The gigantic decennial exercise of census taking was held from 9th February to 28th February 1981 when thousands of enumerators went through each abode in the entire length and breadth of the state and filled millions of individual slips.

The provisional population totals were published soon after within a matter of days (March 1981) vide Paper I by this directorate, to which a Supplement was issued a few weeks later (May 1981) giving further data on urban and rural composition, break up of workers and more importantly primary census abstract (PCA) giving provisional figures of population and other allied features.

Thereafter hundreds of tabulators in the regional tabulation offices waded through the millions of individual slips manually and prepared PCA from the individual slips.

Pending publication of the data, as stands already compiled in the various publications proposed to be issued by this directorate under suitable tables and with some analysis, the final figures of the population of the state upto the level of tahsil in rural areas and town in urban areas is indicated in this brochure. The population figures for the scheduled castes* are also indicated alongside.

This has been done to meet the persistent and immediate demand from the various quarters of data users.
