paper I of 1971

### **PROVISIONAL POPULATION TOTALS**

I. E. N. CHAUHAN  
*of the Indian Administrative Service*  
*Director of Census Operations, Haryana*

D.O.No.228-A/PS-Govr-71

हरियाणा राजभवन  
चण्डीगढ़  
HARYANA RAJ BHAWAN  
CHANDIGARH

April 19, 1971.

My dear Chauhan,

I am very glad to receive paper 1 of 1971- Provisional Population Totals- for the State of Haryana. I am gratified to see that the first results of the Census have been made available so soon after the completion of the Census Operation in the State. The 1971 Census is the first Census for the State of Haryana since its creation and as such, it has an added significance for our State. I am pleased to see that the work has been completed successfully and without any untoward incident anywhere. I can well understand how much hard labour was put in and what organisational details had to be worked out.

The Haryana Government will no doubt find the data thrown up by the Census extremely valuable in formulating its plans. I hope that the final data will also be made available as early as possible, so that they might be of assistance in the future development of the State.

With all good wishes,

Yours sincerely,

(B.N.Chakravarty)

Shri I.E.N.Chauhan, I.A.S.,  
Director of Census Operations,  
Haryana, Chandigarh.

## PREFACE

It was just a few days ago, when close on the heels of the Census Operations, we presented in Paper-I of 1971 certain basic particulars about the population of the State of Haryana as recorded at the 1971 Census conducted from 10th to 31st March, 1971, the reference moment being the sunrise of the 1st of April, 1971. It was our endeavour then to inform the public at large about the first results of the Census immediately on the completion of the process of Census-taking.

2. Paper-I of 1971 Census gave the total population of the State, its ranking among the other States of India with respect to population, the break-up of the State population sex-wise, growth rate of population and the density thereof, the state of literacy etc. The data was presented district-wise as well.

3. Since the release of Paper-I of 1971, it has become possible for us to compile information about certain other characteristics of the population of the State. In the present brochure we seek to supplement the information already made available by presenting five more Tables (four tables have already been presented in Paper-I of 1971) as under :—

Table-V—Rural and Urban composition of population.

Table-VI—Towns arranged according to the size of population.

Table-VII—Distribution of population by workers and non-workers.

Table-VIII—Distribution of working population by agricultural and other workers.

Table-IX—Population of Tahsils and Towns.

4. A brief analysis of data has also been attempted for the benefit of users. This supplement is the final instalment of the provisional information which could possibly be provided at this stage. It is our hope that the basic data provided so far would go at least some way towards satisfying the needs of both the public at large and the scholars—for the latter it may serve as food for thought and stimulate further probing and analysis. The Census Organisation would be in a position to provide further informa-

tion only after the sorting of the Individual Slips.—a laborious and time consuming process—has been completed by the close of the year.

5. The Census is a gigantic operation involving the whole mass of population of the country and a huge army of functionaries who are expected to work on an almost honorary basis. It is a test of their sense of patriotism and national duty. In the small State of Haryana alone as many as 21,000 Enumerators and Supervisors drafted from the various State/Central Government offices and private institutions had to work in the field to collect door to door varied information about each individual. Apart from its magnitude the work of Census is a highly intricate one and a thorough training of the Census functionaries all along the line is a basic pre-requisite. The understanding on the part of the field agency, particularly the Enumerators and Supervisors, of the various concepts involved is most essential if we are to achieve any degree of accuracy and authenticity in the data.

6. The State of Haryana came into existence on the 1st of November, 1966 and for the Haryana State as such, therefore, it was the first Census. It is gratifying to note that the Census in this State was a complete success, thanks to the co-operation extended by the public and the devotion to duty exhibited by the huge army of Enumerators and Supervisors in particular and the District machinery in general. The former, in fact, are the unsung heroes of the saga of Census. The State of Haryana may well take pride in having participated in the Centenary Census of India.

7. It is my pleasant duty to express my deep sense of gratitude to Shri B. N. Chakravarty, Governor of Haryana, for inaugurating the State Level Training Conference at Ambala before the start of the House-Listing Operations. His keen interest served as a stimulus to all concerned. I am particularly grateful to Shri Bansi Lal, Chief Minister, Haryana, for the keen interest he took in the Census Operations, and the facilities afforded by his Government. Ch. Khurshid Ahmad as Minister for Local Government and Education also gave of his best. Shri Saroop Krishen, ICS., Chief Secretary to Government Haryana and Shri B. L. Ahuja, I.A.S., Commissioner and Secretary to Government Haryana,

Local Government and Education Departments, gave unstinted co-operation at all stages from start to finish. In view of the fact that almost the entire Census Organisation is constituted of borrowed staff, the Operation could not have been a success without the help of the State Government. In the field, the Deputy Commissioners (District Census Officers), the Additional District Census Officers and the Charge Officers both in rural and urban areas also richly deserve our thanks for the efficient way in which they conducted the work in the field so as to ensure its completion on schedule.

8. My thanks are also due to Sarvshri N. K. Tandon, J. S. Dhamija, and Lalit Kumar Gupta Deputy Directors and Sarvshri G. D. Singla, J. R.

Vashishtha, K. B. Lakhnupal and J. N. Suri, Tabulation Officers and other staff of my office, particularly, Shri S. S. Sharma, Office Superintendent. They showed remarkable enthusiasm and devotion to duty without which these operations could not have concluded so successfully or smoothly.

9. Finally, there was the constant support and guidance which we received from our Registrar General, India, Shri A. Chandra Sekhar and his deputy, Shri K. D. Ballal. Shri K. K. Chakravorty, C.T.O., was also always ready to help us. They very kindly took the trouble to check the work extensively in the field as a result of which we were able to improve its quality.

Dated the 3rd May, 1971.

I. E. N. CHAUHAN,  
Director of Census Operations  
Haryana

	Males	..	844,905
	Females	..	66,564

## A BRIEF ANALYSIS

### 1. Rural and Urban Composition of Population :

The process of urbanisation in the State appears to have been at a stand-still. A perusal of Table V shows only a marginal increase from 17.23 per cent in 1961 to 17.78 per cent in 1971 in the State's urban population. The decennial growth rate from 1961 to 1971 for urban areas, however, works out to 35.61 per cent as against the rural growth rate of 30.48 per cent only. The slightly higher growth rate in urban areas could possibly be attributed to the following four places being treated as urban for the first time in 1971 :—

- (1) Naraingarh
- (2) Jagadhri Workshop Railway Colony
- (3) Ganaur
- (4) Tosham

For the purposes of 1971-Census, all the Municipal areas/Cantonment Board areas/Notified areas, have been treated as 'Urban'.

2. The total number of towns in the State is only 65. There has been an increase of 4

towns over the number of towns in 1961. It is disappointing to note that the State has only two Cities, i.e., towns with population of one lakh and over. Even these two cities, namely, Rohtak and Ambala Cantt. have only marginally qualified to pass into the category of Cities. Rohtak has acquired the status of city for the first time.

3. Among the 7 Districts of the State, the District of Gurgaon has shown the highest growth rate in urban population of 53.72 per cent. It is followed by Jind and Rohtak districts with urban growth rates of 48.56 per cent and 43.96 per cent, respectively. The phenomenal increase in the percentage of urban population in Gurgaon District could be explained by the fact that Faridabad-Ballabgarh Industrial Complex has registered a more than cent-percent increase in population during the decade.

4. The following statement presents a comparison between the number of towns in each size class as in 1961 and as recorded in 1971. The proportion of population represented by each size class of towns to the total urban population in the two Census years, namely, 1961, and 1971 has also been indicated therein.

Class	Number of towns		Proportion of population in each size class to total population	
	1961	1971	1961	1971
I (Population 1,00,000 and above)	1	2	8.07	12.82
II (Population 50,000-99,999)	7	9	36.22	39.75
III (Population 20,000-49,999)	11	14	28.39	26.06
IV (Population 10,000-19,999)	15	15	15.68	12.54
V (Population 5,000-9,999)	15	20	8.24	7.84
VI (Less than 5,000)	12	5	3.40	0.99
Total	61	65	100.00	100.00

5. It will be seen from the above statement that the two Cities of Rohtak and Ambala Cantt. account for only 12.82 per cent of the total urban population of the State. The highest percentage of the urban population is accounted for by towns of class II category (having population ranging from 50,000 to 99,999. The Cities (having population of 1,00,000 and over) and the class II category towns (population 50,000 to 99,999) together have increased their share in the total urban population of the State. All other categories of towns, on the other hand, have registered a decline as compared to their share in the total urban population at the time of 1961 Census. The decline, however, is notwithstanding the fact that the number of towns in these categories has increased as compared to their number at the 1961-Census, with the exception of the towns of class VI in which case there has been a decrease in the number of towns also from 12 as in 1961 to 5 in 1971. The situation, therefore, suggests that the increase in population of smaller size towns is comparatively lower than the increase in the case of bigger towns. The reasons for the decrease in the number of class VI towns are not far to seek. A number of towns of this category have apparently crossed over and joined the towns of the higher classes.

6. Table VI contained in this brochure gives the total as also the sex-wise population distributed according to the various size classes of towns. The said data has also been furnished town-wise, the towns being arranged according to their class size. The growth rate of population for the two decades, viz., 1951-61 and 1961-71 and its sex ratio for 1971 has also been indicated in the said Table. It should be of quite some interest to the readers.

## II. Working Population :

7. Notwithstanding the increase in the total population of the State from 7,590,543 to 9,971,165 during the decade 1961-1971, the working population registered a sharp decline from 2,878,550 to 2,643,116. Understandably, therefore, there has been a decrease in the percentage of workers to the total population from 37.92 per cent in 1961 to 26.51 per cent in 1971. On the face of it, the phenomenon is somewhat intriguing. A closer look on the figures, however, reveals that there has been a substantial increase in the number of male workers from 2,119,660 in 1961 to 2,495,498 in 1971. The number of female workers, on the other hand, dwindled steeply from 758,890 in 1961 to 147,618 in 1971. To a considera-

ble extent, this contraction in the number of female workers would be attributable to the definition placed on the term 'Worker' for the purposes of the 1971-Census.

8. For the purposes of the 1961-Census a 'Worker' was taken to mean a person who engaged himself in any economically productive work without any regard for the extent of his participation in such work. In other words, the concept of main activity adopted for the 1971 Census as such had not been evolved or adopted for the 1961-Census. During 1961-Census, therefore, even those persons who were basically non-workers with reference to their main activity but were economically active even though for a very small fraction of their time, were recorded as workers. The result naturally was an inflated picture of the working population at the time of 1961-Census. During 1971-Census, however, a person was categorised as a worker or a Non-worker on the basis as to how he engaged himself mostly. In case, therefore, a woman was mostly engaged in household duties even though she participated in some economically productive work for a part of her time, she was categorised as a Non-worker, her participation in economically productive work being recorded as her secondary work. As, however, the data relating to Secondary work has not as yet been compiled, a clear picture about the exact situation would take some-time to emerge.

9. It is well-known that in most parts of Haryana, women-folk in the rural areas and belonging to the agricultural community, do participate in cultivation while at the same time looking after their household duties. It appears that at the time of 1961-Census, they were returned as Workers. Now because of the modified application of the definition of 'Worker' at the 1971-Census, such women have been returned as Non-workers engaged in their main activity of household duties. This factum alone should explain adequately the vast difference in the results yielded by the two Censuses. The decline in the number of female workers is a common feature in all the seven districts of the State. The view, therefore, that the decline in the female workers is mainly due to the change in the application of the definition of 'Worker' is further corroborated.

10. Table VII shows the distribution of population by 'Workers' and 'Non-workers' for the State and for all its seven Districts.

### III. Ratio of Agricultural Workers and other Workers :

11. For purposes of the Census, a cultivator has been taken to mean a person engaged in cultivation by himself or by supervision or direction in his capacity as the owner or lessee of land held from Government or as a tenant of land held from private persons or institutions for payment of money, kind or share. The agricultural labourer, on the other hand, has been defined as a person who works in another person's land for wages in money, kind or share. Unlike a cultivator, therefore, an agricultural labourer has no risk in cultivation nor does he have any right of lease or contract on land on which he works. Together, the 'cultivators' and the 'agricultural labourers' constitute the category 'Agricultural Workers'.

12. The workers other than the 'Agricultural Workers' have all been put together for the purpose of classification adopted for this Supplement. The 'Other Workers', therefore, include workers engaged in household industry, factory workers, those working in trade or transport, all Government Servants, municipal employees, teachers, mining workers, political or social workers, building labourers, etc., etc. In effect, all types of economic activity not covered by cultivation and agricultural labour have come under this category. The workers engaged in plantation or forestry, however, have not been treated as

Cultivators or Agricultural Labourers and have instead been covered in the category "Workers other than Cultivators and Agricultural Labourers".

13. The percentage of agricultural workers and other workers to the total working population in the State has been shown in Table VIII appended to this Supplement. A perusal thereof would show that the percentage of cultivators has shown a decline from 63.87 per cent in 1961 to 49.28 per cent in 1971. The percentage of Agricultural labourers to the total workers, on the other hand, has shown an increase from 6.90 per cent in 1961 to 16.23 per cent in 1971. The workers other than cultivators and agricultural labourers have also shown an increase from 29.23 per cent to 34.49 per cent to the total working population. The sex-wise break-up of workers for the State of Haryana has also been given in the said Table. The Table also gives the break-up of the total working force district-wise and within the district sex-wise. Apart from placing these figures before the public, it would not be possible for us to undertake any detailed analysis of the variations in the figures at this stage, as such an attempt would only be conjectural and not analytical.

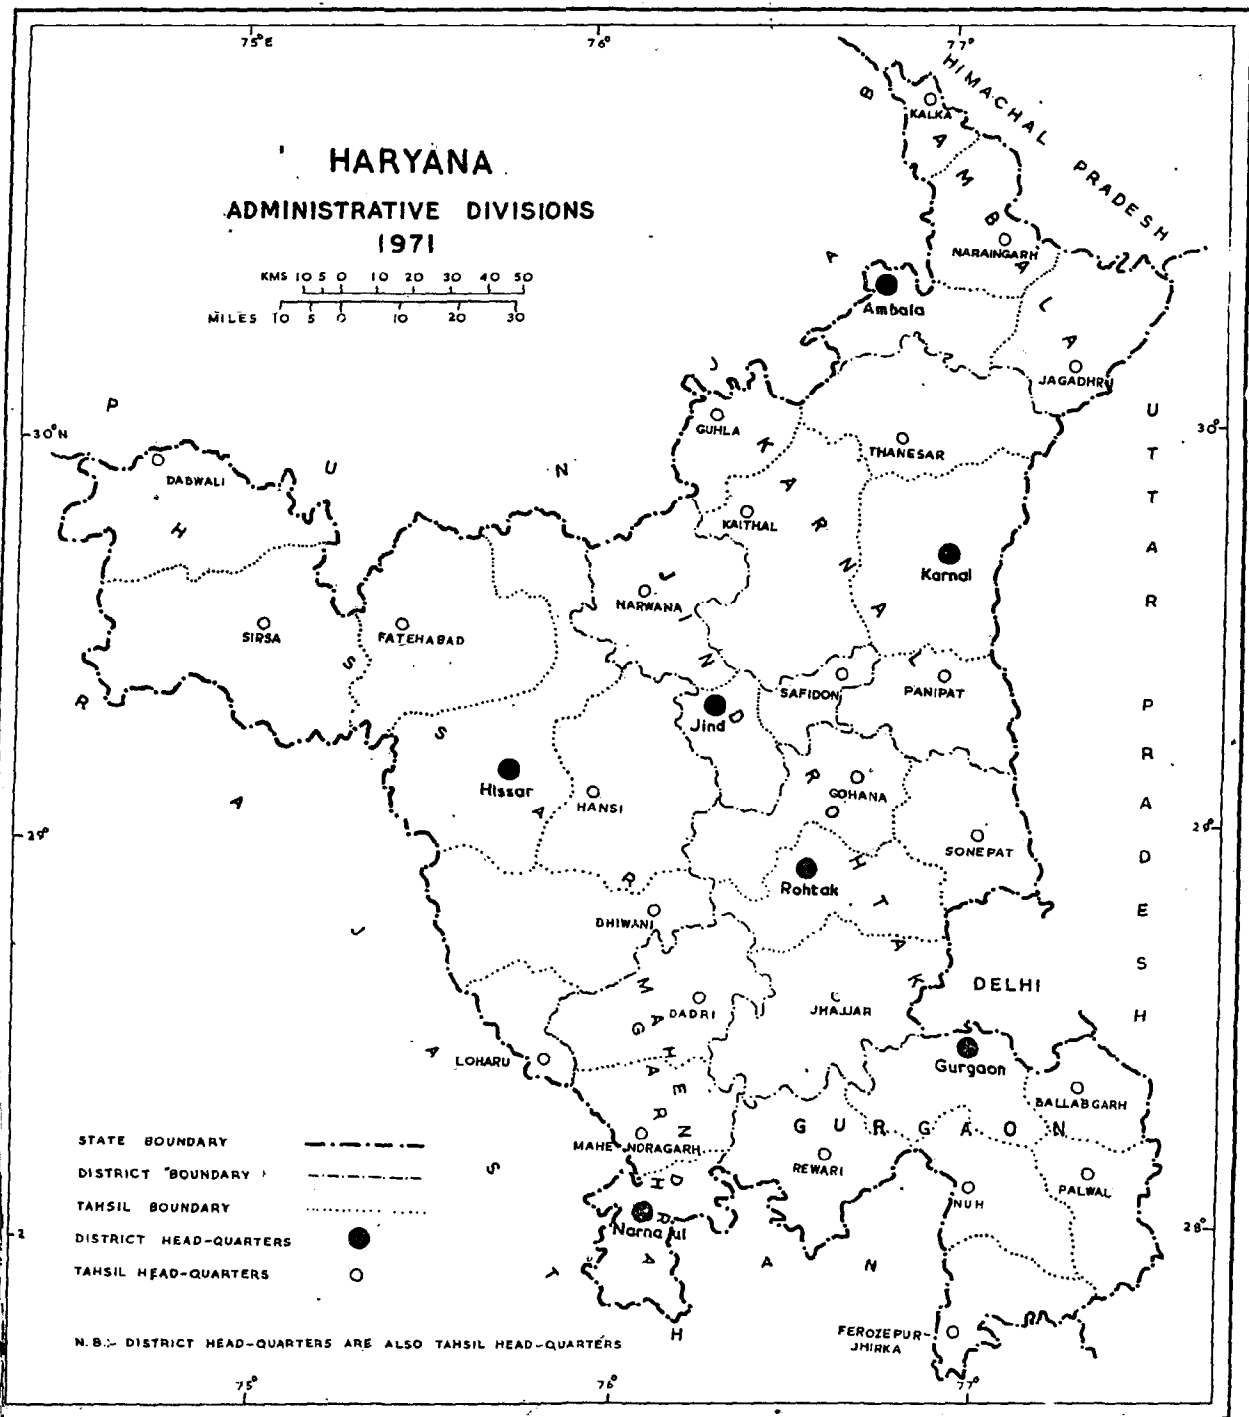

14. To make this brochure more useful, Tahsil-wise and within the Tahsil town-wise population figures according to sex have also been incorporated in Table IX.

Haileymandi (M.C.) ..	2,247	1,218	1,029			+28·38	+30·03	845
Ateli (M.C.) ..	1,939	1,064	875			+49·85	+27·48	822

Notes:—(1) Places treated as towns for the first time in 1961-Census and which continue as such in 1971-Census are shown with an asterisk (\*) on their left.

(2) Names of places treated as towns for the first time in 1971-Census are printed in *Italics*

(3) The following abbreviations have been used for indicating the status of the town.

M.C. = Municipal Committee.

C.B. = Cantonment Board.

N.A.C. = Notified Area Committee.

## APPENDIX-IV

### Officials who worked in the "Provisional Population Totals-1971 Census-Project"

Shri J. S. Dhamija .. Deputy Director

#### COMPILATION

Shri G. D. Singla .. Tabulation Officer  
Shri A. L. Kakkar .. Statistical Assistant  
Shri O. P. Malik .. Statistical Assistant  
Shri Hari Krishan .. Computer  
Shri Mohan Lal .. Computer  
Miss Suresh Kumari .. Computer

#### MAPPING

Shri K. B. Lakhnupal .. Tabulation Officer  
Shri Madhav Shyam .. Computer  
Shri Rajinder. K. Chaudhary .. Computer

#### PRINTING

Shri S. S. Sharma .. Office Supdt.  
Shri Daulat Ram .. Statistical Assistant  
Shri R. D. Verma .. Proof Reader  
Shri Yogeshwar Sharma .. Assistant Compiler

**PROGRAMME :**  
**TABULATION**  
**PUBLICATION**

## (i) TABULATION PROGRAMME

### A Series—General Population Tables

- A-I .. Area, Houses and Population.
- A-II .. Decadal variation in Population since 1901.
- A-III .. Villages classified by Population.
- A-IV .. Towns and Urban agglomeration classified by Population in 1971 with variation since 1901.
- A-V .. Standard Urban Areas, Union/State Primary Census Abstract, Urban Block/Villagewise Primary Census Abstract.

### B. Series—General Economic Tables.

- B-I Part-A .. Workers and non-workers according to main activity classified by sex and age-groups.
- B-I Part-B .. Female workers and non-workers according to main activity classified by marital status and age-groups.
- B-II .. Workers and non-workers in cities and non-city urban areas according to main activity classified by sex and age-groups.
- B-III Part-A .. Classification of workers and non-workers according to main activity by educational levels in Urban Areas only.
- B-III Part-B .. Classification of workers and non-workers according to main activity by educational levels in Rural Areas only.
- B-IV Part-A .. Industrial Classification of persons at work other than at cultivation as main activity by Sex and Divisions, Major Groups and Minor Groups.
- B-IV Part-B .. Industrial Classification of workers in manufacturing, processing, servicing and repairs on household industry basis as main activity by sex and class of workers.
- B-IV Part-C .. Classification of workers in Non-Household Industry, Trade, Business, Profession or Service as main activity by class of workers, age and sex.
- B-IV Part-D .. Industrial Classification by sex and class of workers of persons and work in non-household Industry, Trade, Business, Profession or Service as main activity.
- B-V Part-A .. Occupational Classification by sex of persons at work according to main activity other than cultivation.
- B-V Part-B .. Occupational Classification by sex and class of worker in non-household Industry, Trade, Business, Profession or Service as main activity.

- B-VI Part-A (i) .. Occupational Classification of persons at work according to main activity other than cultivation classified by sex and broad age-groups in Urban Areas only.
- B-VI Part-A (ii) .. Occupational Classification of persons at work according to main activity other than cultivation classified by sex and educational level in Urban Areas only.
- B-VI Part-B (i) .. Occupational Classification of persons at work according to main activity other than cultivation by sex and broad age-groups in Rural Areas only.
- B-VI Part-B (ii) .. Occupational Classification of persons at work according to main activity other than cultivation classified by sex and educational levels in Rural Areas only.
- B-VII .. Secondary work, i.e., persons having main activity, (i) as Cultivator, (ii) as Agricultural Labourer, (iii) at Household Industry, (iv) at non-household Industry, and (v) Non-workers classified by sex and by secondary work, (i) at Household Industry, (ii) as Cultivator, or (iii) as Agricultural Labourer, or (iv) Non-Household Industry, Trade, Business or Service.
- B-VIII .. Persons classified as non-workers according to main activity cross-classified by sex, broad age-groups and type of activity.
- B-IX Part-A .. Non-workers categorized as others aged 15 and above classified by sex, broad age-groups and educational levels in Urban Areas only.
- B-IX Part-B .. Non-workers categorized as others aged 15 and above classified by sex, broad age-groups and educational levels in Rural Areas only.

#### **C. Series—Social and Cultural Tables**

- C-I Part-A .. Composition of Households by Relationship to Head of Household classified by age-groups.
- C-II ... Age and Marital Status.
- C-III Part-A ... Age, Sex and Education in All Areas.
- C-III Part-B .. Age, Sex and Education in Urban Areas only.
- C-IV .. Single year age returns.
- C-V .. Mother-tongue (Alphabetical Order).
- C-VI .. Bilingualism.
- C-VII .. Religion.
- C-VIII .. Scheduled Castes and Scheduled Tribes (Part A & B).

#### **D. Series—Migration Tables.**

- D-I .. Population classified by place of birth.
- D-II .. Migrants classified by place of last residence and duration of residence in place of enumeration.

- D-III .. Migrants to cities classified by sex, broad age-groups, educational levels and in case of workers by Occupational Divisions.
- D-IV .. Population of cities classified by place of last residence and duration of residence.
- D-V .. Workers and non-workers according to main activity classified by place of last residence.
- D-VI .. Migrants classified by place of last residence, age-groups, duration of residence and marital status.

**E. Series—Establishment Tables.**

- E-I .. Distribution of Establishments by broad types.
- E-II Part-A .. Distribution of Manufacturing, Processing or Servicing Establishments other than Household Industries classified by Registered Factories, Unregistered workshops and size of employment.
- E-II Part-B .. Distribution of Manufacturing, Processing or Servicing Establishments other than Household Industries classified by industry, Fuel, Power or Manual used and size of employment.
- E-II Part-C .. Distribution of Household Industry, Establishments classified by industry Fuel/Power used and size of employment.
- E-III .. Distribution of Trade/Commercial establishments classified by the type of business or trade and size of employment.
- E-IV .. Distribution of Establishments (other than Manufacturing, Processing Servicing or Business and Trade Establishments) by size of employment.

**F. Series—Fertility Tables.**

- Table 1-A .. Number of currently married women and the related births during the last year by religion, present age and age at marriage (For All Areas).
- Table 1-B .. Number of currently married women and the related births during the last year by religion, present age and age at marriage (For Rural Areas).
- Table 1-C .. Number of currently married women and the related births during the last year by religion, present age and age at marriage (For Urban Areas).
