NEW DELHI- 110066

ENSURE REGISTRATION OF EVERY BIRTH AND DEATH

PREFACE

The Civil Registration System (CRS) may be defined as a unified process of continuous, permanent and compulsory recording of the vital events and characteristics thereof, as per legal requirements in the country. In India, the Civil Registration System covers registration of births and deaths only. It provides the best source of information on the vital rates at all levels.

2. This issue of the Report on 'Vital Statistics of India based on the Civil Registration System' for the year 2010 provides an overview of the working of the Civil Registration System (CRS) in the country and presents a compilation of data on registered births, deaths and infant deaths with rural-urban & sex-wise break-up and sex ratio at birth based on Civil Registration Records. Ideally, an Annual Report on vital statistics containing more detailed information should have been brought out. However, due to non-availability of Annual Reports from some of the major States and limited availability of information contained in the Annual Reports of some of other States, the report for the year 2010 containing key information has been brought out for the convenience of users. An attempt has been made to present more detailed analysis as compared to previous Reports.

3. The publication is divided into two parts. Part I provides a brief review of the Civil Registration System and contains a summary analysis of data on registered births, deaths, infant deaths and sex ratio at birth at State level. Part II consist of the main tables which provide State and District-wise data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up and sex ratio at birth.

4. The data source for the report is the statutory Annual Statistical Report prepared by the Chief Registrars of Births & Deaths. In respect of States where these reports have not been prepared, the information provided by the Chief Registrars has been used. I take this opportunity to express my sincere gratitude to all the Chief Registrars of Births & Deaths of various States/UTs for their kind co-operation in providing the requisite information.

5. The report has been prepared by the Vital Statistics Division of this office. I would like to place on record my appreciation for the efforts put in by Smt. P. A. Mini, Deputy Registrar General, Shri R. K. Gautam, Joint Director, Shri Ajay Khanna, Deputy Director, Shri Sandeep Rai, Assistant Director and Shri Vimal Kaul, Sr. Compiler under the overall guidance of Shri Deepak Rastogi, Additional Registrar General, India.

Dr. C. Chandramouli
Registrar General
& Census Commissioner, India

Overview of Civil Registration System (CRS)

1. Registration of birth is a right of the child and is the first step towards establishing their identity.

2. It is compulsory to report births and deaths to the Registrar of Births and Deaths under the Registration of Births and Deaths Act, 1969.

3. Births and Deaths are registered only at the place of their occurrence.

4. Head of the household is responsible to report births and deaths that occurred in the house to the Registrar of Births and Deaths.

5. It is the responsibility of the officer in charge to report the births and deaths that occur in hospitals, nursing homes, health centres, etc. to the Registrar of Births and Deaths of the concerned area.

6. For reporting of events, prescribed forms are used, Form 1 for live birth, Form 2 for death and Form 3 for still birth.

7. Midwives and other Medical and Para-medical persons who have attended a birth of a child are duty bound to notify the Registrar about the occurrence of the birth.

8. Keepers of crematoria and burial grounds, and persons required to be present at such places by a local authority are required to notify the Registrar about the occurrence of the death.

9. The Registrar of Births and Deaths have the power to obtain information regarding birth/death from those who are in the knowledge.

10. Births and deaths are to be reported within 21 days of occurrence of the event.

11. A Birth/Death certificate is to be issued free of charge for events reported within 21 days.

12. Births and deaths reported after 21 days but within 30 days can be registered on payment of prescribed late fee.

13. Births and death reported after 30 days but within one year can be registered on production of an affidavit, permission of the prescribed authority and payment of a late fee.

14. Births and deaths reported after one year can be registered only with the permission of a First Class Magistrate and payment of prescribed late fee.

15. Births can be registered without name of the child.

16. Name of the child can be reported to the registrar for entering in the Birth Register within one year of registration free of charge.

17. Name of the child can also be entered after one year but within 15 years of registration on payment of prescribed late fee.

18. Persons giving information about births/deaths are required to give it under their signature.

19. Errors in the particulars of births or deaths in the registers can be corrected according to the prescribed procedure.

20. Wrong and fraudulent entries can be cancelled by the Registrar of Births & Deaths.

21. Under Section 17 of the RBD Act, 1969, any person can cause a search in the birth/death registers for any entry and obtain a certified extract (Birth/Death Certificate).

22. Extracts issued under Section 17 of the Registration of Births and Deaths Act shall be admissible as evidence of birth or death to which the entry relates.

23. All Registrars are to send a monthly return to the District Registrar or Chief Registrar.

24. Births that occurred outside the country can also be registered in India within sixty days of return of the family at the place where they settle.

25. There is no provision to register deaths that occurred outside the country.

26. Non-reporting of births and deaths, giving false information for inclusion in the register, refusing to put signature in the reporting form/register and non registration of events reported to the registrar is a punishable offence.

27. Under the RBD Act, 1969, Registrars and Sub-Registrars are the public servants.

28. Registration of births and deaths made prior to implementation of the Registration of Births and Deaths Act, 1969 is deemed to have been done under the same Act.

29. On adoption of a child, the name of the adoptive parents and a new name for the child can be entered in the birth register.

30. Registration of births and deaths is in the interest of the individual and the nation.

EXECUTIVE SUMMARY

A unified process of continuous, permanent and compulsory recording of the vital events and characteristics thereof, as provided through the legal requirements of the country, is called Civil Registration System (CRS). In India, the Registration of Births and Deaths Act, 1969, provides for the compulsory registration of births and deaths. Civil Registration records are the best source of Vital Statistics. The records resulting from Civil Registration System have two main uses. First, as a personal legal document, required by citizens as proof of facts e.g. age, identity etc and second, the data generated through a complete and up to date System of Civil Registration are essential for socio-economic planning and also to evaluate the effectiveness of various public's related programs. They also serve as the cornerstone of public health systems. This Annual Statistical Report on Vital Statistics of India for the year 2010 has been brought out on the basis of data made available by the Chief Executive Authorities i.e. Chief Registrar of Births and Deaths of States/Union Territories. The main findings of the report have been summarized below:

VITAL INDICATORS: Notwithstanding the difference in approach of data collection between CRS and Sample Registration System (SRS), a comparison of vital rates based on these two sources helps in evaluating the performance of CRS over SRS. Level of reporting helps in reviewing the registration system and defining measures that would be necessary to improve registration levels across the country. It is around 89.9% of the registration units at national level during 2010. Such reporting level by rural and urban registration units are about 89.9% and 91.8% respectively.

Birth Registration:

- **The number of reported registered births has more than doubled in the year 2010 as compared to 1981 (increased to 21.4 million in 2010 from 8.6 million in 1981).**
- **The share of registered births to total estimated births under SRS is increasing year by year which in result shows the significant improvement in birth registration.**
- **The share of male registration is more than the female for registered births.**
- **Share of Institutional births in total registered births has increased to 65% during 2010 as compared to 56% during 2009. 35% of the total registered births are non–institutional in the year 2010. It is based on information received from 23 States/UTs.**
- **The level of registration of births has increased from 58.0 per cent in 2000 to 82.0 per cent in 2010.**
- **14 States/UTs have achieved the target of cent per cent level of registration of births during 2010.**
- **10 among 19 major States have crossed the level of registration of births of 90 percent. These States are Assam, Gujarat, Haryana, Karnataka, Kerala, Maharashtra, Odisha, Punjab, Rajasthan and Tamil Nadu.**
- **After excluding 2 most populous and poor performing States namely Bihar and Uttar Pradesh, the level of registration of births comes out to be 91.6%.**
- **The level of registration of births for other States/UTs is higher than that of Southern as well as EAG States& Assam persistently over the period of 2001-2010.**
- **The birth rate worked out to 18.1 per thousand populations during 2010 as compared to 22.1 from SRS birth rates.**
- **The gap between the birth rates based on CRS and SRS is narrowing down over the year which is a good indication of improvement in the functioning of CRS.**

- **Birth Rate reported under CRS in some of the better performing States namely Assam, Gujarat, Kerala, Maharashtra and Punjab is on higher side than that of SRS birth rate. This difference may be due to the fact that SRS estimates are based on usual residence while events registered at the place of occurrence irrespective of the place of residence under CRS.**
- **The Sex Ratio at Birth for the year 2010 comes out to be 857.**
- **Highest Sex Ratio has been reported by Assam (1244) followed by Karnataka (1025) during 2010.**
- **Lowest Sex Ratio has been reported by Bihar (323) followed by Manipur (770). This is due to poor netting of events especially female in Bihar.**

Death Registration:

- **The number of registered deaths has also more than doubled in the year 2010 as compared to 1981 (5.7 million in 2010 from 2.7 million in 1981). There is slight improvement in total number of registered deaths during 2010 as compared to 2009.**
- **The share of registered deaths to total estimated deaths under SRS is increasing year by year with fluctuating trend.**
- **Male shale in total registered deaths is more than the female.**
- **Share of Institutional deaths in total registered deaths has increased to 43% during 2010 as compared to 40% during 2009 and 22% of deceased did not receive any medical attention at the time of death. This information is based on information received from 21 States/UTs.**
- **The level of registration of deaths has increased from 52.2 per cent in 2001 to 66.9 per cent in 2010.**
- **6 States/UTs have achieved the target of cent per cent level of registration of deaths during 2010.**
- **5 among 19 major States have crossed the level of registration of deaths of 90 percent. These States are Karnataka, Kerala, Maharashtra, Punjab and Tamil Nadu. During 2009, only 3 major States were in this category.**
- **During 2010, there are only 7 States who have achieved the target of 90% in case of both birth and death registration.**
- **After excluding 2 most populous and poor performing States namely Bihar and Uttar Pradesh, the level of registration of deaths comes out to be 76.8%.**
- **The death rate worked out to 4.8 per thousand populations during 2010 as compared to 7.2 from SRS death rates.**
- **More infant deaths have been registered in urban area than the rural area.**
- **A substantial gap can be seen in the level of registration of births and deaths between three groups, i) Empowered Action Group (EAG) & Assam, ii) Southern States and iii) Other States/UTs over the period 2001-2010.**
- **Notwithstanding the difference in approach of data collection between CRS and Sample Registration System (SRS), a comparison of vital rates based on these two sources helps in evaluating the performance of CRS over SRS. Crude birth & death rates based on registered events for most of the better performing states are in close proximity to that from SRS.**
- **There is a significant gap in the IMR based on CRS with that of from SRS in almost all States/UTs. The netting of infant deaths under the CRS continues to be a major concern.**

GLOSSARY OF TERMS

Birth: Live birth or still birth.

Live birth: Complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life, and each product of such birth is considered live-born.

Still Birth: Foetal death where a product of conception has attained at least the prescribed period of gestation.

$$\text{Crude Birth Rate (CBR)} = \frac{\text{Number of live births registered during the year}}{\text{Mid-year population}} \times 1000$$

Death: Permanent disappearance of all evidence of the life at any time after live birth has taken place.

$$\text{Crude Death Rate (CDR)} = \frac{\text{Number of deaths registered during the year}}{\text{Mid-year population}} \times 1000$$

Infant Death: Death of a child less than one year old.

$$\text{Infant Mortality Rate (IMR)} = \frac{\text{Number of inafnt deaths registered during the year}}{\text{Number of live births registered during the year}} \times 1000$$

Still Birth Rate:

$$\text{Still Birth Rate (SBR)} = \frac{\text{Number of stiil births registered during the year}}{\text{Number of live births and still births registered during the year}} \times 1000$$

Level of Registration: The level of registration, defined as the percentage of registered births/deaths to the births/deaths estimated through SRS, determines the performance level of a State / Union territory with regard to functioning of Civil Registration System.

$$\text{Level of Registration (LOR)} = \frac{\text{Number of events registered during the year}}{\text{Number of estimated events for the year}} \times 100$$

Mid-year Population: Population at the mid-point of the year, i.e., 1st July of the year.

$$\text{Number of estimated events for a year} = \text{Mid} - \text{year population} \times \text{SRS Rate}$$

$$\text{Sex Ratio at birth (SRB)} = \frac{\text{Number of female births registered during the year}}{\text{Number of male births registered during the year}} \times 1000$$

Gross Natural addition to the Population = Total Registered Births – Total Registered Deaths

Rate of Natural Increase = CBR- CDR

PART-I
REVIEW AND ANALYSIS

STATEMENT 1: CIVIL REGISTRATION SYSTEM: AT A GLANCE

Demographic features of India as per the Civil Registration System (CRS)				
Registration of Births		**2008**	**2009**	**2010**
i)	Estimated Mid- Year Population (in '000)	1150196	1166228	1182108
ii)	Expected Live Births	26224469	26240130	26124587
iii)	Number of Registered Births	19993799	21292574	21430434
iv)	Level of Registration	76.4	81.3	82.0
v)	Level of Registration after excluding U.P. & Bihar	89.2	89.6	91.6
vi)	Crude Birth Rate (per thousand)	17.4	18.3	18.1
Registration of Deaths				
i)	Expected Deaths	8511450	8513464	8511178
ii)	Number of Registered Deaths	5638131	5677705	5690549
iii)	Level of Registration	66.4	66.9	66.9
iv)	Level of Registration after excluding U.P. & Bihar	73.2	75.4	76.8
v)	Crude Death Rate (per thousand)	4.9	4.9	4.8
Registration of Infant Deaths				
i)	Number of Registered Infant Deaths	175207	180865	180736
ii)	Infant Mortality Rate	9.0	8.0	8.0
iii)	Percentage of infant death to total deaths	3.1	3.2	3.2
Gross Natural addition to the Population				
i)	Person	14355668	15614869	15739885
ii)	Rate of Natural Increase (CBR-CDR)	12.5	13.4	13.3
Sex Ratio at Birth				
i)	Number of Registered Male Births	7511406	9054521	9436361
ii)	Number of Registered Female Births	6761305	8126390	8087068
iii)	Sex Ratio at Birth	904	898	857

Note: Total registered births do not match with the total of male and female registered births due to non availability of sex-wise details from some of the States.

CHAPTER – I

CIVIL REGISTRATION SYSTEM - AN INTRODUCTION

1.1 The requirement for a complete and up to date Vital Statistical System to yield reliable data on vital events hardly needs any emphasis. These data are essential for socio-economic planning and development and also to evaluate the effective implementation of various programs. The chief sources for data on vital events in India are Civil Registration System (CRS), Sample Registration System (SRS) and Population Census. The Population Census remains the main source of information on population and its characteristics; however, being a decennial exercise, it does not provide the measure of population change from year to year. The measures of fertility and mortality derived from the Census are centered on the midpoint of the decade and as such do not provide annual change in the population. Of the other two sources of vital statistics for getting the vital rates on a regular basis, the SRS has been designed to provide reliable estimates at National and State level. Robust estimates of vital rates at District and sub-district level on an annual basis through sample survey are difficult to obtain on account of prohibitively large sample size and variety of resultant factors such as controlling of non-sampling errors etc. CRS is thus the only source for providing vital rates at district and sub-District level. Rather a complete CRS can provide these rates at all administrative levels.

1.2 The Civil Registration System (CRS) may be defined as a unified process of continuous, permanent and compulsory recording of the vital events and characteristics thereof, as per legal requirements in the country. In India, the Civil Registration System cover registration of births and deaths only. Civil registration system provides the best source of information on the vital rates at all levels. Full coverage of vital events by registration machinery only can help in reaching to the high-quality vital rates which may be used for planning or research. Therefore, concentration should be given to the proper monitoring of the activities under the system. Civil registration systems are considered to be complete if they cover 90 per cent or more of all live births and deaths taking place within a country or area. However, in India the coverage of registration system is incomplete and not up to the mark to be utilized for statistical purposes at the National level but there are 19 States/UTs where the coverage of birth registration is more than 90 per cent and 11 States/UTs where the coverage of death registration is more than 90 per cent.

1.3 The registration records are primarily useful for their value as legal documents and secondarily as the source of vital statistics. Civil registration as a source of vital statistics is relatively less expensive, as the statistics generated from the registration records are the by-products of an essential administrative process. The registration records can also generate current and continuous statistics, which can be more accurate than any other method of data collection. However, the reliability of the statistics obtained through the registration system depends much on the completeness and promptness with which events are registered and the accuracy of the information in the registration records. The improvement in the system of registration of births and deaths is critically dependent on how much importance is attached to the data on births and deaths by the respective States and District administrations. Besides, the level of awareness among the public about the utility of birth/death certificate also plays a crucial role.

1.4 Vital statistics generated through registration records enable estimation of the size, structure and geographical distribution of the population for the current year except for migration. Vital statistics also enables the projections for future years on the basis of probable trends of fertility and mortality as derived from a study of these factors and their interactions with social, economic and other demographic factors. The vital statistics data generated through an effective Civil Registration System is of immense use for formulation of various development and welfare programmes/ schemes. Civil Registration data can act as an

objective source for allocation of financial resources at State and District level. The Civil Registration data acquires paramount importance in the wake of 73rd and 74th amendments to the constitution of India, as it can provide data at local level for micro level planning, monitoring and evaluation of schemes. At national level, the vital statistics data generated through Civil Registration is quite useful for medical research and in the study of sex ratio, mortality and morbidity rates and also in the study of causes of deaths.

Registration of births and deaths in India

1.5 In India, the registration of births and deaths is carried out under provisions of the Registration of Births and Deaths (RBD) Act, 1969. The registration is done by the local Registrar appointed by the State Government under whose jurisdiction the event has taken place.

1.6 Provision for registration of births and deaths and the mechanism thereof had been in existence in India for more than a century, however, the work of registration was carried out under various laws and byelaws existing at that time in different parts of the country. The need for improvement in the vital statistics system was felt for long time and, therefore, on recommendations of various committees and conferences, the Registration of Births & Deaths Act, 1969 providing for compulsory registration of births and deaths was enacted. Since then, this Act has been enforced uniformly across all the States and Union territories. This Act provides for registration of births and deaths and publication of statistical reports annually based on the civil registration data. The enactment of the Registration of Births & Deaths Act, 1969 has provided a common framework for putting in place a sound system of registration of births and deaths in the country.

1.7 The registration work at various levels in States/Union Territories is performed by involving officers of different Departments. The existing organizational set-up involved in the work of civil registration at various levels in different States/Union Territories is given at **Annexure-A**. A uni-linear hierarchy exists in 7 States/ UTs namely, Assam, Haryana, Meghalaya, Odisha, Punjab, Sikkim and A&N Islands, where Health Department is involved at all levels of registration. Similarly, Panchayats in Kerala, Revenue in Dadra & Nagar Haveli and Local Administration Department in Puducherry are responsible for execution of this work at all levels. At present, Health Department supervises the civil registration work at State level in 19 States/Union Territories, Department of Panchayats in 1 UT namely Lakshadweep and Department of Planning, Economics & Statistics in 12 States/ Union territories.

1.8 In order to simplify and speed up the process of registration and to bring in uniformity in birth and death registration formats, the registration system was revamped in the year 2000. Under the revamped system, the procedure for registration of births and deaths was also modified to some extent and the forms redesigned. Most of the tables to be part of the Annual Report of the Chief Registrars based on registration of births and deaths data under revamped system would be based on the information of place of usual residence of mother in case of births and place of usual residence of the deceased in case of deaths. The revamped system became operational in 2000 in all States/Union Territories except Assam, Arunachal Pradesh, Gujarat, Haryana, Himachal Pradesh, Odisha, Punjab, Uttarakhand and Uttar Pradesh. It was implemented in Assam, Arunachal Pradesh and Odisha in 2001, Haryana in 2002, Himachal Pradesh, Uttarakhand and Uttar Pradesh in 2003 and Gujarat and Punjab in 2004.

Statistical Reports

1.9 System of Registration of Births and Deaths is constantly generating statistical information at the local level. The information contained in the Reporting Forms is consolidated for onward transmission to the

Chief Registrar of a State/UT. Every Chief Registrar is required to submit an Annual Report on the Working of the Act and a Statistical Report to the State Government by the July and December respectively of the following year to which the report relates. The Chief Registrars are also required to send a copy of these Reports to the Registrar General, India, Govt. of India.

1.10 Based on the Annual Statistical Report prepared by the States, the Office of the Registrar General, India, brings out annually a comprehensive statistical report entitled "Vital Statistics of India based on Civil Registration System". This series of reports have been brought out since 1958. However, most of the States are not bringing out their Annual Statistical Reports in time, and this in turn, delays the publication of the corresponding national report. It has also been observed that many of the States do not include all the prescribed tables in their reports making the utility of the national report very limited. However, most of the States have sent the annual information on births and deaths registered up to 2010. This information is available for most of the Districts with rural- urban and sex wise break-up. Therefore, this report has been prepared by compiling this information. Keeping in view the importance and use of the data on registered births and deaths, this report provides the District-wise registered births and deaths along with infant deaths with sex-wise and rural-urban break-up of registered events for the year 2010.

*****

CHAPTER II

Observations on Working of the RBD Act Report for the Year 2010

2.1 **Issue of Supreme Court Directions for improving registration System –** The Hon'ble Supreme Court passed certain orders on 20th September 2010 on a writ petition filed by an NGO on non-implementation of the provisions of the Registration of Births and Deaths Act, 1969. The aforesaid directions were sent to all States /UTs for their compliance. The Hon'ble Supreme Court has passed the following directions:-

a. For an order directing the States /UTs, as far as possible to appoint full time Chief Registrars exclusively to perform their statutory duties under this act.

b. For an order directing the States /UTs, to submit their reports under section4 (4) and 19 (2) of the RBD Act every year and on time to the RGI.

c. For an order directing all States /UTs, To notify all Panchayats and Institutional Delivery Centers such as Hospitals, Nursing Homes, CHCs, PHCs and if required Government Schools and others as Local Registration Centers under Section 7 (1) of the Act.

d. For an order directing all States /UTs, to notify ASHAs, Aanganwadi Workers, Dais and Headmasters of Government School as notifiers under Section 10 of the Act and authorize them to deliver birth certificate under section 12 of the Act.

e. For an order directing all States /UTs, Switchover to the uniform format for birth certificate, as suggested by the Registrar General with the National Emblem on the said certificates.

f. For an order directing all States /UTs to disclose the Registrar General, the posts lying vacant under the Act and to fill said post within 3 months.

g. For an order directing the low performing and stagnating States like Assam, Bihar, Chhattisgarh, J&K, Jharkhand, Manipur, Meghalaya, Orissa and West Bengal States /UTs, to review the existing number of registration centers and increase their numbers if required. The other States / UTs may also be directed to review the number of registration centers and, if required, increase the number of registration centers.

2.2 **Registration Machinery:** There is wide variation in the registration machinery across the country. The Chief Registrars of births and deaths in 17 States and 2 Union Territories are from the Health Department, in 10 States and 2 Union Territories from the Planning, Economics & Statistics Department and in 1 State and 1 UT from Panchayats Department and in remaining 2 UTs with other Department viz. Local Administration and Revenue Department. The district level authorities are mainly divided among District Collectors/ District Magistrate (in 9 States and 1 UT), Chief Medical Officers/ District Medical and Health (11States and 2 UT), District Statistical/ Planning Officers (in 4 States and 1 UT) and Deputy Director / Assistant Director (Panchayats) in 1 State and 1 UT and in remaining States/ UT are others. At rural level, the registration work is entrusted to the officials of Panchayats Department in 15 States and 3 UTs, Health Department in 7 States and 3 UTs, Revenue Department (3 States), Education Department in 2 States and Police Department in 1 State and 1 UT. The registration work of rural areas in the State of Punjab has been transferred from Panchayats Department to Health Department w.e.f. 01.09.2010.

2.3 **Inter Departmental Coordination Committee Meetings:** In order to resolve operational problems and to sort out the issues of mutual coordination among the various departments engaged in registration work and for effective implementation of the provisions of the Act, State Level Inter-Departmental Coordination Committees (IDCC) has been set up in all the States / UTs. To formulate the strategies for

further improvements in civil Registration system in the state, the State Governments are required to convene the meeting of such committees at least once in a year. However, it has been observed that most of the States have not convened such meetings on a regular basis. During 2010, such meetings were held in the States/UTs of Bihar, Chhattisgarh, Haryana, Karnataka, Orissa, Punjab, Rajasthan and Uttar Pradesh. The Inter departmental Coordination committees have also been set up at District level and even below the District level i.e. Mandal level and Taluk level in majority of the States. However, the information on regular convening of such meetings has not been provided by majority of the States. As per the information provided the States of Andhra Pradesh, Rajasthan, Himachal Pradesh, Karnataka, Madhya Pradesh, Tamil Nadu, Punjab, Uttarakhand and Nagaland have convened such meetings during 2010.

2.4 **Penalties**: Section 23 of the RBD Act provides for imposing penalties on defaulting institutions, Registrars and the individuals for non-registration, non-reporting and for negligence or refusal without reasonable cause to register any birth or death. However, very few States have been reported to resort to penalties as a means to improve the functioning of the system. As per the information made available, the States of Rajasthan, Kerala, and Punjab have imposed such penalties during 2010. The details of which are given below:

Name of States / UTs	**Year**	**Penalties imposed on**	
1. Rajasthan	**2010**	89 Gram Sevak (Registrar of Births and Deaths) Rs.4450/ collected	1 Dev. Officer
		No. of prosecutions	**No of offences**
2 .Kerala	**2010**	286 (Rs. 1703/-)	31 (Rs. 1068/-)
		Amount collected from defaulter for non / late reporting (in Rs.)	
3. Punjab	**2010**	Rural	38,150/-
		Urban	60,674/-
4. Assam	**2010**	Some District Registrars has taken disciplinary action against the defaulters for unnecessary delays.	

The States of Andhra Pradesh, Bihar, Chhattisgarh, Gujarat, Jammu & Kashmir, Madhya Pradesh, Uttarakhand, Haryana, Maharashtra, Nagaland, Manipur, Tripura, Andaman & Nicobar Lakshadweep, West Bengal and Puducherry have furnished the nil information and not imposed any penalties during the year. The other States has not responded on this issue.

2.5 **Registration of Births and Deaths occurring to Indian Citizens abroad:** The event of births and deaths of Indian citizens occurring abroad are registered by the respective Indian Consulates under the Citizenship Act 1955. The Consulates are statutorily required under Rule 5 of Citizen's (Registration at Indian Consulates) Rules 1956 to send the annual returns of births and deaths of Indian Citizens to the ORGI. Such returns received from 75 missions, covering 14525 births and 1652 deaths in 2010. Out of total birth registered at the various missions during 2010, Kuwait alone accounted for more than 34%, UAE 16%, Italy 13%, Oman 11% and Bahrain 10% births. In case of total registered deaths at various missions,

Kuwait accounted for 27% deaths, UAE 23% and Bahrain 12% deaths in 2010. Details are given in Statement 19.

2.6 **Annual report on the working of the RBD Act:** The Chief Registrars are required to submit an Annual Report on the working of the RBD Act under section 4 (4) of the Act to the respective State Governments as well as to the ORGI. The statutory Annual Reports for the year 2010 have been received from 34 States and UTs except Goa.

2.7 **Inspections of registration units**- Inspection of registration centers and registration records are important for both qualitative and quantitative improvement of registration. Specific provisions under Section 18 of the RBD Act have been made for inspection of registration offices and examine the registers kept therein. Regular inspections are required to be done by the office of the Chief Registrar and District Registrars in each States/ UTs. Such inspections could have been more meaningful, if organized and conducted periodically however, as per the information provided by the States, the inspection of registration centers in the States were sporadic and extremely inadequate in most of the States/UTs during 2010. The actual information in respect of number of units inspected is not provided by the majority of the States /UTs. The following States/ UTs have furnished the desired information, the details of which are given below:

Name of State	Number of Districts	No. of Rural units Inspected	No. of Urban units Inspected
1. Bihar	26	406	59
2. Chhattisgarh	10	61	16
3. Haryana	7	45	--
4. Karnataka	Not given	2904	--
5. Madhya Pradesh	37	162	66
6. Punjab	Not given	118	106
7. Rajasthan	Rural & Urban units inspected by DSO's and others but number of units not given.		
8. Manipur	Not given	50 units	

The inspections have also been made by the Officers/ officials of the ORGI and DCO offices from time to time. The observations found during the inspections were forwarded to the respective States/ UTs for remedial measures.

2.8 **Training of Civil Registration Functionaries-** Training is one of the most important inputs for successful implementation of any project. This includes orientation of new staff as well as in-service training, refresher training or re-orientation of personnel already in place. The hierarchy of registration officials has been established with the enforcement of the Registration of Births and Deaths Act, 1969 in the States and Union Territories and the Act gives a legal status to all registration officials. Among the major reasons for lack of reliable vital statistics in India is the dearth of trained staff at the various levels of the CRS. It is, therefore, necessary to equip these officials with basic knowledge specifically oriented to the task. In other words, the whole registration machinery has to be geared up and strengthened to secure uniformity of procedures, timeliness of reporting and comparability of results throughout the country. Registration officials are drawn from several departments of the States. It is, therefore,

important that these officials have the benefit of a uniform training. During 2010-11, 12 States/UTs were financially assisted by ORGI towards training programmes to be organized for registration functionaries involved in States /UTs and the details are as under:

Sl. No.	States/ UTs	Funds Sanctioned	No. of Participants
1.	Karnataka	3,68,180/-	1343
2.	Andhra Pradesh	4,57,800/-	1680
3.	West Bengal	13,87,810/-	5472
4.	Goa	93,000/-	300
5.	Mizoram	54,880/-	199
6.	Assam	4,42,240/-	1344
7.	Tamil Nadu	13,79,500/-	4450
8.	A & N Islands	74,030/-	119
9.	Chhattisgarh	1,18,860/-	296
10.	Maharashtra	5,63,560/-	1206
11.	Puducherry	12,700/-	70
12.	Punjab	16,94,480/-	4248
Total		***66,47,040/-***	***20727***

2.9 **Publicity through IEC activities**: The system of Civil Registration brings multiple benefits, an individual's right to be counted at both extremes of life is fundamental to social inclusion. In the absence of insurance or inheritance, death registration and certification are often required prerequisites for burial, remarriage or the resolution of criminal cases. India has a challenge to achieve the target of cent per cent level of registration of births and deaths. At present, the level of registration of births and deaths are about 82% and 67% respectively. The system of Civil Registration is suffering from poor reporting/registration in some of the major populous States. These inter-state variations may be improved through the **publicity** measures to bring awareness among the general public about the utility of the certificates of births and deaths as publicity is the deliberate attempt to manage the public's perception of a subject. In this way i.e. with people participation we may go a long way in improving the effectiveness of the system as a whole. During 2010-11, the financial assistance of Rs. 1.34 Crore was given among 13 States/UTs towards publicity through IEC activities.

2.10 **Computerization of Civil registration record/ work-** The information on computerization of civil registration record and online registration have been furnished by the following States/ UTs-

- **Kerala**- Civil Registration works in Kerala have been computerized in all Municipal corporations and Municipalities and 902 Rural Registration Units (Gram Panchayats) out of 978 Gram Panchayats in the rural areas. Using "Sevana" software developed by Information Kerala Mission (IKM). The Civil Registration records prior to date of computerization are being digitized. The legal part of the reporting forms is preserved as Statutory Register in addition to the electronic data.

- **Gujarat-** Municipal Corporations and most of the Municipalities computerized the Civil Registration work. The certificates in respect of register maintained under traditional system are also issued by using the software of E-gram centers.

- **Daman & Diu**: computerized birth and deaths records of all registration centers and computerized certificates are being issued by them

- **Puducherry**: All records from 1979 fed in to computer and computerized certificates are issued in Oulgaret Municipality from 05-04-1999, in Ariankuppam commune Panchayats from 20.10.2002, in Bahour commune Panchayats from 02.10.1999, in Nettapakkam commune Panchayats from October 2002, in Manadipet commune Panchayats from11.08.2004 and in Villanur commune Panchayats from 24.05.2000. All municipalities have computerized the records and issued computerized certificates.

- **Tamil Nadu**: All Corporations, Municipalities, Taluks and Town Panchayats computerized the birth and death data and computerized certificates are being issued by all urban local bodies. Computerization of birth and death record of rural areas has also been started.

Other States have also taken various measures on computerization of civil registration record but details have not been given in their annual reports.

CHAPTER – III

A BRIEF ANALYSIS OF DATA ON REGISTERED BIRTHS, DEATHS AND INFANT DEATHS

3.1 Births and deaths are the two most important vital events in the life of an individual and for the society as a whole. Based on the data collected under the Civil Registration System on registered births and deaths, this Chapter presents the trend in the level of registration, vital rates and other related indicators, at the State and National level. To get an idea as to the coverage of Civil Registration in the country, the data generated from the Civil Registration System has been compared with corresponding estimates thrown up by the Sample Registration System. However, while interpreting the two statistics it should be borne in mind that data under Civil Registration is based on place of occurrence and Sample Registration System is by the place of usual residence of mother. It will not be out of place to mention that although the registration data continues to be deficient due to not reporting of the events for registration or not being registered, and also due to non-reporting of the registered events to the Districts Registrar's office in time by the local registration units, the silver lining is that the overall level of registration across the States / Union Territories (UTs) largely show an upward trend.

3.2 Statement 3 gives the number of registration units along with the level of reporting at the national level and across the States and Union Territories by rural and urban place of occurrence of the event in 2010. Level of reporting indicates how many registration units from those within a State / UT submitted monthly returns of registered births and deaths to the District Registrar's Office during the year. Expressed as percentage, it helps in reviewing the registration system and defining measures that would be necessary to improve registration levels across the country.

3.3 It may be seen from the Statement that nearly 89.9 per cent of the registration units at national level reported monthly returns of registered births and deaths to the District Registrar's Office during 2010. Such reporting level by rural and urban registration units is about 89.9 and 91.8 percent respectively. These figures exclude information from Arunachal Pradesh, Bihar, Jharkhand, Odisha and Uttar Pradesh due to non-receipt of returns.

3.4 Among the States, cent-per-cent level of reporting from both rural and urban areas has been reported from 8 States viz. Goa, Gujarat, Haryana, Kerala, Meghalaya, Punjab, Sikkim and Tripura. It is interesting and heartening to note that all Union Territories have had cent-per-cent level of reporting during the year 2010.

Statement 3: Number of registration units and level of reporting by place, India, States and UTs, 2010

Sl. No.	India / State / UT	Registration units (Number)			Level of reporting (%)		
		Total	Rural	Urban	Total	Rural	Urban
	India	**258895**	**253869**	**4833**	**89.9**	**89.9**	**91.8**
	States

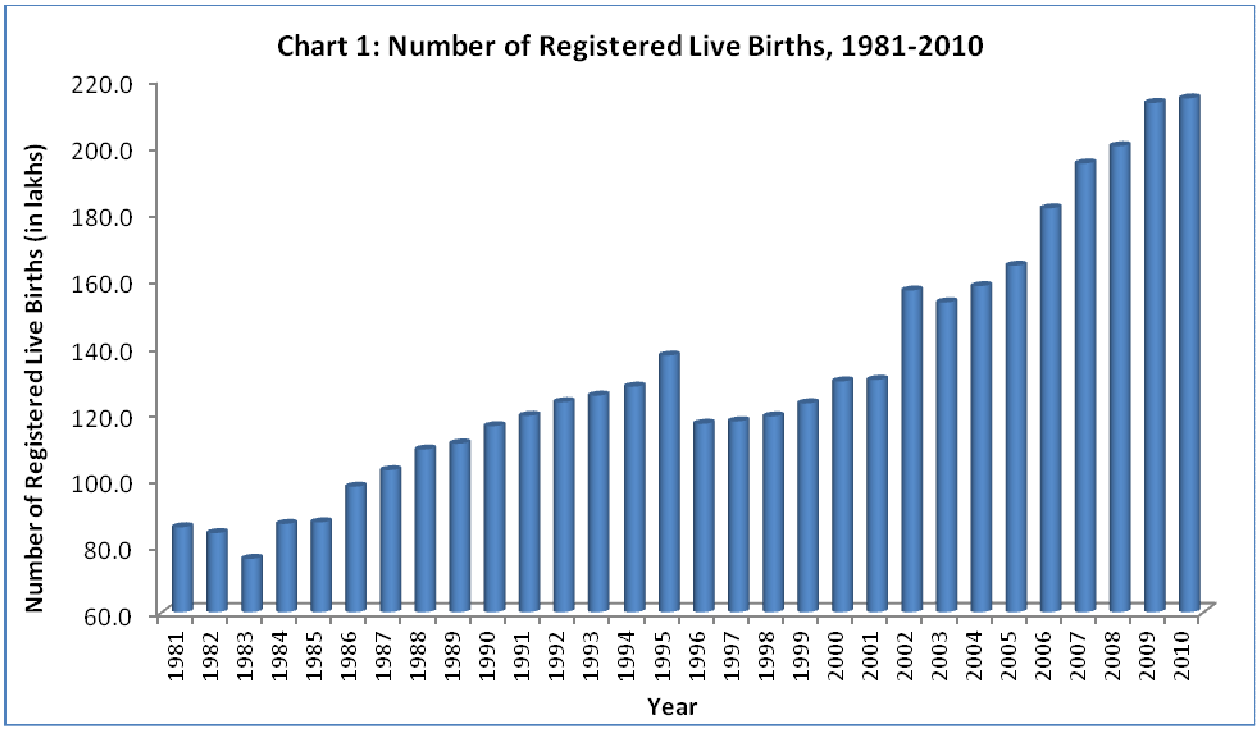
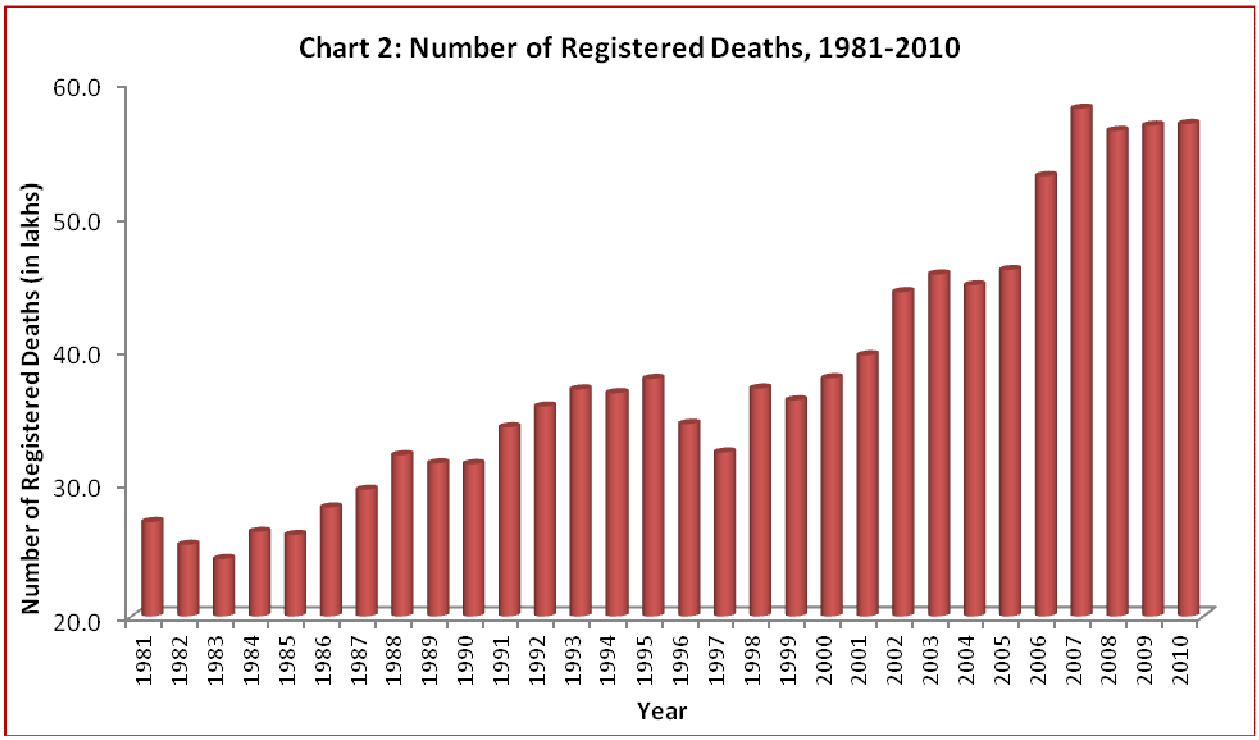
Notes:

1. *The figures are based on the data made available by the States/UTs.*
2. *For the period 1981 to 2000, total registered births/deaths of States/Union Territories exclude data for Assam from 1981 to 1987 & 1990 to 1994, for Bihar from 1997 to 1999, for Kerala of 1983, for Meghalaya from 1984 to 1994, for Sikkim from 1982 to 1987 and of 1989, for Uttar Pradesh of 1983 and from 1996 to 2000, for Uttarakhand of 2000, for West Bengal of 1982 & 1985, for A&N Islands 1981 to 1982, from 1987 to 1988 and from 1991 to 1992 and for Lakshadweep of 1982.*
3. *In 2001, total registered births/deaths of States/Union Territories exclude data from Assam, Uttar Pradesh and Uttarakhand.*
4. *Total registered births and deaths of States/Union Territories does not include data for Uttarakhand from 2002 to 2003, Tripura for 2005 and2007-2009.*
5. *The registered births/deaths have been taken from the Annual Reports of the Chief Registrars and in its absence from the data provided by the Chief Registrar's office.*

3.6 Statement 4 reveals that there is an absolute increase in the number of registered births and deaths over the period 1981 - 2010. The number of registered births has gone up from 8.56 million in 1981 to 21.43 million in 2010 - an increase of 151%. Such increase in the number of registered deaths, from 2.71 million in 1981 to 5.69 million in 2010, is to the tune of 110%. However, disaggregated to reveal year to year change in the registered births and death, the pattern does not reveal a continuous increasing trend. Whereas, sizable decline in the number of registered births and deaths between two consecutive years is largely due to incomplete reporting by the local registration units of all registered events to the Districts Registrar's office, such increase may be due to special registration campaigns undertaken by the States / UTs. The decline in absolute number of registered deaths at the national level – from 5.80 million in 2007 to 5.64 million in 2008, was due to incomplete reporting from some of the major States namely, Andhra Pradesh, Bihar,

Chhattisgarh, Jammu & Kashmir and Uttar Pradesh. Chart 1 and 2 present the number of registered births and deaths from 1981 to 2010.





3.7 The number of registered births, deaths and infant deaths for States and Union Territories for the period from 2001-2010 are presented in Statement 5, 6 and 7 respectively.

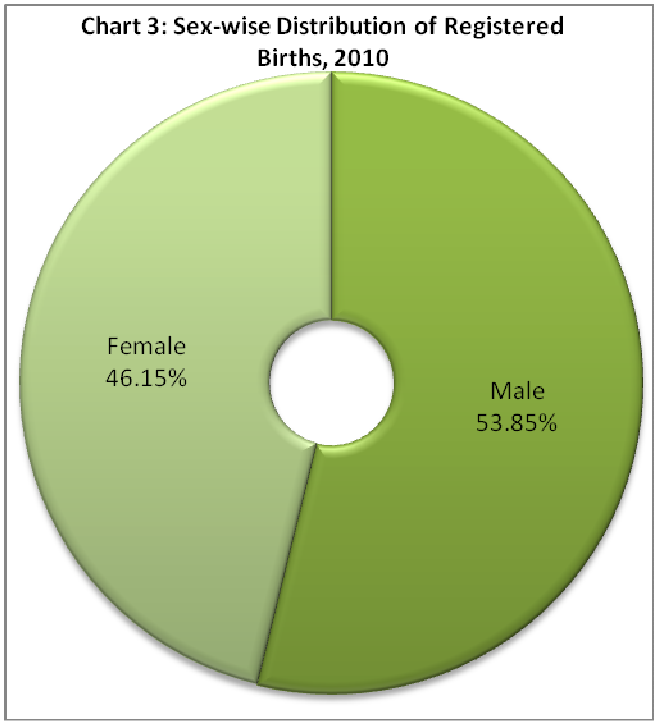
3.8 Sex-wise Distribution of Registered Vital Events

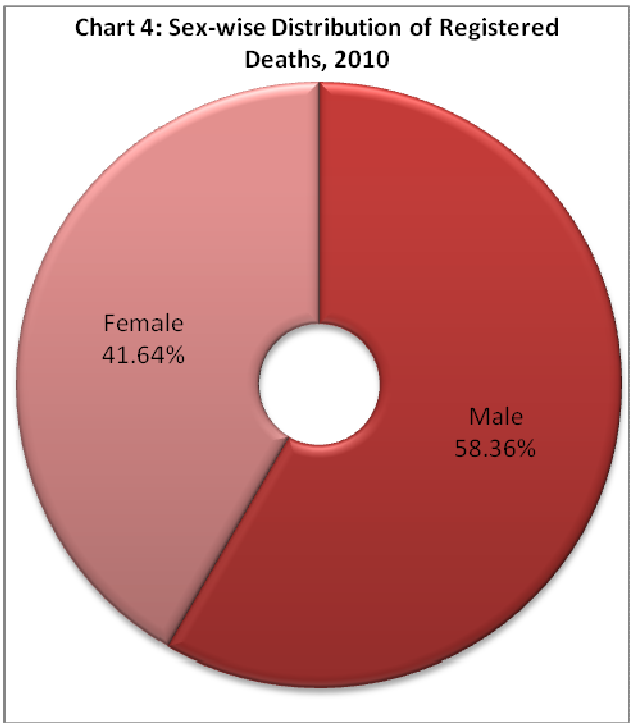
Sex	No. of Registered Births	%	No. of Registered Deaths	%
Male	9436361	53.85	2846090	58.36
Female	8087068	46.15	2030429	41.64
Person*	17523429	100.00	4876519	100.00

*: Does not include the cases of sex not reported, so does not match with total registered deaths.

3.8.1 Chart 3 on sex wise distribution of registered births reveal that share of female registered births is about 8 per cent short of registered male births. The figures exclude Uttar Pradesh due to non-receipt of information on gender wise registered births during 2010.

3.8.2 On the other hand, in case of death registration, the chart 4 shows the share of male registration is about 16 per cent more than female. These figures have been arrived after excluding the incomplete figure of Uttar Pradesh.





3.9 Sex-wise Distribution of Registered Vital Events of Major States

3.9.1 Chart 5 and 6 respectively shows the sex-wise distribution of registered births and deaths for the major States. Sex-wise distribution of birth reveals that the share of male registration is more than the female in almost all major States except Assam and Karnataka. Similar pattern can also be seen in case of death registration. Huge difference in male-female death registration has been observed in Bihar due to non-reporting of male registered figures by the districts of the State especially in urban areas.

Statement 8: Sex-wise Registered Births and Deaths of Major States (in'000), 2010

Sl. No.	States	Registered Births		Registered Deaths	
		Male	Female	Male	Female
1.	Andhra Pradesh	601.6	591.1	235.9	179.1
2.	Assam	326.6	406.2	56.7	47.3
3.	Bihar	959.0	309.5	29.6	79.1
4.	Chhattisgarh	165.3	149.8	68.1	47.4
5.	Gujarat	698.0	629.4	199.4	124.3
6.	Haryana	296.3	248.3	94.7	52.4
7.	Jammu & Kashmir	75.8	69.5	19.0	16.3
8.	Jharkhand	237.7	205.5	62.0	45.9
9.	Karnataka	529.2	542.3	232.0	149.8
10.	Kerala	282.0	264.7	137.5	101.1
11.	Madhya Pradesh	835.6	770.1	182.5	142.6
12.	Maharashtra	1044.9	892.8	383.5	279.9
13.	Odisha	401.5	365.6	158.3	120.4

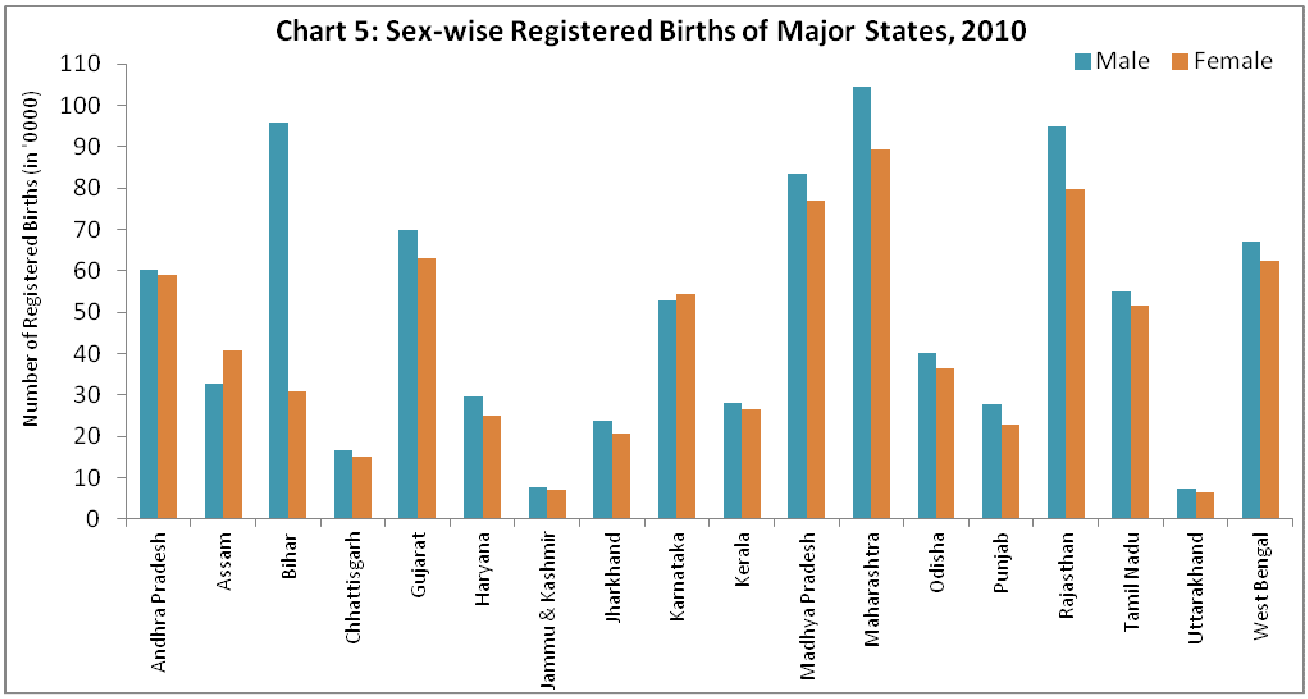
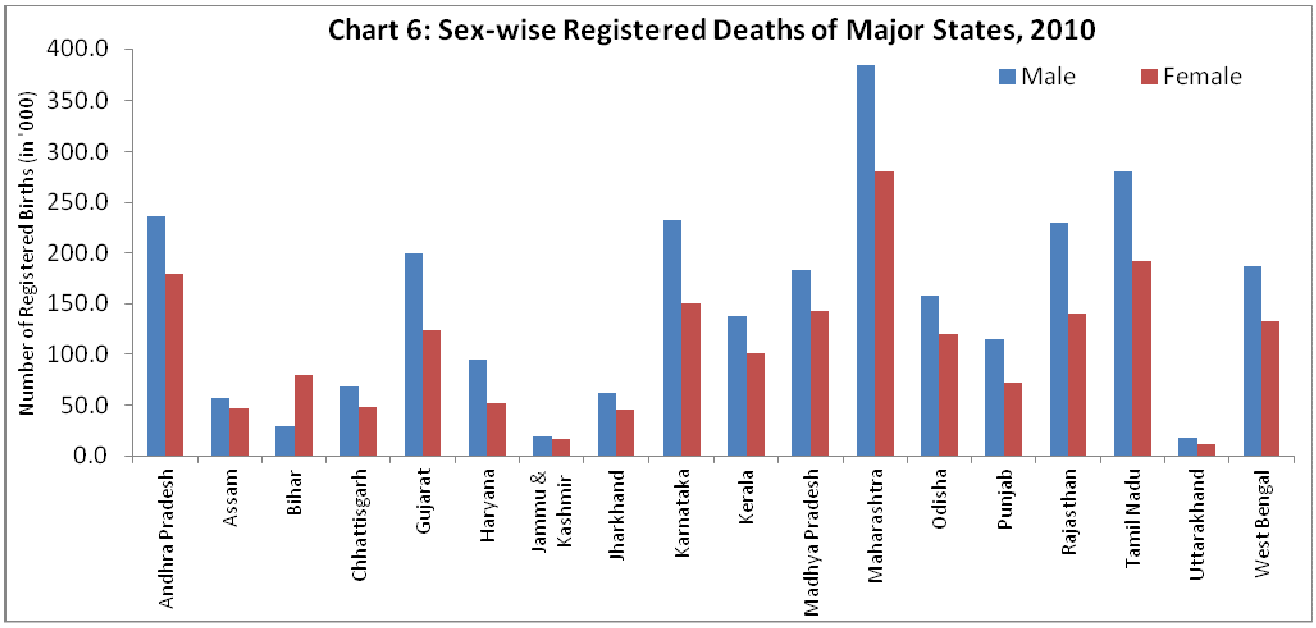
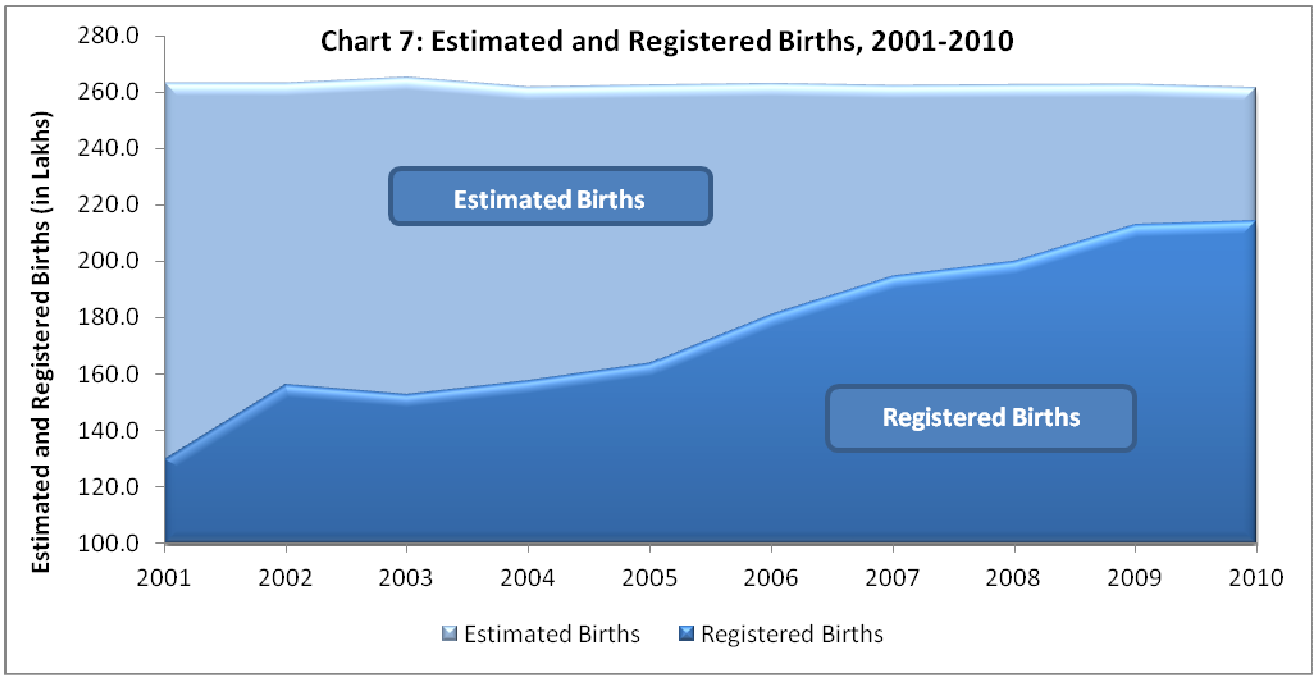
17.	Uttarakhand	73.3	62.9	18.3	10.8
18.	West Bengal	670.9	624.4	187.0	132.6

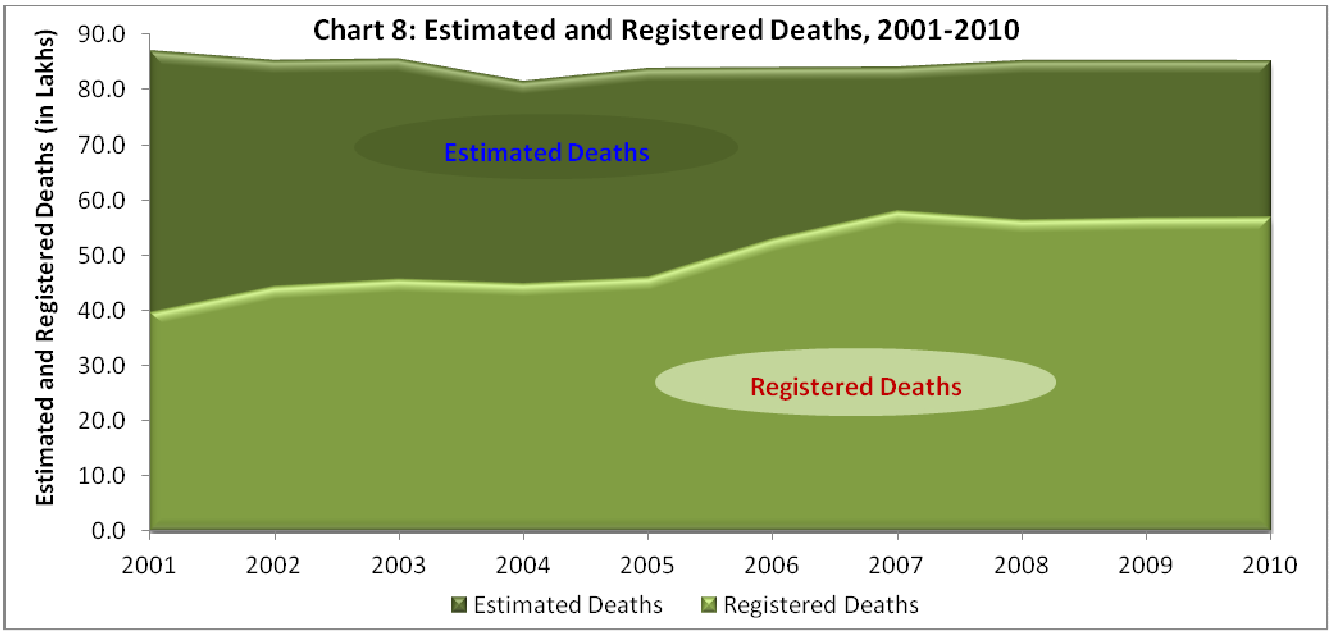




4.0 Distribution of registered births and deaths vis-à-vis estimated births and deaths for the period 2001-2010

4.1 The time series data on registered births and deaths for the years 2001 to 2010 reveals a significant long-term growth in the area covered by the registered events as compared to estimated events. In case of death registration, this share has been reduced during 2008-2009 as compared to 2007 due to less reporting of registered death events from some of the major States. Share of birth registration has crossed the level and has reached to 80 percent during 2010 which is good indication for the system of Civil Registration.



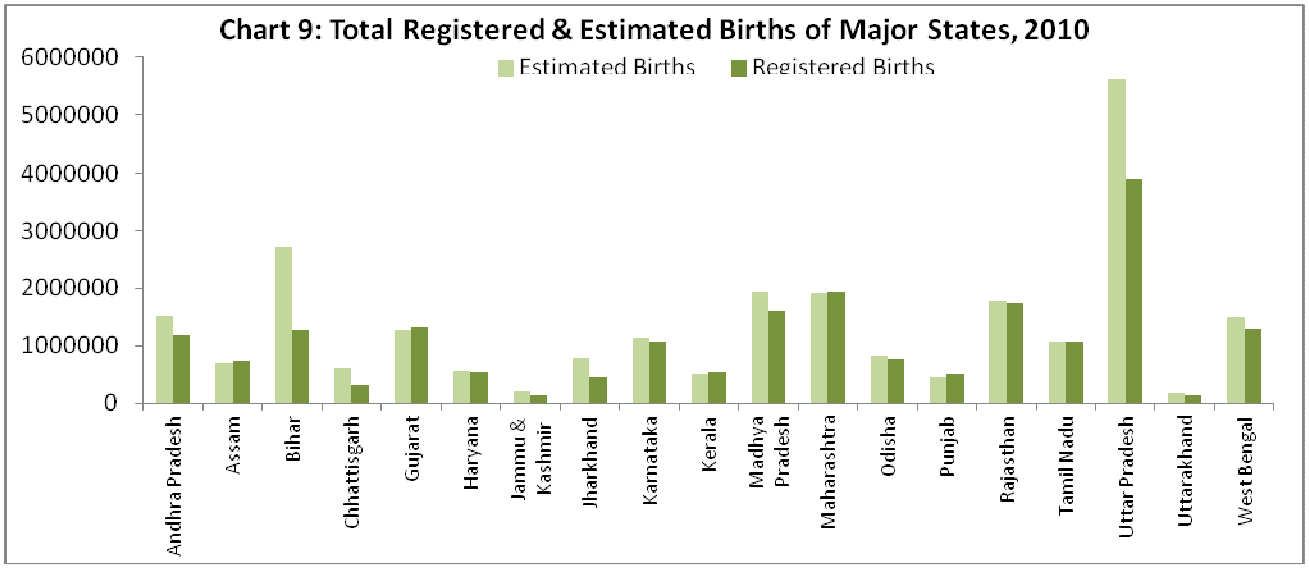


5.0 Distribution of estimated and registered events in Major States

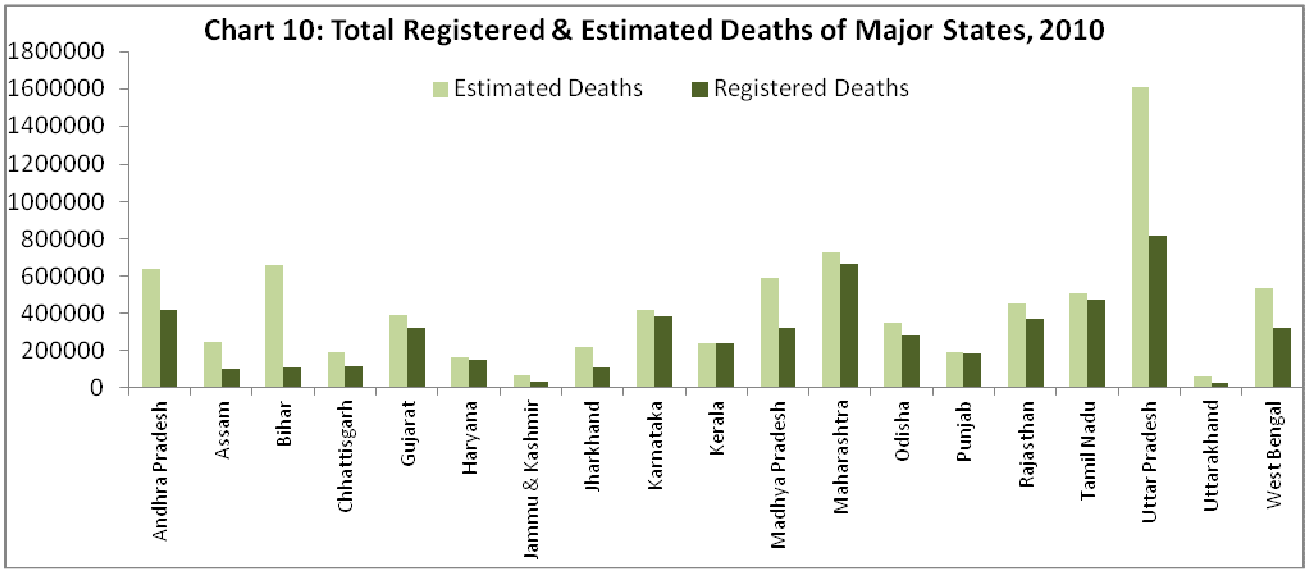
Statement 9: Total Registered and Estimated Births & Deaths of Major States, 2010

Sl. No.	States	Estimated Births	Registered Births	Estimated Deaths	Registered Deaths
1.	Andhra Pradesh	1507663	1192721	640125	415050
2.	Assam	703354	732788	248599	103943
3.	Bihar	2721401	1268550	658560	108705
4.	Chhattisgarh	608212	315082	192320	115544
5.	Gujarat	1275300	1327304	391950	323689
6.	Haryana	561135	544620	166076	147113
7.	Jammu & Kashmir	212646	145385	66234	35360
8.	Jharkhand	788955	443182	218288	107916
9.	Karnataka	1133050	1071518	418992	381743
10.	Kerala	509164	546964	240821	238864
11.	Madhya Pradesh	1950285	1605729	592944	325118
12.	Maharashtra	1909130	1937727	725693	663383
13.	Odisha	830496	767060	348403	278710
14.	Punjab	456085	507665	192325	186519
15.	Rajasthan	1792131	1745057	449711	370460
16.	Tamil Nadu	1067860	1065271	510424	472450
17.	Uttar Pradesh	5616277	3906734	1607486	813822
18.	Uttarakhand	190086	136196	62049	29127
19.	West Bengal	1494326	1295324	533688	319581

5.1 In the analysis, the States having population less than one million have not been taken into consideration**.** On comparison of estimated and registered births, it is found that there is significant gap in estimated and registered births in Andhra Pradesh, Bihar, Chhattisgarh, Jharkhand, Madhya Pradesh and Uttar Pradesh. The States of Gujarat, Kerala, Maharashtra and Punjab have registered births more than estimated births. This may be partly due to better medical facilities available in these States as compared to neighboring States. Chart 9 shows the distribution of estimated and registered births and deaths respectively in major States.



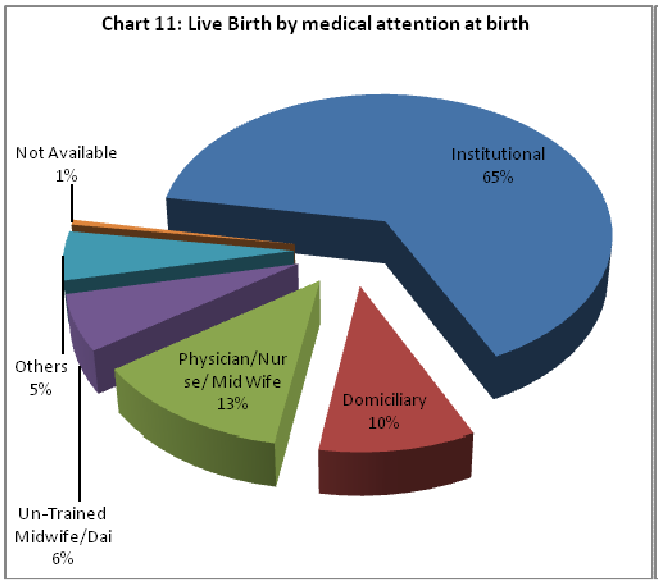
On comparison of estimated and registered deaths, it is found that there is significant gap in estimated and registered deaths in Andhra Pradesh, Bihar, Jharkhand, Madhya Pradesh, Maharashtra, Uttar Pradesh and West Bengal. Death registration inmajor States such as Assam, Bihar, Chhatisgarh, Jammu & kashmir, Jhakhand, Madhya Pradesh, Uttar Pradesh, Uttarakhand and West Bengal need to improve. Chart 10 shows the distribution of estimated and registered births and deaths respectively in major States.

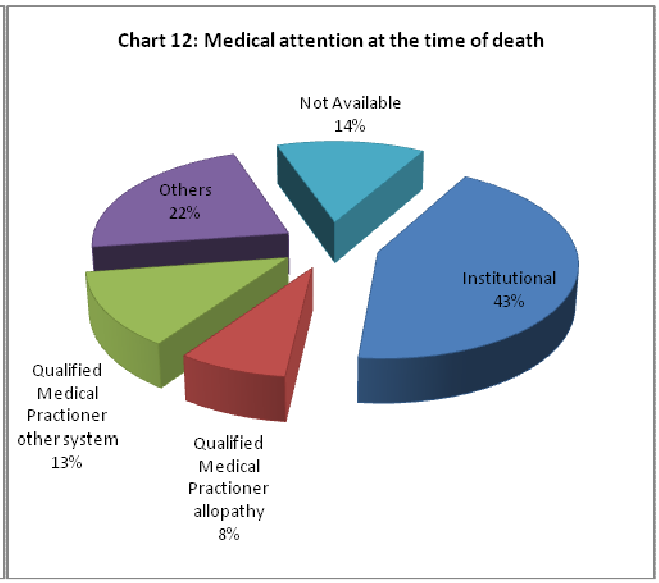


6.0 Medical attention received at the time of birth and death

6.1 The data on live birth by type of medical attention received at the time of delivery has been reported from 23 States/UTs and the combined distribution of medical attention received at the time of birth of these States/UTs has been presented in Chart 11. Chart 11 shows that majority of live births have been occurred in an institution, either in Government or private hospitals. Institutional births occurred in 65% of cases and 35% of registered births were non–institutional in the year 2010. During 2009, this ratio was of 56% and 44% in total registered births. Of the non-institutional births, 13% were attended by Physicians/Nurse/Mid-wife and 10% have been registered as domiciliary event. In spite of having enough better medical facilities about 6% of the events are still attended by untrained Mid-wife/Dai/others.

6.2 Chart 12 represents the distribution of medical attention, received by the deceased at the time of death on the basis of data received from 21 States/UTs. It is evident from Chart 12 that 43% of the total registered deaths have occurred in institutions which is on higher than that of other places from where the deceased had received medical attention. During 2009, this share was about 40% of the total registered deaths. 8% of registered deaths received medical attention from qualified allopathic professionals. 22% of deceased did not receive any medical attention at the time of death.





7.0 Infant Deaths

7.1 Statement 10 presents the infant deaths registered by place of occurrence (Rural /Urban) of the event for the year 2010. It may be observed that share of rural area is only 40.5% and urban area is 59.5% in total infant deaths registered. Non registration of infant deaths in rural area is a cause of concern which may be due to non-reporting of infant deaths to the Registrars. Jharkhand has not submitted the information on registered infant deaths and Tripura for its urban areas. Share of infant deaths to total registered deaths is more in urban area as compared to rural area. Statement 11 gives the percentage distribution of sex wise infant deaths which shows that female infant deaths are reported more than male infant deaths.

Statement 10: Percentage distribution of registered infant deaths by place of occurrence, 2010

Place of occurrence	No. of Registered Deaths	No. of Registered Infant Deaths	% share of registered Infant Deaths by place of occurrence	% of Registered Infant deaths to total registered deaths
Rural	3365047	73221	40.5	2.2
Urban	2325502	107515	59.5	4.6
Total	5690549	180736	100.0	3.2

Statement 11: Percentage distribution of infant deaths by sex, 2010

Sex	No. of Registered Deaths	No. of Registered Infant Deaths	% of Infant deaths to total registered deaths
Male	2846090	88519	3.1
Female	2030429	72398	3.6
Person*	5690549	180736	3.2

*: Includes the cases of sex not reported, so does not match with the addition of male and female.

8.0 Still Births

8.1 The birth of an infant that has died in the womb after having survived through at least the first 28 weeks of pregnancy i.e. a still birth occurs when a fetus has died in the uterus. Still birth also known as fetal death which has been defined as *'death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy and which is not an induced termination of pregnancy. The death is indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.'*

8.2 Statement 12 presents still births registered by place of occurrence (Rural /Urban) of the event for the year 2010 and it may be observed that in total registered still births, share of rural registered births is only 29.1% which may be due to poor netting of still births in rural areas. In urban areas, this share is about 70.9% due to better netting of still births from medical institutions. Non registration of still births in rural area is a cause of concern. This total still birth is based on registered events from 25 States/UTs. State-wise registered still births has been depicted in Table 4.

Statement 12: Still Births registered during 2010

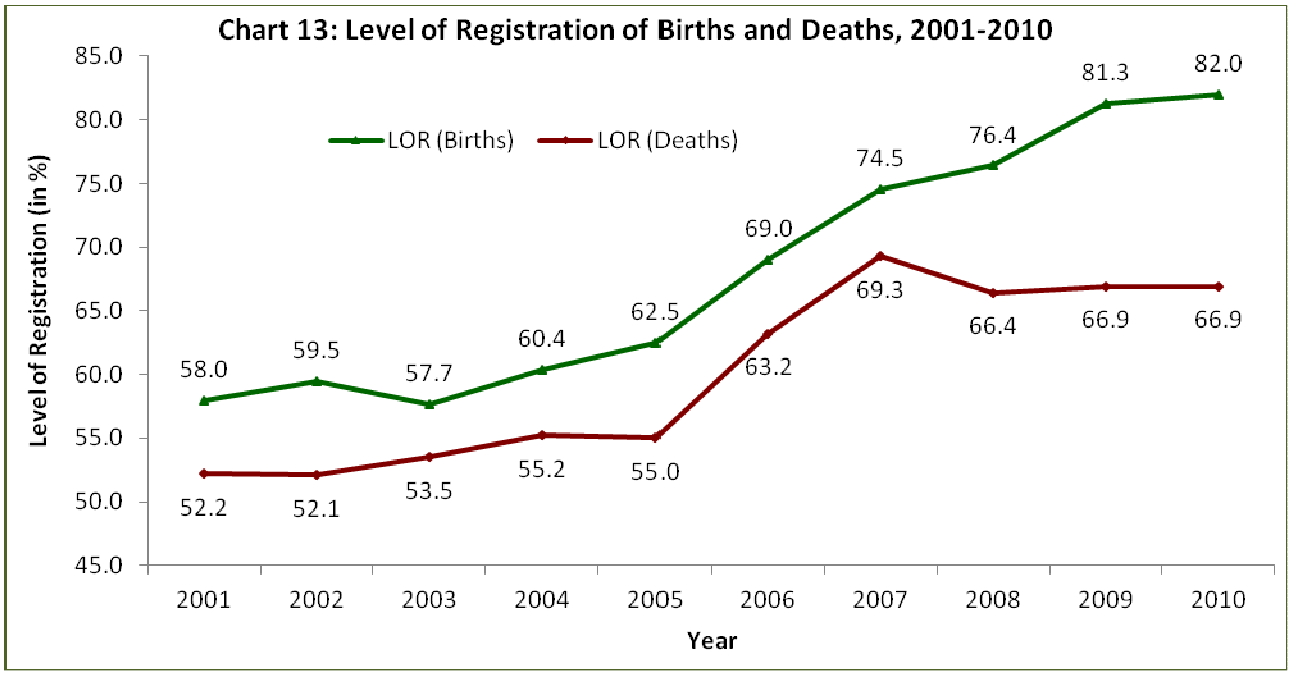
Place of occurrence	No. of Registered Still Births	% share of registered still births by place of occurrence
Rural	27125	29.1
Urban	66032	70.9
Total	93157	100.0

9 Analysis and Findings

9.1 Level of Registration (LOR)

9.1.1 The level of registration, defined as the percentage of registered births/deaths to the births/deaths estimated through SRS, determines the performance level of a State / Union territory in respect of registration of births and deaths. In the absence of reliable estimates of number of births and deaths on a year to year basis from any other source, the number of events as revealed from SRS is used to calculate the level of registration. The level of registration so calculated is very high for some of the smaller States/Union Territories either due to the lower estimates of vital events than the actual and / or due to the fact that SRS estimates of vital events are based on the place of usual residence while events are registered at the place of occurrence irrespective of the place of residence.

9.1.2 The levels of registration of births and deaths for India and States/UTs for the period 2001 to 2010 are presented in Statements 13 and 14 respectively. The level of registration of births has increased to 82.0 percent in 2010 from 58.0 percent in 2001 i.e. in last 10 years an increase of about 24 per cent has been shown in birth registration. The level of registration of deaths has also increased to 66.9 percent in 2010 from 52.2 percent during the corresponding period. There is no change in the level of registration of deaths during 2010 as compared to 2009. Chart 13 depicts the trend of level of registration of births and deaths from 2001 to 2010. The level of registration for births has recorded sharp exponential increase after 2005. However, the existing gap of about 18 percent in case of registration of births and about 33 percent for registration of deaths at all India level remains a cause of concern. In order to universalize the registration of events, a mission mode approach is required especially in the poor performing States.



9.1.3 Statement 13 reveals that the States/UTs continue to function at different levels of registration efficiency during 2001-2010. The level of registration of births in the country is highly erratic even after more than 40 years of enactment of the Registration of Births and Deaths Act, 1969.

Statement 13: Level of Registration of Births, 2001-2010

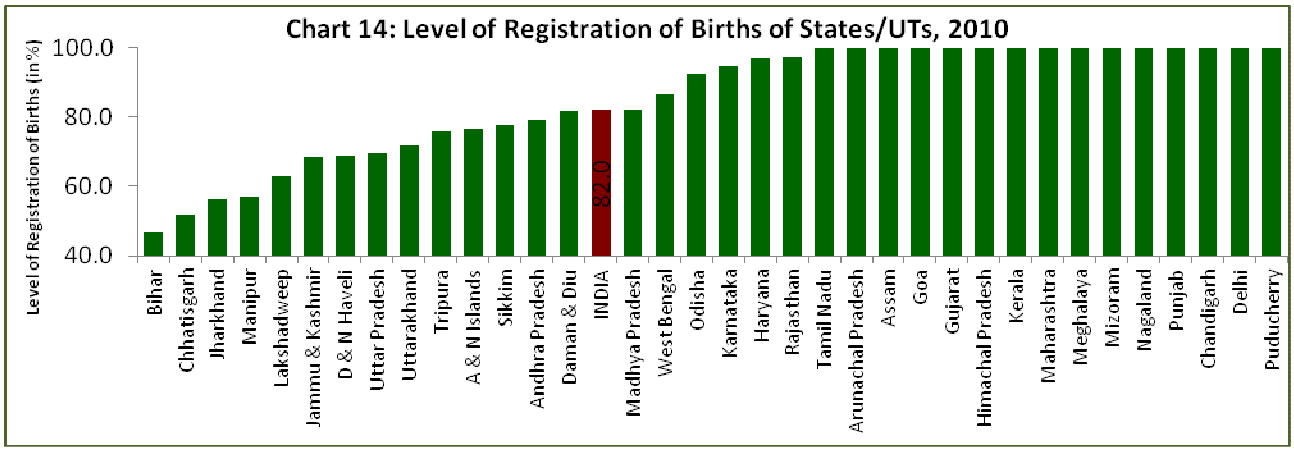
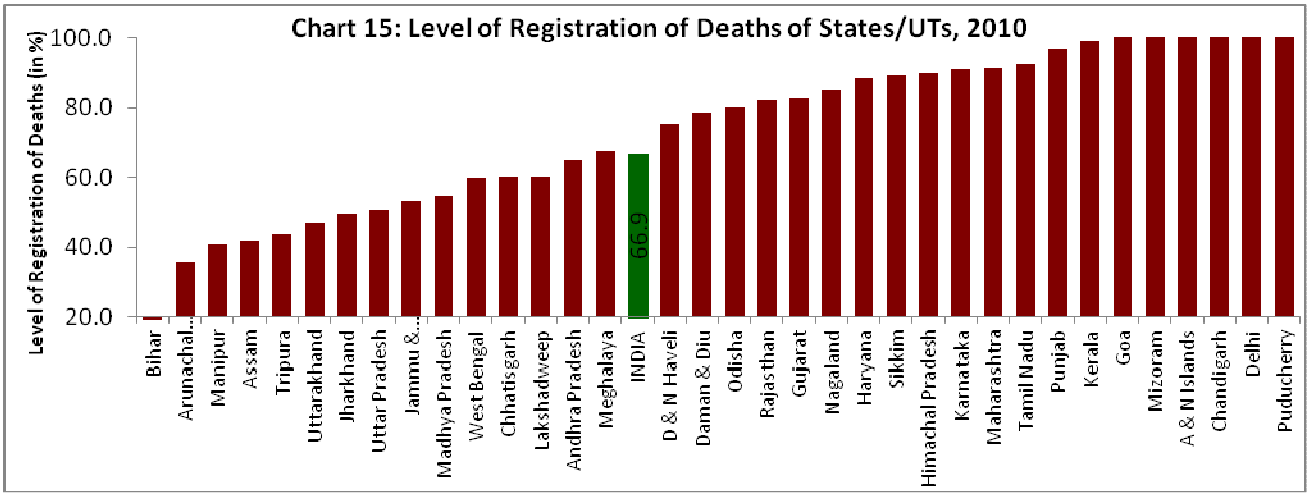
Note: n.c. – not calculated and n.a. – not available

9.1.4. Chart 14 shows that 14 States/UTs namely Arunachal Pradesh, Assam, Goa, Gujarat, Himachal Pradesh, Kerala, Maharashtra, Meghalaya, Mizoram, Nagaland, Punjab, Chandigarh, Delhi and Puducherry have recorded cent percent registration of births in 2010.



9.1.5 5 States/UTs namely, Kerala, Mizoram, Chandigarh, Delhi and Puducherry have maintained their level of registration of births as cent percent since last 10 years. During 2010, 19 States/UTs have recorded their level of registration of births above the level of 90 per cent. Chart 14 portrays the level of registration of births for India and States/UTs for the year 2010. 21 States/UTs have recorded their level of registration of births higher than the National level and on the other side this number is 14. Statement 8 shows that the States of Haryana, Sikkim, Tripura and the UT of A & N Islands, D & N Haveli, Daman & Diu and Lakshadweep where the level of reporting is cent percent, the level of registration of birth has not achieved the target of cent percent which may be due to less registration of birth events/differences in the actual and projected Mid- Year Population.

9.1.6 Statement 14 shows that the level of registration of deaths in the country also continues to be fluctuating. In 2010, Goa and Mizoram are the only States recording cent percent registration of deaths followed by the States of Kerala, Punjab, Tamil Nadu, Maharashtra and Karnataka reporting more than 90 percent registration of deaths. The Union Territories of Chandigarh, Delhi and Puducherry have maintained cent percent level of registration of deaths since 2001. 21 States/UTs have recorded their level of registration of deaths higher than the National level and on the other side this number is 14. Chart 15 depicts the level of registration of deaths for India and States/UTs for the years 2010.



Statement 14: Level of Registration of Deaths, 2001-2010

Note: n.c. – not calculated and n.a. – not available

9.1.7 Statement 15 presents the distribution of major States (with population 10 million and above as per 2011 Census) by their level of registration of births and deaths. The major States have been categorized into 5 groups as per their level of registration of births and deaths for the year 2009 and 2010.

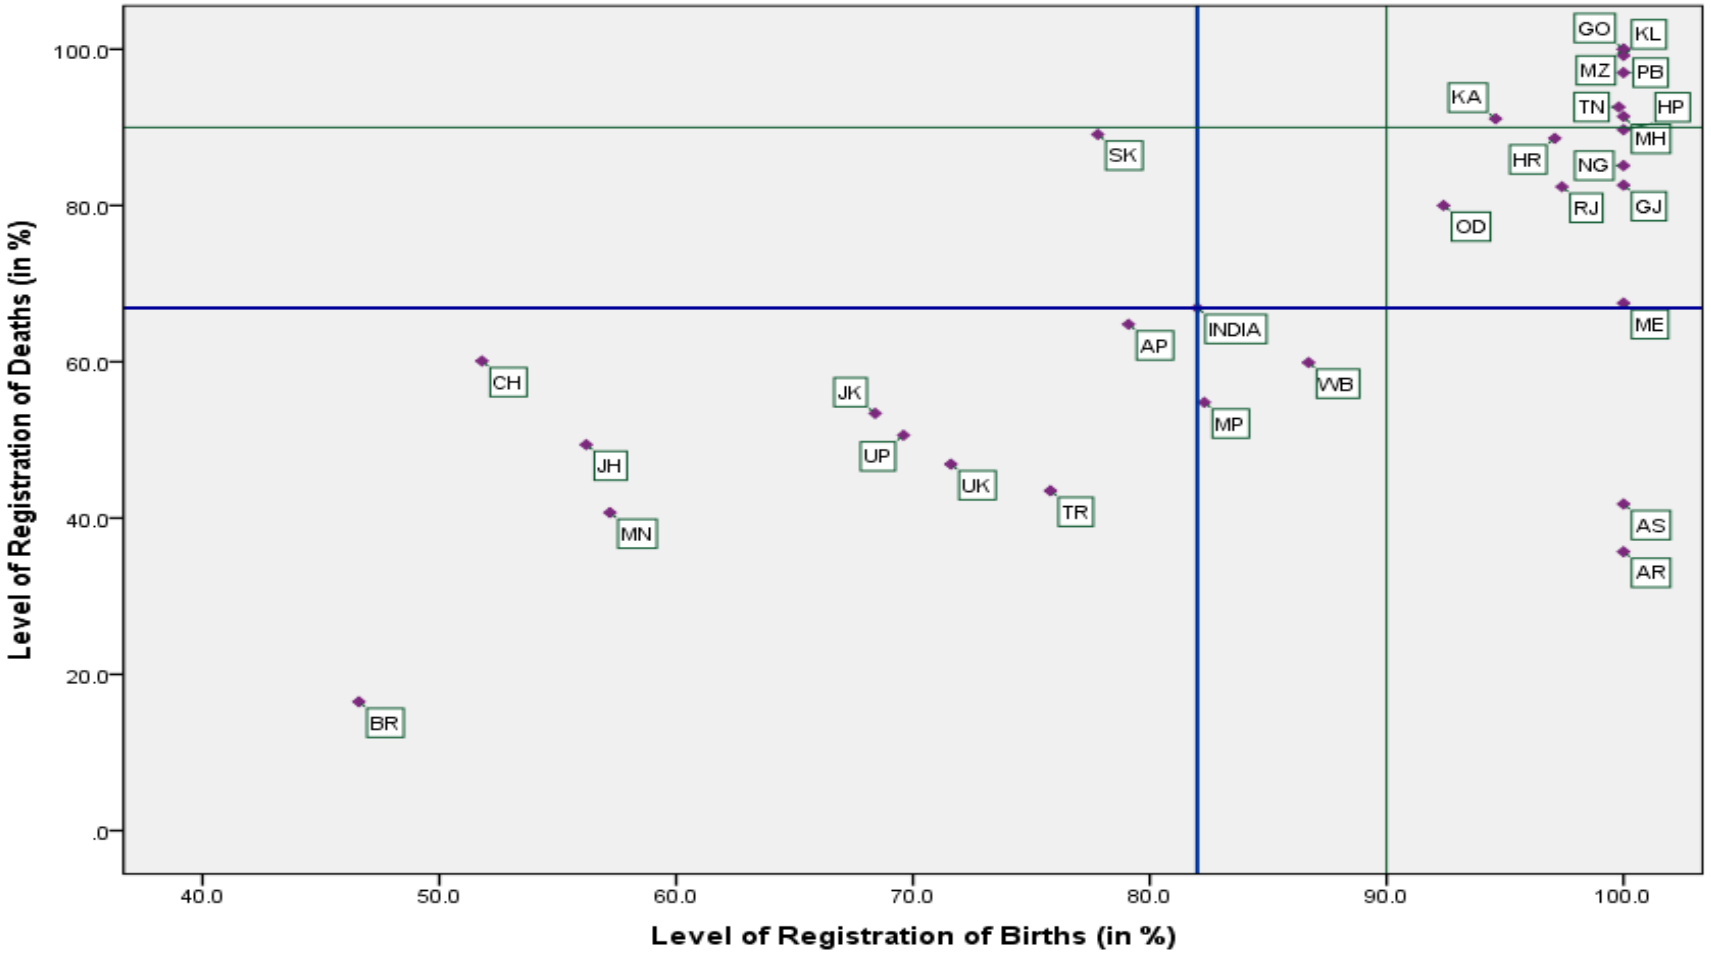
Statement 15: Major States (Population above 10 million as per 2011 Census) classified by their level of registration, 2009 and 2010

Level of Registration	**2009**		**2010**	
	Births	**Deaths**	**Births**	**Deaths**
Above 90	8 States (Gujarat, Haryana, Karnataka, Kerala, Maharashtra, Punjab, Rajasthan and Tamil Nadu)	3 States (Kerala, Punjab and Tamil Nadu)	10 States (Assam, Gujarat, Haryana, Karnataka, Kerala, Maharashtra, Odisha, Punjab, Rajasthan and Tamil Nadu)	5 States (Karnataka, Kerala, Maharashtra, Punjab and Tamil Nadu)
80-90	4 States (Assam, Madhya Pradesh, Odisha and West Bengal)	4 States (Haryana, Karnataka, Maharashtra and Odisha)	2 States (Madhya Pradesh and West Bengal)	4 States (Gujarat, Haryana, Odisha and Rajasthan)
50-80	5 States (Andhra Pradesh, Jammu & Kashmir, Jharkhand, Uttarakhand and Uttar Pradesh)	9 States (Andhra Pradesh, Chhattisgarh, Gujarat, Jammu & Kashmir, Jharkhand, Madhya Pradesh, Rajasthan, Uttar Pradesh and West Bengal)	6 States (Andhra Pradesh, Chhattisgarh, Jammu & Kashmir, Jharkhand, Uttarakhand and Uttar Pradesh)	6 States (Andhra Pradesh, Chhattisgarh, Jammu & Kashmir, Madhya Pradesh, Uttar Pradesh and West Bengal)
25-50	2 States (Bihar and Chhattisgarh)	2 States (Assam and Uttarakhand)	1 State (Bihar)	3 States (Assam, Jharkhand and Uttarakhand)
Below 25	NIL	1 State (Bihar)	NIL	1 State (Bihar)

9.1.8 Kerala, Punjab and Tamil Nadu are the only three major States recording more than 90 percent of registered births as well as deaths both in 2009 and 2010. Bihar is the only State in case of death registration in the lowest category during both the years. 10 major States have recorded in the category of above 90 per cent of level of registration of births in 2010 as compared to 8 in 2009. Assam and Odisha have moved one step to the level of above 90 from 80-90 category in 2010. The number of Sates has also increased in the category of above 90 per cent of level of registration of deaths.

9.1.9 The level of registration of births and deaths for the year 2010 for India and States/UTs has together been mapped in the Chart 16. The rectangle on the top right corner is the expected target towards achieving the cent percent registration and status of each States is depicted in the Chart 16.

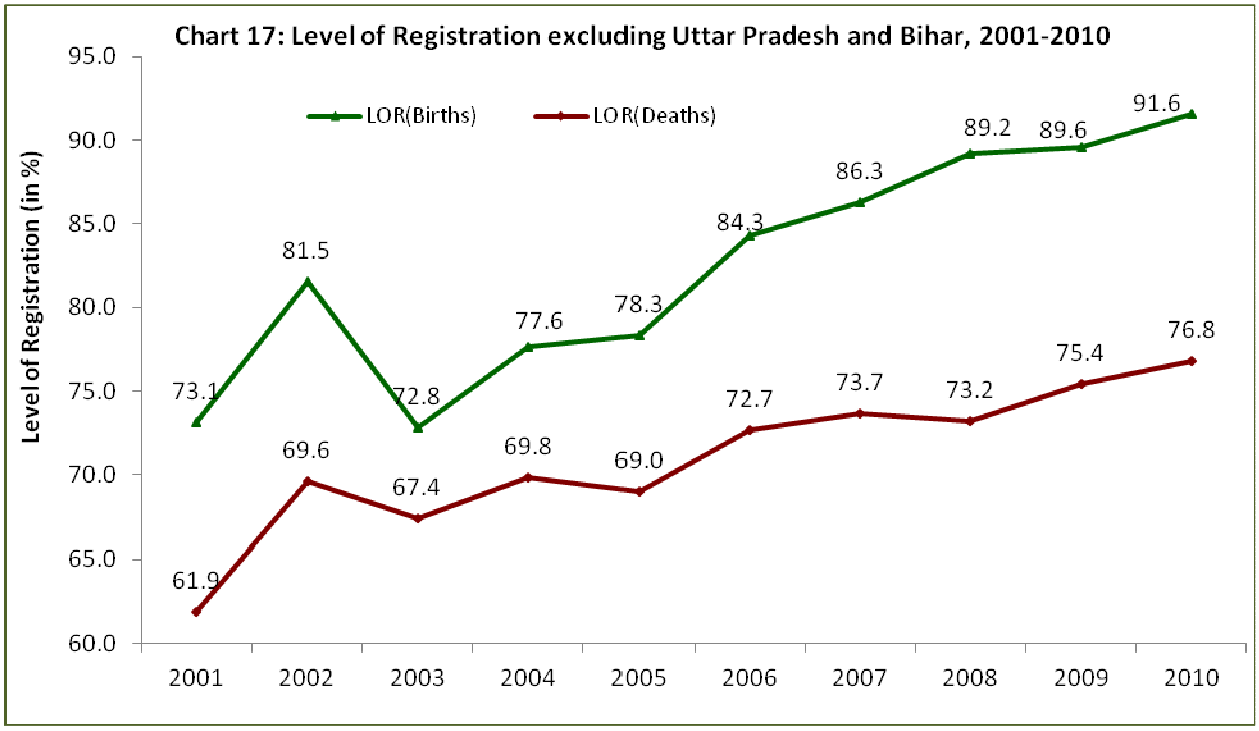
Chart 16: Level of Registration of Births and Deaths, 2010



Andhra Pradesh (AP), Arunachal Pradesh (AR), Assam (AS), Bihar (BR), Chhattisgarh (CH), Goa (GO), Gujarat (GJ), Haryana (HR), Himachal Pradesh (HP), Jammu & Kashmir (JK), Jharkhand (JH), Karnataka (KA), Kerala (KL), Madhya Pradesh (MP), Maharashtra (MH), Manipur (MN), Meghalaya (ME), Mizoram (MZ), Nagaland (NG), Odisha (OD), Punjab (PB), Rajasthan (RJ), Sikkim (SK), Tamil Nadu (TN), Tripura (TR), Uttar Pradesh (UP), Uttarakhand (UK), West Bengal (WB)

10.0 Level of Registration after excluding Uttar Pradesh and Bihar

10.1 In order to quantify the impact of Bihar and Uttar Pradesh, which are most populous and performing abysmally poor for last so many years, the level registration for the country excluding these two States have been worked out and mapped in Chart 17 from 2001 onwards. These two States even after showing marginal improvement in functioning of Civil Registration during last several years still suppresses the national figure for registration of both births and deaths by around 10 per cent.



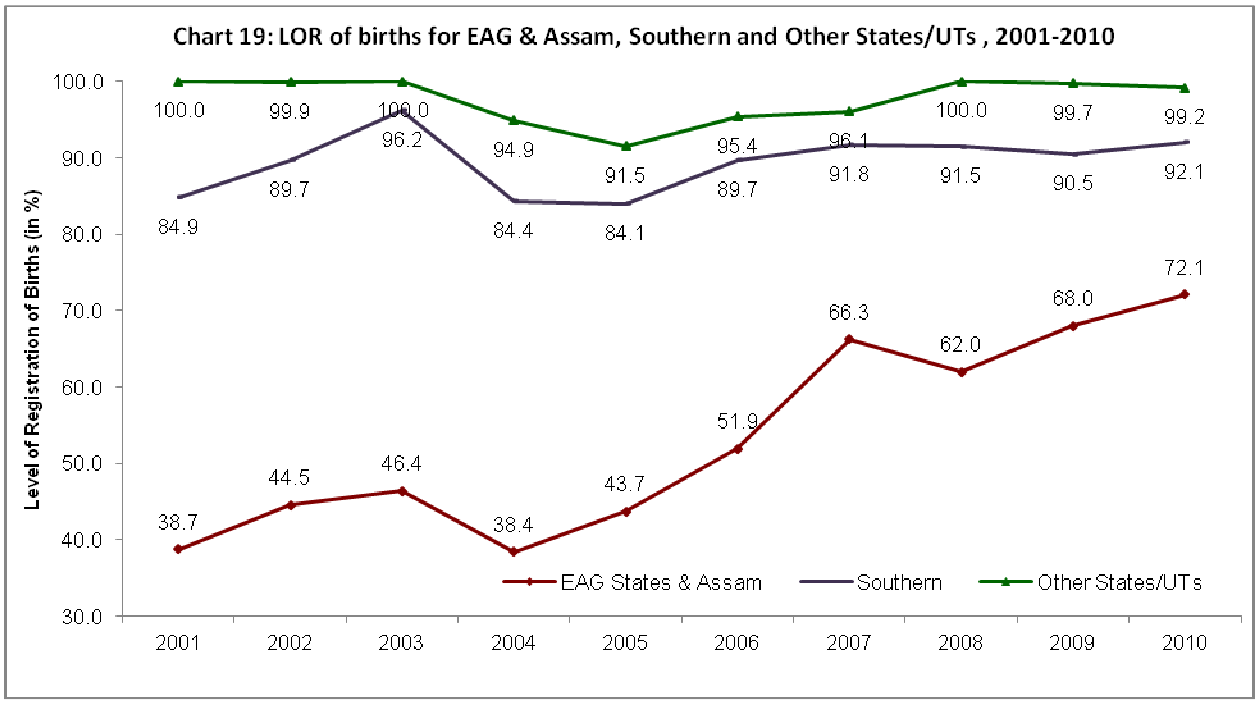
12.0 Comparison of level of registration of births and deaths in EAG & Assam, Southern States and Other States/UTs

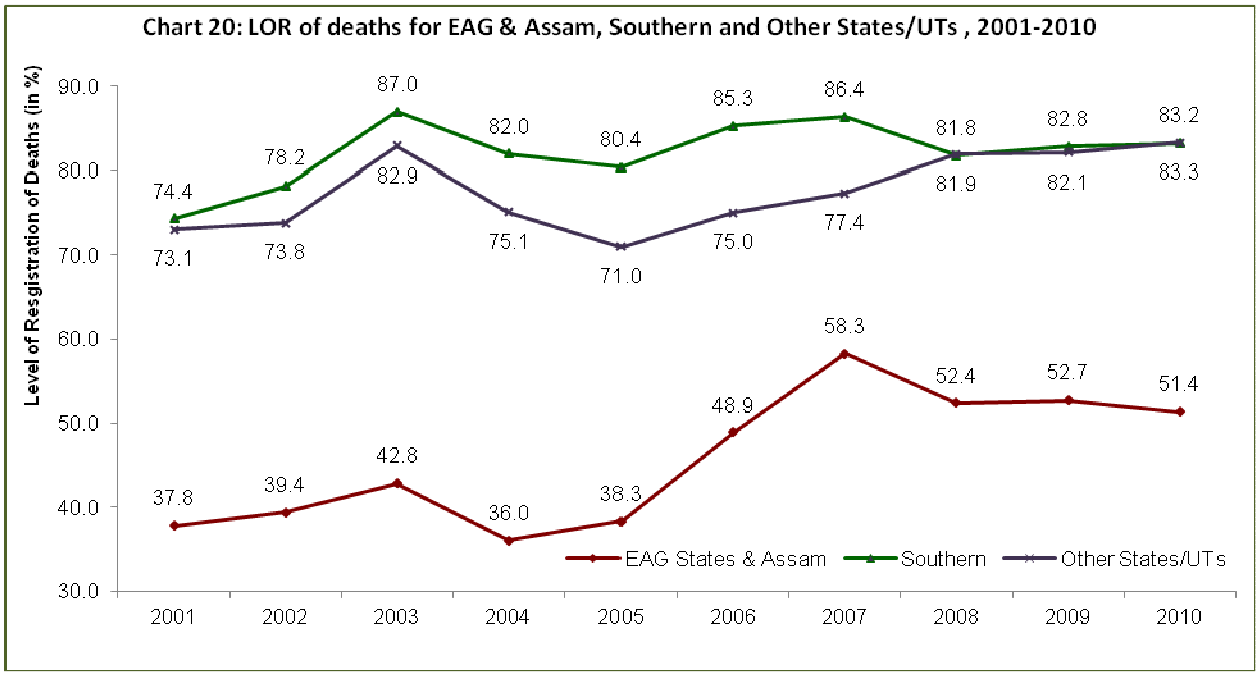
12.1 In order to highlight the gap in the demographic profile of i) Empowered Action Group (EAG) States & Assam, ii) Southern States and iii) other States/UTs, the level of registration for births and deaths (two important indicators describing the demographic progress) has been worked out and shown in the charts 19 and 20 respectively.

12.2 The compositions of these three groups in terms of States/UTs are as under:

a) EAG States: Bihar, Jharkhand, Madhya Pradesh, Chhattisgarh, Odisha, Rajasthan, Uttar Pradesh and Uttarakhand. Assam has also been added to this group.
b) Southern States: Andhra Pradesh, Karnataka, Kerala and Tamil Nadu.
c) Other States/UTs: This category covers all the remaining States and UTs.

12.3 It can be seen that the level of registration of births for other States/UTs is higher than that of Southern as well as EAG States& Assam persistently over the period. This perhaps is due to low level of registration of births in Andhra Pradesh and to some extent in Karnataka.

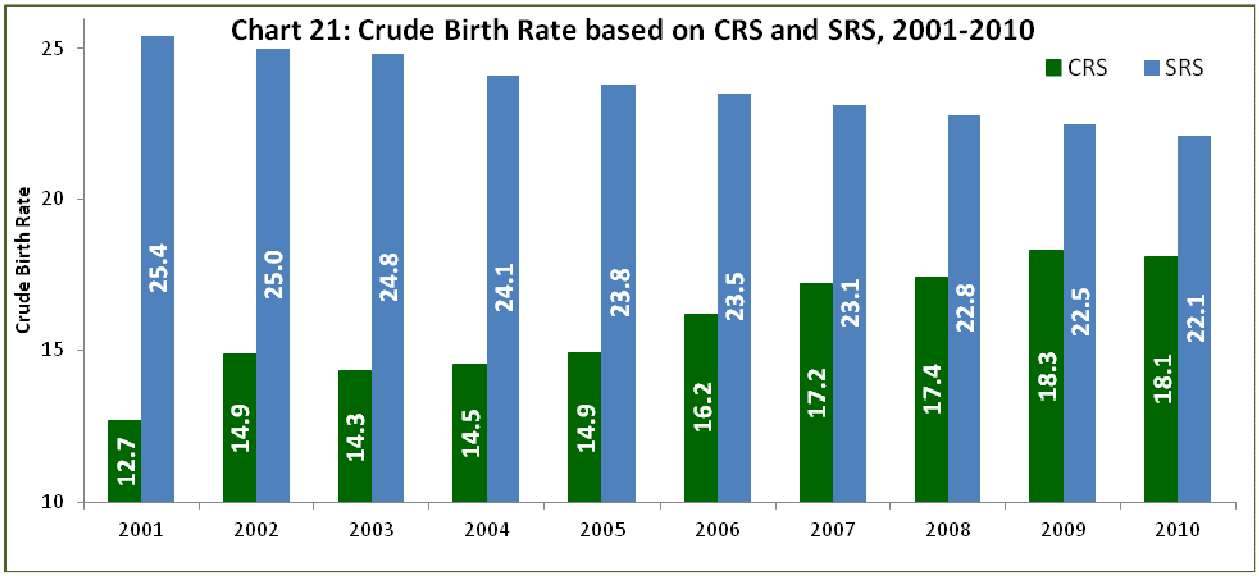




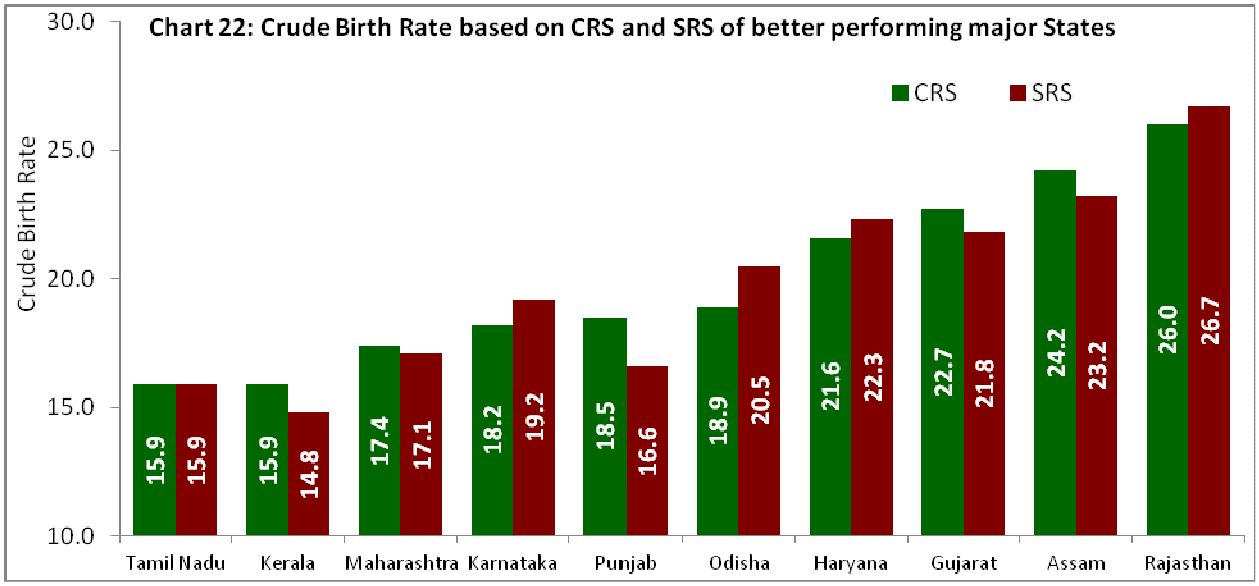
13.0 Crude Birth Rate

13.1 The Crude Birth Rate (CBR) is the annual number of live births per thousand populations and is a ratio. The numerator is the number of live births registered during the year and the denominator is the midyear population for the same period.

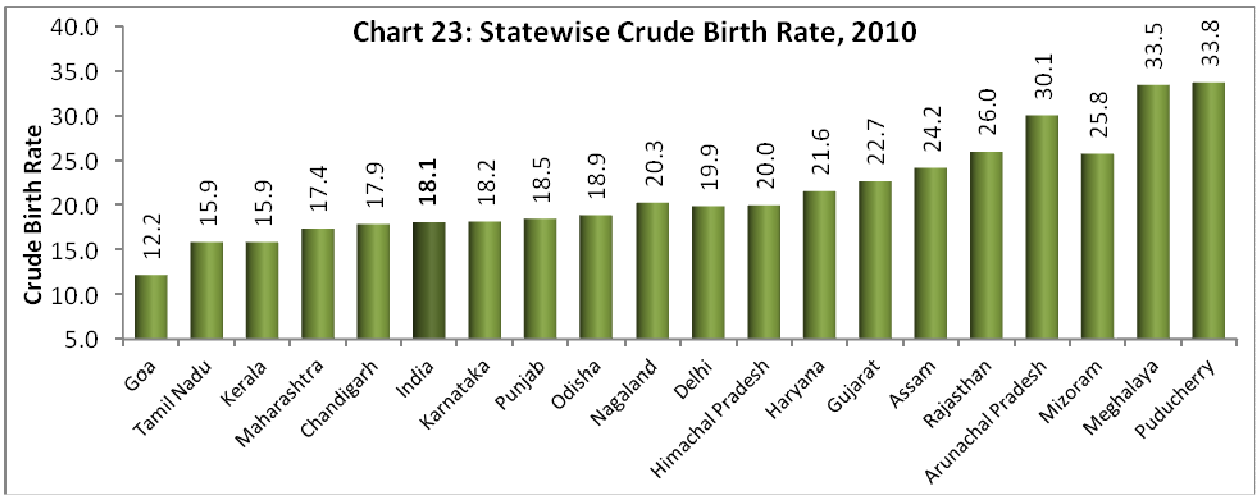
13.2 Crude Birth Rate (CBR) based on CRS data is compared with the CBR estimated from SRS to evaluate the completeness of Civil Registration System despite the difference in method of data collection. The birth data in CRS is based on the place of occurrence of event whereas in SRS, it is based on the place of usual residence of the mother. A comparative picture of CBRs based on CRS and SRS for the period 2001 to 2010 has been depicted in the Chart21.



13.3 It can be seen from the above chart that gap between the birth rates based on CRS and SRS is narrowing down over the years which is a good indication of improvement in the functioning of CRS. The situation further improves if a comparison is made between the birth rates based on CRS and SRS for the States recording more than 90 per cent level of registration of births. To illustrate this, such a comparison has been done for few States as shown in Chart 22. It can be seen from the chart that the birth rates at State level are in close proximity. District-wise birth rates for better performing States have been derived which may be seen from Table 15.



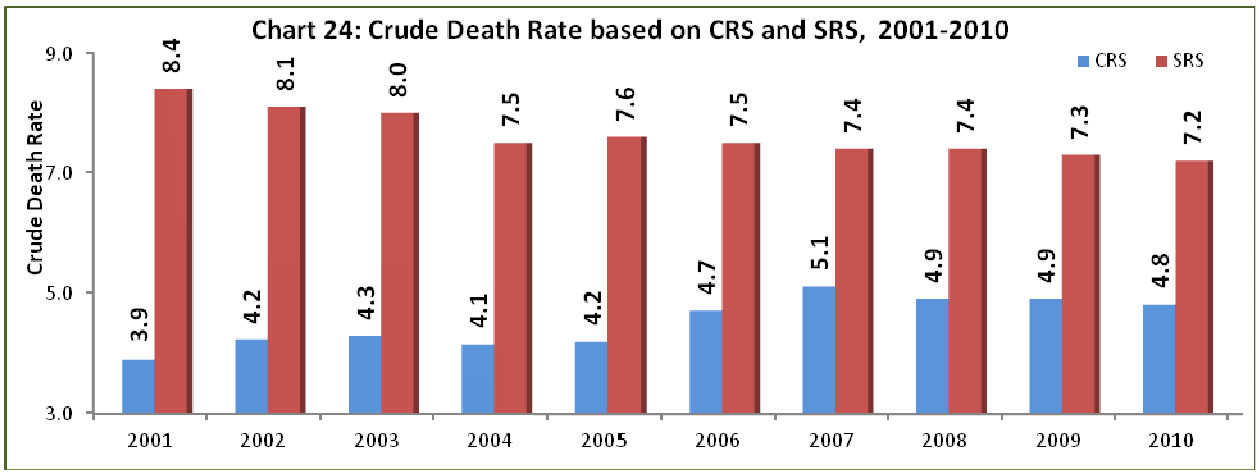
13.4 The Crude Birth Rates for the year 2010 for India and States/UTs where level of registration of birth is more than 90% are presented in Chart 23. Among these States/UTs, Puducherry has recorded the highest birth rate which is due to the fact that substantial number of births is occurring to the mothers who are not the usual residents of the UT and might have visited to avail better medical facilities available in Puducherry. As per the Annual Statistical Report of the UT, 52.8% of the mothers are not the usual resident of the UT. Lakshadweep followed by Tripura has recorded the lowest birth rate during the year among all States/UTs.



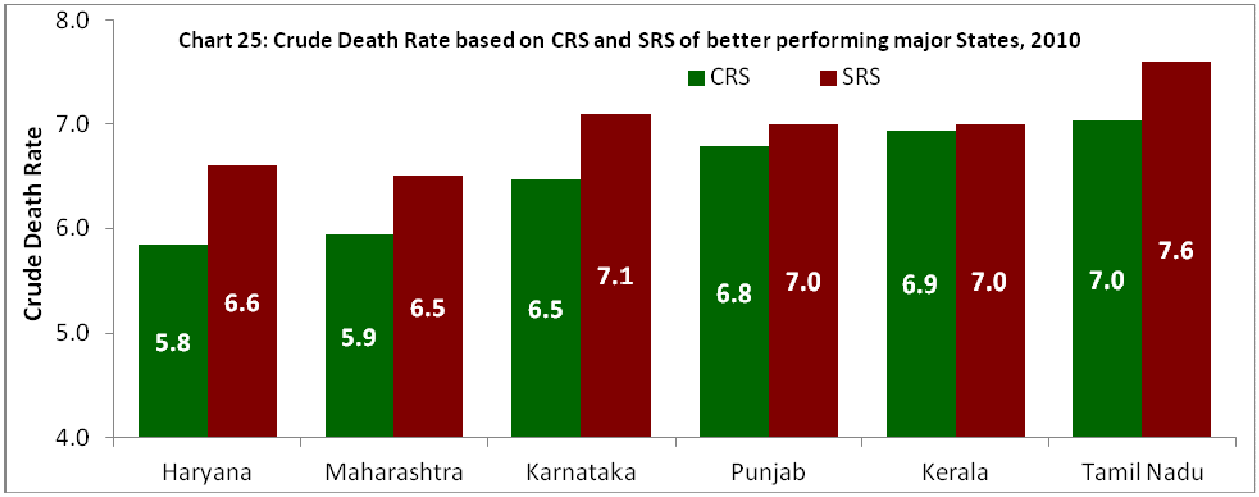
14.0 Crude Death Rates

14.1 Crude death rate is the mortality expressed as a proportion of the population. The crude death rate is defined as the ratio of the number of deaths during the year to the midyear population in that year; the value is expressed per thousand populations.

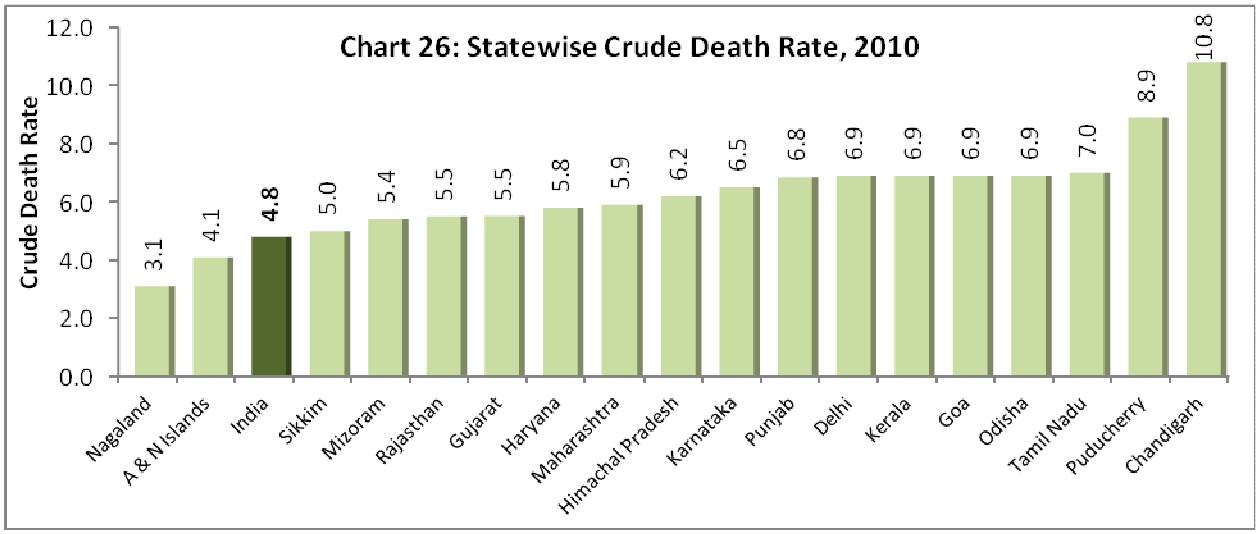
14.2 Crude Death Rate (CDR) based on CRS data is compared with the CDR estimated from SRS to evaluate the completeness of Civil Registration System despite the difference in method of data collection. The death data in CRS is based on the place of occurrence of event whereas in SRS, it is based on the place of usual residence of the deceased. A comparative picture of CDRs based on CRS and SRS for the period 2001-2010 has been depicted in the Chart24.



14.3 It may be seen from Chart24 that gap between death rates based on CRS and SRS during 2010has narrowed down which is a good indication of improvement in the functioning of CRS. The situation further improves if death rates based on CRS and SRS for the better performing States recording more than 85 per cent level of registration of deaths are compared. To illustrate this, such a comparison has been done for the better performing States as shown in Chart25 for 2010. It may be seen that the death rates are in close proximity in these States. District-wise death rates for better performing States have been derived which may be seen from Table 15.



14.4 The crude death rates for the year 2010 for India and States/UTs where level of registration of death is more than 80% are presented in Chart 26. Among these States/UTS, Chandigarh has reported the highest CDR during the year. This may due to the fact that substantial number of deaths may be occurring to outsiders who visit these places to avail better medical facilities. Bihar has reported the lowest CDR during the year 2010 among all States/UTs which is due to poor netting of death events.



14.5 Statement 16 presents the comparative picture of crude birth and death rates based on the data from CRS and SRS of the States/UTs for year 2010. It may be seen from the Statement 11 that the birth and death rate for the country as a whole based on SRS data is about 4 percent and 2 per cent higher than that of corresponding rates based on CRS data. In view of the gap of about 18 per cent in

registration of births and about 33 per cent in registration of deaths at National level, the rates derived from CRS data is not comparable with the rates based on SRS data for the country as a whole. However, it can be observed in the States, where the level of registration of vital events is quite good during 2010, the crude birth rates based on registered events are close to the respective estimates based on SRS in respect of the States of Goa, Gujarat, Haryana, Karnataka, Kerala, Maharashtra, Rajasthan and Tamil Nadu. There are significant differences in majority of the States in the death rates based on CRS and SRS which is due to low level of registration of deaths.

Statement 16: Crude Birth &Death Rates based on CRS &SRS and LOR- States/Union Territories, 2010

Sl. No.	India/States/Union Territories	CBR		LOR (Birth)	CDR		LOR (Death)
		CRS	SRS		CRS	SRS

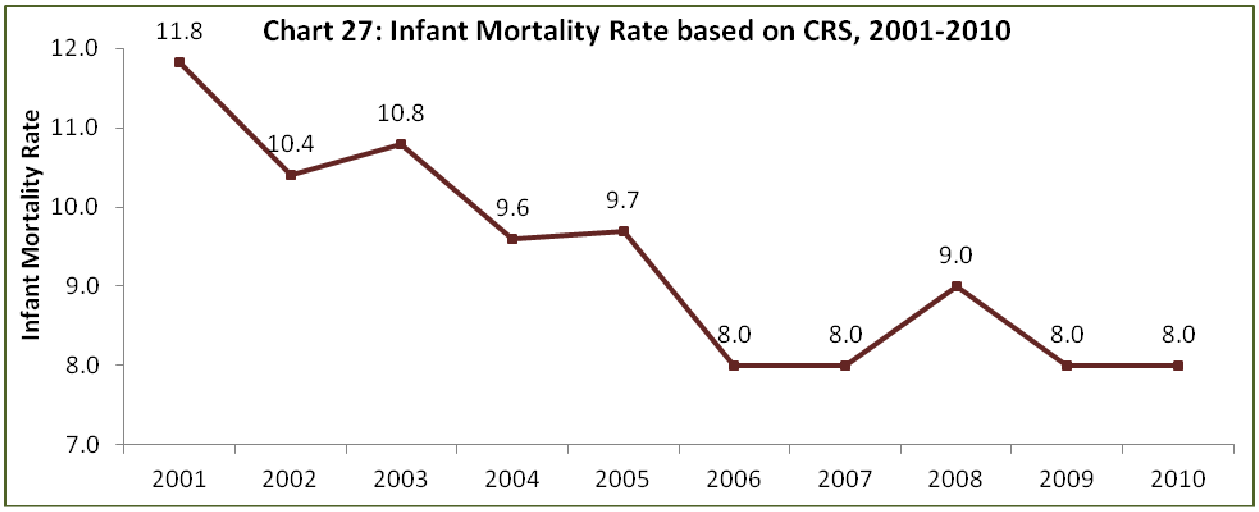
6	Lakshadweep	9.0	14.3	62.9	3.9	6.4	60.2
7	Puducherry	33.8	16.7	100.0	8.9	7.4	100.0
INDIA		**18.1**	**22.1**	**82.0**	**4.8**	**7.2**	**66.9**

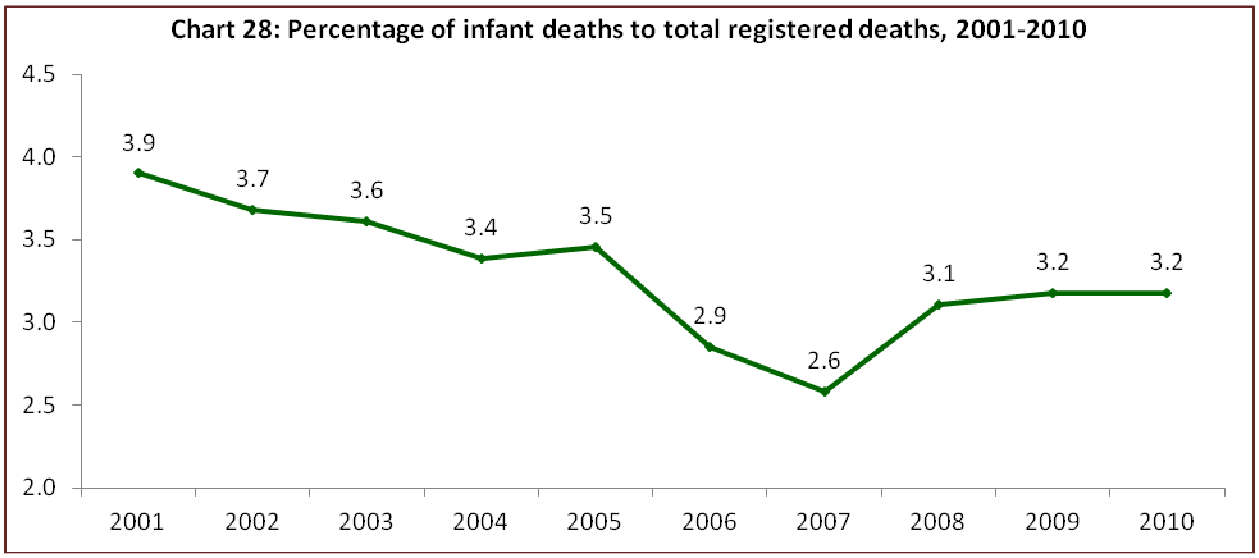
14.6 This suggests that in the States where LOR is high, the data on registered events could also be used to analyse the inter–district variation in crude birth and death rates. In the remaining States, there are measurable gaps in the birth and death rates based on CRS and SRS and a lot more efforts are required to bridge the same.

15.0 Infant Mortality Rates

15.1 The Infant Mortality Rate (IMR) is defined as the ratio of the number of deaths of children under one year of age to the number of live births in the reference year, the value is expressed per thousand live births.

15.2 Unlike Crude birth and death rates, the Infant Mortality Rate (IMR) for the country based on CRS data over the years is exhibiting a declining trend. Chart 27 depicts the IMR based on CRS data for the year 2001 onwards. The declining coverage of infant deaths under CRS also gets corroborated from perceptible fall in the percentage of infant deaths to the total registered deaths for the years 2001 to 2010 as shown in Chart 28.





16.0 Still Birth Rate

16.1 The Still Birth Rate (SBR) is estimated as the ratio of number of still births per thousand live births and still births during the year. Statement 17 given below presents the still birth rate for the year 2010 for 21 States from where the figures on registered still births have been received. Among these States, Rajasthan (1), Nagaland (1) and Odisha (16) form the two extremes. Among the minor States, the highest level of still birth rate has been estimated for Meghalaya (14) and the lowest is also from North Eastern States Nagaland (1). The reporting of still birth for registration from domiciliary events is almost negligible and there is scope for the improvement in netting of still birth events.

Statement 17: STILL BIRTH RATE BASED ON REGISTERED VITAL EVENTS, 2010

India/ States/ Union Territories	Still Birth Rate	
	CRS	SRS
Total	**6**	**7**

17.0 Sex Ratio at Birth

17.1 The Sex Ratio (Number of females per thousand males) at birth is an important indicator to map the sex differential of the population at the beginning of their life. The sex ratio at birth has been calculated for different States/UTs for the year 2001 to 2010 and shown in the Statement 18.

Statement 18: Sex Ratio at Birth based on registered events, 2001-2010

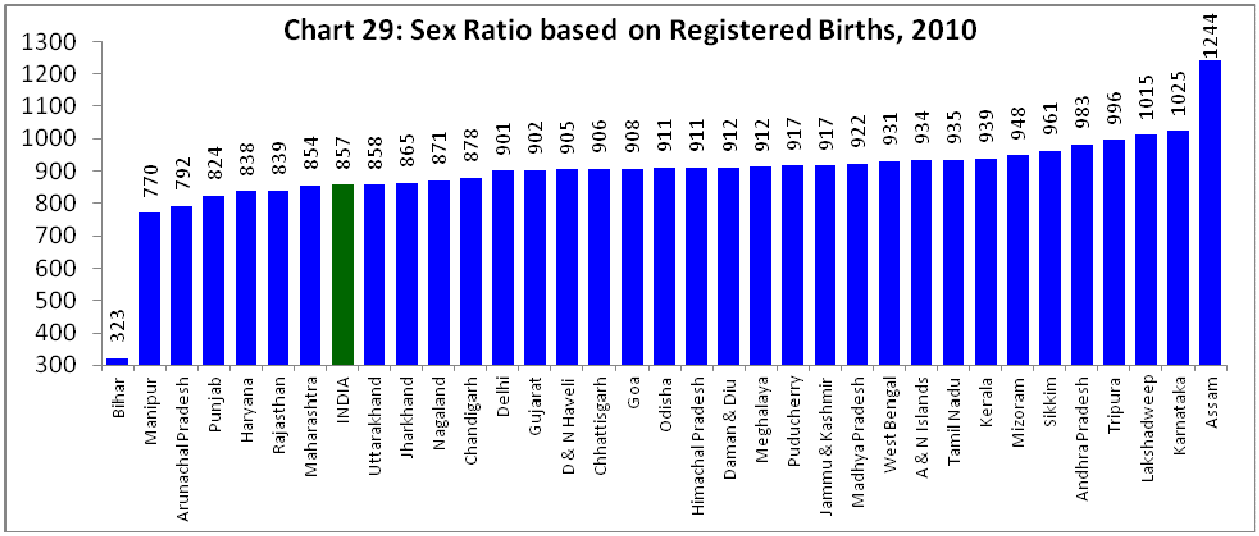
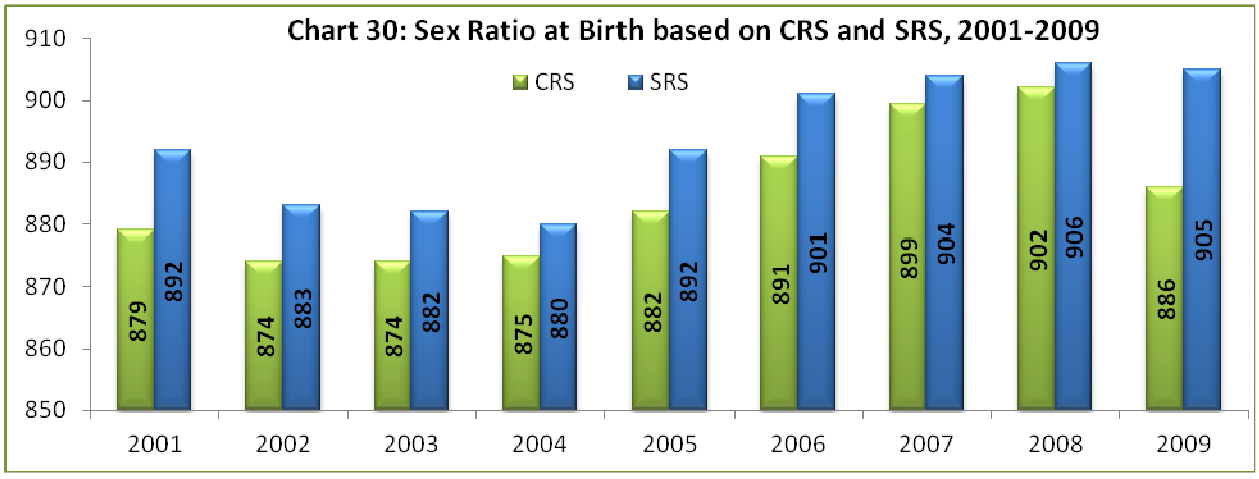
Note: n.a. – not available; n.r. – not reported.

17.2 It can be seen from the Chart 29 that the Sex Ratio at Birth based on registered events of Assam has shown the highest sex ratio which is due to better netting of female birth during 2010 and Bihar has shown the lowest during 2010. The sex ratio at birth at national level is 857 during 2010.The Sex Ratio at birth for the country ranges from 857 to 904 over the years 2001-2010. Downfall in the sex ratio at birth has been observed during 2010 which is due to less reporting of female registered births from some of the major the States namely Bihar, Punjab, Haryana, Rajasthan and Maharashtra where Sex Ratio at Birth based on CRS is less than the National. The sex ratio at birth has shown noticeable improvements in the States of Assam and Karnataka in 2010 as compared to 2009. Karnataka has the distinction of being the only major state reporting favorable sex ratio at birth in last so many years.

17.3 The sex ratio at birth could not be worked out for Uttar Pradesh for want of sex-wise disaggregated data on registered births for the year 2010. Non-reporting of gender-wise break up of registered events is another area where urgent attention is required.



17.4 In order to evaluate the performance of Civil Registration System on this front also, a comparison of sex ratio at birth based on registered births with that of from SRS by taking three years simple moving average for the years 2001-2009 has been done and the same is shown in Chart 30.



17.5 It can be seen from the above graph that the gap at the national level was narrowing down till 2009 but due to poor registration of females in majority of the bigger States, this has gone down during 2010. However, it may take few more years under the Civil Registration System to bridge the gap in Sex Ratio.

18.0 Registered Births & Deaths of Indian Nationals in Indian Missions/Post abroad

18.1 Statement 19 presents the number of registered births and deaths during 2010 of Indian Nationals in Indian Mission/Post abroad. These events of Indian citizens occurring abroad are registered by the respective Indian Consulates under the Citizenship Act, 1955.
