## PREFACE

As in the 1961 Census the Social and Cultural Tables of the present Census include C-Series with a departure that in 1961, these tables along with Migration Tables, viz., D-Series were published in Part II-C, but in 1971, C-Series Tables have been published in two separate volumes and D-Series in a separate volume, viz., Part II-D.

This is the second volume of social and cultural tables. While the first volume viz., Part II C(i) combined with Part V-A has dealt with the 'Mother-tongue and Religion' of the population of the State and the 'Economic activities and Literacy' of the Scheduled Castes and Scheduled Tribes communities; this volume contains the tables relating to Household Composition; Age, Sex, Marital status, Education and Bilingualism of the whole population of the State. In this volume are also presented the 'Fertility Tables' which have been introduced for the first time in the 1971 Census. A fly-leaf precedes each table explaining therein the objective, layout, the procedure etc. This will be helpful to fully understand the table.

Fertility survey is a question of the time. For framing and implementing family welfare programmes

which are essential towards achieving a welfare state the importance of the fertility survey has long been felt. To fill up this gap the census of 1971 has made a successful attempt and the findings of the survey will be seen presented in F-Series tables of this volume.

The services of Shri S. Birendra Singh, Tabulation Officer and Sarvashri R. K. Sanatomba Singh and Y. Joykumar Singh, Statistical Assistant of this office are commendable in making compilation of this volume a success.

While expressing my deep sense of gratitude to my Chief Shri R. B. Chari, Registrar General, India, for his over-all guidance, I am very much grateful to Shri Badri Nath, Deputy Registrar General (Census) for the inspiration he has kindly given to me. My thanks are also due to Shri K. K. Chakravorty, Assistant Registrar General (C & T) and his staff for their guidance in finalising the tables of this volume.

M. Tejkishore Singh,  
*Assistant Director (T)*

## INTRODUCTION

The social and cultural tables of the 1971 Census have been prepared with some improvements here and there based on the corresponding tables of 1961 Census. While making a comparative study of the data it should be borne in mind that in 1961 Manipur was a single district state having 10 constituent subdivisions, viz., (1) Imphal West, (2) Imphal East, (3) Bishenpur, (4) Thoubal, (5) Ukhrul, (6) Mao & Sadar Hills, (7) Tamenglong, (8) Jiribam, (9) Churachandpur; and (10) Tengnoupal and the data were furnished accordingly, but in the 1971 Census Manipur became a five district state as per the district reorganisation of November, 1969. The five districts viz., (1) Manipur North, (2) Manipur West, (3) Manipur South, (4) Manipur Central; and (5) Manipur East have been formed of the erstwhile ten subdivisions of the state as shown below.

District in 1971 Census	Subdivisions in 1961 Census which have formed the present districts
(1) Manipur North	.. Mao & Sadar Hills.
(2) Manipur West	.. Tamenglong.
(3) Manipur South	.. Churachandpur with the villages lying in the hilly regions of Jiribam.
(4) Manipur Central	.. (1) Imphal West, (2) Imphal East, (3) Bishenpur, (4) Thoubal, (5) Tengnoupal and villages lying in the plain portion of Jiribam.
(5) Manipur East	.. Ukhrul

All the social and cultural tables of 1961 have been prepared on full count based on the Individual Slip except C-I 'Household Composition' which was prepared from Household schedule on 20 percent sample. In the present census all the tables have been prepared on full count, except C-I table which had its base on Population Record, all the tables were prepared from the Individual slip.

It appears realistic to reproduce here the relevant questions and instructions to the enumerating agency in the 1971 census operations for correct recording of the answers to facilitate appraisal of the data in this publication correctly. The Population Record form is also reproduced in ANNEXURE—1.

### Question 2: Relationship to Head

In the case of the Head of the household write 'Head'. The Head of the Household for census purpose is a person who is recognised as such in the household. He is generally the person who bears the

chief responsibility for the maintenance of the household and takes decisions on behalf of the household. The Head of the household need not necessarily be the eldest male member, but may even be a female or a younger member of either sex. You need not enter into any long argument about it but record the name of the person who is recognised by the Household as its Head.

In the case of institutions like boarding houses, messes or friends living together in one census house, which should be regarded as households of unrelated persons living together, which may be called institutional households, the manager or superintendent or the person who has administrative responsibility or who by common consent is regarded as the head should be recorded as the head of the household.

In the case of absence of a normal 'Head', the person on whom the responsibility of managing the affairs of the household falls, should be regarded as the head.

All relationship in this question should be recorded in relation to the head of the household. Write the relationship in full. Do not use words like 'nephew', 'niece or uncle', but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (for uncle), 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of 'visitors', boarders, or employees, write 'visitor', 'boarder', or 'employee' as the case may be. In the case of institution, the members should be recorded as 'unrelated'.

If on the check of revisional round between 1st and 3rd April, 1971 the head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as head should be recorded as head and the relationships in all other slips will have to be suitably corrected. The slip of the deceased head of the household will, of course, be cancelled.

### Question 3: Sex

For males write 'M' and for females write 'F' within the circle indicated against this question. Even for eunuchs and hermaphrodites, write 'M'. Verify with reference to the name and relationship to head against questions 1 and 2 respectively you have noted the sex correctly.

### Question 4: Age

Record the age of the person in total years completed last birthday. Very often there is a tendency on the part of the individuals to return 'years running' rather than the 'years completed'. Make sure that only the actual number of years completed is recorded,

(iv)

In respect of infants who might not have completed one year by the day of enumeration their age in completed years should be invariably shown as '0' as they have not yet completed one year of age and add 'Infant' in brackets. As was stated under general instructions make sure that infants even if a day old are invariably enumerated. You should not enter the age in months. The age of an infant who has not yet completed one year should invariably be noted as '0' only.

Age is one of the most important items of demographic data and you should ascertain the age with greatest care. Many persons particularly in the rural areas cannot give their age by stimulating their memory with reference to any historical event etc. well known in the area. Sometimes the age can be ascertained with reference to the age of another person of a known age that may be in the same household or in the neighbouring household or that of a well known person of the village such as head-man of the village. A person can more easily say whether he was older or younger to such a person and by how many years. This will help you to record the age more accurately.

Question 5: Marital Status

In answering this question use the following abbreviations:—

- NM : Never Married
- M : Currently Married
- W : Widowed
- S : Separated or Divorced

For a person who has never been married at any time before, write 'NM'. For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for the persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or is in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again write 'W'. For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been, divorced either by a decree of a law court or by an accepted social or religious-custom but who has not remarried, write 'S'. For a prostitute return her marital status as declared by her.

Question 6: For currently married women only

This question has to be answered in respect of all currently married women only i.e., all women whose marital status is shown as 'M' against Q. 5. For all others a cross may be put through the two sub-parts of this question.

6(a) Age at marriage

Age at marriage: You should ascertain the age at which the currently married woman whom you are enumerating was married and record that age in com-

pleted years. If the currently married woman had been married more than once, the age at which she got married for the first time should be recorded.

6(b) Any child born in the last one year

Any child born in the last one year: You should ascertain if the currently married woman whom you are enumerating gave birth to a child in the last one year prior to the date of enumeration. Since it may be difficult for a person to reckon the exact year with reference to the English calendar dates, the period of one year may be ascertained with reference to a well known festival day which falls close to Feb-March, as determined by the Census Superintendent of the State. You should ask if a child was born on or after this festival day last year to the date of enumeration. Only if the child was born alive, even if the child has died soon after birth, should the answer be 'yes' to this question. Still birth, i.e. a child which is born dead should not be taken into account for this purpose. So while you should make sure that every case of birth of child born alive, even if it is not alive on the date of enumeration, is reported, you should not reckon it if the child was born lifeless.

It is common experience that the birth of the child may not be reported readily if the child is not actually surviving at the time of enumeration. Infant deaths are still high in the country. There is a chance of a number of such cases being missed unless specifically questioned about them. It is necessary to record all live births even if the child had died soon thereafter or had not survived to the day of enumeration. Therefore where the initial answer to this question is 'no', you should ask a specific question if there has been a case of child having been born alive in the last one year and later dying before the enumeration date. This is a delicate question and should be asked with tact in a manner not to offend the sensibility of the respondent. Where a currently married woman first answers that she had no child born in the last one year, you may perhaps question her as follows:

"It has been found in some houses that a child was born and had died soon after or a few days or months later and such cases had not been reported. It is my hope that there are no such cases here. Am I right?"

This may bring in the required response. If she reports 'no' then you can be sure that no birth has been missed. You have to make sure that any live birth that has occurred to the currently married woman in the last one year is netted whether the child is surviving till the date of enumeration or not. Similarly, probe to eliminate still births may be necessary. For example, when the answer is 'yes' under question 6(b) the enumerator might ask if the child is here in this house. If the answer is 'yes', no further question is needed. If 'no' the enumerator might ask where he has gone. The answer may be 'dead' or he had gone elsewhere. If 'dead' then the enumerator might ask when did the child die and this will bring out the fact whether or not it was still birth.

(v)

Write 'yes', if the currently married woman had given birth to a live child from the prescribed festival day last year to the date of enumeration or 'not' if she had not. In case of twin or multiple births, write 2, 3, etc. as the case may be within round brackets after the entry 'yes'.

Note :—You may find on your revisional round from 1st to 3rd April, 1971 that a child is born to a married woman in a household after your last visit but before the sunrise of 1st April, 1971. You will have to take this into account and correct the answer against the Q. 6(b) accordingly. You must enquire specifically if any such birth has taken place. While ignoring still births all other births where the child was born alive even if it did not survive long should be taken into account.

#### Question 12: Literacy (L or C)

**Definition of a literate:** A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not a literate.

It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

For a person, who is literate i.e. who can both read and write, record 'L' in the triangle against question 12. If there is any doubt about a person's ability to read or write the rest that may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator's Instructions and similarly for writing he/she should be able to write a simple letter. Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent's word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumerated.

For a person who is illiterate i.e. who can neither read nor write or can merely read but cannot write, in any language, write 'O' in the triangle against question 12. All children of the age of 4 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

#### Question 13: Educational level

This question will be asked of those for whom 'L' has been recorded against question 12. For a person who is illiterate and 'O' has been put against him in the answer to question 12, there is no advantage in ascertaining the educational level even if he had at some stage attended school and passed a standard and had relapsed into illiteracy. In such a case you should put 'X'. You have to ascertain and record the highest educational level attained by a person for whom 'L' is recorded in answer to question 12.

2—361 R. G. India (ND)/78

For a person who is still studying in a particular class, the highest educational level attained by him will be one that he has actually passed and not the one in which he is studying. For example, a person studying in 1st year B.A. should be recorded as only 'PUC' or 'Higher Secondary' as the case may be. Similarly, a person studying, say, in the 4th year of 'M.B.B.S.' should not be noted as 'M.B.B.S.' but as 3rd year 'M.B.B.S.' which is the highest level he has actually attained. If you are not sure whether a person has passed Primary, Middle, Higher Secondary or other definite levels, you may record the actual standard passed such as say IIIrd standard, VIIIth standard, 1st year B.Com. etc.

The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qualifications both of which are of equivalent level such as say B.Sc. (Zoology) and M.B.B.S. or B.A. (Maths.) and B.E. (Bachelor in Engineering), the technical qualification should be given preference in recording the highest educational level attained. Where the general educational level is higher than the technical educational level or where it is not possible to decide which of the two levels is relatively higher, the highest level of education as returned by the person concerned should be recorded.

In recording the highest educational level of a graduate or a post-graduate, subject of specialisation such as (B.Sc.) (Maths.), etc. should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully.

Whenever you come across graduates or post-graduates as also those with a technical diploma or degree, you will have to issue him a "Degree-holder and Technical personnel Card" and ask the person concerned to fill it. You should note the location code on the card while issuing it. Put a tick (✓) after noting the educational level against question 13 immediately after you issue a card. When you collect it after some time but before you complete the enumeration of your area, cross the tick and put a circle as (✓).

You will have to ensure that the card issued to all the graduates and the technical degree or diploma holders are collected back. The non-crossed tick, if any, against question 13 will show that the card has not been collected.

#### Question 14 : Mother-tongue

**Definition :** Mother-tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother shall be recorded.

(vi)

Record mother-tongue in full whatever be the name of the language as returned and avoid use of abbreviations. You are not expected to determine if the language returned by a person is the dialect of another major language and so on. You should not try to establish any relationship between religion and mother-tongue. You are bound to record the language as returned by the person as his mother tongue and you should not enter into any argument with him and have reason to suspect that in any area due to any organised movement, mother-tongue was not being truthfully returned, you should record the mother-tongue as actually returned by the respondent and make a report to your superior Census Officers for verification. You are not authorised to make any correction on your own.

#### Question 15: Other languages

After recording the mother-tongue in question 14 enquire whether the person knows any other language(s) Indian or foreign and record language(s) returned by him against this question. In case he does not know any language apart from his mother-tongue put 'X' against this question.

The number of languages recorded under this question need not be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use with understanding in communicating with others. He need not necessarily be able to read and write these languages. It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language with understanding.

**C-I PART A COMPOSITION OF HOUSEHOLDS BY RELATIONSHIP TO HEAD OF HOUSEHOLD CLASSIFIED BY BROAD AGE GROUPS**

**FLY-LEAF**

This table gives the data relating to the composition of the household by relationship to the head of the household classified by three broad age-groups viz., less than 30, 30-49 and 50+. Age not stated is included in "All Ages". Related and unrelated members of the households and the single member households are shown separately. The relationship to the head of household is given for sons, brothers, son's wife, brother's wife, daughter, sister, daughter's husband, sister's husband, father, mother and other male or female members separately for married persons and for other marital status combined. Among the married relations, the spouses of the heads of the households are given separately.

This table will be of sociological interest indicating the extent of the joint family system. The age

distribution of the heads of the households and their relations classified by marital status will further help study the future trend of the joint family system. Table C-I of 1961 which corresponds to this table was prepared on 20 per cent sample for rural, urban and total population separately and the relationship to the head was shown as "married sons" and "Other married relations" and was not classified by broad age-groups. Table C-I of 1971 Census has been prepared on full count for total, rural and urban population separately. It will be seen from the table that the largest number of the heads of the household i.e. 93,683 is among the persons in the age-group 30-49. Among the male heads of the household the age-group 30-49 tops the number while the female of the age-group 50+ occupies the leading number among the female heads of the different age-group.

**C-I PART B (i) and (ii) DISTRIBUTION OF HOUSEHOLDS WHERE THE HEAD IS A MALE/FEMALE BY RELATIONSHIP OF MEMBERS WITH THE HEAD**

**FLY-LEAF**

Table B(i) gives composition of households where head is male by relationship of members with the head of the household. Similarly information is given in table B(ii) for the households where head is

female. It will be of much interest to sociologists as it will be real composition of households having married relations also. This table taken together corresponds largely to C-I of 1961.

**C-I PART B (i) HOUSEHOLDS WHERE THE HEAD IS A MALE, BY RELATIONSHIP OF MEMBERS WITH THE HEAD**

## C-II AGE AND MARITAL STATUS

### FLY-LEAF

This table has been prepared separately for total, rural and urban population. This is an important demographic table. This table was prepared on full count as was in 1961 and in 1951 on a 10 percent

sample basis. It will be observed from the table that among the married males the highest proportion lies in the age group 30—34 and among the females the same proportion is in the age group 25—29.

C-II AGE AND MARITAL STATUS

### C-III AGE, SEX AND EDUCATION

#### FLY-LEAF

This table has been prepared separately for total and urban population as part A and part B respectively. The educational levels for the urban areas have been shown more elaborately than those shown for the total. The educational levels in table C-III Part A correspond to table B-III part B and table C-III part B to table B-III part A. This table will measure the growth of literacy in the total population as well as in the different age-groups since the last Census. Similar Table C-III part A and B was prepared on

full count in 1961 Census with slightly different educational levels and age-groups and in 1951 Census this table was prepared on 10 percent Sample basis.

It will be observed from the table that the highest proportion of illiterate persons is still among the persons of age-group 35 and above as had been seen in 1961. In the age-group 10—14, 222 persons have been recorded in 1971 in the educational level "Matriculation or Higher Secondary" against 28 persons in 1961.

## C-IV SINGLE YEAR AGE RETURNS

### FLY-LEAF

This table has been prepared separately for total, rural and urban population at the State level. The age in years for an individual completed on 1st April, 1971 was recorded but in the case of infants who did not complete a year on this day have been grouped under '0' age-group. This is also very important demographic table which is used by the Census Actuary. The corresponding Table was prepared in 1961 Census on full count as in this Census and in 1951 on 10 percent Sample basis.

As had been seen in 1961 Census the ages in years are seen lumping at 5,10,20 etc. which reflect the intention of the individual to round up or round down his age in years to the nearest 5 or 10 etc.

An Appendix is also provided for this table furnishing the data for the age-groups, 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79, 80-84, 85-89, 90-94, 95-99, 100+ and "Age not stated" for the state and its constituent districts.

## C-VI BILINGUALISM

### FLY-LEAF

This table corresponds to table D-I Part II of the 1951 and C-VI of the 1961 Censuses.

The question on bilingualism at the 1971 Census was:

Question 15: Other languages.

"After recording the mother-tongue in question 14, enquire whether the person knows any other language(s), Indian or foreign, and record language(s) returned by him against this question. In case he does not know any language apart from his mother-tongue, put 'X' against this question.

The question on bilingualism at the 1971 Census question need not be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use. With understanding in communicating with others. He need not necessarily be able to read and write these languages.

It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language with understanding."

In this table, data on bilingualism are presented only for selected languages/mother-tongues (L/MTs). The selection of these L/MTs has been done on the basis of all India table C-VI Bilingualism of 1961 and a list of L/MTs was devised for all India. This list formed the basis for preparing the table on bilingualism. In the case of both rural and urban areas of this state, the figures are based on cent percent count.

Columns 2, 3 and 4 of the table give the total number of speakers of L/MT inclusive of MTs grouped under it. Columns 5, 6 and 7 give figures of such of the speakers who returned a second language, that is to say, any other L/MT not accounted for in columns 2, 3 and 4. Column 8 contains in 'run on' fashion the names of subsidiary L/MTs inclusive of L/MTs wherever grouped by number of male and female speakers within brackets.

**F-1 DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS  
DURING THE LAST YEAR BY RELIGION, PRESENT AGE AND AGE AT MARRIAGE**

(Rural/Urban)

Part A—(Rural)

Part B—(Urban)

**FLY-LEAF**

This table is presented in two parts, i.e. Part A & B. Part A relates to rural areas and Part B to urban areas. The data relating to the distribution of currently married women and the related births during the last one year by Religion, present age and age at marriage of the mother are shown in this table. These data will help in deriving differentials by Religion in median age at marriage and in age specific fertility rates, total fertility rate and general fertility rate for various age at marriage groups.

An appendix is also provided for the Table presenting similar data separately for Scheduled Castes/Scheduled Tribes only.

If the rural and urban break-up is combined for the State it may be seen that the greatest number of women, i.e. 78,201 get married in the age at marriage

group of 18—22 which is closely followed by 75,889 women who get married in the age at marriage group 13—17. The same marital state is seen both in the rural and urban areas. As regards the fertility rates the greatest number of births during the last year preceding 1971 is found among the women of the personal age-group of 23—27.

Among the Scheduled Castes the greatest number of women i.e. 839 get married in the age at marriage group 13—17 and the highest rate of births i.e. 123 is also among the women of the personal age-group of 18—22. Among the Scheduled Tribes the greatest number of women i.e. 32,008 get married in the age at marriage group of 18—22 and such married women have the highest births i.e. 3,139 at their personal age-group of 28—32.

**F-II DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY EDUCATION, PRESENT AGE AND AGE AT MARRIAGE**

(Rural/Urban)

Part A—(Rural)

Part B—(Urban)

FLY-LEAF

As in F-I this table is in two parts, Part A relating to rural and Part B relating to urban areas. The distribution of women and births by Education, present age and age at marriage is provided in this table. These data will help in deriving differentials by Education in median age at marriage and in age specific fertility rate, total fertility rate and general fertility rate for various age at marriage groups.

From the consolidated table for the State it may be observed that the greatest number of illiterate women, i.e. 65,760 get married in the age at marriage group of 18-22 and the greatest number of literate women i.e. 12,441 get married in the age at marriage group of 18-22. The highest birth rate is, however, among the women both literate and illiterate who got married at the age at marriage group of 13-17 and at their present personal age of 18-22.

**F-III DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, DURATION OF MARRIAGE AND AGE AT MARRIAGE**

(Rural/Urban)  
Part A—(Rural)  
Part B—(Urban)

**FLY-LEAF**

This table has been presented in two parts i.e. Part A & B. Part A relates to rural areas and Part B to urban areas. The distribution of women and births by Religion, duration of marriage and age at marriage is provided in this table. These data will help in deriving differentials by Religion in duration specific fertility rates for various age at marriage groups. An appendix is also provided for the table presenting similar data separately for Scheduled Castes/Scheduled Tribes only.

When the data for the rural and urban areas are consolidated for the State it will be observed that the greatest number of births, i.e. 5,426, during the last year preceding 1971 is among the women who got married at the age of marriage group of 13-17 and whose duration of marriage is 5 to 9 years. The highest rate of birth is also among the women who co-habit with their husbands for 5 to 9 years. In the case of the Scheduled Castes/Scheduled Tribes the same fertility rate exists among the women who co-habit with their husbands from 5 to 9 years.

**F-IV DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY EDUCATION, DURATION OF MARRIAGE AND AGE AT MARRIAGE**

(Rural/Urban)

Part A—(Rural)

Part B—(Urban)

**FLY-LEAF**

This table is in two parts, Part A relating to the rural and Part B to the urban areas. It shows the distribution of women and births by Education, duration of marriage and age at marriage. These data will help in deriving differentials by Education in duration specific fertility rates for various age at marriage groups.

It has already been stated in the explanatory note on table F-I that the greatest number of women i.e. 78,201 age at marriage group of 18—22. It is interesting to note that among the illiterate women of the

urban areas of the state the greatest number i.e. 3,386 get married at the age at marriage group of 13—17, while in the rural areas the greatest number i.e. 57,875 get married at the age at marriage group of 18—22.

Among the illiterate women of the state the highest birth rate is in the age at marriage group of 13—17, while among the literate women the rate is in the age at marriage group of 18—22. Both the categories of women fall in the duration of marriage group of 5—9.

**F-V DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, EDUCATION GROUPS, PRESENT AGE AND AGE AT MARRIAGE OF THE WOMEN (Rural/Urban)**

**FLY-LEAF**

This table provides the distribution of women and births by Religion-cum-Education, present age and age at marriage. These data will help in deriving differentials by Religion-cum-Education in median age at marriage and in age specific fertility rate and general fertility rate for various age at marriage group.

Among the illiterate women of the Hindus of the rural areas of the State the highest birth rate is in the personal present age-group of 18—22, but in the urban areas the rate is in the personal present age-group of 23—27. But contrary to this, illiterate women of the Muslims who have attained personal present age

group of 23—27 have the highest birth rate in the rural areas but in the urban areas, the rate is in the present age group of 18—22.

Among the illiterate women of the Christians the highest rate of birth is in the personal present age group of 23—32. Among the literate women of the Hindus of rural and urban areas of the State, the highest rate of birth is in the personal present age group of 23—27, and among the literate women of the Muslims the highest rate of birth is in the personal present age-group of 33—37. The highest rate of birth among the literate women of the Christians is in the present personal age-group of 23—27.
