Korba Super Thermal Power Plant

Super Thermal Power Plant is situated on the bank of Hasdeo river of Korba city with 2600MW of installed capacity. It ranks seventh largest thermal power plant in India. It is a coal based power plant of NTPC. It uses coal from Kusmundha and Gevra mines in the Korba Coalfield.

It was completed in three phases. In the first phase, it was founded in June 1957. Distribution of Electricity was started from 1 March 1959. In the second phase, Plant having the power of 200 m.w was started from 1963. Later on, it was expanded during 1970-71 and in 1976 it started functioning to its full capacity of 420 m.w.

Foreword

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st.phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th. July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and ‘most important commodity’ manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of ‘notified slums’.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts

driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Smt. Renu G Pillay, Joint Secretary & Director of Census Operation Chhattisgarh, Raipur. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

Preface

The District Census Handbook (DCHB) brought out in each decennial census since 1951 Census by the Census Organisation is an important publication which provides detailed Census and non Census information from village and town level to district level. The Primary Census Abstract (PCA) part of this publication contains census data including data on household amenities collected during the 1st phase of Census i.e. Houselisting and Housing Census. The non-census data (presented in another part) is in the form of village directory and town directory and it contains information on infrastructural facilities available in each village and town within the district. This include details on educational and medical facilities, drinking water, communication and transport, post, electricity, banking etc. The data provided in DCHBs are important in the context of planning and development at grass root level. This publication is brought out separately for each district of the State.

The DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, its scope and coverage was enlarged in each subsequent Census. The DCHB published in 1961 Census provided a descriptive account of the district, administrative statistics, Census tables and village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenities data in respect of villages.

The 1981 Census-DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of villages and towns including the SCs and STs PCA up to tahsil/town levels. The village and Town directory formats were restructured. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centers, primary health sub-centres and community health workers in the village were provided. Information on approach to the village was provided for the first time in the village Directory. In the town Directory, a statement (IV-A) on slums was introduced to provide details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 Census DCHB followed the presentation of 1981 Census, but the format of PCA was restructured. A Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

The 2001 Census DCHB was more exhaustive in nature. The village Directory was enlarged by including a number of other facilities like banking, recreational and cultural facilities, news-papers and magazines and ‘the most important commodity’ manufactured in villages. In town Directory, the statement on slums was modified and its coverage enlarged by including details on all slums instead of only ‘Notified slums’. Two more additions were inclusion of ‘motif’ highlighting significant characteristic of the district and brief analytical notes as annexures. An eight digit permanent location code number(PLCN) was assigned to all the villages and towns keeping in view future needs.

The coverage of Village Directory of 2011 DCHB has been further widened by including a number of new amenities in addition to those of 2001 Census. These newly added aminities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School

for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of WBM Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In Town Directory, all seven Statements of 2001 Census were retained. CD Block wise data of Village Directory and Village PCA are presented in DCHB, as presented in previous Censuses.

The data of DCHB, 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. The two parts have been published in separate volumes.

The Non-Census data or village and town level amenities data for DCHB was collected in Village Directory Schedule and Town Directory Schedule designed and sent by the Office of the Registrar General & Census Commissioner, India. The blank schedules were sent to village level officials through their respective tahsil offices in case of villages and to town authorities in case of towns. The data compiled and supplied by them were compared with the data published in 2001 Census and also cross checked with the information obtained from various departments of State Government. An attempt was made to reconcile the discrepancies to make it more reliable. The digitization of VD & TD data and validity checks were done in-house. It must be noted that the villagewise area figures presented in the PCA are based on information supplied by village level revenue officials in Village Directories and the total given for the CD Block levels is the total of the area figures of villages coming under it. In the case of district and State area totals shown are based on the information furnished by the Survey of India, Govt. of India. Therefore, the total area of district may not match the total of area figures of the villages of the respective tahsils and districts. I am thankful to all the village and town level officials, respective tahsil and town authorities and district administration of State Government for their co-operation in accomplishing this task.

I express my sincere gratitude to Dr. C. Chandramouli, Registrar General & Census Commissioner, India for his valuable guidance and support. The task of planning and designing of DCHB was carried out by Dr. Pratibha Kumari, ARG(SS) in Social Studies Division of ORGI under the guidance and supervision of Shri Deepak Rastogi, Addl. RGI. Shri A.P. Singh, DRG (Map), provided technical guidance in preparation of Maps. Shri A.K. Arora, Joint Director (DP Division) under the overall supervision of Shri M.S. Thapa, Addl. Director (EDP) provided full co-operation in preparation of record structure for digitization and validity checks of Village and Town Directory data and the program for the generation for cross classified tables. I am thankful to all of them.

The data presented in DCHB together with drafting of DCHB reports, preparation of maps, manuscripts and its printing as per the guidelines of ORGI required concerted efforts of a team comprised of Shri Jose T. Varghese, Dr. I.C. Agrawal, Deputy Directors, Shri C.M. Joshi, Shri R. Patel, Dr. P.K. Sao, Assistant Directors, Shri Hirendra Kumar Sinha, Stat. Inv Gr. II, Smt. Rajni Jose, Senior Compiler, Shri Mrigendra Bahadur Singh, Compiler of this Census Directorate. I express my appreciation for their untiring work.

History and Scope of the District Census Handbook

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. The District Census Handbook is a unique publication from the Census organization which provides authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and ward and town of the district. The non census data consist of data on the availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

In the 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to taluk/town levels. New features along with restructuring of the formats of village and town directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional taluk/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was expanded by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i)-Status and Growth History of towns, (ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. Both the Parts have been published in separate volumes in 2011 Census.

Brief History of the District

Korba was carved out as a new district on 22 May, 1998 separating 4 tahsils- Katghora, Pali, Korba and Kartala from the then Bilaspur district vide the Madhya Pradesh State Government Notification No. 1008-F-20-8-92. (vii)-sha-8 dated 22/5/1998. The district is situated in the northern part of Chhattisgarh State and is surrounded by 5 districts of the State, namely Koriya in the North, Bilaspur in the West, Janjgir-Champa in the South, Raigarh in the East and Surguja in the North-East direction.

The district is named after Korwa, a major tribal community that inhabits this part of the State. Importantly, a section of Korwa tribe known as Pahari Korwa is particularly a vulnerable tribal group.

Korba district was a part of Bilaspur district. Bilaspur district was formed in the year 1861. Korba was last ruled by Rani Dhanraj Kunwar Devi. Earlier, rulers belonging to the Haihaya dynasty reigned over the region during 106 AD. Later, the city of Korba came under the influence of the Marathas. Raja Vikramaditya who was a notable ruler belonging to the Banna dynasty too used to visit the region to offer prayers to the local deity there.

Earlier, Korba was known as Gourigrah. It was ruled by Nago Singh Gour, snake charmers. He belonged to Mourya caste . Nago singh Gour had a small Zamidar, in which there were 5-10 Villages. In the neighbouring places of this area, there were other small Zamidars like Korwa, Gond, Kanwar etc. so who ever became powerful out of these zamindars, used to attack and take over other Zamidars. According to one version the people of Korwa attacked

Gourigarh, Nago Singh Gour went to face their attack. When Korwa were losing the battle, some one came into Nago Singh's home and announced that Nago Singh was killed in the battle. Then his wife along with the family and children jumped into the pond and committed suicide. When Nago Singh came home after defeating the Korwa, he learnt about the tragedy with his family. He also drowned himself in the pond. From then onwards, the Korwas ruled over Korba.

The Korwas were a big community. These people built forts and were ruling Podi-Uprora, Lafa, Chaiturgarh, Kosgi, Chhuri etc. They used to fight with the neighbouring places to increase their Zamidari. A king named Ghughus belonging to the community of Korwas, ruled over Ratanpur. After this, the kingdom belonged to the Rajput King Ratan Singh. Yogeshwar Dayal Singh belonged to their fourth generation. He opened a School in Korba, presently at Rani Road . In 1913 he constructed a palace with the help of skilled workers from Bengal. Later, this was taken over by the British. After the First World War, Yogeshwar Dayal died. His wife Dhanraj Kunwar Devi became the Queen. The Zamindari were also returned to her. The queen had two daughters. One died at a young age. The second girl was married to a Zamindar of Uproda, "Swasharan Pratap Singh". He was given all the rights for controlling the Zamidars of Korba. The first hospital at Korba was opened by the queen. When India became independent in 1947 and when the Zamindari system was abolished in 1952, the farmers were given titles over their land. The queen also sold her lands. At that time, Rudhra Sharan Pratap Singh, represented this area.

Analytical Note

(i) Physical Features:

Korba district is situated in the northern half of Chhattisgarh State and lies between $22^{\circ}01'$ to $23^{\circ}01'$ North latitude and $82^{\circ}07'$ to $83^{\circ}07'$ East longitude. The district is surrounded in north by Koriya and Surguja districts, on east by Raigarh district, on the west and south-west by Bilaspur district and on the south by Janjgir-Champa district. The District Headquarters is Korba town, which is situated on the banks of rivers Hasdeo and Ahiran. Korba is the power capital of the Chhattisgarh. Total geographical area of the district is 6,598.50 square kms.

Geographically, Korba district is situated partially on the plains and in the north-east, partially on the plateau of mountain ranges. The north of Korba is the plateau of Chhotanagpur. This plateau extends from east to west and most of its part is mountainous. The north-east of the district is Katghora tahsil which is full of mountain ranges and it is covered with thick forests. The main mountains are Agar (2,402 ft.), Karmali (3,233 ft.), Kenda (2,021 ft.), Kamrol (1741 ft.), Phutka (3,068 ft.), Loumpahar (1,559 ft.). The highest peak of Chhittorgarh is 3,240 ft.

There are foot-paths on the sides of valleys of the northern mountains. In the north of Katghora, the slope of Hasdeo and Gaze valleys is less. In the north side of Tan and Chornai valleys are peaks of Gurdwari mountain, Janta mountain, Matin mountain, Chhajag mountain, which are less than 2500 ft. Manjur, Puraina and Kumhar mountain are extended far and wide and in the valleys region, these are in the form of hard rocks.

The plains of Sheonath-Mahanadi valleys extend in the north to Belgahna-Pondi and near to Korba. These are seen as large pains, small mounds and shallow small bowls of land.

Rivers :

Main rivers of the district are Sonbhadra, Hasdeo, Ahiran and Lilagar. Leaving aside Sheonath river which comes from west and falls into Mahanadi river,

Khargahni, Hasdeo, Berai and Mand etc. are the tributaries of Mahanadi which come from north and mingle from left bank. The main river Hasdeo is deep at many places between mountain ridges. Hasdeo river originates from the plateau of Chhotanagpur in Surguja district. Its flow is Southwards. Tan and Ahiran are hilly rivers. Katghora and Chhuri are on the banks of Ahiran river. Ahiran river is also known as Jata-Shankari. Korba is on the left bank of Hasdeo river. Son, Hasdeo, Ahiran and Lilagar etc. flow during all the twelve months.

Climate : -

The climate of the district is usually hot and dry. South-west monsoon brings good rain which is evenly distributed.

The duration of winter season is from December to February ; then comes to summer which is between March to June South-West monsoon lasts from mid-June to September. October-November months have retreating monsoon climate.

During south-west monsoon humidity is more than usual. Winds blow generally lightly but in the first half of summer season and beginning of monsoon, the speed of wind intensifies.

During south-west monsoon , when depression rising from Bay of Bengal cross the eastern coast, and brings local rain all through the district. Sometimes post monsoon cyclones rising from Bay of Bengal also affect the climate of the district .

Forest:

The district has dense deciduous mixed type of forest of mainly Sagon and Sal trees. There is abundant store of forest-produce . Due to large forest area the district has good number of tigers, pea-cocks, langoors. Total forest area in the district is 346334.818 hect. This includes 287865.661 hect. protected forest and 58467.157 hect. unclassified forest. Building timber, tendu leaf , mahua, amla, harra, bahera, palash, lac,

gond, and forest medicines are found in abundance in the forest.

Minerals :

This district is rich in minerals. Coal is the major mineral in the district, which led to the establishment of profit making South Eastern Coal Fields Ltd. (SECL) under the Coal India Ltd. Other minor minerals in the district are sand, gitti and muram.

Land Use :

Most of the land is hilly and is up and down and a huge area of the district is under coal-mines. Dorsa and Matasi soil is in Katghora tahsil. Due to Bhata soil, it is of little use for agriculture. This type of land is useful for trade and industry. The other parts of the district are mixed soil according to the physical features. Bhata soil is in Katghora tahsil and there is mixed soil in other parts of the district, Sand Stones and granite are in abundance which is not suitable for bore-wells.

Agriculture :

Paddy is main kharif crop and wheat, gram, tiwara, linseed, alsi etc. are rabi crops of the district. Maize, kodo-kutki, tuvar, urad, kulthi, groundnut, til, ramtil and soyabean are also sown in good quantity in the district.

Irrigation :

The economy of the district is primarily based on agriculture. Irrigation is an important role to play for good cultivation. However, the district is somewhat backward in the field of irrigation. The source of irrigation, specially the lapping of river and wells are being used and encouraged extensively .

Animal Husbandry :

The main occupation of people in the district is agriculture and cattle-rearing. In Raigarh district, Cows, Goats and Buffaloes are the main species among animals. As per the Livestock Statistics of Department of Animal Husbandry, the district has 208154 cattle, 73300 buffaloes, 71561 goat and 2252 pigs. Other livestock are 409 sheeps, 483 horse & others and 113108 poultry.

There are veterinary hospitals and veterinary dispensaries in the district to after the welfare of livestocks. After the green revolution, white revolution plays an important role in the economy of the district .

Fishery :

Fish rearing in the district is very popular in villages because of low cost. This is also a powerful medium to eradicate unemployment. Various programmes like training to the village people, availability of loans, subsidiaries, production of fish-farming etc. are being encourage for the development of fish forming in the district. The village ponds are given on patta to local people on long-term which has created employment in an extensive way. In rivers and ponds, fish like Parhin, Rohu, Mogri, Katla, Singhani and Sefar are found in abundance.

Industry :

Korba district is industrially developed. The district is rich in minerals and therefore, it is famous in the Industrial map of India. Due to the existence of many power plants, it is called the power hub of Chhattisgarh. Thermal Power Plants namely, NTPC (National Thermal Power Corporation), KSTPS, BCPP, CSEB and Coal company SECL, and BALCO are industrial giants in the district.

Near the border of the district, there are about 85 or more industrial units established due to which a big industrial area has been developed. The main industries and trade institutions in the district includes aluminum based industries, lime stone industries, chemical industries etc. Under the sub-industrial units there are establishments of South Eastern Coalfields Limited (SECL) and BALCO and I.B.P Company.

Looking to the agriculture products, extension of agricultural industry seems to be negligent but since

forests are in large area, forest produce-based industries are also developed in good numbers.

The ashes thrown out of thermal power centres is used in making of fly ash bricks and in making dams. Due to Kosa weavers co-operative society employment in this sector has also been increased.

Transport and Communication :

The district headquarter, Korba is well connected by rail with State Capital Raipur and Bilaspur. Since Korba is connected with Bilaspur Junction by rail, the people of Korba district have the facility to travel by train to other part of the State and National capital as well. The district and all tahsil headquarters are well connected by road transport. Private buses ply from Korba as well as other parts of the district in good numbers.

Energy :

Korba district has National Thermal Power Corporation which has a big unit of production of electricity which supplies electricity to whole of Chhattisgarh State. Under swift energy development programme, central energy department is running technical energy development in the district.

(ii) Census Concepts

Building: A ‘Building’ is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses: Houses, the walls and roof of which are made of permanent materials. The material of walls

can be any one from the following, namely, Stones (duly packed with lime or cement mortar), GI/metal/asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, GI/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutcha houses: Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic / polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

Dwelling Room: A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant’s room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant’s household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House : A ‘census house’ is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be

occupied or vacant. It may be used for residential or non-residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

Village: The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area: The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is ‘town’ for urban areas and ‘village’ for rural areas. The urban area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

- (a) **Statutory Towns** : All places with a municipality, corporation, cantonment board or notified town area committee, etc are known as statutory towns.
- (b) **Census towns:** All other places satisfying the following three criteria simultaneously are treated as Census Towns.
 - i) A minimum population of 5,000;
 - ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and
 - iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as ‘urban’ all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated

towns, urban areas also constitutes of OGs which are the parts of UAs.

Urban Agglomeration: An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the exiting town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an ‘urban agglomeration’. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

- (a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and
- (b) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG): The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc and physically contiguous with the core town of the UA.

City: Towns with population of 100,000 and above are called cities.

Household: A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household: A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household : Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate: A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate: Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level: The highest level of education a person has completed.

Work: Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker: A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker: A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker: A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator: For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like— tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under "other workers".

Agricultural labourer: A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker: Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It

does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker: A person, who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are ‘Other Workers’.

Work participation rate: Percentage of Workers (Main + Marginal) to total population.

Population density: Population density is the number of persons inhabited per square kilometer of the area.

Age: Age is measured in terms of the completed number of years.

Sex Ratio: Number of females per 1,000 males in a population.

(iii) Non-Census Concepts

Civic status of urban units: Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee / Municipal council, Municipality etc.

Size class of U.A./town: Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population are classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000- 19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area : The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city : The concept of ‘Mega city’ is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cutoff point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities and the same criteria of population has been adopted in 2011 census.

Concepts used in VD and TD of DCHB:

1. Educational Amenities:-The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only the educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

1.1 Pre-primary (PP): Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from preprimary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

1.2 Primary School (P): Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 Middle School (M): Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

1.4 Secondary School (S): Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 Senior Secondary School (SS): Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. Degree College: (i) **Arts/Science/Commerce**: These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) **Engineering College (E):** It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

(iii) **Medical Colleges:** These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. Management College/ Institute (MI): It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled: There are Government and Government recognized institutions/organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities: **2.1 Hospital-Allopathic and Hospital-Alternative medicine:** A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there is hospitals providing facilities under different

systems of medicines such as, Allopathy, Ayurveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b) Ayurveda: Ayurveda means ‘Science of life’. The philosophy of Ayurveda is based on the theory of Pancha Mahabootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements are represented in the form of Tridosha: Vata, Pitta and Kapha. These three ‘doshas’ are physiological entities of living beings. Ayurveda developed into eight distinct specialities, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c) Unani: Treatment of Unani consists of three components, namely, preventive, promotive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Arthritis. Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homoeopathy: Treatment in Homoeopathy, which is holistic in nature, focuses on an individual’s response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist

health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30-bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3 Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer. A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4 Primary Health Sub- Centre (PHS): A Primary Health Sub-centre is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female health worker.

2.5 Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counseling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7 Health Centre: Clinic where medicine and

medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8 Dispensary: Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9 Veterinary Hospital: Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc in rural areas.

2.10 Mobile Health Clinic: These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counseling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12 Nursing Home: A nursing home is a long –term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies., treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13 Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are not taken as medicine

shops.

3. Drinking water: The following are the main source of drinking water facility (ies) available in the village.

3.1 Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/ community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as ‘Tap water from treated source’.

3.2 Tap Water-un-treated: If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as ‘Tap water from un-treated source’.

3.3 Covered Well (CW): A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW): A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

3.5 Hand Pump (HP): Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube Well / Borehole (TW): Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self explanatory.

4. Community Toilet Complex : Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet

(RSM): It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use: Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid wastes is subjected to decomposition, bio-gas could be produced under favourable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and transport Facilities: 7.1

Post Office (PO): Self-explanatory.

7.2 Sub-Post Office (SPO): Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO): Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self explanatory.

7.6 Mobile Phone Coverage: Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered

to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC):

If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighboring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

7.11 Other District Roads (ODR): These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development head quarters or other main roads.

7.12 Village Road: The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR): A road provided with a bituminous surfacing.

7.14 Gravel (Kuchha) Road (GR): A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM): This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP): A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: - Banking facility means a place where a person can operate a bank account.

8.1 Commercial Bank (CB): These may be banks wholly owned by the Government of India. or by Indian or Foreign Companies.

8.2 Cooperative Banks (Coop. B): A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Cooperative banks are often created by persons belonging to the same local or professional community or sharing a common interest. These banks are registered under the Cooperative Societies Act. The cooperative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949.

8.3 Agricultural Credit Society (ACS): Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery.

8.4 Non-Agricultural Credit Society (NCS): These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities: **9.1 Self-help Group (SHG):** Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY

(Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9. 2. Public Distribution System (PDS) shop: The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3. Mandis/Regular Market: These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4. Weekly Haat: These are those clusters of shops with or without fixed premises which are open once a week.

9.5. Agricultural Marketing Society: It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.

9.6. Nutrition Centre: Integrated Child Development Services (ICDS): The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7. Anganwadi Centre: Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8. Accredited Social Health Activist (ASHA): ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter

of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9. Sports Club/Recreation Centre: Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10. Cinema/Video Hall (CV): If regular cinema houses licensed by Government is available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.

9.11. Public Library: Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12. Public Reading Room: Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13. Newspaper Supply: The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.

10. Availability of Electricity/Power. If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc.,

it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for domestic use: This category includes electricity used only for domestic consumption.

10.2 Power supply for agricultural use: This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power supply for commercial use: This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power supply for all uses: This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern: The land use area of the villages is given in hectares. The land use pattern in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of drainage : Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of latrines: The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine. (i) **Pit System:** The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

(ii) **Flush/pour flush:** A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used). (iii) **Service:** Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under “Others” category.

14. Protected Water Supply- Source and capacity of Storage system: There are various sources of water supply and its storage system in the town.

14.1 Service Reservoir: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for **intake screens**. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary

from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank: Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. Road lighting (Points): Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage: Orphanage is the name to describe a **residential institution** devoted to the **care of orphans** – children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a **ward of the state**, and orphanages are a way of providing for their care and housing.

17. Working women's hostel: These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. Old Age Home: There are two types of Old Age Homes in India. One is the “Free” type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the “Paid” home where care is provided for a fee. Nowadays, such “Retirement” homes have become very popular in India and they are well worth considering.

19. Stadium: A stadium is a place, or venue, for (mostly) outdoor **sports**, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall: These are the places where meetings, social functions etc. are organised.

(iv) 2011 Census findings – Population, its distribution

At the Census 2011, there were 5 tahsils and equal numbers of Community Development Blocks (CD Blocks) in Korba District. The district has 5 statutory towns and 2 Census town. Total number of villages in the district is 719 which includes 707 inhabited villages and 12 un-inhabited villages. The corresponding figures for Census 2001 were 4 tahsils 5 CD Blocks, 4 towns (2 Statutory town and 2 Census town) and 719 villages. The district has an area of 6599 sq.kms which is 4.9 percent of the total area of State.

The total population of Korba district is 12,06,640 with 6,12,915 males and 5,93,725 females. Rural population is 7,60,350 and Urban population is 4,46,290. The district has registered growth rate of 19.3% in the state during the decade 2001-2011. The district occupies 9th place in the State according to the population. The average household size is 4.3 persons. The density of the district is 183 persons per sq. km. In 2001, the density of the district was 153 persons per sq.km.

The percentage of urban population of the district is increased by 0.72 percentage point during the decade 2001-2011. The percentage of urban population of the district was 36.27% as per 2001 Census which increased to 36.99% in 2011 Census.

The Sex ratio of the district is 969. The sex ratio has been increased during the decade from 964 in 2001

Census to 969 in 2011 Census. But, the child sex ratio (in 0-6 age group) has been declined by 12 points, from 978 in 2001 Census to 966 in 2011 Census.

The literacy rate of the district of Korba in Census 2011 is 72.37% (male- 82.48% and female 61.93%). In 2001 literacy rate of the district was 61.71 %. There has been an increase of 10.66 percentage point in the literacy rate. The state literacy rate is 70.3%.

The Scheduled Castes (SC) population constitute 10.33% of the total population of the district. The proportion of SC population in the State in the last Census was 9.98%. The proportion of Scheduled Tribes (ST) population in the district is 40.90% in Census 2011, against 41.50% in Census 2001. There has been a decreased of 0.6 percentage point in the proportion of ST population during the decade 2001-2011.

As regard workers and non-workers 43.19 percent are workers and 56.81% are non-workers. Among the workers 67.21% are main workers and 32.79% are marginal workers.

The work participation rate in the district is 43.19%. The break-up of the category of workers (Main and Marginal) suggest that 21.7% are cultivators, 42.6% are agricultural labourers and 34.2% are ‘Other Workers’. 1.5% are engaged in ‘Household Industry’.

(v) Brief analysis of the PCA data

Inset tables 1-35 analysis

Analysis of the PCA data based on Census 2011 is presented here in the form of tables 1 to 36. Various demographic indicators such as density, literacy, sex-ratio and distribution of population in

different economic activities by rural/urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels seperately.

Table 1 indicates tahsil wise decadal variation of both rural and urban areas of the district. It is seen that the district has registered a percentage decadal variation of 19.3 during the decade 2001-2011. The urban areas of the district has attained a higher decadal variation of 21.6 percent as compared to that of rural area which is at 17.9 percent. At tahsil level, it varies from the lowest of 13.2 percent in Katghora tahsil to a maximum of 25.0 percent in Pali tahsil.

There is a marginal increase in the percentage of urban population in the district, from 36.3 percent in 2001 to 37.0 percent in 2011. Of the 5 tahsils, 2 have registered the same trend as that of the district whose percentage of urban population has increased from 2001 to 2011. It is increased from 65.4 percent to 67.3 percent in Katghora and that from 63.2 percent to 64 percent in Korba. Poundi-Uproda and Kartala are rural tahsils whereas, there was no urban area in Pali tahsil at the 2001 Census.

Table 2 gives CD Block wise number and percentage of inhabited villages in specified population size range with the related population in the district. Of the total 719 villages, 707 are inhabited villages. Pondiupraura CD Block has highest number of inhabited villages i.e. 209, the next in order is Pali with 141 inhabited villages. The lowest 107 inhabited villages is in Katghora.

Pali is the most populous CD Block with 193232 persons while Katghora is the least populous CD Block with 99506 population.

The maximum number of villages i.e. 243 (34 percent) are those which lie in the population range of 500-999. It is followed by 206 (29 percent) inhabited villages which have population range of 1000-1999. Another 142 villages (20 percent) are in population size range of 200-499. As regards the large size villages, there are 6 villages (1 in Katghora, 4 in Pali and 1 in Korba CD Blocks) which lie in the population size of 5000-9999. There is no village in any of CD Blocks in the district in population size range of 10000 and above.

Table 34 presents CD Blockwise distribution of workers by sex in four categories of economic activity. In rural areas of the district, total workers (main + marginal) constitute 49.27 percent of total population. Among them, 28.55 percent are cultivators, 57.1 percent are agricultural labourers, 1.31 percent are household industry and 13.04 percent are Other workers. The percentage of cultivators is highest in

Kartala (33.63 percent) and the lowest is in Korba (22.24 percent). The percentage of agricultural labourers is highest in Korba (61.21 percent) and the lowest is in Katghora (50.24 percent). It is also seen that the proportion of male workers is more than female workers in the category of cultivators whereas, the females exceed their male counterpart in the category of agricultural labourers.

Table 35 presents the distribution of workers by sex in four categories of economic activity for towns of the district. It is seen that out of 32.83 percent of total workers, cultivators constitute 4.16 percent,

agricultural labourers 5.38 percent, household industry 2.04 percent and the highest proportion is covered by Other workers which is 88.42 percent. It is also noticed that the proportion of male workers under Other

workers is more than female workers whereas, the proportion of female workers under cultivators, agricultural labourers and household industry are more than their counterparts. Town wise analysis shows that the proportion of cultivators is highest in Katghora (NP)

(17.56) percent and that of the agricultural labourers is highest in Pali (NP) (24.59). The percentage of household industry workers is highest in Chhurikala (NP) (6.22 percent) and the ‘Other workers’ is in Dipka (M) (95.26).

(vi) Brief analysis of Village and Town Directory data based on inset table 36-45

Analysis based on Village Directory and Town Directory data pertaining to Census 2011 are given in the form of Inset tables, from 36 to 45. Like previous census, alongwith the Census data, Non-Census data popularly known as village amenity and town amenity data were also collected in Census 2011. Based on these data table 36 to 45 were generated.

These tables give detailed information at district/tahsil / CD Block levels on various aspects like number of villages, proportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. Brief analytical notes are also prepared and these are given below of each table:

Table 36 deals with CD Block wise distribution of villages according to availability of different amenities like education, medical, drinking water, post office, telephone, transport/communications, agricultural credit societies, approach by pucca road and power supply within the village. Out 707 inhabited villages in the district, 694 or 98.16 percent villages have been provided with educational facility of one type or other. 381 villages, constituting 53.89 percent have medical facilities. Drinking water facility is available in all 707 villages (100 percent). Only 116

villages or 16.41 percent of total villages have the facility of Post offices within the village. 306 or 43.28 percent villages have telephone facility, 322 or 45.54 percent villages have transport facility, 19 or 2.69 percent villages have bank facility and 30 or 4.24 percent villages have agricultural credit societies. 446 or 63.08 percent villages are linked with pucca roads. Of the total 707 villages, 638 or 90.24 percent of them are provided with the power supply.

At CD Block level, educational facility is available in all villages of 2 CD Blocks namely, Pali and Kartala.

In Korba CD Block also educational facility available in 128 out of 129 villages.

Medical facility is available in 53.89 percent of total 381 villages spread over in 5 CD Blocks. At CD Block level, in Pali, medical facility is available in 79.43 percent of its total villages, whereas 59.5 percent of the villages in Kartala have the access of medical facility. In the remaining 3 CD Blocks, the medical facility is available to less than 50 percent of their total villages. Drinking water facility is available to all villages of all 5 CD Blocks of the district .

As revealed from VD data of Census 2011, 63.08 percent or 446 villages have approached by pucca roads. Among the CD Blocks, the maximum number

of villages (117 or 82.98 percent) in Pali have approached by pucca road and it is followed by Katghora where its 86 villages out of total 107 villages (80.37 percent) have access to this facility. The least numbers of villages i.e. 99 out of total 209 villages (47.37 percent) have approached by pucca road in Pondiupraura.

Of the total 5 CD Blocks in the district, it is only Kartala where power supply is available to its all the villages. In Katghora also the power supply is available to 106 villages out of its total 107 villages. In Korba CD Block, the number of villages having the facility of power supply is comparatively lesser as its 80.62 percent of the villages have access to electricity.

(viii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district.

Pali :- Pali is a tahsil headquarter in Korba district. This place is situated around 50 km off from the district headquarters on the Korba- Bilaspur road. It is believed that pali was the worship place of Raja Vikramaditya who was a ruler belongs in Banna dynasty. There is an ancient Shiv Mandir, which is situated at the side of large pond. Many other remnants can also be seen here. This temple is faced towards east and its entrance is in octagonal. Plinth

of this temple is upon 5 platforms.

The architecture of the sculptures carved on this temple are very much similar to the Jai Mandirs of Abu Hills and temples of Sohagpur. And, it is also very similar to the world famous temple of Khajuraho. Vikramaditya also known as ‘Jayameyu’, who was the son of Mahamandaleswar Malldeo, built is nearly in 870 BC. In 11th and 12th century the king Jajwalyadeo first of Kalchuri repaired it. His name has been carved on the temple.

The pond near the entrance of this temple has nine corners. This pond has been found to be water filled throughout the year. Two statues and two coins were found here while the archeological department excavated this place for making boundary walls.

Korba :- Korba is known as “Industrial Temple” of Modern India. In addition to Thermal Power Station (NTPC), there is a major Aluminum Factory, well known as BALCO. Covered with mining wealth Korba has unending store of “Black Diamond” (Coal) which is extended to bordering areas.

Kudurmali :- Kudurmali, in Katghora tahsil is known as a holy place for the followers of Kabir panthis. There is samadhi of Churaman, the son of the first Mahant Dharmdas of Kabir Panth.

Lafagarh:-Lafagarh is one of the countries most strong natural forts. This is situated on the Korba-Bilaspur road, about 19 km from pali village in the Chaiturgarh hills of Katghora Tahsil. The walls of the forts are not uniform as this fort is a natural one. The fort has three entrance doors which are beautifully decorated by pillars and statues. At the main entrance of the fort, there is a small temple carved out of stones. This has been decorated in wonderful style. There is a big dome which has been supported by five rows of pillars with each row having five pillars. An idol of Goddess Durga killing Mahisasur has been installed at the main altar of the temple. At the center of the entrance door, an idol of Lord Ganesh has been carved. There is a pond near the temple.

Waterfalls in Devpahari :- Devpahari is one of the village in Korba Tahsil of Korba distict. It is famous for its water fall named Govind Kunj on Chornai river. It's a very nice picnic spot which is surrounded by mild forest. There are distributed 2-3 water falls in

chornai river. This place is also used to generate the electricity. This place attracts the tourist for its beauty of water and tracking in the forest.

Madwarani Mandir- Madwarani Mandir is situated on the Korba-Champa Road at a distance 22 kms from district headquarter. There is a temple of Goddess Madwarani at the top of the hill. The legend behind this temple is that at the season of Nawaratri, jowar was growing under Kalmi trees near the temple. During the Nawratri season (September-October) of each year. There is fair celebrated by the local people.

(ix) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Korba is land of ‘Black Daimond’(Coal), and also popular for Kosa Silk and Thermal Power. This district is known mainly for N.T.P.C and BALCO and as a big Industrial Centre. It is the power hub of

chhattisgarh. It boasts for the gevra mines which are india’s largest open cast mines catering 11% of the nation’s coal needs. The district comes under Bilaspur Division and is inhabited mainly by tribals including the Primitive Tribe korwas (pahadi korwa). Korba is blessed with lush green forest cover, where a sizable number of tribal population is found. The adivasis in the forest areas leave in tandem with the environment and have retained their distinctive cultural characteristics and traditional observances

Bango dam is build in korba for irrigation purpose, which supplies water to Korba, Janjgir- Champa and Raigarh districts. Korba and Champa are well known for “kosa”, a special variety of silk used for producing one of the best quality of cloth in the world. Being light in weight and having shiny glaze, it is used to make kurtas, sarees, shirts, salwar-suits and other garments for party as well as casual wears.
