PREFACE

The Indian Census Organisation has been tabulating data collected during each decennial census on the twin consideration of their utility to Government and other data users and the feasibility of production in a time-frame and within the available resources. Based on the experience of the previous censuses, there has been constant endeavour to improve the presentation of data and the tabulation plan so that maximum utilisation of the census data is made possible. The Tabulation Plan for the 1991 Census of India has been prepared after consultations with important data users and deliberations in the Advisory Committee on Technical Issues connected with the 1991 Census. Descriptive notes on the tables, their basic purpose and their content have been included along with short notes on the Publication Plan. These details, we hope, will enable the data users to obtain the data required by them conveniently. Admittedly, the scope of tabulation of Census data is limitless, but the focus has always been to produce basic and essential tabulations as quickly as possible and in readily usable form. Therefore, tabulations of very specialised nature have not been presented, but it is hoped that such tabulations could be considered, if need be, within the constraints of time and resources.

In addition to printed publication of tables, it is expected that Census tabulations and other basic Census data would be made available on demand under certain conditions in machine-readable forms such as magnetic tapes, diskettes and CD-ROM etc.

We hope this volume will serve as a Census data users' guide enabling them to appreciate the scope and utility of the tabulations. We look forward to the increasing use of Census data. This Tabulation Plan is a major step towards ensuring such utilisation.

March 18, 1991
New Delhi

A.R. NANDA
REGISTRAR GENERAL AND
CENSUS COMMISSIONER, INDIA

GENERAL NOTE

The schedules canvassed at the 1991 Census are the Houselist, the Household Schedule and the Individual Slip. The schedules are given in Annexures I-III. The "Houselist" schedule was canvassed at the house-listing operations which were conducted in the various States and Union Territories at different points of time during April-September 1990. Another schedule known as the "Enterprise List" was also canvassed during the houselisting operation on behalf of the Central Statistical Organisation for the third Economic Census but the processing, tabulation and dissemination of the Enterprise list data is the responsibility of Central Statistical Organisation. The "Household Schedule" for each and every household and the "Individual Slip" for each individual were canvassed during February-March, 1991. The reference date for the 1991 Census was the sun-rise of March 1, 1991. Alongwith the enumeration, all post-graduates and technically qualified persons were given a schedule to be filled up by them. This schedule was designed by the Council of Scientific and Industrial Research and the data will be tabulated and released by them.

The Houselist schedule contained the identification particulars and use of each Census house, the predominant construction material of wall, roof and floor of the Census house, identification particulars of households, the name and sex of head of household and whether he/she belongs to Scheduled Caste or Scheduled Tribe, whether the household lives in owned or rented house, number of living rooms in the occupation of the household, amenities available to the household like drinking water supply, electricity and toilet; and type of fuel used by the household for cooking. The question on provision of toilet facilities was asked for the first time in rural areas. The enquiry on type of fuel used for cooking was made for the first time in Census. The information on physically handicapped persons which was collected in the 1981 Census has been dropped at the 1991 Census. The information on housing conditions and facilities which was part of the Household Schedule (Part-I) in the 1981 Census has now been transferred to the Houselist schedule. This has been done to avoid

the delay in the processing of these data.

The Household Schedule and the Individual Slip were canvassed at the census count during February-March, 1991. At the 1981 Census, the Household Schedule had two parts. The first part contained information relating to the household and the second part, the Population Record, was a record of individual information on the members of the household. Some of the questions contained in the first part have been transferred to the Houselist at the 1991 Census and thus the Household Schedule of the 1991 Census contains only the individual information on all the members of the household. The questions on the language mainly spoken in the household, number of married couples living in the household, whether the household owns a house or house-site in the village or town of enumeration in case the household is living in rented house and whether the household cultivates land and if the land cultivated is owned or rented or owned and rented and the local name of tenancy in case the land cultivated is rented were dropped at the 1991 Census. The Household Schedule of the 1991 Census contains a list of members of the household and their social, demographic and economic characteristics as abstracted from the Individual Slips.

A few changes have been made in the Individual Slip which is the main schedule of the 1991 Census. These are briefly narrated in the following paragraphs.

- (i) It was apprehended that the persons engaged in unpaid work on farm or in family enterprise were not netted as workers in the 1981 Census. To net such persons, at the 1991 Census, it was emphasised in Question 14A and also in the relevant instructions that work includes unpaid work on farm or in family enterprise. The instructions were also elaborated with repeated emphasis on probing enquiries and with various illustrations so as to net the women's work participation.

- (ii) The definition of a literate has also undergone a slight change. Till the 1981 Census, children of aged 4 years and below were treated as illiterates. On the advice of the Ministry of Human Resource Development and the Planning Commission, it has been decided to treat the children of ages 6 years and below as illiterates at the 1991 Census.
- (iii) The question on seeking/available for work has been asked from only non-workers at the 1991 Census unlike from both marginal workers and non-workers as at the 1981 Census. Further, those seeking/available for work will be asked if they had worked before in order to know about the fresh entrants in the labour market.
- (iv) A new question on whether a person is an Ex-serviceman and if so, whether he/she is a pensioner or non-pensioner has been included at the 1991 Census on the request of the Ministry of Defence.
- (v) The migration and fertility questions have been canvassed universally at the 1991 Census. The reasons for migration have been expanded by including two more reasons for migration, namely, business and natural calamities like drought, floods, etc.

Subject to the above changes, the Individual Slip of the 1991 Census follows more or less the same pattern as in the 1981 Census in respect of demographic, social, cultural, economic, migration and fertility questions. These items cover the relationship to head, age, sex, marital status, mother tongue, two other languages known, religion, scheduled caste/scheduled tribe, literacy and educational level, attendance at school/college, economic activity, birth place, place of last residence, reasons for migration, duration of residence at the village or town of enumeration, age at marriage and number of children surviving at present and ever born alive to the ever married women and any child born alive during last one year to currently married women.

Rural-Urban Classification

As in the previous Censuses, the 1991 Census data will be presented for rural and urban areas separately where a Community Development Block is not co-terminus with a tahsil/taluk etc., the data will be provided at Community Development Block level. The basic unit for rural areas is the revenue village which has in most cases definite surveyed boundaries. The revenue village may comprise several hamlets but the entire village will normally be one unit for presentation of data. In unsurveyed villages within forest areas or other unsurveyed tracts each habitation area with locally recognised boundaries within each local administration jurisdiction is treated as one unit.

Urban areas are specially defined for the census purposes. In the 1991 Census the same criteria as in 1981 have been adopted. Urban area in the 1991 Census will be :

- (a) All places with a municipality, corporation or cantonment board or notified town area;
- (b) All villages/compact project areas which satisfied the following criteria :
 - (i) A minimum population of 5,000;
 - (ii) Atleast 75 per cent of the male main workers engaged in non-agricultural pursuits;
 - (iii) A population density of atleast 400 per Km.²

The urban criteria of 1981 varied slightly from that of the 1961 and 1971 censuses. The males working in activities such as fishing or logging, etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion of the 1961 and 1971 censuses, whereas in the 1981 Census, these activities were treated as on par with cultivation and agricultural labour for the purpose of this criterion. In 1991 Census also, the activities of livestock, forestry, fishing, hunting, plantations and orchards and allied activities have been treated as agricultural activities while applying the test of male working population.

Urban Agglomeration

Apart from town/city, the 1971 and 1981 concept of urban agglomeration is also adopted for the 1991 Census. Very often large railway colonies, university campuses, port areas, military camps, etc. come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns, but if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'. An urban agglomeration may constitute :

- (a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);
- (b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); or
- (c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Standard Urban Area

The concept of Standard Urban Area introduced in the 1971 Census has been followed both in 1981 and 1991 Censuses. The essential requirements for the constitution of a Standard Urban Area (SUA) as laid down in 1971 were that :

- (i) It should have a core town of a minimum population of 50,000;
- (ii) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town;
- (iii) In all probability this entire area should get fully urbanised in a period of two or three decades.

Certain Standard Urban Areas were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data were presented for the Standard Urban Areas in 1981. It is proposed to present the similar data for the delineated Standard Urban Areas in 1991 Census also. The idea is to present basic data for these areas for three decades so that the urbanisation process in those areas can be studied. The boundary of SUA as finalised in the 1981 Census has been kept undisturbed in the 1991 Census.

In the 1981 Census, the areas which were annexed statutorily to the urban components of SUA from outside its boundary were accommodated within the SUA. The boundary of SUA was also adjusted to bring outgrowths (OGs) of UAs within the limits of the relevant SUA. In all other cases, the SUA boundary was kept constant. But in the 1991 Census, the boundary of SUA has been kept constant and is not being adjusted as was done in the 1981 Census. In the 1991 Census, where the urban spread of UAs has transcended the boundaries of SUAs or the statutory limit of a town has expanded on account of statutory merger of areas lying outside the limits of SUAs, the data relating to such spill-over urban areas and those lying within the SUA boundary will be presented separately in the tables of Standard Urban Area.

PROCESSING OF DATA

In the 1991 Census, a judicious mix of manual and computer tabulations would be used to bring out the data as quickly as possible. Tables on houses and household amenities based on Houselist will be processed on computer on the basis of a 20 per cent sample of Census houses. Primary Census Abstract for the entire population and also for Scheduled Caste and Scheduled Tribe population, table on ex-servicemen, tables on mother tongue, religion and household composition will be based on the manual processing of Household Schedules on full count in the Regional Tabulation Offices. All other tables based on Individual Slip will be generated on the computer. Most of these tables will be based on 10 per cent sample of Individual Slips of all states with a population of 10 million and above and hundred per cent of Individual Slips in the remaining

States and Union Territories. Special tables for Scheduled Castes and Scheduled Tribes will also be processed on computer on full count.

Absence of in-house computer in the Census Organisation was a major handicap in the processing of the 1981 Census data. An in-house computer MEDHA-930 which corresponds to CYBER 930-11 has been acquired for the processing of the 1991 Census data. It is also programmed to have four Regional Processing Centres at different locations by the end of 1991. There would be 15 Data Entry Centres each having 2 to 10 data entry systems comprising AT/386 micro-computers with 10 terminals each for handling the massive data entry work of the 1991 Census.

A-SERIES : GENERAL POPULATION TABLES

A-SERIES : GENERAL POPULATION TABLES

A-1 Area, houses and population

This is the basic population table of the 1991 Census which furnishes the population by sex for territorial units at different levels separately for rural and urban areas. Besides population, this table also presents the area (in sq. kms.), density of population, number of inhabited and uninhabited villages, number of towns as well as number of occupied residential houses and households for each of the territorial units. The data are presented upto C.D. Block/tehsil level for rural areas and upto town level for urban areas including urban agglomerations. The area figures for States/Union Territories and districts are as computed by the Surveyor General of India and at lower levels below district the area figures are as supplied by the State Directors of Land Records or other local authorities.

This table has three appendices.

Appendix-1

This appendix shows the 1991 territorial units upto C.D. Block/tehsil level and their constituent units as at the 1981 Census indicating the changes, viz., areas added to and areas taken away from the corresponding 1981 jurisdiction of the units.

Appendix-2

This appendix gives number of villages with 5,000 population and over and their total population and number of towns with

population below 5,000 and their total population. Normally places with population exceeding 5,000 are declared as "town" if they meet the prescribed norms and places with less than 5,000 population are treated as villages. However, certain places with population below 5,000 have also been treated as towns in the Census while certain places with population over 5,000 have not been treated as towns. The number and population of such places are shown in this appendix.

Appendix-3

This appendix gives the number of Houseless and Institutional households and their population out of the total households and their population by sex presented in the main Table A-1. This appendix is presented upto the C.D. Block/tehsil level for rural areas and upto town level for urban areas including urban agglomerations.

A-2 Decadal variation in population since 1901

This table presents the population of territorial units upto district level from 1901 to 1991 and the decadal variation. The population figures for all the previous censuses in this table are adjusted to the 1991 jurisdiction.

This table has an appendix.

Appendix

This appendix gives for each State, Union Territory and district the 1981 area and population according to the territorial jurisdiction in 1981 and the 1981 population according to the 1991 jurisdiction. It also gives area and population according to the 1991 jurisdiction alongwith net increase or decrease of population purely due to the jurisdictional changes.

A-3 Villages classified by population size

This table gives the distribution of villages by population size. It also gives the population of villages in each size class by sex. This table is presented upto tehsil level.

A-4 Towns and urban agglomerations classified by population in 1991 with variation since 1901

This table gives all the towns including urban agglomerations of 1991, their population by sex since 1901 and its decadal variation. The towns/urban agglomerations are arranged in descending order of their 1991 population and are shown under the six population size classes : I-Population over 100,000; II-Population 50,000 to 99,999; III-Population 20,000 to 49,999; IV-Population 10,000 to 19,999; V-Population 5,000 to 9,999; and VI-Population less than 5,000. Data are also presented under urban agglomerations for each of their constituent units. The table, therefore, shows the trend of population growth of each town/urban agglomeration since the beginning of the century.

This table has four appendices.

Appendix-1

This appendix gives the new towns of 1991 which were not treated

as towns in 1981 and also the towns of 1981 which have been declassified as rural in 1991. For the new towns the area as of 1991 and for the declassified towns the area as of the 1981 Census are presented. The population of these areas in 1981 and 1991 are also shown in the appendix. This appendix shows the change in rural/urban status of places between 1981 and 1991.

Appendix-2

This appendix gives places with less than 5,000 population treated as towns for the first time in 1991 and their area and population.

Appendix-3

This appendix gives towns of 1981 with population less than 5,000 which have been declassified as rural in 1991 and their area and population in 1981.

Appendices 2 and 3 indicate the change in rural/urban status of places with less than 5,000 population from 1981 to 1991.

Appendix-4

This appendix gives the list of towns which have undergone change in area between 1981 and 1991, their area and population at the two censuses, with reason for changes in area.

A-5 Standard Urban Areas

This table gives for Standard Urban Areas and their rural and urban components, the area, density, number of occupied residential houses, number of households and the population by sex at the 1991 Census and also the population at the 1961, 1971 and 1981 censuses. This table also gives the Houseless and Institutional

households and their population in such areas. The table also gives similar data for the spill over urban areas of the Standard Urban Area (SUA) in case urban agglomeration or town/city has transcended the boundary of SUA due to statutory annexation or linkage of out-growth with urban area within SUA. The table thus shows the population growth of the SUAs for the three decades from 1961.

Union/State Primary Census Abstract

The Union Primary Census Abstract will give data at State/Union Territory and district level, while the State Primary Census Abstract will include data at State/Union Territory, district, tehsil, C.D. Block and town level.

The Primary Census Abstract gives for each territorial unit the number of occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, literates, main workers by nine broad industrial categories of main activity, marginal workers and non-workers by sex. It, therefore, indicates the basic socio-economic characteristics of the population for the territorial units.

The Primary Census Abstract will also be prepared for total Scheduled Castes and Scheduled Tribe population separately at

C.D. Block and tehsil level in rural areas and at town level in urban areas.

For the first time, the population in age group 0-6 will also be presented sex-wise. This will enable data users to compute more realistic literacy rate, as the 1991 Census has treated all persons below 7 years of age as illiterate at the time of counting.

Urban/Village Primary Census Abstract

This abstract gives the same information as available in the Union/State Primary Census Abstract for villages and wards of towns. The villages and towns will be arranged according to the Community Development Blocks. Apart from tehsil total, total for Community Development Block falling within the tehsil or part of the Community Development Block falling in the tehsil will also be presented. The population in the age-group 0-6 will also be indicated by sex.

Urban Primary Census Abstract has an appendix also.

Appendix

The appendix to the Urban Primary Census Abstract gives at urban enumeration block level the total population and Scheduled Caste and Scheduled Tribe population.

A-1 AREA, HOUSES AND POPULATION

Location Code No.	Name of Town/Ward/ Urban Block	Total Population	Scheduled Castes	Scheduled Tribes
1	2	3	4	5

B-SERIES : GENERAL ECONOMIC TABLES

B-SERIES : GENERAL ECONOMIC TABLES

Most of the B-Series tables are based on a 10 per cent sample of Individual Slips. However, there will be 100 per cent data entry of workers engaged in household industry (HHI) and other work (OW), marginal workers and non-workers seeking/available for work in order to provide more reliable and detailed data at lower levels. As such, some of the B-Series tables on these characteristics will be on full count.

It may be noted that B-Series tables will be brought out in two stages. In stage I, tables based on a 10 per cent sample of Individual Slips would be brought out and in stage II, the tables based on full count would be brought out. Tables to be brought out in stage I have been indicated by the word 'S' to denote sample within brackets after the table number. Tables to be brought out in stage II have been indicated by word 'F' to denote full count, added in brackets after the table number.

In the presentation of the economic tables some standard groupings of population characteristics have been adopted.

The broad industry groupings for main activity and other work of main workers and work of marginal workers are :

- I Cultivators
- II Agricultural Labourers
- III Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
- IV Mining and Quarrying.

V Manufacturing, Processing, Servicing and Repairs

(a) in Household Industry

(b) Other than Household Industry

VI Constructions

VII Trade and Commerce

VIII Transport, Storage and Communications

IX Other Services

The age-groups adopted for these tables are 5-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-49, 50-59, 15-59, 60+ and 'age not stated'. While in the 1981 Census the data were presented for age group 0-14, in 1991 Census these will be presented for age group 5-14. For data users' convenience sub-totals for ages 15-59 will also be given.

The educational levels are grouped in the following two categories :

1. Detailed Educational levels

Illiterate

Literate (without educational level)

Primary

Middle

Matriculation/Secondary

Higher Secondary/Intermediate/Pre-University/Senior Secondary

Non-technical diploma or certificate not equal to degree
 Technical diploma or certificate not equal to degree
 Graduate degree other than technical degree
 Post-graduate degree other than technical degree
 Technical degree or diploma equal to degree or post-graduate degree

- (i) Engineering and Technology
- (ii) Medicine
- (iii) Agriculture and Dairying
- (iv) Veterinary
- (v) Teaching
- (vi) Others

2 Broad Educational levels

Illiterate
 Literate (without educational level)
 Primary
 Middle
 Matriculation/Secondary
 Higher Secondary/Intermediate/Pre-University/Senior Secondary
 Non-technical diploma or certificate not equal to degree
 Technical diploma or certificate not equal to degree
 Graduate and above

The equivalent levels of education have been clubbed under appropriate level.

The following B-Series tables will be generated.

B-1(S) Main workers, marginal workers, non-workers and those non-workers seeking/available for work classified by age and sex (Sample)

This table gives the break-up of the population by age and sex into "main workers", "marginal workers", "non-workers" and "those seeking/available for work among non-workers", separately for total, rural and urban areas at state, district and city level. This is the basic economic table indicating the economic activity status of the population by age and sex. This table corresponds to Table B-1 of the 1981 Census prepared on the basis of a 20 per cent sample.

B-2(S) Main workers classified by industrial category, age and sex (Sample)

This table gives the classification of main workers by age and sex into four broad industrial categories viz., cultivators, agricultural labourers, workers engaged in household industry and other workers for total, rural and urban areas at state, district and city level. It shows the age and sex composition of main workers in the four broad industrial categories.

B-2(F) Main workers other than cultivators and agricultural labourers classified by industrial category, age and sex (Full count)

This table gives the classification of main workers other than cultivators and agricultural labourers, by age and sex into broad industrial categories III to IX. Table B-2 (S) prepared

on sample and table B-2 (F) prepared on full count will together correspond to Table B-3 of the 1981 Census, which was prepared on the basis of a 20 per cent sample, with the exception that table B-2 (F) presents data at Community Development Block level.

B-3(S) Main workers classified by industrial category, educational level and sex (Sample)

This table gives the educational level of main workers by sex in each of the four broad industrial categories viz., cultivators, agricultural labourers, workers engaged in household industry and other workers. The data are presented for total, rural and urban areas at state and district level. The broad educational levels are presented in this table.

B-3(F) Main workers other than cultivators and agricultural labourers classified by industrial category, educational level and sex (Full count)

This table gives the educational level of main workers other than cultivators and agricultural labourers by sex in broad industrial categories III to IX. The data are presented for total, rural and urban areas at state, district and city level. The detailed educational levels are presented in this table. Table B-3 (S) prepared on sample basis and Table B-3 (F) prepared on full count basis together correspond to Table B-4 of the 1981 Census which was prepared on the basis of a 20 per cent sample, at state and district level.

B-4(S) Main workers by age, sex and educational level (Sample)
Parts

A and B This table gives the age, sex and educational level composition of main workers. Part A of the table presents the data for urban areas and Part B for rural areas at state and district

level. The broad educational levels are presented in this table. This table corresponds to Table B-5 Parts A and B of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-5(S) Main workers with other work classified by industrial category of other work and main activity (Sample)

This table gives separately for total, rural and urban areas at state and district level, the break-up of main workers engaged in other work also. The main workers have been classified by cultivation, agricultural labour, household industry and other work. The 'other work' of the main workers has been classified by nine broad industrial categories. This table indicates the industrial composition of other work of main workers engaged also in secondary activity.

B-6(F) Marginal workers classified by industrial category of work and main activity (Full count)

This table gives separately for total, rural and urban areas at state and district level, the break-up of marginal workers by nine broad industrial categories. The marginal workers in each industrial category have been further classified by their main activity such as those in household duties or students, etc. This table indicates the industrial composition of marginal workers by their main activity.

B-7(F) Main workers excluding cultivators and agricultural labourers with other work classified by industrial category of other work and main activity (Full count)

This table gives separately for total, rural and urban areas at state and district level, the break-up of main workers in household industry and non-household industry, trade, busi-

ness or service engaged in other work also by nine broad industrial categories of other work. Further break-up of such main workers is given by sections of National Industrial Classification, 1987. This table indicates the industrial composition of other work and of main workers engaged in household industry and non-household industry, trade, business or service.

Tables B-5(S), B-6(F) and B-7(F) together correspond to Table B-6 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-8 (F) Marginal workers by industrial category, age and sex (Full count)

This table presents the break-up of marginal workers by age and sex into nine broad industrial categories of marginal work. The data are presented by total, rural and urban areas at state and district level. This table corresponds to Table B-7 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-9(F) Marginal workers by industrial category, educational level and sex (Full count)

This table gives the educational level of marginal workers by sex in each of the nine industrial categories of marginal work for total, rural and urban areas at state and district level. The detailed educational levels are presented in this table. This table corresponds to Table B-8 Parts A and B of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-10(S) Non-workers by main activity, age and sex (Sample)

This table gives the cross-classification of non-workers by their main activity (Students; Household duties; Dependents; Retired, rentiers and persons of independent means; Beggars, vagrants; etc.; Inmates of penal, mental and charitable institutions and others), age and sex. The information is presented separately for total, rural and urban areas at state and district level. It shows the age composition of non-workers for each main activity group. This table partly corresponds to Table B-22 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-11(S) Non-workers by main activity, educational level and sex (Sample)

This table gives the cross-classification of non-workers by their main activity (Students; Household duties; Dependents; Retired, rentiers and persons of independent means; Beggars, vagrants, etc.; Inmates of penal, mental and charitable institutions and others), educational level and sex. The information is presented separately for total, rural and urban areas at state and district level. It gives the educational level of non-workers separately for each main activity group. The detailed educational levels have been adopted for this table.

B-12(F) Non-workers seeking/available for work and those among them who never worked before classified by age, sex and educational level (Full count)

This table gives the educational level composition of non-workers seeking/available for work and those among them

who never worked before by age and sex. The data will be presented separately for total, rural and urban areas at state and district level. It also gives data for cities/UAs with a population of one million and above. The detailed educational levels have been adopted in this table. The table partly corresponds to Table B-10 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-13(S) Female workers classified by industrial category and marital status (Sample)

This table gives the distribution of female main and marginal workers by four broad industrial categories and marital status separately for total, rural and urban areas at state level. This shows the differential participation of women of different marital status in economic activity grouped under four broad industrial categories. This table partly corresponds to Table B-11 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-13(i)(F) Female main workers other than cultivators and agricultural labourers by industrial category and marital status (Full count)

This table gives the distribution of female main workers other than cultivators and agricultural labourers by industrial categories III to IX and marital status separately for total, rural and urban areas at state level.

B-13(ii)(F) Female marginal workers classified by industrial category and marital status (Full count)

This table gives the distribution of female marginal workers by nine broad industrial categories and marital status separately for total, rural and urban areas at state level. This

is for the first time that such a table for marginal workers among females is being presented.

B-14(S) Industrial classification of main workers other than cultivators and agricultural labourers by sex and by section, division and group (Sample)

This is the basic table which gives the industrial classification of main workers other than cultivators and agricultural labourers, by sections, divisions and groups of the National Industrial Classification, 1987. This table presents the data for all areas and for urban areas at state level by sex. It shows the participation of main workers in various Industrial sectors of economy. This table corresponds to Table B-12 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-14(F) Industrial classification of main workers and marginal workers other than cultivators and agricultural labourers by sex and by section, division and group (Full count)

This table gives the industrial classification of main workers and marginal workers other than cultivators and agricultural labourers, by sections, divisions and groups of the National Industrial Classification, 1987. This table presents the data for all areas and for urban areas at state and district level by sex. This is for the first time that such a detailed classification for marginal workers is being presented.

B-15(S) Main workers in manufacturing, processing, servicing and repairs by household industry and non-household industry (Sample)

This table gives the break-up of main workers in manufacturing, processing, servicing and repairs by household and

non-household industry in each division and group of National Industrial Classification, 1987. It shows the participation of main workers engaged in manufacturing, processing, servicing and repairs separately in the household and non-household sectors for all areas and urban areas at state level. This table corresponds to Table B-13 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-15(i)(F) Main workers in manufacturing, processing, servicing and repairs by household industry and non-household industry (Full count)

This table will be prepared on full count. The format of this table is the same as that of Table B-15(S). The only difference is that the full count table will be prepared at state and district level while Table B-15 (S) will be presented on sample basis only at state level.

B-15(ii)(F) Marginal workers in manufacturing, processing, servicing and repairs by household industry and non-household industry (Full count)

This table gives information similar to those contained in Table B-15(i)(F) for marginal workers on full count at state and district level.

B-16(S) Industrial classification of main workers in manufacturing, processing, servicing and repairs on household industry basis by sex and class of worker (Sample)

This table gives the break-up of main workers in household industry by employment status as employer, single worker and family worker for each section and division of National Industrial Classification, 1987. It shows the employment

status of main workers engaged in manufacturing, processing, servicing and repairs in the household sector. This table will be prepared for total, rural and urban areas at state level and corresponds to Table B-14 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-16(F) Industrial classification of main and marginal workers in manufacturing, processing, servicing and repairs on household industry basis by sex and class of worker (Full count)

This table gives for marginal workers, on a full count basis, data similar to that contained in Table B-16(S) for main workers on a sample basis. This table has been prepared for total, rural and urban areas at state, district and city level.

B-17(S) Classification of main workers in non-household industry, trade, business, profession or service by class of worker, age and sex (Sample)

This table gives the break-up of main workers, other than cultivators, agricultural labourers and those engaged in household industry, by age into employers, employees, single workers and family workers. This shows the employment status of main workers other than cultivators, agricultural labourers and those engaged in household industry, by age groups. The data in this table will be presented for all areas and urban areas at state level. This table corresponds to Table B-15 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-17(F) Classification of main workers in non-household industry, trade, business, profession or service by class of worker, age and sex (Full count)

This table gives data on full count. The format of this table

is the same as that of Table B-17(S). The only difference is that this table will be prepared at state and district level while Table B-17(S) will be prepared at state level only.

B-18(S) Industrial classification of main workers in non-household industry, trade, business, profession or service by class of worker and sex (Sample)

This table gives break-up of main workers other than cultivators, agricultural labourers and those engaged in household industry in each section and division of National Industrial Classification, 1987 into employers, employees, single workers and family workers. It shows the employment status of main workers in each section and division of industry, other than cultivation and agricultural labour and workers engaged in household industry. This table gives data for all areas and urban areas at state level. This table corresponds to Table B-16 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-18(F) Industrial classification of main and marginal workers in non-household industry, trade, business, profession or service by class of worker and sex (Full count)

This table shows the classification of main workers and marginal workers in non-household industry, trade, business, profession or service by industry and employment status. The industrial classification has been presented by sections and divisions of National Industrial Classification, 1987, at state and district level for all areas and urban areas. This table is also presented at city level.

B-19(F) Occupational classification of main workers other than cultivators and agricultural labourers by industrial category and sex (Full count)

This table gives the occupational classification of main workers other than cultivators and agricultural labourers by industrial category and sex. The National Classification of Occupation (NCO), 1968 will be adopted with some modifications for this purpose. The occupational classification is presented at family (3 digit) level. The data are presented for all areas and urban areas at state level. This is a basic table showing the distribution of main workers by occupation. This table corresponds to Table B-18 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-20(S) Occupational classification of main workers in non-household industry, trade, business, profession or service by class of worker and sex (Sample)

This table gives the cross-classification of main workers other than cultivators, agricultural labourers and those engaged in household industry by sex, occupation and class of worker. The occupational detail is given upto group (2 digit) level of the National Classification of Occupation, 1968. Data are separately presented for all areas and urban areas at state level. This table shows the employment status of main workers other than cultivators, agricultural labourers and those engaged in household industry by various occupations. This table corresponds to Table B-19 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-20(F) Occupational classification of main workers in non-household industry, trade, business, profession or service by class of worker and sex (Full count)

This table will be prepared on full count. The format of this table is the same as that of Table B-20(S) prepared on sample basis. The only difference is that this table will be prepared at state, district and city level while the sample table will be prepared at state level only.

B-21(F) Occupational classification of main workers and marginal workers other than cultivators and agricultural labourers by sex and age (Full count)
Parts A and B

This table gives the cross-classification of main and marginal workers other than cultivators and agricultural labourers by occupation, age and sex. The occupational detail is given upto group (2 digit) level of the National Classification of Occupation, 1968. It shows the age and sex composition of main and marginal workers engaged in various occupations other than cultivation and agricultural labour. Parts A and B of this table present the data for urban and rural areas separately at state and district level. This table partly corresponds to Table B-20 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-22(F) Occupational classification of main workers other than cultivators and agricultural labourers by sex and educational level (Full count)

This table gives the cross-classification of main workers other than cultivators and agricultural labourers by sex, occupation and educational level. The occupational detail is given

upto group (2 digit) level of the National Classification of Occupation, 1968. The data are presented for the detailed educational levels in all areas and urban areas at state and district level. This table shows the educational composition of main workers other than cultivators and agricultural labourers by occupation. This table corresponds to Table B-21 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-23(F) Marginal workers by main activity, age and sex (Full count)

This table gives the cross-classification of marginal workers by their main activity (Students; Household duties; Dependents; Retired, rentiers and persons of independent means; Beggars, vagrants, etc.; Inmates of penal, mental and charitable institutions and Others), age and sex. The data are presented separately for total, rural and urban areas at state and district level. It shows the age composition of marginal workers for each main activity group. The question relating to seeking/available for work was not asked from marginal workers at the 1991 Census. This table partly corresponds to Table B-22 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

B-24(F) Non-workers seeking/available for work classified as worked before and never worked before by main activity, age and sex (Full count)

This table gives the cross-classification of non-workers seeking/available for work, those who worked before and those who never worked before by their main activity (Students; Household duties; Dependents; Retired, rentiers and persons of independent means; Beggars, vagrants, etc.; Inmates of

penal, mental and charitable institutions and Others), age and sex. The data are presented for total, rural and urban areas at state and district level. The question relating to seeking/available for work was asked only from non-workers at the 1991 Census unlike at the 1981 Census where it was canvassed for both marginal and non-workers. It shows the age composition of those who are

in search of employment among non-workers for each main activity group. These data on non-workers seeking/available for work who have never worked before will provide the magnitude of the fresh entrants to labour force. This table partly corresponds to Table B-22 of the 1981 Census which was prepared on the basis of a 20 per cent sample.

C-SERIES : SOCIAL AND CULTURAL TABLES

C-SERIES : SOCIAL AND CULTURAL TABLES

All the tables of this series except Tables C-7, C-9 and C-10 are based on a 10 per cent sample of Individual Slips. Tables C-7, C-9 and C-10 are based on full count. The latter three tables will be compiled manually.

In C-Series tables educational levels are presented in the following two categories :

1. Detailed Educational Levels

Illiterate

Literate (without educational level)

(i) Non-formal

(ii) Formal

Primary

Middle

Matriculation/Secondary

Higher Secondary/Intermediate/Pre-University/Senior Secondary

Non-technical diploma or certificate not equal to degree

Technical diploma or certificate not equal to degree

Graduate degree other than technical degree

Post-graduate degree other than technical degree

Technical degree or diploma equal to degree or post-graduate degree

(i) Engineering and Technology

(ii) Medicine

(iii) Agriculture and Dairying

(iv) Veterinary

(v) Teaching

(vi) Others

2. Broad Educational Levels

Illiterate

Literate (without educational level)

(i) Non-formal

(ii) Formal

Primary

Middle

Matriculation/Secondary

Higher Secondary/Intermediate/Pre-University/Senior Secondary

Non-technical diploma or certificate not equal to degree

Technical diploma or certificate not equal to degree

Graduate and above

The equivalent levels of education have been clubbed under appropriate level.

The following C-Series tables will be generated :

C-1 Age, sex and marital status

This table presents the age, sex and marital status composition of the population separately for total, rural and urban areas at state and district levels. The table is presented in 5-year age groups. Data have been presented for the age group 15-44 also. This table is the same as Table C-1 of the 1981 Census.

C-2 Age, sex and level of education and

C-2 This table presents the educational level of the population by age and sex at state and district levels. The data are also presented for cities/urban agglomerations with a population of one million and above. While Table C-2 presents data by broad levels of education, Table C-2 Part A presents data by detailed educational levels. Data are presented for the single year ages 7, 8, 9, 10, 11, 12, 13 and 14 and the age-groups are 0-6, 15-19, 20-24, 25-29, 30-34, 35-59, 60+ and 'age not stated'. Part A of the table presents the data for urban areas only. This table corresponds to Table C-2 of the 1981 Census.

C-3 Attending school/college by completed level of education, Parts age and sex

A and

B This table gives the completed educational level of persons attending school/collage by age and sex. While Table C-2 gives the educational level for the total population, Table C-3 gives the educational level for only those who are attending school/college. The table is presented for the single year ages 5, 6, 7, 8, 9, 10, 11, 12, 13 and 14 and for age-groups 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-59, 60+ and 'age not stated'.

Parts A and B of the table present data for urban and rural areas respectively at state and district levels. While the Table C-3 Part A presents data by detailed educational levels of education, Table C-3 Part B presents data by broad educational levels. This table corresponds to Table C-3 of the 1981 Census.

C-4 Population (ages 5-16) by single year of age, school attendance and economic activity

This table gives the population at each of the ages 5-16 attending school and those not attending school and among them "main workers", "marginal workers" and "non-workers". Totals have also been presented for age groups 6-10, 11-13, 14-16 and 5-16. This table is useful in studying the prevalence of child labour/children in work in relation to school attendance. The table presents data separately for rural and urban areas at state, district and city levels. This table corresponds to table C-4 of the 1981 Census.

C-5 Single year age returns

This table presents the single year age distribution of the population by sex. It is presented upto the age of 99 and 100+. The table presents the information separately for total, rural and urban areas at state level. This table is used for the construction of life tables. This table corresponds to Table C-5 of the 1981 Census.

C-6 Population by five year age-group and sex

This table gives the age and sex composition of the population separately for total, rural and urban areas at state and district levels. It gives the 5-year age-group totals for Table C-5. The age-groups presented in this table are 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79, 80-84, 85-89, 90-94, 95-99, 100+ and 'age not stated'. This table corresponds to Table C-6 of the 1981 Census.

C-7 Mother tongue (Alphabetical order)

This table gives the distribution of population, males and females by mother tongue separately for total, rural and urban areas at state, district, tehsil and town levels. The mother tongues will be arranged in alphabetical order. In the All-India volume, under each "mother tongue" the population figures will be presented area-wise.

This table will be prepared on full count basis manually from Household Schedules and will be based on the linguistic classification of mother tongues.

C-8 Bilingualism

This table gives for each mother tongue the number of speakers, who are bilingual among them. The latter have been further classified according to the two additional languages spoken. The data will be presented only for all areas, that is, rural and urban combined at state level. This table is based on a 10 per cent sample.

C-9 Religion

This table gives the distribution of population by sex and religion for total, rural and urban areas separately for state, district, tehsil and town levels. The figures of six major religious communities viz., Hindus, Muslims, Christians, Sikhs, Buddhists and Jains are presented in this table in alphabetical order. This table has an appendix and an annexure.

Appendix

This appendix shows the break-up of "other religions and persuasions" indicated in Table C-9. The data are presented at state

and district levels for total, rural and urban areas.

Annexure

This annexure shows the details of sects/beliefs/religions clubbed under the major religions presented in Table C-9 for total, rural and urban areas at state and district levels.

The table, appendix and annexure are based on full count and have been prepared manually from the Household Schedules.

C-10 Households by composition and size

This table presents the composition of households by size at state and district levels separately for rural and urban areas and for cities with a population of one lakh and above. This table provides the number of single-person households, nuclear households, supplemented nuclear households, sub-nuclear households, supplemented sub-nuclear households, collateral joint households, supplemented collateral joint households, lineal joint households, supplemented lineal joint households, lineal collateral joint households, supplemented lineal collateral joint households and others by size, separately for male and female headed households. This table excludes institutional households. This table indicates the changing pattern of household composition in rural and urban areas and in cities with a population of one lakh and above in the context of the changing economy and other urban conditions.

Table C-10 of the 1991 Census is an improvement over Table C-10 of the 1981 Census and gives male and female headed households by household size for each type of household.

This table is also based on full count and will be prepared manually from the Household Schedules.

Head	Head	Head	Head	Head	Head
-	12	13	14	15	16
					17

Note : This table excludes Institutional Households.

* Cities with population of one lakh and above.

** To be classified as per the description given in the following page. Domestic servant will not be considered for reckoning the type of household.

DESCRIPTION OF HOUSEHOLDS

1. Single person household.
2. Nuclear family : a couple with or without unmarried children.
3. Supplemented nuclear family : a nuclear family plus one or more unmarried, separated or widowed relatives of the parents, other than their unmarried children.
4. Subnuclear family : a fragment of a former nuclear family. Typical examples are the widow with unmarried children, or the widower with unmarried children, or siblings-whether unmarried, or widowed, separated, or divorced--living together.
5. Supplemented subnuclear family : a group of relatives, members of a formerly complete nuclear family, plus some other unmarried, divorced, or widowed relative who was not a member of the nuclear family. For example, a widow and her unmarried children plus her widowed mother-in-law.
6. Collateral joint family : two or more married couples between whom there is a sibling bond-usually a brother-brother relationship-plus unmarried children.
7. Supplemented collateral joint family : a collateral joint family plus unmarried, divorced, or widowed relatives. Typically, such supplemental relatives are the widowed mother of the married brothers, or the widower father, or an unmarried sibling.
8. Lineal joint family : two couples between whom there is a lineal link, usually between parents and married son, sometimes between parents and married daughter.
9. Supplemented lineal joint family : a lineal joint family plus unmarried, divorced or widowed relatives who do not belong to either of the lineally linked nuclear families; for example, the father's widower brother or the son's wife's unmarried brother.
10. Lineal collateral joint family : three or more couples linked lineally and collaterally. Typically, parents and their two or more married sons, plus the unmarried children of the three or more couples.
11. Supplemented lineal collateral joint family : a lineal collateral joint family plus unmarried, widowed, separated relatives who belong to none of the nuclear families lineally and collaterally linked, for example, the father's widowed sister or brother, or an unmarried nephew of the father.
12. Others : those not covered in any type mentioned above at Sl. No. 1 to 11.

D-SERIES : MIGRATION TABLES

D-SERIES : MIGRATION TABLES

All D-Series tables, except tables D-12 and D-14, are based on a 10 per cent sample of the Individual Slips. Tables D-12 and D-14 are based on full count. In these tables, generally, the following groupings have been adopted for age, educational level and duration of residence :

Age -- 0-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-59, 60+ and 'age not stated'.

Educational level -- Illiterate, literate but below matric, matric but below graduate, technical diploma or certificate not equal to degree, graduate and above other than technical degree, technical degree or diploma equal to degree or post-graduate degree.

Duration of residence -- Less than 1 year, 1-4 years, 5-9 years and 10 years and above.

Following D-Series tables will be generated :

D-1 Population classified by place of birth

This table gives the distribution of population by place of birth and sex. Here, place of birth is classified as place of enumeration, elsewhere in the district of enumeration, other districts of the state, other states, outside India in specified countries of Asia, Europe, Africa, Americas and Oceania. In the district level tables, the data for individual countries will not be printed. Those born within India are also grouped by current rural/urban status of the place of

birth. The data are presented for total, rural and urban areas at state and district levels.

This table corresponds to Table D-1 of the 1981 Census.

D-2 Migrants classified by place of last residence and duration of residence in place of enumeration

This table is the basic table on migration by place of last residence showing intra-district, inter-district, intra-state and inter-state migratory streams and migration from abroad by sex and duration of residence at the place of enumeration at state level.

Places of last residence are grouped as within the district of enumeration, in other districts of the state of enumeration, other states in India or outside India in specified countries of Asia, Europe, Africa, Americas and Oceania. The migrants within India are classified by rural/urban status of last residence. The data are presented separately for the rural and urban areas of the state. The migrants have been classified by different durations of residence at the place of enumeration. The durations of residence in this table are less than 1 year, 1-4 years, 5-9 years, 10-19 years and 20 years and above. This table corresponds to Table D-2 of the 1981 Census.

This table has an appendix.

Appendix

This appendix is similar to the main table and gives information

in an abridged form at the district level. Migrants from individual states and countries will not be shown in this appendix.

D-3 Migrants by place of last residence, duration of residence and reason for migration

This table presents migrants from within the district, from other districts within the state, from other states and from other countries by sex, duration of residence and reason for migration separately for rural and urban areas at the state level and also for each city with one million population and above. Thus, this table presents the break-up of the figures of Table D-2 by reasons for migration -- 'employment', 'business', 'education', 'family moved', 'marriage', 'natural calamities' like drought, floods, etc. and 'others'. The duration of residence will be less than 1 year, 1-4 years, 5-9 years and 10+ years. This table corresponds to Table D-3 of the 1981 Census.

D-4 Main workers, marginal workers, non-workers, those non-workers seeking/available for work and literacy from among migrants reporting 'employment' as reason for migration by age, sex and duration of residence

This table presents the age, sex composition, literacy and economic status of migrants reporting 'employment' as reason for migration by duration of residence at the place of enumeration, separately for total, rural and urban areas at state level and for each city with a population of half a million and above. The duration of residence has been classified as less than 1 year, 1-4 years and 5+ years. The table gives the break-up of such migrants into main workers, marginal workers, non-workers and also those among non-workers seeking/available for work by age-group. This table corresponds to Table D-4 of the 1981 Census.

D-5 Migrants from rural areas within the state of enumeration reporting 'employment' as reason for migration by age, sex, educational level and duration of residence - Urban

This table presents the age, sex and educational level of migrants reporting 'employment' as reason for migration from rural to urban areas of the state by duration of residence at the place of enumeration. The duration of residence will be less than 1 year, 1-4 years, 5-9 years and 10+ years. This table will be presented at state level and for cities with a population of one million and above.

This table together with Tables D-6, D-7 and D-8 presents the migration for 'employment' from rural to urban areas and urban to urban areas within the state and from rural and urban areas of other states to urban areas of the state of enumeration. These tables will be prepared for each city with a population of one million and above as well as at the state level. This table corresponds to Table D-5 of the 1981 Census.

D-6 Migrants from urban areas within the state of enumeration reporting 'employment' as reason for migration by age, sex, educational level and duration of residence - Urban

This table presents the same information as in Table D-5 in the same format for migrants from other urban areas within the state of enumeration. This table corresponds to Table D-6 of the 1981 Census.

D-7 Migrants from rural areas outside the state of enumeration reporting 'employment' as reason for migration by age, sex, educational level and duration of residence - Urban

This table presents the same information in format of Table D-5 for migrants from rural areas of other states to urban areas

of the state of enumeration and corresponds to Table D-7 of the 1981 Census. The table also presents similar data for each city with a population of one million and over.

D-8 Migrants from urban areas outside the state of enumeration reporting 'employment' as reason for migration by age, sex, educational level and duration of residence - Urban

This table is similar to Table D-5 and presents migrants from urban areas of other states to urban areas of the state of enumeration and corresponds to Table D-8 of the 1981 Census. The table also presents similar data for each city with a population of one million and over.

D-9 Migrants reporting 'employment' as reason for migration, now seeking/available for work by age, sex, educational level and duration of residence - Urban

This table presents the age, sex and educational level of those non-workers seeking/available for work among migrants to urban areas for 'employment' by duration of residence at the place of enumeration. The table also presents similar data for each city with half a million population and above. The data are presented for durations of residence less than 1 year, 1-4 years and 5+ years. This table corresponds to Table D-9 of the 1981 Census.

D-10 Migrants by place of last residence to cities by reason for migration

This table presents the data on migrants to each city from urban or rural areas. Place of last residence has been classified as within the district, other districts of the state, other states and other countries. This table also shows migrants by reason for migration, such as employment, business, education, family moved, marriage, natural calamities like drought, floods, etc. and others. This is a

new table and will be presented for each city with a population of one lakh and above.

D-11 Migrant workers by place of last residence by industrial category

This table presents the intra and inter-district, inter-state and international migrant workers by nine broad industrial categories. This table will be presented for state, district and each city with a population of one lakh and above. Classification of migrant workers by industrial category shows how the migrant workers are attracted and absorbed by different industries. The place of last residence and place of enumeration enables one to study all the four migration streams of workers. This is a new table.

D-12 Migrant workers (other than cultivators and agricultural labourers) from place of last residence by occupational division (Full count)

This table presents for state, district and for each city with a population of one lakh and above, the occupational divisions of migrant workers from rural and urban areas within the district, other districts of the state, beyond the state of enumeration and from abroad. It indicates the occupations which attract and absorb migrant workers.

D-13 Migrants from place of last residence by age, sex, educational level and duration of residence

This table presents the age, sex and educational level of migrants to state and each city with a population of half a million and above by duration of residence at the place of enumeration. It indicates the demographic and cultural profile of migrants during various periods. Data are presented for the age groups 0-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-59, 60+ and 'age not stated' for

durations of residence of less than 1 year, 1-4 years, 5-9 years and 10+ years. This table partly corresponds to Table D-11 of the 1981 Census.

D-14 Migrant workers (other than cultivators and agricultural labourers) reporting 'employment' as reason for migration by duration of residence, educational level, occupational division and sex (Full count)

This table presents for total, rural and urban areas at state level and for each city with a population of half a million and above the occupation and educational level of migrant workers reporting 'employment' as reason for migration by duration of residence at the place of enumeration. It indicates the occupations which attract and absorb migrants of different educational levels. Data are presented for the durations of residence of less than 1 year, 1-4 years and 5+ years. This table corresponds to Table D-12 of the 1981 Census

D-15 Persons born in other districts of the state and enumerated in this district

This table gives the population by sex enumerated in this district but born in other districts of the state by district of birth separately for rural and urban areas. The place of birth has been classified as rural and urban. This table corresponds to Table D-13 of the 1981 Census.

D-16 Migrants from place of last residence with duration of residence of 0-9 years by age
Parts A and B

This table gives information on the age composition of migrants who have migrated to the state from the place of last residence and have been residing in the state of enumeration for the period of 0-9 years. The age classification of the migrants is as follows:

All ages, 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60+ and 'age not stated'.

Parts A and B of this table present data for urban and rural areas respectively while in the 1981 Census Parts A and B presented data for males and females respectively.

D-17 Migrants by literacy, main workers, marginal workers and non-workers among them

This table presents the age, sex composition, literacy and economic status of all migrants separately for total, rural and urban areas for state, district and each city with a population of half a million and above. The duration of residence has been classified as less than 1 year, 1-4 years and 5+ years. The table gives break-up of migrants into literates and illiterates and also into main workers, marginal workers and non-workers by age groups.

F-SERIES : FERTILITY TABLES

F-SERIES : FERTILITY TABLES

These tables are based on the 10 per cent sample of Individual Slips.

For F-Series tables duration of marriage will be computed as the present age (recorded in completed years) less age at marriage (also recorded in completed years). Also order of birth last year will be taken as the number of children ever born to the mother.

In all the tables, except Tables F-15 to F-18, Part A relates to urban areas and Part B to rural areas. All the tables will be presented at state level except Tables F-15 to F-18. The latter tables will be presented at the district level.

In these tables some uniform groupings have been adopted, generally, for present age, age at marriage, duration of marriage, educational level and occupation as below :

Present age	Less than 15, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49 and 50+.
Age at marriage	10-11, 12-13, 14-15, 16-17, 18-19, 20-21, 22-23 and 24+.
Duration of marriage	0-4, 5-9, 10-19, 20-29 and 30+ .
Educational level	Illiterate, literate but below middle, Middle but below matric, Matriculate but below graduate, Graduate and above.

Work status and occupation of main workers

The classification of main workers, marginal workers and non-workers has been referred to as 'work status'. Main workers have been further classified into occupations as under :

- Main workers
- (a) Cultivators
 - (b) Agricultural labourers
 - (c) Other main workers
 - (1) Non-manual
 - (2) Manual

Non-manual workers cover the occupational divisions 0-1, 2, 3 and 4 of the National Classification of Occupations, (1968). Manual workers cover all other occupations.

In the tables presented by religion, data are presented for parities 0, 1, 2, 3, 4, 5+ . Similar classification is adopted for birth order and number of surviving children also.

Following F-Series tables will be generated.

F-1 Currently married women by duration of marriage, age at marriage and religion

This table presents the distribution of currently married women by

duration of marriage, age at marriage and religion. This table is useful in deriving the differentials in age at marriage for different marriage cohorts.

F-2 Currently married women by duration of marriage, age at marriage and educational level

This table gives the distribution of currently married women by duration of marriage, age at marriage and educational level. The table is useful in deriving the differentials in age at marriage by duration of marriage and educational level.

F-3 Currently married women by duration of marriage, age at marriage, work status and occupation

This table presents the distribution of currently married women by duration of marriage, age at marriage and work status. Occupations have been presented for main workers. The table is useful in deriving the differentials in age at marriage for currently married women by duration of marriage and occupation.

F-4 Currently married women by present age, religion and births during last year by birth order

This table presents births during last year by birth order and by present age and religion of mother. The currently married women by present age and religion are also given in this table. The table is useful in deriving the age-specific fertility differentials by religion and also by birth order pattern.

F-5 Currently married women by present age, educational level and births during last year by birth order

This table presents births during last year by birth order and present age and educational level of mother. The distribution of currently

married women by present age and educational level are also given in the table. The table is useful in deriving the age-specific fertility differentials by educational level and also by birth order.

F-6 Currently married women by present age, work status, occupation and births during last year by birth order

This table presents the births during last year by birth order and by present age, work status and occupation of mother. The distribution of currently married women by present age and occupation are also given in the table. The table is useful in deriving the age-specific fertility differentials by work status, occupation and birth order.

Tables F-4, F-5 and F-6 are similar to one another and present births last year by religion, educational level and occupation of the mother respectively.

F-7 Ever married women by present age, parity, religion and total number of children ever born by sex

This table presents the distribution of every married woman by present age, parity and religion. The table also gives the total number of children ever born by sex to ever married women by present age and religion. The table is useful in deriving the differentials in average number of children ever born at different ages by religion.

F-8 Ever married women by present age, parity, educational level and total number of children ever born by sex

This table presents the distribution of ever married women by present age, parity and educational level. The table also gives the total number of children ever born by sex to ever married women by present age and educational level. The table is useful in deriving the differentials in average number of children ever born at different ages by educational level.

F-9 Ever married women by present age, parity, work status, occupation and total number of children ever born by sex

This table presents the distribution of ever married women by present age, parity, work status and occupation. It also gives the total children ever born by sex to ever married women by present age and occupation. The table is useful in deriving the differentials in average number of children ever born at different ages by occupation.

F-10 Women by age group, ever married women by present age, number of surviving children, religion and total number of surviving children by sex

This table presents the distribution of women by present age and ever married women by present age, number of surviving children and religion. The table also gives the total number of surviving children by sex by present age and religion of their mother. The table is useful in deriving the differentials by religion in average number of surviving children of ever married women.

F-11 Women by age group, ever married women by present age, number of surviving children, educational level and total number of surviving children by sex

This table presents the distribution of women by present age and ever married women by present age, number of surviving children and educational level. The table also gives the total number of surviving children by sex born to ever married women by present age and educational level. The table is useful in deriving the differentials by educational level in the average number of surviving children of ever married women.

F-12 Women by age group, ever married women by present age, number of surviving children, work status, occupation and total number of surviving children by sex

This table presents the distribution of total women by present age and ever married women by present age, surviving children, work status

and occupation. The table also gives the total number of surviving children by sex born to ever married women by present age and occupation. The table is useful in deriving the differentials by occupation in average number of surviving children of ever married women.

Tables F-10, F-11 and F-12 are similar to each other and present data on the number of surviving children by religion, educational level, work status/occupation of the mother respectively.

F-13 Number of women, number of ever married women, total children ever born and children surviving by sex to ever married women by age, religion and educational level

This table presents the distribution of total number of women by present age, religion and educational level. The table also gives the number of children ever born and the number of children surviving by sex to ever married women by different educational levels within each religion. This table is useful in deriving child mortality differentials by educational levels in different religions.

F-14 Ever married women by number of children ever born, number of male children ever born and number of children surviving by sex

This table presents the distribution of ever married women by number of children ever born, number of male children ever born, number of male children surviving and number of female children surviving. The table presents information on child survival in relation to total children born and sex differentials in child survival of different parities. The table is also useful in inferring the accuracy of responses.

F-15 Ever married women by age at marriage, currently married women by age at marriage and duration of marriage

This table gives at district level the distribution of ever married women by age at marriage. The table also gives the distribution of

currently married women by age at marriage and duration of marriage. The data are presented for rural and urban areas. This is a basic table for analysing the age at marriage at district level.

F-16 **Currently married women by present age and births during last year by birth order**

This table gives at district level the distribution of currently married women by present age. The table also gives the births during last year by birth order and present age of mother. The data are presented for rural and urban areas. This table is useful in deriving current fertility rate at district level.

F-17 **Ever married and currently married women by present age, parity and total number of children ever born by sex**

This table presents at district level the distribution of ever married and

currently married women by present age and parity. The table also gives the number of children ever born by sex to ever married women and currently married women by age. Data are presented for rural and urban areas separately.

F-18 **Ever married and currently married women by present age, number of surviving children and total surviving children by sex**

This table presents at district level the distribution of ever married and currently married women by present age and number of surviving children. The number of surviving children by sex of ever married and currently married women by present age is also given. The data are presented for rural and urban areas separately.

Tables F-16, F-17 and F-18 together are useful in deriving fertility and child mortality levels and differentials by age at district level.

H-SERIES : TABLES ON HOUSES AND HOUSEHOLD AMENITIES

H-SERIES : TABLES ON HOUSES AND AMENITIES AVAILABLE TO HOUSEHOLDS

These tables are based on Houselist and prepared on the basis of a 20 per cent sample of census houses on the computer. As the houseless population was not covered during the Houselisting operations, tables in H-Series exclude houseless population. Following H-Series tables will be generated :

H-1 Census houses and the uses to which they are put

This table gives the total number of census houses, the vacant houses and the distribution of occupied census houses by their use. The various residential and non-residential uses of census houses are grouped as Residence; Shop-cum-residence; Workshop/factory-cum-residence, including household industry; Residences in combination of other uses; Hotels, sarais, dharamshalas, tourists, homes and inspection houses; Shops excluding eating houses; Business houses and offices; Factories, workshops and worksheds; Restaurants, sweetmeat shops and eating places; Places of entertainment and community gathering (panchayat ghar) excluding places of worship; Places of worship (e.g., temple, church, mosque, gurudwara etc.) and other non-residential houses. The data are presented separately for total, rural and urban areas at state, district and city levels. This table gives the housing stock in the country and its uses and corresponds to Table H-1 of the 1981 Census.

H-2 Distribution of census houses by predominant material of roof, wall and floor of census houses

Parts A and B This table gives the material of roof, wall and floor of the census

houses. Parts A and B of the table present the data for urban and rural areas respectively at state and district levels. Part A of the table also presents the data separately for each city. The table shows the quality of the housing stock.

This table has an appendix also.

Appendix

The appendix gives the distribution of households excluding institutional households by predominant material of roof, wall and floor of the residential census houses occupied by them. This appendix corresponds to Table HH-1 of the 1981 Census.

H-3 Households by tenure status, size and number of rooms occupied

This table gives the distribution of households by tenure status, household size and number of rooms occupied for total, rural and urban areas at state, district and city levels. The household sizes used in this table are 1-2 members, 3-5 members, 6-8 members and 9+ members. This table excludes institutional households for whom the tenure status and number of living rooms occupied by them were not collected.

Tables H-3 SC and H-3 ST give similar information for Scheduled Caste and Scheduled Tribe households respectively at state and district levels.

H-4 Households and distribution of 1,000 population by availability of electricity and toilet facilities and tenure status of house occupied

This table gives the distribution of households by tenure status of house occupied and availability of electricity and toilet facilities to the household. This table also shows the distribution of 1,000 population by tenure status of the household and availability of electricity and toilet facilities. The institutional households are included in 'Total' only as the tenure status was not canvassed but information regarding availability of electricity and toilet facilities was collected from such households. The table presents data for total, rural and urban areas separately at state, district, tehsil and town levels.

Tables H-4 SC and H-4 ST give similar information for Scheduled Caste and Scheduled Tribe households respectively for total, rural and urban areas separately at state and district levels.

H-5 Households classified by source of drinking water, availability of electricity and toilet facility

This table gives the cross-classification of households by source of drinking water supply and availability of electricity and toilet facilities for total, rural and urban areas at state, district, tehsil, town levels. The sources of drinking water supply are well, tap, handpump/tubewell, river/canal, tank and others. These have been

further classified as available within the premises and outside the premises of the house. This table indicates the number of households to whom all the three amenities are available, number of households to whom only two facilities are available and those to whom only one facility is available.

Tables H-5 SC and H-5 ST give similar information for Scheduled Caste and Scheduled Tribe households respectively for total, rural and urban areas separately at state and district levels.

H-6 Households by type of fuel used for cooking

This table gives the distribution of households by type of fuel used for cooking. This table includes institutional households. The data are presented separately for rural and urban areas at state, district, tehsil and town levels. The types of fuel used for cooking presented in this table are cowdung-cake, electricity, coal/coke/lignite, charcoal, cooking gas, wood, bio-gas, kerosene and others. This is a new table as the data on the type of fuel used for cooking by the households has been collected for the first time in the 1991 Census.

Table H-6 SC and H-6 ST give the similar information for Scheduled Caste and Scheduled Tribe households respectively for rural and urban areas separately at state and district levels.

H-1 CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT
(20% Sample)

State/ District/ City	Total/ Rural/ Urban	Total number of census houses	Census houses vacant at the time of house- listing	OCCUPIED CENSUS HOUSES USED AS							
				Residence	Shop-cum- residence	Workshop/ Factory- cum- residence including household industry	Resi- dences in com- bination with other uses	Hotels, sarais, dharam- shalas, tourist homes and inspection houses	Shops exclu- ding eating houses	Busi- ness houses and offices	Factories, workshops and work- sheds
1	2	3	4	5	6	7	8	9	10	11	12

OCCUPIED CENSUS HOUSES USED AS			
Restaurants, sweetmeat shops and eating places	Places of enter- tainment and community gathering (Panchayat ghar) excluding places of worship	Places of wor- ship (e.g. Temple, Church, Mosque, Guru- dwara, etc.)	Other non-residential houses
13	14	15	16

H-2 PART A DISTRIBUTION OF CENSUS HOUSES BY PREDOMINANT MATERIAL OF ROOF, WALL AND FLOOR OF CENSUS HOUSES -- URBAN

(20% Sample)

Material of wall	Total census houses	MATERIAL OF ROOF							
		Grass, leaves, reeds, thatch, wood, mud, unburnt bricks or bamboo	Tiles, slate or shingle	Corrugated iron, zinc or other metal sheets	Asbestos cement sheets	Bricks, stone and lime	Stone	Concrete RBC/RCC	All other materials and material not stated

1	2	3	4	5	6	7	8	9	10	11	12

Note: 1. Total number of households in column 3 also includes those households which do not do any cooking.
 2. This table excludes institutional households.

SC-SERIES : SPECIAL TABLES FOR SCHEDULED CASTES

SC-SERIES : SPECIAL TABLES FOR SCHEDULED CASTES

These tables will be generated on the computer on full count. Following are the tables which will be generated :

SC-1 Distribution of scheduled caste population by sex (Caste-wise)

This table gives the population of each scheduled caste by sex for total, rural and urban areas at state and district levels.

SC-2 Main workers classified by industrial category, age and sex (Caste-wise)

This table gives the classification of main workers of each scheduled caste by age and sex into nine broad industrial categories. The age-groups used in this table are : 5-14, 15-34, 35-59, 60+ and 'age not stated'. This table shows the age and sex composition of main workers in each of the nine broad industrial categories. The data will be presented for rural and urban areas at state level.

SC-3 Main workers classified by industrial category, educational level and sex (Caste-wise)

This table gives the educational level of main workers for each scheduled caste by sex in nine broad industrial categories. The data will be presented for rural and urban areas at state level. The educational levels used in this table are : illiterate, literate (without educational level), primary, above primary but upto matriculation/secondary, above matriculation/secondary but below

graduate including non-technical diploma or certificate or technical diploma or certificate not equal to degree and graduate degree and above.

SC-4 Marginal workers classified by industrial category, age and sex (Caste-wise)

This table presents the break-up of marginal workers of each group of scheduled caste by age and sex into nine broad industrial categories. The data will be presented separately for rural and urban areas at state level. The age-groups followed in this table are same as in Table SC-2.

SC-5 Marginal workers classified by industrial category, educational level and sex (Caste-wise)

This table gives the educational level of marginal workers of each group of scheduled caste by sex into nine broad industrial categories. The data will be presented for rural and urban areas at state level. The educational levels presented in this table are same as in Table SC-3.

SC-6 Non-workers seeking/available for work and those among them who never worked before classified by age, sex and educational level (Caste-wise)

This table gives the educational level composition of non-worker scheduled castes seeking/available for work caste-wise and those

among them who never worked before by age and sex. The data will be presented separately for rural and urban areas at state level. The age-groups presented in this table are same as in Tables SC-2 and SC-4. The educational levels followed in this table are: illiterate, literate (without educational level), primary, middle, matriculation/secondary, higher secondary/intermediate/pre-university/senior secondary, non-technical diploma or certificate not equal to degree, technical diploma or certificate not equal to degree and graduate degree and above.

SC-7 Occupational classification of main and marginal workers other than cultivators and agricultural labourers by sex (Caste-wise)

This table gives the occupational classification of main and marginal workers other than cultivators and agricultural labourers by sex in respect of each group of scheduled caste. The National Classification of Occupation (N.C.O.), 1968 is being adopted with some modifications for this purpose. The occupational classification is presented upto the family (three digit) level. The data will be presented separately for rural and urban areas at state and district levels. This is the basic table showing the distribution of main and marginal workers by occupation in respect of each group of scheduled caste.

SC-8 Age, sex and marital status (Caste-wise)

This table presents the age, sex and marital status composition of each group of scheduled caste separately for rural and urban areas at state level. The data will be presented for the age-groups 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+ and 'age not stated'. This table corresponds to Table C-1 prepared for the total population.

SC-9 Age, sex and level of education (Caste-wise)

This table presents the educational level of each group of

scheduled caste by age and sex. The data will be presented for single year ages 7, 8, 9, 10, 11, 12, 13 and 14 and the age-groups 0-6, 15-19, 20-24, 25-29, 30-34, 35-59, 60+ and 'age not stated'. The data will be presented separately for rural and urban areas at state level. This table corresponds to Table C-2 Part A for the urban areas prepared for the total population.

SC-10 Scheduled caste population (ages 5-16) by single year of age, school attendance and economic activity

This table gives the scheduled caste population at each of the ages 5-16, attending school and those not attending school and among them "main workers", "marginal workers" and "non-workers". The table presents the data separately for rural and urban areas at state and district levels. This table corresponds to Table C-4 prepared for the total population and is useful in studying the prevalence of child labour in relation to school attendance among scheduled castes.

SC-11 Ever married women by age at marriage, currently married women by age at marriage and duration of marriage

This table gives at state and district levels the distribution of ever married women belonging to scheduled castes by age at marriage. The table also gives the distribution of currently married women belonging to scheduled castes by age at marriage and duration of marriage. The data will be presented separately for rural and urban areas. This is the basic table for analysing the age at marriage at district level among the currently married and ever married women belonging to scheduled castes. This table is similar to Table F-15 prepared for the total population.

SC-12 Currently married women belonging to scheduled castes by present age and births during last year by birth order

The table gives at state and district levels the distribution of

currently married women belonging to scheduled castes by present age. The table also gives the births during last year by birth order and present age of mother. The data will be presented separately for rural and urban areas. The table is useful in deriving current fertility rate at district level among scheduled castes. This table corresponds to Table F-16 prepared for the total population.

SC-13 Ever married and currently married women belonging to scheduled castes by present age, parity and total children ever born by sex

This table presents at state and district levels the distribution of ever married and currently married women belonging to scheduled castes by present age and parity. The table also gives the number of children ever born by sex to ever married women and currently married women belonging to scheduled castes by age. The data will be presented separately for rural and urban areas. This table corresponds to Table F-17 prepared for the total population.

SC-14 Ever married and currently married women belonging to scheduled castes by present age, number of surviving children and total number of surviving children by sex

This table presents at state and district levels the distribution of ever married and currently married women belonging to scheduled castes by present age and number of surviving children. The number of surviving children by sex for ever married and currently married women belonging to scheduled castes by present age is also given. The data will be presented separately for rural and urban areas. This table corresponds to Table F-18 prepared for the total population.

Tables SC-12, SC-13 and SC-14 together are useful in deriving fertility and child mortality levels and differentials by age at district level among scheduled castes.

ST-SERIES : SPECIAL TABLES FOR SCHEDULED TRIBES

ST-SERIES : SPECIAL TABLES FOR SCHEDULED TRIBES

These tables will be generated on the computer on full count. Following are the tables which will be generated :

ST-1 Distribution of scheduled tribe population by sex (Tribe-wise)

This table gives the population of each scheduled tribe by sex for total, rural and urban areas at state and district levels.

ST-2 Main workers classified by industrial category, age and sex (Tribe-wise)

This table gives the classification of main workers of each scheduled tribe by age and sex into nine broad industrial categories. The age groups used in this table are : 5-14, 15-34, 35-59, 60+ and 'age not stated'. This table shows the age and sex composition of main workers in each of the nine broad industrial categories. The data will be presented for rural and urban areas at state level.

ST-3 Main workers classified by industrial category, educational level and sex (Tribe-wise)

This table gives the educational level of main workers for each scheduled tribe by sex in nine broad industrial categories. The data will be presented for rural and urban areas at state level. The educational levels used in this table are : illiterate, literate (without educational level), primary, above primary but upto matriculation/secondary, above matriculation/secondary but below graduate in-

cluding non-technical diploma or certificate or technical diploma or certificate not equal to degree and graduate degree and above.

ST-4 Marginal workers classified by industrial category, age and sex (Tribe-wise)

This table presents the break-up of marginal workers of each scheduled tribe by age and sex into nine broad industrial categories. The data will be presented separately for rural and urban areas at state level. The age groups followed in this table are same as in Table ST-2.

ST-5 Marginal workers classified by industrial category, educational level and sex (Tribe-wise)

This table gives the educational level of marginal workers of each scheduled tribe by sex into nine broad industrial categories. The data will be presented for rural and urban areas at state level. The educational levels presented in this table are same as in Table ST-3.

ST-6 Non-workers seeking/available for work and those among them who never worked before classified by age, sex and educational level (Tribe-wise)

This table gives the educational level composition of non-workers scheduled tribe seeking/available for work tribe-wise and those among them who never worked before by age and sex. The data

have been presented separately for rural and urban areas at state level. The age-groups presented in this table are same as in Table ST-2 and ST-4. The educational levels followed in this table are: illiterate, literate (without educational level), primary, middle, matriculation/secondary, higher secondary/intermediate/pre-university/senior secondary, non-technical diploma or certificate not equal to degree, Technical diploma or certificate not equal to degree and Graduate degree and above.

ST - 7. Occupational classification of main and marginal workers other than cultivators and agricultural labourers by sex (Tribe-wise)

This table gives the occupational classification of main and marginal workers other than cultivators and agricultural labourers by sex in respect of each scheduled tribe. The National Classification of Occupation (NCO), 1968 is being adopted with some modification for this purpose. The occupational classification is presented upto the family (three digit) level. The data will be presented separately for rural and urban areas at state and district levels. This is the basic table showing the distribution of main and marginal workers by occupation in respect of each scheduled tribe.

ST - 8 Age, sex and marital status (Tribe-wise)

This table presents the age, sex and marital status composition of each scheduled tribe separately for rural and urban areas at state level. The data will be presented for the age-groups 0-9,10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+ and 'age not stated'. This table corresponds to Table C-1 prepared for the total population.

ST - 9 Age, sex and level of education (Tribe-wise)

This table presents the educational level of each scheduled tribe by age and sex. The data will be presented for single year age, 7,8,9,10,

11, 12,13, & 14 and the age-groups 0-6, 15-19, 20-24, 25-29, 30-34, 35-59, 60 + and 'age not stated'. The data will be presented separately for rural and urban areas at state level. This table corresponds to Table C-2 Part A for the urban areas prepared for the total population.

ST - 10 Scheduled tribe population of (ages 5-16) by single year of age, school attendance and economic activity

This table gives the scheduled tribe population at each of the ages (5-16), attending school and those not attending school and among them "main workers", "marginal workers" and "non-workers". The table presents the data separately for rural and urban areas at state and district levels. This table corresponds to Table C-4 prepared for the total population and is useful in studying the prevalence of child labour in relation to school attendance among scheduled tribes.

ST - 11 Ever married women by age at marriage, currently married women by age at marriage and duration of marriage.

This table gives at state and district levels the distribution of ever married women belonging to scheduled tribes by age at marriage. The table also gives the distribution of currently married women belonging to scheduled tribes by age at marriage and duration of marriage. The data will be presented separately for rural and urban areas. This is the basic table for analysing the age at marriage at district level among the currently married and ever married women belonging to scheduled tribes. This table is similar to Table F-15 prepared for the total population.

ST- 12 Currently married women belonging to scheduled tribes by present age and births during last year by birth order

The table gives at state and district levels the distribution of currently married women belonging to scheduled tribes by present age. The

table also gives the births during last year by birth order and present age of mother. The data will be presented separately for rural and urban areas. The table is useful in deriving current fertility rate at district level among scheduled tribes. This table corresponds to Table F-16 prepared for the total population.

ST-13 Ever married and currently married women belonging to scheduled tribes by present age, parity and total children ever born by sex

This table presents at state and district levels the distribution of ever married and currently married women belonging to scheduled tribes by present age and parity. The table also gives the number of children ever born by sex to ever married women and currently married women belonging to scheduled tribes by age. The data will be presented separately for rural and urban area : This table corresponds to Table F-17 prepared for the total population.

ST - 14 Ever married and currently married women belonging to scheduled tribes by present age, number of surviving children and total number of surviving children by sex

This table presents at state and district levels the distribution of ever married and currently married women belonging to scheduled tribes by present age and number of surviving children. The number of surviving children by sex for ever married and currently married women belonging to scheduled tribes by present age is also given. The data will be presented separately for rural and urban areas. This table corresponds to Table F-18 prepared for the total population.

Tables ST-12, ST-13 and ST-14 together are useful in deriving fertility and child mortality levels and differentials by age at district

level among scheduled tribes.

ST-15 Religion for scheduled tribes (Tribe-wise)

This table presents for each scheduled tribe group the population by religion and sex separately for rural and urban areas at state and district levels. It shows the religions pursued by each scheduled tribe group.

This table has an appendix.

Appendix

This appendix presents the details of religions shown under “other religions and persuasions” in the main Table ST-15 for each scheduled tribe group at the state level.

ST-16 Mother tongue for scheduled tribes (Tribe-wise)

This table presents for each scheduled tribe group the population by mother tongue and sex separately for rural and urban at state and district levels. It shows the mother tongue of each scheduled tribe group.

ST-17 Bilingualism for scheduled tribes (Tribe-wise)

This table presents for each scheduled tribe group the population by mother tongue and among the speakers of each mother tongue the speakers of each subsidiary language. The data will be presented separately for rural and urban areas at state and district levels. It will show the data on bilingualism among scheduled tribes.

SPECIAL TABLE ON EX-SERVICEMEN

SPECIAL TABLE ON EX-SERVICEMEN

This table gives the distribution of ex-servicemen by pensioners and non-pensioners into two broad age groups viz., 55 years and below and above 55 years by sex at state and district levels. This table will be

compiled manually from the Household Schedules on full count. This is a new table as the data on ex-servicemen has been collected for the first time in the 1991 Census.

VILLAGE AND TOWN DIRECTORIES

VILLAGE AND TOWN DIRECTORIES

VILLAGE DIRECTORY

Amenities and land use

The Statement gives the list of villages by tehsil, C.D. Block and for each village area, number of households and population, availability of amenities and land use. The information on amenities available to the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and wasteland not available for cultivation.

The Village Directory has four appendices.

Appendix 1

This appendix gives for each C.D. Block/tehsil the number of villages having various levels and types of educational institutions, such as middle school, adult literacy centres, etc.; various types of medical institutions such as dispensaries, primary health centres, etc. and the number of such institutions; various types of drinking water sources such as tap, tubewell, etc.; post and telegraph office; power supply; railway station, bus stop, etc. and also the number of villages not having each of these amenities.

Appendix 2

This appendix gives for each non-municipal town (i.e. place treated as town only for census purposes) the area under forest, irrigation by source of irrigation, unirrigated land, culturable waste and wasteland not available for cultivation.

Appendix 3

This appendix gives the list of villages where no educational, medical and public health and other facilities are available. No format is prescribed for this appendix.

Appendix 4

This Appendix gives the list of villages by various ranges of proportion of scheduled caste and scheduled tribe population. Part A of the Appendix gives the village lists according to the proportions of scheduled caste population and Part B according to the proportions of scheduled tribe population. Information will be presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent for scheduled castes and 0-5 per cent, 6-15 per cent, 16-25 per cent, 26-35 per cent, 36-50 per cent and 51 per cent and above for scheduled-tribes.

TOWN DIRECTORY

Statement I

This statement gives the list of towns and for each town the area, number of households, population and growth rate at each census since 1901, population, density and sex ratio at 1971, 1981 and 1991 censuses.

Statement II

This statement gives for each town some physical aspects and location particulars as in 1989. The rainfall and temperature and its distance by road from state, district and sub-division/taluk/tehsil/police station/ development block/island headquarters and from nearest city, railway station, bus stand and navigable river/canal will be presented.

Statement III

This statement gives the financial status of the civic administration of each town for the year 1988-89. The civic administration status of the town, the receipts through tax on properties, etc., government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement.

Statement IV

This statement gives the scheduled caste and scheduled tribe population and civic and other amenities available for each town in 1989. The road length,

system of sewerage, number of different types of latrines, method of disposal of night soil, source and capacity of protected water supply, fire fighting services and number of various types of electricity connections are presented in this statement.

Statement IV-A

This statement gives for each notified slum of each town the available civic amenities in 1989. The population, paved road length, system of sewerage, number of different types of latrines, method of night soil disposal, number of tap points/hydrants supplying protected water, number of electricity connections of different types are the details given in this statement.

Statement V

This statement gives the medical, educational, recreational and cultural facilities available for each town in 1989. Number of hospitals and dispensaries, number of hospital beds, number of medical, engineering and other colleges, polytechnics, vocational training institutions, junior colleges and schools for various levels, adult literacy centres, working womens' hostels, stadia, places of entertainment and libraries are given in this statement.

Statement VI

This statement gives the trade, commerce, industry and banking aspects for each town. The important commodities manufactured, imported and exported, number of banks and agricultural and non-agricultural credit societies are given in this statement.

VILLAGE DIRECTORY
Amenities and Land Use

Location code number	Name of village	Total area of the village (in hectares)	Total population and number of households	AMENITIES AVAILABLE (If not available within the village, a dash (--) is shown in the column and next to it in brackets the distance in broad ranges viz.— 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given)

PUBLICATION PLAN

PUBLICATION PLAN

The 1991 Census tables will be published in 33 separate series of volumes for All-India and for each State and Union Territory.

The publication series is as follows:

<p>Series No.</p> <p>1. INDIA</p> <p>States</p> <p>2. Andhra Pradesh</p> <p>3. Arunachal Pradesh</p> <p>4. Assam</p> <p>5. Bihar</p> <p>6. Goa</p> <p>7. Gujarat</p> <p>8. Haryana</p> <p>9. Himachal Pradesh</p> <p>10. Jammu & Kashmir</p> <p>11. Karnataka</p> <p>12. Kerala</p> <p>13. Madhya Pradesh</p> <p>14. Maharashtra</p> <p>15. Manipur</p> <p>16. Meghalaya</p> <p>17. Mizoram</p> <p>18. Nagaland</p>	<p>19. Orissa</p> <p>20. Punjab</p> <p>21. Rajasthan</p> <p>22. Sikkim</p> <p>23. Tamil Nadu</p> <p>24. Tripura</p> <p>25. Uttar Pradesh</p> <p>26. West Bengal</p> <p>Union Territories</p> <p>27. Andaman & Nicobar Islands</p> <p>28. Chandigarh</p> <p>29. Dadra & Nagar Haveli</p> <p>30. Daman & Diu</p> <p>31. Delhi</p> <p>32. Lakshadweep</p> <p>33. Pondicherry</p>
---	--

In each of these series (for all-India and each State/Union Territory) the different series of tables (A-Series-General Population Tables, B-Series-

General Economic Tables, etc.) will be brought out as different parts. Apart from these, District Census Handbooks will be published for each district in the country. These will contain the census tables for the district, the village and town primary census abstracts and the village and town directories. The latter comprise compilations of statistics, external to census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For all-India and for each State and Union Territory, the census tabulations and reports will be published according to the following plan :

Part No. and subject covered	Sub-part No., if any, and the topics covered
1	2
Part I-Administration Report (for official use only)	Part IA-Administration Report - Enumeration Part IB-Administration Report- Tabulation
Part II-General Population Tables	Part IIA-General Population Tables-- A-Series Part IIB-Primary Census Abstract
Part III-General Economic Tables	Part IIIA--B-Series tables of first stage which will be brought out on 10% sample in respect of major states and on full count in respect of smaller states and union territories.

	Part IIIB--B-Series tables of second stage which will be brought out on full count. The data relating HHI, OW, Marginal workers and Non-workers seeking/available for work will be entered on full count basis.		
Part IV-Social and Cultural Tables	Part IV A--C-Series tables of first stage covering age, sex and marital status composition of population, single year age returns, educational levels, school attendance and bilingualism.		
	Part IV B--C-Series tables covering mother tongue, religion of population and household composition.		
Part V-Migration Tables	Part VA--D-Series tables of first stage covering tables based on 10% sample in respect of major states and on full count in respect of smaller states and union territories.		
	Part VB--D-Series tables of second stage covering occupational classification of migrant workers. These tables are based on full count.		
Part VI-Fertility Tables	F-Series tables of first stage which will be brought out on 10% sample in respect of major states and on full count in respect of smaller states and union territories.		
Part VII-Tables on Houses and Household Amenities	H-Series tables covering census houses and the uses to which these are put, construction material of wall, roof and floor		
		Part VIII-Special Tables on Scheduled Castes and Scheduled Tribes	of the census houses occupied by households, tenure status of the house occupied and number of living rooms, household size, housing facilities like drinking water, electricity and toilet available to households and the fuel used by the household for cooking. These tables will also cover tables on scheduled castes and scheduled tribes. This volume will contain analytical notes also.
			This part will contain SC and ST series of tables for scheduled castes and scheduled tribes respectively. The data relating to scheduled castes and scheduled tribes will be entered on full count basis in the third stage and SC/ST tables will be processed on the computer on full count. These will cover population of each scheduled caste/tribe, industrial categories of main and marginal workers, non-workers seeking/available for work and those who never worked before, educational level, school attendance, age, sex and marital status, composition of scheduled castes and scheduled tribes. In addition to these, the fertility tables relating to SC/ST are also covered. These tables also cover for scheduled tribes, their composition by religion, mother tongue and bilingualism.
		Part IX-Town Directory, Survey Report on Towns and Villages	Part IX A- Town Directory Part IX B- Survey Report on selected towns

	Part IX C- Survey Report on selected villages	(d) Language Survey Reports
Part - X	Ethnographic notes and special studies on scheduled castes and scheduled tribes	(e) Post Enumeration Check Report
		(f) Age Tables
		(g) Life Tables
Part-XI-Census Atlas	Union and State/Union Territory Census Atlases	(h) Reports on estimates of inter-censal birth and death rates using 1981 -91 life tables and age data
		(i) Development of Vital Statistics in India
Part XII-District Census Handbook	Part XII A - Village and Town Directory Part XII B - Village and Town-wise Primary Census Abstract	

Besides these special papers, some monographs based on 1991 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1991 Census Monographs.

The following special papers are also planned and will be published as and when they are ready as 1991 Census papers :

- (a) Special studies taken up by the Directors of Census Operations
- (b) Special Areas Surveys
- (c) Special Tables for Standard Urban Area

It is also proposed to carry out some special studies of 1991 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1991 Census.

It is also proposed to disseminate census tabulations and the basic data in machine readable forms such as magnetic tapes, diskettes, floppies, etc.
